Commissioner Chessman suggested that it might be advisable to grant these people permission to construct its own building on the state's property as a temporary proposition if they will agree to keep it in good condition. It was his thought that the results of the trial would be valuable to the Commission in the establishment of a permanent policy with respect to such matters. The suggestion was approved by the Commission by unanimous vote subject to the condition that the privilege shall not extend for more than three years and that the permit be of a revocable nature. The Attorney was instructed to prepare a formal permit on such basis. The Engineer was instructed to give the matter some study and advise the Commission his recommendation with respect to the establishment of a permanent policy.

The Secretary presented a resolution from the Oregon State Grange for the construction of a new highway across the Cascade Range Mountains along the Clackamas River route. The Commission took no action in this matter.

The Commission approved a project agreement with the Public Roads Administration providing $2,500.00 of Federal funds to finance a survey of the Church-Lighthouse Section of the Cape Blanco Secondary Highway in Curry County, which it is proposed to construct as an access road project.

The Commission had under consideration the following requests for extensions of time within which to complete highway construction projects:

McNutt Brothers, Contract No. 2582, for grading and paving the Judkins Point Section of the Pacific Highway in Lane County, requested an extension of time from May 31, 1943 to July 31, 1944 within which to complete this job. They gave as their reasons for failure to complete this project within the specified time limit, extreme difficulty in obtaining labor, adverse weather conditions and extra work ordered by the Engineer. The Engineer advised that the reasons given by the contractor for the overrun of time limit are correct. Further, that while the State incurred extra expense for engineering supervision he did not believe that this should be charged against the contractor, because it was through no fault of the contractor that the work was delayed. He pointed out that the contractor was in direct competition with the largest lumber operators in the state for men to carry on the work, and despite the contractor's best efforts to secure labor, men could not be obtained and as a consequence the job lagged. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Chester T. Lackey, Contract No. 2622, for furnishing crushed materials in stock piles for the John Day Rock Production Project on the John Day, Beech Creek and John Day-Burns Highways in Grant County, requested an extension of time from August 31, 1943 to June 21, 1944, within which to complete this job. He attributed his failure to complete the project within the specified time limit to labor difficulties and

delay in securing repair parts for his equipment. The Engineer advised that labor troubles and plant breakdowns contributed largely to the failure of the Contractor to complete this project within the specified time limit. Further, that notwithstanding the poor progress of the work, the State was not inconvenienced by lack of material for oiling or plant patching. He recommended that the extension of time requested be granted without penalty, notwithstanding that the State incurred some extra expense for engineering supervisions. The Commission approved the recommendation unanimously.

R. O. Dail & Warren Bros., Inc., Contract No. 2635, for surfacing and oiling the Dallas-Fern Corner and Pedee-Wren Section of the Dallas-Kings Valley Secondary Highway, in Polk and Benton Counties, requested an extension of time from October 15, 1943 to July 10, 1944, within which to complete this project. They attributed their failure to complete the project within the specified time limit to labor difficulties, trouble in securing certain equipment and major breakdown of their plant. The Engineer advised that the contractor placed all of his surface rock on the road before it was necessary to close down operations during the winter season but could not complete the manufacture of the oiling rock although that and the maintenance rock were produced during the winter months. He gave as his opinion that the delay in completing the work, particularly the oiling, was beneficial to the road and for that reason recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

Clifford A. Dunn, Contract No. 2672, for grading and construction of bituminous macadam on the Klamath Falls Air Station Access Road in Klamath County, requested an extension of time of ten days, from June 30, 1944 to July 10, 1944, within which to complete this job. He attributed his failure to complete the project within the specified time limit to poor delivery of oil needed for surfacing and to car shortages. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are correct; that the contractor had no control over oil shipments. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Western Rock Company, Contract No. 2675, for resurfacing and production of rock for the Rhea Creek-Rock Creek Section of the Heppner-Spray Secondary Highway in Morrow County, requested an extension of time of ten days, from June 30 to July 10, 1944, within which to complete this job. They gave shortage of labor and difficulties in securing repair parts for their equipment as the reasons for their failure to complete the project within the specified time limit. The Engineer advised that the only real delay in the execu-

tion of the contract was in the setting up of a new portable plant that the contractor purchased for this job and which took longer to get into operation than was expected. The traveling public, he added, has not been inconvenienced by the delay and no extra expense for supervision was incurred by the State. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

In the discussion of the granting of extensions of time, the Attorney suggested that it would be advisable to make a careful check into the liability of the contractor's surety in the event the contractor defaulted after the time limit for completion of the contract had expired and before it had been extended, particularly if the bonding company should refuse to acknowledge liability for payment of claims incurred against the work in the meantime. The Commission indicated approval of the suggestion and instructed the Attorney to give the matter further study.

The Engineer reported that Contracts Nos. 2622, 2635, 2654, 2656, 2661, 2665, 2672, 2677, 2678, 2680, 2681, 2682, 2684, and 2691, for the construction of state highway projects, have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2622, with Chester T. Lackey, for furnishing crushed materials in stock piles for the John Day Section of the John Day, Beech Creek and John Day-Burns Highways, in Grant County; completed on June 21, 1944.

Contract No. 2635, with R. O. Dail & Warren Bros., Inc., for surfacing and oiling the Dallas-Fern Corner and Pedee-Wren Section of the Dallas-Kings Valley Secondary Highway, in Polk and Benton Counties; completed on July 10, 1944.

Contract No. 2654, with E. C. Hall Co., for furnishing crushed rock in stock piles for the Ashland-State Line Section of the Pacific Highway, in Jackson County; completed on June 29, 1944.

Contract No. 2656, with Oscar E. Joelson, for furnishing crushed material in stock piles for the Cold Springs Section of the Columbia River, Pendleton-Cold Springs and Hermiston Highways, in Umatilla County; completed on August 9, 1944.

Contract No. 2661, with R. O. Dail & Warren Bros., Inc., for furnishing crushed gravel in stock piles for the Hunter Creek-Lone Ranch Creek Section of the Oregon Coast Highway, in Curry County; completed on May 13, 1944.

SEP 12 1944

Contract No. 2665, with M. C. Lininger & Sons, for furnishing crushed rock in stock piles for the Umatilla County Line-Long Creek Section of the Pendleton-John Day Highway, in Grant County; completed on June 30, 1944.

Contract No. 2672, with Clifford A. Dunn, for grading and bituminous macadam surfacing on the Klamath Falls Air Station Access Road Project, in Klamath County; completed on July 10, 1944.

Contract No. 2677, with A. C. Suhre, for furnishing crushed material in stock piles for the Bend-Lava Butte Section of The Dalles-California and Central Oregon Highways in Deschutes County; completed on July 31, 1944.

Contract No. 2678, with T. W. Thomas, for furnishing crushed material in stock piles for the Juniper Ridge-Alkali Lake Section of the Lakeview-Burns Highway, in Harney and Lake Counties; completed on September 2, 1944.

Contract No. 2680, with T. W. Thomas, for furnishing crushed gravel in stock piles on the Valley Falls Section of the Fremont and Lakeview-Burns Highways, in Lake County; completed on July 18, 1944.

Contract No. 2681, with Warren Northwest, Inc., for paving the Crabtree Corner-Crabtree Creek Section of the Albany-Lyons Secondary Highway, in Linn County; completed on July 20, 1944.

Contract No. 2682, with Russell Olson, for reoiling the Owyhee River-McDermitt Section of the I. O. N. Highway, in Malheur County; completed on August 5, 1944.

Contract No. 2684, with Babler & Conley, for grading and surfacing the Lakeview Airfield Access Road Project, in Lake County; completed on August 8, 1944.

Contract No. 2691, with Babler & Conley, for oiling the Garibaldi-Tillamook Air Base Section of the Oregon Coast Highway, in Tillamook County; completed on July 19, 1944.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

SEP 12 1944

The Engineer reported difficulties in the securing of materials for repairing the Crooked River Bridge and the Deschutes River Bridge on the Culver-Grandview Market Road in Jefferson County, which work was authorized by the Commission on April 3, 1944, under agreement with the Jefferson County Court. He said that because of the circumstances it has been necessary to post the bridges for an 8-ton load limit until such time as the reinforcement work is completed. He asked the Commission to order such reduced load limit as a safety measure. The Commission approved the request and thereupon by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the road known as the Culver-Grandview Road is a county road in Jefferson County and is therefore a road under the jurisdiction of the County Court of said County; and

WHEREAS, a part of said road is within the boundaries of a state park, namely, The Cove State Park, over which members of the general public travel while entering and leaving said park area; and

WHEREAS, on said road there are two bridges, one over Crooked River located at mile post 6.0, and the other over the Deschutes River located at mile post 7.5; and

WHEREAS, the State Highway Engineer has advised the Commission that said bridges are in a condition of impairment which renders them unsafe for other than restricted load limits; and

WHEREAS, because of war emergencies the labor and materials necessary for the proper repair and reconditioning of said bridges are not available at this time; and

WHEREAS, because of said impaired condition of said bridges and the obligation imposed on the Commission to maintain said structures for park traffic and because of the lack of either materials or labor necessary for the rebuilding or reconditioning of said structures, it is the judgment of this Commission that restrictions and limitations as to loads should be established with respect to each of said bridges;

NOW, THEREFORE, the premises being as above stated, and the Highway Commission having as a result of due investigation found that the said bridge structures are incapable of safely sustaining and supporting a total gross load in excess of the total gross loads hereinafter specified, it is hereby ordered that the total gross weight of combined load and vehicle which at any one time shall be permitted on any single or individual span of either of said bridge structures shall not exceed the limits given and set forth hereinbelow. In computing the total weight of any single vehicle within the meaning of this resolution, the total gross weight of any trailer or trailers attached to said vehicles shall be considered as a component part of the total gross load and shall not be considered as a separate vehicle. The combined gross weight thus deteremined shall not exceed the following limits:

CULVER-GRANDVIEW COUNTY ROAD, JEFFERSON COUNTY

Mile Post 6.0	Crooked River Bridge	8 tons
Mile Post 7.5	Deschutes River Bridge	8 tons

IT IS FURTHER ORDERED, that these rules, regulations and restrictions shall be in full force and effect with respect to said bridges until rescinded, modified or revoked by order of the State Highway Commission.

IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named bridge structures, so that said notice can be readily seen and read, which notice shall state plainly the limitations and prohibitions of the traffic hereby in this order determined and fixed.

AND IT IS FURTHER ORDERED, that a certified copy of this resolution be furnished the County Clerk of Jefferson County, in which county the said bridge structures are located, and the Superintendent of the Department of State Police for his information.

The Secretary presented a letter from the City of Ontario requesting the installation of a flashing beacon at the intersection of Oregon and S. W. Fourth Avenues in Ontario. The Engineer advised that this intersection is on the main thoroughfare where highway traffic makes a right-angle turn, and in his estimation the installation is justified. He estimated the cost involved at $250 and recommended approval of the request subject to the condition that the City will pay for the electrical energy required to operate the light. The Commission approved the recommendation.

The Commission confirmed its telephonic approval heretofore granted authorizing the taking of bids for the purchase of fallen timber in Joaquin Miller State Park adjacent to the Oregon Coast Highway at Glenada, Lane County. In this connection, the Engineer advised that the sale was advertised for bids to be received in his office at 2:00 p. m. on August 15, but apparently no one was interested because no bids were submitted. He requested authority to negotiate the private sale of the timber. The request was approved by the Commission by unanimous vote.

The matter of designating the Yamhill-Newberg Secondary Highway a "through highway" within the city limits of Newberg, had the attention of the Commission. The Engineer advised that the highway carries a considerable volume of traffic and in his estimation it would be advisable from a safety standpoint to require traffic to stop before entering the same, and he so recommended. After discussion, the Commission approved the recommendation and thereupon by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, pursuant to resolution duly and regularly adopted by the Highway Commission and entered in the minutes and records of the Commission as of the twenty-seventh day of April, 1943, the Highway Commission declared certain highways to be "through highways" under the provisions of Section 115-351, O.C.L.A., and directed the State Highway Engineer to erect and maintain along the said enumerated highways or sections of highways at all points where streets or roads intersect or enter said highway or sections of highway, except at such points as are specifically noted in said resolution, signs or markers notifying drivers of vehicles to stop before entering or crossing the designated through highways; and

WHEREAS, when said resolution was adopted it was the purpose and intent of the Highway Commission to add to said list of designated highways such other state highways as in the judgment of the Commission should be declared to be through highways within the meaning of the said law; and

WHEREAS, an investigation of the portion of Main Street and the portion of Illinois Street in the City of Newberg over which state highway traffic is routed discloses that the type, character and volume of traffic using said street warrants its designation as a through highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS ORDERED that the resolution adopted by the Highway Commission under date of April 27, 1943, under the authority and provisions of Section 115-351, O.C.L.A., be and the same hereby is amended by adding thereto the following section of Illinois Street and the following section of Main Street in the City of Newberg, to-wit:

> Beginning at a point on Illinois Street where said street intersects the west city boundary, thence in a southeasterly and easterly direction on Illinois Street to its intersection with Main Street, thence southerly on Main Street to the Pacific Highway West at First Street.

That traffic entering and leaving the City of Newberg over the Yamhill-Newberg Secondary Highway No. 151 is sufficient in type, character and volume to warrant the designation of said sections of said streets as a part of a through route.

That the State Highway Engineer be and he hereby is directed to erect and maintain on said designated through-highway streets appropriate signs and markers conforming in all respects with the instructions given in said resolution adopted by the Commission on the twenty-seventh day of April, 1943.

There is attached hereto and made a part hereof a map on which is shown colored in red the sections of the streets of Newberg which by this resolution are declared to be a part of a through highway.*

SEP 12 1944

*Map filed in "Through Highways" file - No. 6, with resolution.

That this resolution shall be deemed to amend the said resolution adopted April 27, 1943, by adding thereto the sections of streets defined or described herein.

That this resolution be entered in the minutes and records of the Commission as of the 12th day of September, 1944, and a duly certified copy thereof delivered to the Public Roads Administration, to the County Court of Yamhill County and the Mayor of the City of Newberg.

The Commission had under discussion the adoption of a resolution authorizing truck and trailer combination movements 60 feet over-all in length on the Oregon Coast Highway from Coquille south to the Oregon-California state line and along the entire Coos Bay-Roseburg Highway between Pacific Highway Junction, south of Roseburg, and a junction with the Oregon Coast Highway, in Coquille. The Engineer recommended the granting of such permits if the movements are properly flagged for the protection of other highway traffic, so as to facilitate the movement of livestock from Curry County to California. He advised that from authentic information available an emergency exists; moreover, the emergency is recognized by the Honorable Earl Snell, Governor of Oregon, who has approved the granting of such permits if the Commission considers it advisable. After discussion, the Commission authorized the Secretary to issue such permits under the conditions mentioned by the Engineer. The following resolution with regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, this Commission has heretofore given due consideration to the transportation needs of the State and Nation, which transportation problems have become acute because of war emergencies, and for the purpose of contributing at least a measure of relief, this Commission on the twenty-fifth day of June, 1942, adopted a resolution in which the Commission declared the policy of the Highway Department with respect to the use of state highways for the movement thereover of motor vehicles having a length and a combined weight in excess of the statutory limits; and

WHEREAS, this Commission recognizes that an emergency continues to exist in the transportation systems of the State, both with respect to transportation by rail and by motor, resulting in a loss to producers of food and other essential commodities; and

WHEREAS, for the purpose of further cooperating with the Federal authorities for national defense this Commission by said resolution, but without specific statutory authority, authorized the issuance of permits for the movement over public highways under certain specific and express conditions of motor

vehicles greater in length and heavier in combined weight than is authorized by the laws of the State; and

WHEREAS, the legislature of the State of Oregon, sitting in its 1943 session, enacted Chapter 266, Oregon Laws, 1943, by which the Commission is now vested with authority, with the approval of the Governor, to "*** permit the movement over state highways of vehicles, or combination of vehicles, having a length and combined and gross weight in excess of all statutory limitations."

WHEREAS, pursuant to instructions given by this Commission the State Highway Engineer has made or has caused to be made an inspection and an engineering study of certain state highways, and, based upon such study and inspection, the Engineer has determined the maximum combined and gross weight and the maximum length of vehicle which, in his opinion, said highways will accommodate, giving due regard to the stability and preservation of the highway and the safety and welfare of the general public; and

WHEREAS, after due consideration, it is the judgment of this Commission that provision should be made whereby vehicles, or combination of vehicles, having a length and combined and gross weight in excess of all statutory limitations but not in excess of the limitations fixed by this Commission should be permitted to move over state highways;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the resolution heretofore, to wit: On the twenty-fifth day of June, 1942, adopted by this Commission shall be and the same hereby is re-adopted and all permits heretofore issued thereunder hereby are ratified and affirmed.

2. That the highways enumerated and designated in said resolution are by this reference made a part of this resolution to the same effect and with full recognition as though expressly written or copied herein.

3. That permits hereby are authorized for the movement over any of said highways or sections thereof of vehicles or combination of vehicles having a length and a combined and gross weight in excess of all statutory limitations but not in excess of the limits fixed in the form of permit provided for in this resolution.

4. That there shall be and hereby is added to the list of highways designated and provided for in said resolution of June 25, 1942, the following highways, to wit: The Oregon Coast Highway from Coquille south to the Oregon-California state line, and the entire Coos Bay-Roseburg Highway; provided, however, that permits issued for the movement of

vehicles over the said Coos Bay-Roseburg Highway and the said section of the Oregon Coast Highway shall, in addition to the provisions, limitations, and conditions contained in said standard permit, contain the provision that on all sections of either of said highways where the vehicle described and defined in the permit cannot keep on its own side of the yellow dividing line flagmen shall precede the vehicle.

5. The form of permit which for identification purposes is marked Form 242 Revised-3M-9-43 shall be and the same hereby is approved and adopted as the form of permit to be used for all operations by motor truck within the meaning and purpose of this resolution, subject, however, to the provision with respect to flagmen for movements over the Coos Bay-Roseburg Highway and the Coquille-Oregon-California state line section of the Oregon Coast Highway.

6. H. B. Glaisyer, Secretary to the Commission, be and he hereby is authorized to issue permits under the terms of this resolution and in the name of the Commission to any and all applicants whose equipment and loads have been approved by the State Highway Engineer.

7. Any permit issued pursuant to the provisions of this resolution may be cancelled and terminated by the Commission at any time for cause, or when in the opinion of the Commission the cancellation and termination of such permit is required in the interests of the general public.

8. Each permit issued pursuant to this resolution shall terminate on a date fixed therein, but in any event shall terminate as provided in Chapter 266, Oregon Laws, 1943; provided, however, that permits issued for the movement of vehicles over the Coos Bay-Roseburg Highway and the Coquille- Oregon-California state line section of the Oregon Coast Highway shall be in effect for the lamb market season of 1944 only.

9. This resolution shall be entered in the minutes and records of the Commission as of July 12, 1944, and shall be effective from and after said date until modified, rescinded or otherwise changed by the Commission.

The following statement appears on the "office copy" of the above resolution:

"Within the meaning and purpose of Chapter 266, Oregon Laws, 1943, I hereby approve the action of the Oregon State Highway Com-

mission as evidenced in and disclosed by the foregoing resolution.

Dated this 30th day of August, 1944.

Earl Snell,
Governor of Oregon."

In the discussion of the matter, the Commission considered it advisable, if the expense is not too great, to widen and otherwise improve the several points on the highways under discussion sufficiently to enable truck-trailer combinations 60 feet long to move thereover without encroaching on the opposite lane of travel, thus eliminating the necessity of flagmen. The Engineer was instructed to investigate the matter and to report back the cost to improve these few points in such manner.

The Engineer reported a violation by logging operators in the employ of the C. K. Spaulding Logging Company. He advised that on August 19, 1944, state weighmasters were weighing logging trucks on Highway 191 south of Dallas, with portable scales, and that between 1:15 and 1:30 p. m. on that day several trucks were lined up to be weighed. He also said that a Mr. Barnes, superintendent of the Spaulding operations, was present and requested that some of his trucks be allowed to proceed without weighing because he did not believe that they were overloaded. The request was denied by the weighmasters, whereupon Mr. Barnes instructed his drivers to by-pass the scales, which they did, thus committing a violation of the requirements. The Engineer gave as his thought that the offense is serious enough to justify drastic action and suggested that it be called to the attention of the officials of the company and that the company be warned that, unless they show a greater respect for the requirements, the State Highway Commission will take drastic action to force them to do so. The Commission approved this suggestion subject to the condition that the Highway Department representatives should contact the highest official of the company, who is to be informed that the Commission will take such drastic action if the offense is repeated, although it is reluctant to go to that extreme unless it is absolutely necessary.

The Commission discussed a request from A. C. Pierce, President of the Pierce Auto Freight Lines, Inc., for a permit authorizing the movement of a combination of equipment consisting of truck-tractor and two semi-trailers, commonly known as "jeep-tractor" equipment, carrying a gross load of 68,000 pounds. The Engineer advised that he has checked into this matter and in his estimation, to all interests and purposes, the combination is the same as a tandem axle truck-tractor with tandem axle trailer, which, according to the provisions of the Highway Commission's emergency transportation permits covering Group 1 highways, is limited to a gross load of 61,500 pounds. He recommended that Mr. Pierce's request be denied because of the damaging effect that the heavier load would have on the highway surfaces and bridges. After discussion, motion was made by Commissioner Chessman that the request be denied. The motion was seconded by Commissioner Schaupp and carried by the unanimous vote of the Commission.

The Commission had under discussion a request from the United States Bureau of Reclamation for permission to construct three irrigation pipes across the Vale-West Secondary Highway No. 451 in Malheur County, and a proposed agreement between the United States of America and the Highway Commission covering the matter. The Engineer advised that there are no objections to the three installations across the highway, but he does object to certain provisions of the proposed agreement, particularly the paragraph which requires the State to reimburse the Federal Government for certain expense. This clause, he said, is based on an act of Congress dated August 30, 1890, wherein the United States reserves in the issue of land patents rights of way thereover and the privilege of constructing roads, canals, etc., and a blanket right to cross over patented lands any place desired. The Attorney explained this feature of the law and advised that the decisions of the courts are all in favor of the Federal Government. The Engineer suggested that an attempt should be made to secure release from payment of any part of the cost, and, if unsuccessful, then the State might offer to pay one-half of the expense. The matter was discussed at considerable length, and as a result thereof, the Commission authorized the payment of the 50 per cent of the cost of constructing such pipe lines across the highway right of way in the event that it is impossible to secure full release. The Engineer was instructed to take the matter up with the Reclamation Service by telephone.

In this connection, the Engineer advised that a similar situation obtains with respect to a Reclamation Service culvert which crosses the Old Oregon Trail near the Town of Nyssa. In this instance, he said, the Reclamation Service desires to lower an existing concrete culvert which was originally constructed by either Malheur County or the Reclamation Service prior to the construction of the highway. It was his thought that inasmuch as the water grade has been fixed for 25 years or more, the expense of changing it across the highway should be paid by those who benefit rather than by the State, as the Reclamation Service has requested. He was instructed by the Commission to handle this case in the same manner as the other one.

The Engineer requested authority to purchase one Holland truck loader at a cost of $200 for use in connection with maintenance work. The purchase was approved by the Commission by unanimous vote.

The Engineer requested authority for Bridge Engineer G. S. Paxson to make an inspection trip in northern California at state expense. He advised that Mr. Paxson would accompany C. B. McCullough, Assistant State Highway Engineer, whose expenses will be paid by the Federal Government, and that they will travel by automobile so that Mr. Paxson's out-of-state expense will be kept to a minimum of about $40 or $50. The Commission approved the expenditure. The Engineer also requested authority for Acting Traffic Engineer F. B. Crandall to attend, at state expense, a meeting of the Institute of Traffic Engineers and National Safety Congress, which is to be held in Chicago, October 1 to 5, 1944. He estimated the cost at about $200 and ad-

vised that it is quite important that Mr. Crandall attend this meeting inasmuch as the information that he will obtain will be of great value to him in connection with his highway planning. The Commission approved the expenditure subject to concurrence by Governor Snell. The Commission also approved out-of-state travel expense of Oscar Cutler, Acting Director of the Travel and Information Department, in attending a meeting of the Western Conference on Postwar Problems, which is to be held soon in Salt Lake City. The Engineer advised that this is a meeting of the highway travel organizations of several of the northwestern states and that he considers it important that Mr. Cutler be in attendance to obtain information that will be of value in connection with highway travel in Oregon. He estimated the cost involved at about $75. The Commission approved the expenditure subject to concurrence by Governor Snell.

The Attorney requested instructions whether or not to take action to collect the cost of repairing the Pudding River bridge at Aurora which was damaged in an automobile accident on May 2, 1944. He explained that two brothers were involved in the accident, which occurred late at night when both boys were really too sleepy to drive a car, and it so happens that the driver actually did go to sleep and as a result the car careened into the bridge railing killing one of the boys. He gave as his opinion that the Commission could not recover damages by court action because it would be difficult to prove negligence on the part of the boys, and recommended that the claim be not pressed. The Commission approved the recommendation.

A letter was presented from the Coos Bay Lumber Company, requesting permission to obtain 15,000 cubic yards of rock from a state-owned quarry in Coos County to surface a logging road. The Engineer explained that the policy established by the former Highway Commission will not permit the granting of such privileges to private parties, such privileges being limited to county courts, municipalities, and the Federal Government. He recommended a continuation of this policy. The Commission approved the recommendation unanimously, however, instructed the Engineer to investigate the quarry in question and if it is no longer needed by the State, then to offer it for sale to the Coos Bay Lumber Company.

The Commission had under discussion the setting of a date for its next regular meeting and decided by unanimous vote to hold it in Portland on Monday afternoon, October 23, and all day Tuesday, October 24, 1944. The Secretary was instructed to make the usual arrangements to hold the meeting in the Stock Exchange Room of the Imperial Hotel.

The meeting adjourned at 10:30 a. m.

Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

SEP 12 1944

12151

Burns, Oregon, September 12, 1944.

The members of the State Highway Commission and its party were luncheon guests of the Burns Chamber of Commerce, in the Arrowhead Hotel, following which, at 1:00 p. m., the Commission discussed briefly with the local group matters of mutual interest. Present at such meeting were the following:

T. H. Banfield, Chairman,
A. W. Schaupp, Commissioner,
M. R. Chessman, Commissioner,
R. H. Baldock, State Highway Engineer,
J. M. Devers, Attorney,
H. B. Glaisyer, Secretary.

Members of the Chamber of Commerce present were: W. G. Shepard, Vice President, who presided; C. M. McConnell; County Judge Nelson B. Higgs; D. C. Jordan, Secretary; James Appling, County Agent; Archie McGowan; LaVern Gray; W. C. Carroll, County Clerk; M. O. Timms; Chester Felt; R. E. Kriesien, City Attorney; P. Skiens; James Smith; E. B. Bennett; F. K. Mc Cullough; L. R. Swarthout; Don Willmarth; Tom Wentz; Dr. K. E. Hibbard; M. H. Kuncan and Dr. B. M. Smith.

Following introductions, Mr. Shepard called upon Mr. McConnell for remarks. Mr. McConnell spoke briefly in behalf of the Warm Springs Highway and for the further improvement of the secondary highway between Princeton and Rome. Judge Higgs also endorsed the Rome-Princeton Highway improvement.

Chairman Banfield responded by stating that the primary purpose of the Commission's trip is to inspect highway maintenance and construction work now under way on the I.O.H. Highway. He further advised that the Commission is formulating plans for postwar improvements, but has not as yet adopted a definite program because of uncertainty with respect to funds that will be available to finance the work. Such uncertainty, he said, will not be expelled until the Congress has adopted postwar construction legislation, in view of which the Commission is making no promises whatsoever at this time with respect to any project wherever situate.

The meeting adjourned at 1:30 p. m., following which the Commission motored to Jordan Valley via the Princeton-Rome Secondary Highway.

T H Banfield

SEP 12 1944

Jordan Valley, Oregon, September 12, 1944.

The State Highway Commission and party were guests of local business men at dinner in the Marquina Hotel. There followed an informal meeting with Dr. W. W. Jones presiding. Representing the State Highway Commission were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary.

Visitors included a delegation representing the Boise, Idaho Chamber of Commerce, which included: Laurel Elan, Attorney, President of Chamber of Commerce; Ike Wescott, State Fish and Game Commissioner; Don Whitehead, Druggist; Ned Harland, Secretary; Harry Yost, Postmaster; Art Lyons, Winnemucca States; and Clyde Humphreys of the Morrison-Knudson Company, Contractors. The local group included Dr. W. W. Jones, Domingo Yturri, Jake Long, Jenoro Rementaria, Hugh Scott and Pete Laca.

Brief talks were made by the members of the Highway Commission, Chairman Banfield explaining that the purpose of the Commission's trip is to inspect highway maintenance and construction work on the I.O.N. Highway. Members of the Boise delegation expressed appreciation for the I.O.N. Highway improvement.

The meeting adjourned at 8:40 p. m.

T H Banfield
Chairman

State Highway Engineer

Secretary

M R Chessman
Commissioner

Ontario, Oregon, September 13, 1944.

Following an overnight stop at Jordan Valley, the State Highway Commission motored to Ontario where at 10:15 a.m. a conference was held in the City Hall with a delegation from Adrian and Ontario who urged the Commission to improve the Oregon section of the secondary state highway (Homedale Spur) which extends from Adrian to Homedale, Idaho. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary.

SEP 12 1944

The Adrian Chamber of Commerce was represented by Harold Patch, President, and Claude Euchus. The Ontario Commercial Club was represented by W. R. Hollingsworth, President; E. C. Van Petten; H. F. Logue; H. C. Peterson; H. C. Boyer and J. R. Richardson.

Mr. Patch stated that they have no criticism to offer with regard to the existing rock surface on this road, but they are very anxious to have the road oiled. Mr. Van Petten endorsed Mr. Patch's remarks and added that they would like to have the work done just as early as possible. He pointed out that the road is now oiled between Adrian and Nyssa and declared that there remains only about 9½ miles of oiling to be done between Adrian and the state line. He urged the improvement as a most desirable project, because they are extremely anxious for a highway leading south to a connection with the I.O.N. Highway. He gave as his thought that this job could be classified as an extension of an old project and not a new one, which possibly would make it eligible for Federal funds. He concluded his remarks by saying that they are not asking for a special favor but only consideration of their project by the Commission.

The Engineer advised that the hands of the State Highway Commission are tied so far as projects of this kind are concerned, because of the requirements of the War Production Board, which has limited expenditures to maintenance work and access road projects that are of importance in connection with the war effort. He advised that there is no argument but what the road needs an oiled surface and gave as his thought that the Commission would consider the project as soon as funds are available to finance it and oil can be obtained. He estimated the cost to do a proper oiling job at $100,000. In reply to Mr. Van Petten's statement that the project could be considered an extension of an old one, the Engineer stated that the Federal Government considers as new construction the changing over of a rock surface to an oiled surface, which is the category of this road. The statement was endorsed by Mr. T. M. Davis, Senior Highway Engineer, Public Roads Administration, who was present.

Chairman Banfield advised that the Highway Commission has made no commitments whatsoever concerning its postwar construction program, but is now studying the matter from a state-wide standpoint and in that study intends to give all projects fair consideration. He added that the Commission is interested in the Adrian-Homedale Road and is sympathetic with the improvement thereof as with others, but under the present set-up it is not possible to do the work now.

The meeting adjourned at 10:30 a. m., following which the Commission motored to Baker, where the Commission and party were luncheon guests of the Baker Chamber of Commerce in the Baker Hotel; all members of the Commission, the Engineer, the Attorney and the Secretary being present. Following the luncheon, at 1:30 p. m., brief remarks were made by members of the Commission and others who were present. Mr. Lynn Vermillion, Chairman of the Highway Committee of the Chamber of Commerce, presided. The local group included the following: George Scott, President; Lynn Vermillion, Chairman, Roads Committee; Leo Adler, Chairman of the Entertainment Committee; James T.

Donald, Attorney, Director; Earl Hoget, Director; Henry McKinney, Director and Mayor of Baker; Honorable R. C. Frisbie, State Representative; William Smith, Director and City Commissioner; W. S. Hughes, City Commissioner; Henry Milton, City Engineer; Charles Simpson, Forest Supervisor; Otto Karg, Fire Chief; Blaine Hallock, Attorney; Al Schroeder; Carl Waltz; County Judge Charles E. Baird; County Commissioner R. M. Phipps; County Commissioner George B. Saunders; Mrs. Margaret Slocum, Secretary of the Chamber of Commerce.

Chairman Banfield explained that the purpose of the Commission's trip is primarily to inspect highway maintenance and the I.O.N. Highway construction. He also outlined briefly the prospects of securing Federal funds to finance postwar construction and advised that until it is known how much money Oregon is to receive, the Commission cannot arrange a program so is making no promises now with respect to any project. Commissioner Chessman advised that as a result of the Commission's canvass of the state last year, projects totaling $300,000,000 were presented to the Commission for consideration. The Commission, he said, cannot possibly finance a program of such size with the $40,000,000 or $50,000,000 that it anticipates may be available so it is going to be necessary to delete and eliminate a lot of projects that may have merit. Commissioner Schaupp endorsed the remarks of Chairman Banfield and Commissioner Chessman. Mayor McKinney and Representative Frisbie made brief remarks in behalf of the local group as did also County Judge Baird. Judge Baird particularly urged the elimination of the railroad grade crossing on Dewey Avenue, Baker, where the Baker-Unity Highway crosses the main line tracks of the O.W.R.&N. Railroad. He urged the improvement from the standpoint of safeguarding several large lumber mills which are located on the south side of the railroad and which could not be served by the City's fire department in case of fire if Dewey Avenue were blocked by a train, which frequently occurs. The separation of the railroad and highway grade, he added, would eliminate any possibility of such an occurrence.

Judge Baird also spoke for the improvement of the Sumpter Valley Secondary Highway and suggested that the State purchase the old railroad grade of the Sumpter Valley Railroad, which he thought could be used to advantage as a highway grade between Baker and Austin as was done between Robinette and Homestead.

The meeting adjourned at 2:00 p. m., following which the Commission inspected the proposed Dewey Avenue grade separation project and the Sumpter Valley Secondary Highway in company with members of the County Court and Mayor McKinney.

En route Baker to Sumpter, the Commission disposed of the following routine matters, all members of the Commission, the State Highway Engineer, the Assistant Attorney, J. W. DeSouza, and the Secretary being present.

The Assistant Attorney requested authority to acquire certain parcels of real property that are needed for various state highway im-

provements throughout the state. He submitted a list of such properties together with offers that he recommended be made in connection with each. After careful consideration of each item, the Commission approved the request and thereupon by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed;

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

*With respect to the wayside strip acquisition along the Lakeview Section of the Klamath Falls-Lakeview Highway, the Assistant Attorney advisdd that there is a possibility that some of the properties can be acquired without cost through an exchange of forest lands, and that the State Parks Superintendent is now negotiating with the U. S. Forest Service to that end. In view of this information, the Commission decided not to complete the purchase of these tracts until the outcome of the negotiations is known. In the event the exchange does not materialize, then such properties are to be acquired by purchase at prices mentioned in this resolution.

The Assistant Attorney also requested authority to institute condemnation proceedings to acquire certain properties that are needed as right of way for the Wolf Creek Highway in Washington County. He submitted a list of such properties and offers that he recommended in condemnation, as follows:

Vadis-Gardner Ranch Section of the Wolf Creek Highway

File 6555-A	Zurcher Bros.	$11,500.00

Gardner Ranch-Berger Ranch Section of Wolf Creek Highway

File 6513	Dora Scoggins and Ida Scoggins	$ 1,250.00
File 6503	Arnold Berger	11,000.00
File 6506	Albert L. Croeni and Rose Croeni	4,500.00
File 6507	John C. Bechen	7,500.00
File 6510	John Berger and Elise Berger	4,250.00
File 6511	Walter F. Stucki	15,000.00
File 6512	Rosa Berger	2,750.00
File 10255	Reinhold Hoffman	5,000.00

Berger Ranch-Barnes Road Section of Wolf Creek Highway

File 10256	Minnie C. Morgan	1,500.00

After careful consideration of each item, the Commission approved the request and recommended offers and thereupon by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access for abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites,patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways or for any other purpose designated by the United States; and

WHEREAS, by official act of the State Highway Commission there has been located and established a state highway which is known as the Wolf Creek Highway and otherwise designated as State Highway No. 47; and

WHEREAS said highway between the Davies Overcrossing in Washington County and the westerly terminus of said highway in Clatsop County has been constructed, but the easterly section of said highway which begins at the said Davies Overcrossing and terminates at the Multnomah County line is not yet completely constructed; and

WHEREAS, in connection with and for the completion of said highway it is necessary that real properties be acquired for right of way and other purposes; and

WHEREAS, on the third day of April, 1941, the Highway Commission adopted a resolution by which, among other things, the Commission found, declared and therefore authorized that for the purpose of making possible a highway adequate for the needs of the traveling

public there should be acquired in addition to the necessary rights of way all right of access to said highway except at such places as might be agreed upon by the Highway Commission and the property owners; and

WHEREAS, the Commission does now find and declare that the real properties hereinafter described are required and are necessary for use in connection with the permanent construction, improvement and maintenance of said highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare that the parcels of real property hereinafter described are each and all necessary and needed for and in connection with the construction of the said Wolf Creek Highway between Davies Overcrossing and the Multnomah County line. The properties, the acquisition of which hereby is authorized and ordered, and the names of the owners thereof are shown on the sheets attached hereto and by this reference made a part of this resolution, which said sheets for identification purposes bear the date of September 13, 1944, and the signature of H. B. Glaisyer, Secretary of the Oregon State Highway Commission.*

2. The Commission does further find and declare that in addition to the acquisition of the real properties described on the attached sheets it is necessary in order to make possible the proper construction and maintenance of a highway thereover that there be acquired all rights of access from abutting properties to the said parcels of real property and the highway which is to be constructed thereover.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested, authorized and directed to attempt to agree with the owner or owners or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and is authorized and directed to acquire, in addition to title to the said described parcels of land, all rights of access thereto, and in the event that no satisfac-

tory agreement or agreements can be reached, then it is hereby further ordered that the said J. M. Devers, as Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property, and all rights of access thereto except at such points or places as may be agreed upon by the respective owner or owners and the State Highway Commission.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties or any of them or any interest therein, the said J. M. Devers, as Chief Counsel to the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission and/or the defendant property owners.

6. This resolution shall be entered in full in the minutes and records of the Commission.

*(The detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 46, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

The Assistant Attorney reported the results of his inspection of the proposed state park in the John Day Highway fossil bed area in company with the State Parks Superintendent, S. H. Boardman. He advised that Mr. Boardman and he inspected this area very carefully and selected certain properties that they consider should be included in this park. The properties chosen, he said, total some 2,952 acres, which, together with 1601 acres now owned by the State, will provide a park of 4,553 acres. He further stated that the land is valuable principally for grazing purposes, which brings up the question of acquisition of the grazing rights. He estimated the average value of the land, including grazing rights, at $2.50 per acre; however, pointed out that the grazing privileges in this locality now rent at a rate of one cent per acre per year. He suggested that it would be advisable to purchase both the land and the grazing privileges and then offer to lease the grazing rights to the former owners for a limited period. In the discussion that followed, the Assistant Attorney advised that the initial expense of acquisition would amount to

about $3,000, but the State will have to pay the Government an additional amount later on for government-owned lands that are included. He estimated the total cost involved at $5,120. The Commission decided unanimously to purchase both land and grazing privileges. The Assistant Attorney was authorized to secure options on such basis with the understanding that $2.50 per acre is the maximum amount that the State will pay for both land and grazing privileges, and that the total amount to be paid for the entire acreage shall not exceed the amount set up in the 1944 budget for acquisition of this park. The former owners of the land may be given first refusal of the grazing rights for a limited period, not to exceed five years, at the prevailing rate.

The Commission discussed a report from the Assistant Attorney on the results of his investigation of the request of Mr. H. R. Litel, Portland, to acquire certain state-owned property adjacent to McLaughlin Boulevard in Portland, described as portions of Lots 4, 5, and 6 of Block 5, Riverside Homestead Addition. He advised that Mr. Litel has been maintaining some chicken pens on a portion of this property and the inquiry reveals that he does not wish to purchase the land but that his principal interest is in being allowed to continue to use this state property for chicken-raising purposes. He suggested that the property be not sold to Mr. Litel but that Mr. Litel be given a revocable permit to use the property for the balance of the year. The Commission approved the recommendation.

The Assistant Attorney presented an offer from M. F. Fry to purchase an old state-owned gravel pit situate adjacent to the Sunnyside-Umapine Secondary Highway in Umatilla County. He advised that the pit is exhausted and is of no further value to the State and that Mr. Fry has offered to pay $150 for it. He recommended acceptance of this offer. The Commission approved the recommendation.

He also presented for consideration by the Commission the offer of Mr. Louis Schmidt to pay $80.00 for an old service station building acquired by the Commission in connection with a right of way transaction on the Wolf Creek Highway. The Assistant Attorney advised that this is a small, dilapidated building of no value and, in his estimation, the Commission is fortunate to secure an offer of any kind. He recommended acceptance of Mr. Schmidt's offer. The Commission approved the recommendation.

The Commission confirmed the telephonic approval given the Assistant Attorney on August 14 to purchase for the sum of $1200, certain property owned by C. C. Smith, which is needed in connection with the Seaside-Hug Point Section of the Oregon Coast Highway. Advance approval was necessary in order to obtain the property before the expiration of the option period.

The Commission declared the meeting adjourned at 3:10 p. m. upon arrival in the Town of Sumpter, where the Commission conferred briefly with the following local residents: F. L. Wilson, Rancher, R. D. Shelley, Manager

of the Sumpter Dredging Company; W. R. Hawley, Rancher; Brooks Hawley, Rancher; Albert DeFreese, Rancher, Glen Howard, Manager of the Light and Water Company.

T H Banfield
Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

LaGrande, Oregon, September 13, 1944.

The State Highway Commission and party were dinner guests of the LaGrande Chamber of Commerce, at the Country Club, following which at 8:15 p. m. a brief informal meeting was held. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary.

The local group included the following: R. L. Gray, President of the Chamber of Commerce, the Local Manager, Eastern Oregon Light & Power Co.; A. K. Parker, Manager, First National Bank; W. C. Perkins, Automobile Dealer; H. V. Leffell, Manager, J. C. Penney Co.; August J. Stange, President, Mt. Emily Lumber Company; F. E. Lanzer, Sales Manager, Mt. Emily Lumber Company; Hon. R. J. Green, Circuit Judge; Fred Spaeth, Plumbing Contractor; F. E. Kiddle, President, Pioneer Flouring Mills; Victor Eckley, Postmaster; T. B. Lumsden, Manager, U. S. National Bank; Colon R. Eberhard, Attorney; Frank Schiro, Publisher, LaGrande Evening Observer; C. J. Shorb, Publisher, Eastern Oregon Review; C. H. Reynolds, Insurance, and President, Oregon Trail Association; J. L. Sinden, City Commissioner; B. A. VanWormer, City Commissioner; T. H. Gaither, City Commissioner; all from LaGrande; C. Kenneth McCormick, County Judge; Chris Johnson, Commissioner; William L. Condit, Commissioner, representing the Union County Court; C. I. Hess, Automobile Dealer, and L. H. Bramwell, Manager, First National Bank, from the Town of Union; Glen Sands and Roy Baker, Farmers, from the Town of Cove; Jesse Crum, Attorney; Arthur Hallgarth; F. S. Emery, Manager, Pondosa Pine Lumber Company; J. W. Fitzgerald, Office Manager, Pondosa Pine Lumber Company; and Fred Guthery, Owner, Elgin Recorder, from the Town of Elgin.

SEP 13 1944

Mr. Reynolds presided. Mr. Kiddle welcomed the Highway group. Chairman Banfield explained that the purpose of the Commission's trip is to inspect highway maintenance and the I.O.N. Highway construction. He also outlined briefly the status of the postwar highway construction bill that is now pending in the Congress and advised that until the bill passes and the Commission knows how much money Oregon is to receive, a construction program cannot be arranged; but that will be done as soon as such information is available, and at that time the Commission will make a selection of projects to the best of its ability, giving fair consideration to all parts of the State. The Commission, he said, is not in a position at this time to make any promises whatsoever with respect to any project in any locality.

The meeting adjourned at 9:40 p. m., after appropriate remarks by Mr. Reynolds.

State Highway Engineer

A W Stanfield
Commissioner

H B Searing Jr
Secretary

W K Newman
Commissioner

Enterprise, Oregon, September 14, 1944.

Following an overnight stop at LaGrande, the State Highway Commission drove to Enterprise from which place the Commission inspected the Enterprise-Flora Highway and a proposed state park at Wallowa Lake. All members of the Commission, the Engineer, the Attorney and the Secretary, were present. The Commission was accompanied on such inspection by County Judge Ben Weathers of Wallowa County, and Senator C. H. Zurcher, Enterprise. Joining the Commission in the inspection of the proposed park at Wallowa Lake were Max Wilson, Mayor of Joseph and Secretary of the Consolidated Ditching Company, which owns the property under discussion; Mr. A. Daisley, President of the Joseph C. of C., and C. D. Cannon, Division Office Engineer, LaGrande, who represented the State Parks Superintendent.

Mr. Cannon exhibited a map of the proposed park and explained the details. He pointed out particularly that whereas the map indicates an area of 62 acres in the tract, there is some question as to the ownership at the edge of the lake, so actually the tract may contain no more than 50 acres. The Commission evidenced an interest in this matter and, as a result of inspection of the premises and discussion, authorized the Engineer to make a survey of the property to determine ownerships and the high water meander line

of the lake. Such information is to be reported to the Commission at a future meeting when the matter will be given further consideration.

Following return of the Commission to Enterprise, a short meeting was held in the Enterprise Hotel for the disposal of the following matters that had arisen during the progress of the Commission's trip:

1. Use of Pilot Butte State Park, Bend, by the Federal Government. The Engineer advised that he has received telephonic information from Salem to the effect that the Federal Government desires the use of this state park as an army airplane observation post. He gave as his thought that such use of the property would not hurt the park in any way, although the probabilities are that the park would have to be closed to the public while the army is using it. He recommended approval of the request, because the park is not being used to any great extent during present abnormal times. The recommendation was approved by the Commission by unanimous vote.

2. Sale of an obsolete tractor for which bids were received on September 11. The Engineer advised that the high bid received by the Commission for this equipment is considerably in excess of the ceiling price set by the Government Agency, O. P. A., which may object to the sale at the higher figure. He requested instructions from the Commission whether or not to sell the tractor to the high bidder at his bid price. The Attorney advised that the Commission is strictly within its legal rights in accepting the offer of the high bidder, if it so desires, because its actions are governed entirely by state law, whereas the O. P. A. ruling is a federal directive. In view of the Attorney's statement, the Commission decided to sell the tractor to the high bidder regardless of the O. P. A. ceiling price, and so instructed the Engineer.

The Commission and its party were the dinner guests of the Enterprise Chamber of Commerce in the dining room of the Caton Hotel, following which at 8:00 p. m., a short business session was conducted in the same room. Mr. Glen Jacobs, President of the Enterprise C. of C., presided. Chairman Banfield explained the object of the Commission's visit and the prospects of highway construction during the postwar period. The Highway Commission, he said, has not adopted a program for such period as yet and cannot do so until Congress has passed the bill now pending which provides federal funds to assist the states in financing such work. He assured the group that the Highway Commission would give fair consideration to all parts of the State in the distribution of the funds available, but is not in a position at this time to make any promises with regard thereto. His remarks were endorsed by Commissioners Schaupp and Chessman. Delegations from nearby communities were then introduced by President Jacobs, as follows: Representing the Wallowa County Court were County Judge Ben Weathers and County Commissioners George Dawson and F. W. Hammack. Representing the City of Enterprise, were Mayor Ira E. Snyder; L. E. Jordan, Justice of the Peace; Tom Ratcliff; H. A. Mutch, Councilman; Carl Miller; Gwen Coffin;

M. L. Osborn; Robert Christman; Ed Forrstrom; Garnet Best, County Agent; Hon. Charles H. Zurcher, State Senator; Sgt. George Rogers, State Police; Cliff Jacobs; William Ortman; R. D. McClellan, State Game Commissioner. Representing the Town of Joseph, were Max Wilson, Mayor; Ab Daisley, President, C. of C.; Frank McCully and George Dawson, County Commissioner. Representing the Town of Wallowa were Cecil Chrisman, City Attorney; Verdo Baird, Councilman; Stanley Shell and Harold Lawrence.

A number of local people were called upon for remarks, and the following responded briefly: County Judge Weathers, who urged the Commission to complete construction of the Enterprise-Flora State Highway to a connection with the highway in the State of Washington; Hon. Ira Snyder, Mayor of Enterprise; Hon. Max Wilson, Mayor of Joseph, who endorsed the remarks of Judge Weathers; Ab Daisley of Joseph, who spoke for the establishment of a state park at Wallowa Lake; Frank D. McCully of Joseph, who endorsed the remarks of Mr. Daisley; Cecil Chrisman, Wallowa, who urged favorable consideration by the Commission on both projects mentioned by the other speakers; Stanley Shell, Wallowa; Verdo Baird, Wallowa; Harold Lawrence, Wallowa, and Mr. R. D. McClellan, State Game Commissioner. County Commissioners Fred Hammack and George Dawson also spoke in behalf of the Flora-Enterprise project.

A feature of the evening was the presentation of an elk-tooth charm to State Highway Commissioner A. W. Schaupp by Sgt. George M. Rogers of the State Police Department, as a token of friendship and esteem in which Mr. Schaupp is held by the people of Wallowa County. Commissioner Schaupp responded with a few appropriate remarks.

The meeting adjourned at 9:30 p. m. with closing remarks by Chairman Banfield, who paid high tribute to the Highway Department engineering personnel for the manner in which highways throughout the State are being maintained under existing abnormal conditions.

T. H. Banfield
Chairman

State Highway Engineer

A. W. Schaupp
Commissioner

H. H. Blaine

W. H. Chapman
Commissioner

Hood River, Oregon, September 15, 1944.

The State Highway Commission and its party were dinner guests of the Hood River Chamber of Commerce. A short business session was held immediately

SEP 15 1944

thereafter (7:00 p. m.). Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Chessman was excused. The local group consisted of: Sullivan C. Gaulke, President of the C. of C. and City Councilman; R. C. Samuel, Mayor; A. C. Johnsen, Councilman; P. F. Bucklin, Councilman; E. F. Barclay, Councilman; J. C. Meyer, Councilman; Harold Hershner, City Treasurer; Luke Nichols, Port Commissioner; Edward Hobson, City Engineer; C. D. Nickelsen, County Judge; R. W. Arens, County Commissioner; C. M. Hurlburt, County Engineer; W. S. Finney, Realtor; Tom Scott, Realtor and Port Commissioner; E. L. Martin, Banker; J. H. Travis, Hood River County Sun; H. O. Kresse, Merchant and former Mayor; C. O. Bunnell, Pacific Power & Light Company; J. H. Klahre, Manager, Apple Growers Association, and Edward Steel, Secretary C. of C. Mr. Sullivan C. Gaulke, President of the Chamber of Commerce, presided.

Following introductions, Chairman Banfield explained the purpose of the Commission's visit and outlined briefly the prospects of postwar highway construction. He pointed out that the tentative highway bill now pending in the Congress, provides for an appropriation of federal funds considerably less than was anticipated, so many projects that were being considered by the Commission for postwar construction will have to be deferred. Due to uncertainties, he said, the Highway Commission is not in a position to make any commitments or promises with respect to any project, and the program cannot be decided until the Commission knows how much federal money Oregon is to receive and how it is to be spent. Commissioner Schaupp endorsed Chairman Banfield's remarks.

There followed a general discussion of highway matters. Judge Nickelsen asked the Commission to complete the Hood River Secondary Highway to Parkdale. He also asked completion of the water-grade highway between Portland and The Dalles. He particularly mentioned the adoption of a definite location for this highway through the Town of Hood River, and in this connection mentioned that public sentiment in Hood River at present is divided as to the location. He recommended adoption of a route that will serve the best interests of the entire Hood River Valley. The State Highway Engineer explained briefly the results of investigations which have already been made for the routing of the highway through Hood River. Mr. Klahre presented statistics on fruit shipments emphasizing the need for better highway facilities. He said that he was not speaking in behalf of any particular route, but he is not in favor of a route that would require the installation of stop lights or traffic separation structures. Tom Scott voiced objections to the routing of the highway between the Columbia River and the railroad. He gave as his opinion that the

SEP 15 1944

interests of the Hood River community would be best served by a location closer to the center of the town. He admitted, however, that his concern is selfish. It was his thought that the people of Hood River should unite on some definite route and make a joint recommendation to the Highway Commission. Mr. Hurlburt endorsed Mr. Scott's suggestion that the people should get together and make a recommendation to the Highway Commission. However, he added, that should not be done until the report of the State Highway Engineer has been made on the alternate routes under consideration. Mr. Kresse voiced objections to the adoption of the route that would by-pass the Town of Hood River. He gave as his understanding that the Highway Commission proposes to route the highway directly through the City of The Dalles, which, if a fact, and the Town of Hood River is by-passed, will work to the disadvantage of the Hood River community. The State Highway Engineer explained the plan of development proposed at The Dalles. The ultimate solution, he said, is to by-pass cities and towns as has been done in such places as Roseburg and Eugene. After further discussion, Chairman Banfield concluded the meeting by stating that the Highway Commission is pleased to listen to the arguments in support of the alternate routes but will not make a decision in the matter until the Engineer's report on the subject has been rendered and carefully studied. The people of Hood River, he said, should get together and settle their differences before the Commission spends any money for construction on any route.

The meeting adjourned at 8:00 p. m., concluding the week's inspection trip.

		City of Ontario. Request for rerouting of truck traffic approved. State to maintain new route.
		American Assoc. of State Highway Officials. Payment of 1945 membership dues of $450 authorized.
12327		Agreement with Ostrander Rwy. & Tmbr. Co. and Weyerhaeuser Timber Co. re truck hauling logs across two secondary hwys. near Molalla approved.
		Coos County. Cape Arago State Park. Proposed settlement with U.S. War Dept. for use of park approved. Agreement signed.
		Meeting date. Next regular meeting date set for March 12 & 13, 1945.
		Unfinished business discussed as follows:
		Douglas Co. North Umpqua Co. Rd. Request for designation as state sec. hwy. Engineer to inspect.
12328		Park. Champoeg State Park. Proposed improvement in 1945. Report pending.
		Grant Co. Seneca. Report on housing facilities for maintenance forces. Construction of houses deferred.
		Multnomah County. Swift Sec. Hwy. Request of Portland Union Stock Yards Co. and Swift & Co. for widening. Engineer to report.
		Assoc. of Oregon Counties. Request for endorsement of proposed bill to increase counties' share of state highway funds from 15.7% to 20%. Denied.

Page	Date 1945	Subject
12328	Jan.22	Unfinished business discussed as follows (cont.):
		Oregon Motor Transport Assoc. Request for endorsement of proposed bill to increase weight and length of truck and trailer combinations operating over state highways. To be discussed with delegation next day.
12329		Signs. Pacific Hwy. at Goshen & Grants Pass. Existing signs of Golden Gate Bridge & Highway District illegal. Ordered changed.
		State Tax Street Fund. Resolution adopted approving certain
12330		city street improvement programs.
12331		Real property. Sale of old stockpile site in Sheridan approved. Bids to be received in Salem.
		Meeting adjourned at 5:00 p.m. to reconvene following morning at 9:00 a.m.
12332	Jan.23	Bids received on the following projects and sale of down timber:
		Baker Rock Production Project
		Oregon City-Molalla-Eagle Creek Rock Production Project.
		Silverton-Silver Creek Rock Prod. Project
12333		Sale of tract of timber in Joaquin Miller State Park
		Log hauling. Logging Industry Advisory Committee suggests
12335		penalties for overloading, etc. Classification of operators according to rating suggested by Chairman Banfield and approved by all. Attitude of Supt. State Police to be ascertained.
12336		Benton County. Pacific Highway West. Corvallis. Delegation urges rerouting through Corvallis with two one-way streets. Report ordered.
		Alsea Hwy. Improvement as postwar project requested. Project to be kept in mind for Forest Highway funds.
		By pass route proposed to relieve congestion following football games at O.S.C. No action.
		Klamath County. Sprague River County Road. Delegation.
12337		Obligation of former Highway Commission confirmed. Modification of plans approved.
		Request for additional State funds denied, but Commission not unfavorable to project.
12338		Multnomah County. Columbia River Hwy. Troutdale. Relocation discussed with Claude Bristol. Engineer to make further study.
		Recess at 12;00 noon and reconvened at 1:30 p.m.
		Lincoln County. Oregon Coast Hwy. Taft. Curb and sidewalk construction. Project approved conditionally. Condemnation authorized. Bids to be received.
12339		Drift Creek bridge near Cutler City. Construction as Forest Hwy. Project approved. Chairman Banfield to inspect right of way and pass on purchase price.
		Smelt Sand. Yachats. L.M. Christensen authorized to remove "smeltsand" conditionally.

Page	Date 1945	Subject
12339	Jan.23	Marion County. West Portland-Hubbard Hwy. Ward C. Russell authorized to farm right of way along Aurora Flight Strip.
		"Fireproofing" state highways in Echo Grazing District, Gilliam, Morrow & Umatilla Counties. Request of U.S. Grazing Service for state cooperation. Plowing of furrows on
12340		highway right of way authorized
		Claim. Against U.S. Navy Dept. for damage to state equipment, dropped.
		Claim. Against Giles Wyner for appropriating Hwy. Dept. road grader at Detroit, for personal use. Compromise settlement refused.
		Polk County. Pacific Hwy. West. Right of way controversy
12341		with A. F. Elkins, Monmouth. Engineer to investigate and report.
		State Tax Street Funds. Resolution adopted apportioning 1944 funds to cities and towns.
12347		Travel & Information Dept. Botsford, Constantine & Gardner selected to handle publicity matters during 1945. Supplemental agreement signed.
		National Hospital Association and Oregon Physicians Service. Continuation of present contracts approved.
		Lane County. Right of way for postwar projects near Eugene.
12348		Delegation urges immediate acquisition. Appraisal ordered.
		Oregon Motor Transport Assoc. Delegation requests endorse-
12349		ment of "Big Truck Bill," Senate Bill #5. Matter left with Legislature to decide.
		Awards. Public announcement by Chairman Banfield.
12350		Legislative matters. Bills pending in Oregon Legislature discussed informally.
		Agreements, etc., signed as follows:
		U. S. Dept. of Interior. Bureau of Indian Affairs. Modification of previous agreement re Sprague River Road, Klamath County.
		Modification of project agreement with P.R.A. re snow removal on Mt. Hood Highway near Parkdale.
		Supplemental agreement with U.S. War Dept. terminating use of Cape Arago State Park.
		Permit authorizing Ostrander Rwy. & Tmbr. Co. and Weyerhaeuser Tmbr. Co. to operate logging trucks across two sec. hwys. near Molalla.

		Agreement with Arch Cape Land Co. disposing of company's claim for damages resulting from slide on Ore. Coast Hwy. near Arch Cape Tunnel.
		Agreement with U.S. Dept. of Interior, Bureau of Reclamation, granting to State of Oregon right to occupy portions of Reclamation's Main Canal R/W near Klamath Falls.
		Quitclaim deed conveying to U.S. of America 1.38 acres of land situate adjacent to The Dalles-Calif. Hwy., Jefferson County.
		Meeting adjourned at 4:30 p.m.

Portland, Oregon, October 23, 1944

The State Highway Commission convened in regular session at 1:30 p.m. in Room 615 of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

The following persons, representing the Labor Relations Committee of the Oregon State Federation of Labor, came before the Commission in regard to the Committee's previous request that the Highway Commission hereafter include in its contracts provision for the payment of wages that prevail in the communities in which which the work is to be done: F. W. Griffith, representing Engineers Local Union 701, Spokesman; J. T. Marr, Executive Secretary, Oregon State Federation of Labor; John O'Neill, Secretary Building & Construction Trades Council. Chairman Banfield advised that the Commission has not as yet had opportunity to discuss the Engineer's report on this matter, so is not in a position to make a definite statement at this time. Moreover, it may be several months before the Commission can make its decision. In any event, the Commission cannot take action until Congress passes the postwar Road Bill, now pending, and the rules and regulations which are to govern the expenditure of the funds provided by such bill have been received. He added that the Commission expects to give the matter fair consideration and will act in conformity with what the Commission believes its responsibility dictates, and the matter will not be debated. Commissioners Schaupp and Chessman concurred in Chairman Banfield's statements.

In the discussion that followed, Mr. Marr declared that the Highway Department maintenance men are not now receiving the wages to which they are entitled; he urged the Commission to increase the rate of pay for these men. The Commission agreed to give the matter study. This concluded the conference.

The Commission, by unanimous vote, approved the minutes of the meetings held on July 11 and 12, July 24-28 inclusive, and September 11-15 inclusive, 1944.

The State Parks Superintendent was present and reported on the following state park matters:

(1) Purchase of property belonging to M. A. Goldy, which fronts on the Rogue River about two miles from Gold Hill, Jackson County: - The Parks Superintendent advised that this property lies adjacent to the Sams Valley Secondary Highway and is not particularly desirable from a state park standpoint. The owner, he said, is offering to sell the entire acreage for the sum of $10,000, although he will accept $5,000 for the area fronting on the Rogue River. He recommended that the offer be declined. The Commission approved the recommendation.

(2) Purchase of government-owned land in The Cove State Park, Jefferson County:- The Parks Superintendent advised that this tract contains 2471 acres of land, which the Commission now has under lease from the Department of the Interior at an annual charge of $10.00. However, he has been notified that the land will be returned to public domain the first of the year, so, in order to protect the state's interests, it will be necessary for the state to purchase the land outright. He estimated the cost at $1.25 per acre. He requested authority from the Commission to petition the Department of the Interior for an appraisal of the property to determine a definite sale price. The Commission approved the request unanimously.

(3) Sale of peaches in The Cove State Park:- The Parks Superintendent reported the result of the sale of the peach crop in this park, advising that gross sales amounted to $828.50 and sales expense amounted to $50.00, leaving a net profit of $778.50. The Commission approved the report.

In this connection, the Parks Superintendent requested authority to destroy about 600 peach trees that are over twenty years old and are not of much value. The cost of spraying and pruning the trees, he said, is out of proportion to their value and in his estimation the trees should be replaced with other trees, such as locusts, which he thought would make for a more attractive park. In the discussion of this matter, the Commission expressed a reluctance to destroy existing trees and accordingly instructed the Parks Superintendent to properly care for them, using the profits from the sale of the peaches to pay the expense involved.

(4) Wayside strips along the Quartz Mountain Section of the Klamath Falls-Lakeview Highway:- The Parks Superintendent advised that 74.34 acres of wayside timber land have been purchased along this section at a cost of $5340.00; also, that the U. S. Forest Service has acquired the remaining property that is desirable as waysides, except three small privately-owned tracts. He gave as his thought, in view of the fact that the Forest Service controls most of the wayside land along this section, that it should have jurisdiction over the state's waysides, thus eliminating dual control of adjoining properties that were acquired for the same purpose. He requested authority to negotiate an exchange of the state's property for Forest Service land of equal value in some other location. The Commission approved the recommendation by unanimous vote and ordered discontinuance of negotiations for the acquisition of the three privately-owned tracts.

(5) Proposed purchase of additional property along the Pendleton-John Day Highway in Camas Creek Canyon, Grant County:- The Parks Superintendent advised that investigation in connection with the Commission's purchase of timbered wayside strips from the Pilot Rock Lumber Company reveals that the company had previously sold to a Mr. L. O. Case, a small tract containing 18.4 acres which he thought was included in the state's purchase. The acquisition of this area, he said, is required to fill out the wayside strip, but Mr. Case will not sell for less than $2,500, alleging that he purchased the property for a homesite. He gave as his thought that the price demanded is exhorbitant and requested instructions whether or not to purchase the property at such figure. The Commission decided not to purchase the property.

(6) Proposed addition to Guy W. Talbot State Park:- The Assistant Attorney, who was present, reported that as previously instructed by the Commission, he contacted Mr. B. B. Bennett, the owner of the tract which contains 30 acres, and secured from him an option to purchase the property for the sum of $3500. Inspection of the site, he said, reveals that only one acre is capable of development, the balance being steep hillside. He valued the property at $2,000 and advised that he could not recommend purchase even at such figure because he believed that it would be possible to obtain the tract for less money at some future time when the highway has been realigned. The State Parks Superintendent urged acquisition of the property now as a needed addition to the existing park, because of its one-quarter mile frontage on the highway and its proximity to Latourelle Falls. He questioned the Assistant Attorney's prediction that it could be purchased for a lesser amount later on. After discussion, the Commission decided unanimously not to purchase the tract at this time.

(7) Proposed improvements in Champoeg State Park during 1945:- The State Highway Engineer exhibited a development plan for this park as prepared by the former landscape engineer, Mr. George Otten, and requested authority to expend during 1945 the sum of $6,286.90 for certain betterment work included therein. The matter was discussed at some length during which Chairman Banfield gave as his thought that the proposed major plan of development and the items proposed for 1945 performance should be discussed with the Oregon Historical Society before the Commission acts on them. Commissioners Schaupp and Chessman concurred, whereupon the Parks Superintendent was instructed to contact the officers of the Oregon Historical Society relative thereto. In the event the Historical Society approves the plan, then the Parks Superintendent is to report same to the Highway Commission for further instruction.

(8) Establishment of proposed "Myrtle Lane" along Coos Bay-Roseburg Highway between Coquille and Myrtle Point:- The Parks Superintendent outlined briefly his plans for this project which include the clearing of small areas surrounding existing myrtle trees for a distance of 50 feet and not more than 200 feet, on each side of the highway so the trees can be readily seen by the traveling public. He estimated that it would cost about $4200 to prepare the trees in the first instance and thereafter the services of only one man would be required to properly maintain them. Chairman Banfield remarked that a misunderstanding apparently exists as to the extent of the proposed development, because the Parks Superintendent's ideas do not conform with those of the local sponsors of the project as expressed by Mr. George E. Oerding, Coquille, who accompanied the Commission on its inspection of the project during July. He suggested, in order that the Commission may have a clear understanding of the entire matter, that the State Parks Superintendent prepare a few specimen trees to illustrate just what he has in mind. Commissioners Schaupp and Chessman approved the suggestion whereupon the Parks Superintendent was instructed to proceed with the work. Pictures are to be taken of each of the specimen trees both before and after the development is done for submission to the Commission along with the Park Superintendent's report. The Parks Superintendent was also instructed to show the completed work to the local sponsors and to secure

expressions from them whether or not the development is in conformity with their ideas.

The Engineer presented for the Commission's approval a proposed budget of estimated highway expenditures during the next biennium. He explained that this is for use by the State Budget Director in the preparation of a general budget of all state activities that he is required to furnish the members of legislature. He advised that this budget is based on the period of the two fiscal years ending June 30, 1947. The Engineer also presented a budget for the next calendar year. He explained that it has been customary for the Commission to approve the working budget on the calendar year basis; also, that the State Budget Director requires a breakdown of the budget on the basis of salaries and wages, materials, supplies and equipment, whereas the working budget is broken down on the basis of class of work to be performed. The working budget, he stated, is now being prepared and will be presented to the Commission at its meeting in December, at which time he would give a full explanation of the work proposed to be done. After careful consideration of the general budget items, and in view of the Engineer's explanation, Chairman Banfield moved the adoption of the budget as presented. The motion was seconded by Commissioner Schaupp and carried by unanimous vote of the Commission. The Commission thereupon signed the budget as presented.

The Assistant Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with offers that he recommended be made in connection therewith. After careful consideration of each item, the Commission approved the request, and thereupon by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed;

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

ASTORIA-NAVAL HOSPITAL SECTION, NEHALEM HIGHWAY

11450-A Clatsop County Right of way	970 sq. ft.	$00.00	Landon

ROSEBURG-SHADY POINT SECTION, PACIFIC HIGHWAY

6776- Young, A. J. and Cora Right of Way	4.798 acres at $10.00	$47.98	
	0.642 acre at $10.00	6.42	
	0.23 acre at $10.00	2.30	
	164 rods fencing at $1.00 per rod	164.00	
	Severance damage to 4.0 acres across RR track	125.00	
	Loss use powder house and oil building	154.30	
		$500.00	Witt

ANNUAL RENTAL ON U. S. GOVERNMENT PARKS

Clackamas County- Mt. Hood Hwy. 120.0 acres	$75.60	Boardman
Josephine County- Redwood Hwy. 70.0 acres	6.88	Boardman
Marion County- Silver Creek Falls Park 200.0 acres	35.00	Boardman

CLATSKANIE-RAINIER SECTION, COLUMBIA RIVER HIGHWAY

11514- Shepard, Vilas L. Quarry Site	38.3 acres at $13.055	$500.00	McChesney

CONDON-SHUTLER SECTION, JOHN DAY HIGHWAY

11483- Bradley, W. E. Stockpile site	1.23 acres at $5.00	$ 6.15	
	Federal Land Bank fees	7.50	
		$13.65	Cozad

HUGHES RANCH-LIGHTHOUSE SECTION, CAPE BLANCO HIGHWAY

11506-Hughes, E.A.,T.P. and F.J. Gravel Pit and hauling road	0.53 acre	$ 1.00	Lytle

COLTON SECTION, SANDY-WOODBURN HIGHWAY

11522- Battleson Land Co., and Leonard R. & Latlye Mummert Stockpile site	1.21 acre at $200.00	$242.00	
	44 rods new fence at $1.50	66.00	
		$308.00	McChesney

PACIFIC HIGHWAY-JACKSON STREET SECTION, NORTH UMPQUA HIGHWAY

11457- Young, A. J. and Cora Right of Way	3,230 sq.ft.(in exchange for 3,205 sq.ft. to be conveyed by State and acquired from Schloemann Estate)	00.00	
	Moving Neon sign, est.	$100.00	Witt

OCT 23 1944

PACIFIC HIGHWAY-JACKSON STREET SECTION, NORTH UMPQUA HIGHWAY (Cont.)

11458-	Schloemann, Estate August and Sarah Schloemann	0.46 acres LUMP SUM	$4,000.00	
	Right of Way	3,205 sq.ft.	00.00	
			$4,000.00	Witt

CIRCLE BRIDGE-HUG POINT SECTION, OREGON COAST HIGHWAY

11481-	Wilson, J. W. Right of Way	3,322 sq.ft. at 3 1/3¢	$110.63	Witt
10817-	Foster, Sam B. Right of Way	2.03 acres at $500.00	$1,015.00	
		Loss or possible loss trees, shrubs etc, making changes in flower beds, re-establishing entire water system, including water tank	786.00	
			$1,801.00	Witt
10812-A	Clatsop County Right of Way	2,586 sq.ft.	00.00	Witt
10816-	Greenwood, A. C. Right of Way	10,606 sq.ft. at 7¢	$ 742.40	Witt

ALTAMONT DRIVE-U.S.RECLAMATION SERVICE CANAL SECTION, KLAMATH FALLS-LAKEVIEW HWY.

9762-	Klamath Moulding Company Right of Way	4,008 sq.ft. at 10¢	$ 400.80	
		shade trees, and hedge	320.00	
			720.80	Cozad

BARNES ROAD-MULTNOMAH COUNTY LINE SECTION, WOLF CREEK HIGHWAY

3186-A	Holboke, Anna M. Right of Way	0.168 acre at $1,000.00	$168.00	Collins
3188-A	Holboke, Bernard Right of Way	0.057 acre at $1,000.00	57.00	Collins

HALSEY-HARRISBURG SECTION, PACIFIC HIGHWAY EAST

10264-B	Dempsey, Edward and Irene Right of Way	4.93 sq.ft. at approx. 20¢ sq.ft.	$10.00	Landon
10264-C	Hill, A.J. and Effie E. Right of Way	9.40 sq.ft. at approx 10¢ sq.ft.	10.00	Landon

OWENS STREET-MIDLAND ROAD SECTION, KLAMATH FALLS-LAKEVIEW HIGHWAY

9628-	Wells, L.V. and Mary, and Habib David	586 sq.ft. Cutting off store front etc. Moving lunch room, cold storage room, kitchen, etc.	$ 00.00 455.00 550.00 $1,005.00	Cozad

FRONT STREET PROJECT, CITY OF PORTLAND, PACIFIC HIGHWAY WEST

11141-	Jones, Paul E., Ida M. Brackett and T.B.Jones Estate	5,000 sq.ft. at 20¢ 5,000 sq.ft. at 30¢	$1,000.00 1,500.00 $2,500.00	McCallister
11223-	Emken, Ida M., Pearl, Hazel, Gertrude, Cecil W.	5,000 sq.ft. at 20¢ 5,000 sq.ft. at 30¢	$1,000.00 $1,500.00 $2,500.00	McCallister
11530-	Sewall, Russell E.	9,500 sq.ft. at 50.5¢ sq.ft.	$5,000.00	McCallister

MARSHFIELD-COQUILLE SECTION, OREGON COAST HIGHWAY

11501-	Coos County Right of Way	6.2 acres at $10.00 2.33 acres at $25.00 (½ interest) 2.0 acres at $5.00 (") 1.28 acres at $117.00 aporox.	$62.00 58.25 10.00 150.00 $280.25	Benson

PELICAN CITY-SOUTH 6TH STREET SECTION, KLAMATH FALLS-MALIN HIGHWAY

11334-	Baker Bros. Right of Way	3.11 acres at $40.00 170,725 sq.ft. at ½¢ sq.ft.	$124.40 853.63 $978.03	Cozad
11177-	City of Klamath Falls Right of Way	63 lots at $1.00 per lot	63.00	Cozad

---

The Commission's Attorney reported that in conformity with authority granted him by the Commission at the previous meeting, he has commenced condemnation proceedings to acquire right of way that is needed for the North Umpqua County Road Project in the City of Roseburg. He pointed out that while the Commission authorized such condemnation, it did not adopt the customary resolution pertaining thereto because it was not known definitely at the time whether or not condemnation would be required. It so happens, he said, that it has been necessary to condemn some of the properties in view of which the Commission should take formal action now "nunc pro tunc". The following

resolution in regard to this matter was adopted by the Commission by unanimous vote, on motion of Commissioner Schaupp which was seconded by Commissioner Chessman:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways or for any other purpose designated by the United States; and

WHEREAS, by virtue of subsection 32 of Section 100-115, O.C.L.A., the Highway Commission is authorized to "Enter into an agreement or agreements with any county, city, town or road district for the construction, reconstruction, improvement or repair of any road, highway or street, on such terms and conditions as the contracting parties may mutually agree upon."; and

WHEREAS, under the provisions of Chapter 198, Oregon Laws, 1943, the Highway Commission is authorized to cooperate with the United States in the making of surveys, plans, specifications and estimates for and in the construction and maintenance of flight strips and air fields and in the construction, reconstruction and maintenance of roads and bridges necessary to provide access to military and naval reservations, to defense industries and defense-industry sites, and to sources of raw materials; and

WHEREAS, for the purpose of providing more adequate traffic connections between the Umpqua County Road on East Second Avenue and the Pacific Highway in and near the City of Roseburg to the end that the transportation of logs by motor truck from forest or timbered

areas east of Roseburg to mills or manufacturing establishments located in and near the City of Roseburg may be accomplished with a minimum of traffic hazard, traffic congestion and other traffic difficulties, the parties to this agreement have proposed and now contemplate the construction of a connection between said county road and said state highway; and

WHEREAS, the accomplishment of said project requires the acquisition of real properties for right of way purposes; and

WHEREAS, in response to a request and recommendation made by the United States Public Roads Administration, the State of Oregon, acting by and through its State Highway Commission, the County of Douglas and the City of Roseburg entered into a tri-party agreement with respect to and for the construction of said connecting street or road; and

WHEREAS, in the opinion and judgment of the Commission the construction and maintenance of said connecting road or street is necessary for and will contribute to the convenience of the general public and will facilitate the transportation of timber products from forest to mill, much of which products are to be used in the manufacture of materials or things to be used in national defense;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that the construction and maintenance of an access or connecting road or street connecting the Umpqua County Road with the Pacific Highway in Roseburg is necessary and will be of advantage to the general public in that it will facilitate the movement and transportation of timber products from forest to mill and will relieve a severe traffic hazard caused by the movement of such traffic over the busy thoroughfares of the City of Roseburg.

2. The Commission does further find and declare that the acquisition of title to the real properties hereinafter described is necessary, is needed and is essential to the construction and maintenance of said proposed connecting street or road.

3. The real properties with the names of the owners thereof, the acquisition of which this Commission has found and does find and declare is necessary for right of way purposes in connection with said project, are described as follows, to wit:

12187

John Rast Estate property (R 11456)

Parcel No. 1:

A parcel of land lying in the City of Roseburg in the Northwest quarter ($NW\frac{1}{4}$) of Section 19, Township 27 South, Range 5 West, W. M., Douglas County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by those certain deeds to John Rast recorded in Book 5 at page 179, and Book 11, at page 267, of Douglas County Record of Deeds, the said parcel being described as follows:

Beginning at a point on the existing easterly right of way line of the Pacific Highway, said point being opposite and 50 feet distant easterly from Engineer's center line station 1601+79.23 of said highway; said point being the northwest corner of that tract of land conveyed by that certain deed to A. J. and Cora Young as recorded in Book 100, Page 88 of Douglas County Record of Deeds; said point also being 215.44 feet North and 479.31 feet west of the city street monument at the intersection of the center line of Winchester Street with the center line of North Jackson Street; thence along said right of way line parallel to and 50 feet distant from said highway center line along the arc of a spiral curve left (the long chord of which curve bears North 22° 10' East 92.39 feet) a distance of 92.40 feet; thence South 41° 44' 30" East a distance of 74.18 feet to a point 40 feet distant northerly from (when measured at right angles to) the relocated center line of the North Umpqua Highway at Station 1+25; thence South 84° 16' East parallel to and 40 feet distant northerly from said relocated center line a distance of 38.68 feet to the center of Deer Creek; thence South 0° 07' 30" West up the center of Deer Creek a distance of 85.85 feet to the northeast corner of that tract of land conveyed by that certain deed to A. J. Young and Cora Young recorded in Book 100, Page 88, of Douglas County Record of Deeds; thence North 64° 06' West along the north line of said property a distance of 136.22 feet to the point of beginning, containing 9060 square feet.

Parcel No. 2:

A parcel of land lying in the City of Roseburg and being in the Northwest quarter ($NW\frac{1}{4}$) of Section 19, Township 27 South, Range 5 West, W. M., Douglas County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to John Rast recorded in Book 5, Page 179 of Douglas County Record of Deeds, the said parcel being described as follows:

Beginning at a point on the existing easterly right of way line of the Pacific Highway, said point being opposite and 40 feet distant easterly from Engineer's center line station 1601+30.3

OCT 23 1944

of said highway; said point being the southwest corner of that tract of land conveyed by that certain deed to A. J. Young and Cora Young as recorded in Book 100, Page 88, of Douglas County Record of Deeds; said point also being 164.1 feet north and 508.61 feet west of the city street monument at the intersection of the center line of Winchester Street with the center line of North Jackson Street; thence South 64° 06' East along the south line of the foregoing described property recorded in Book 100, Page 88, of Douglas County Record of Deeds, a distance of 32.52 feet; thence South 71° 19' West a distance of 44.85 feet to the right of way line of the Pacific Highway; thence along said line parallel to and 40 feet distant from said highway center line on the arc of a spiral curve left (the long chord of which bears North 24° 51' East 31.49 feet) a distance of 31.5 feet to the point of beginning, containing 506 square feet.

Together with the perpetual right and easement to construct, maintain, repair and have free access to all slopes of cuts or fills upon the property of the owners, for a distance of 10 feet, outside of and adjoining on the south side of the property herein described, occasioned by or resulting from the construction, operation or maintenance of a public highway and its appurtenances.

Leona Creason Koff property (R 11459).

A parcel of land lying in Lots 5, 6, 7, and 8 of Block 6 of Kinney's Improved Plat in Roseburg, Douglas County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Leona Creason, Registered Title No. 3514, Torrens Transfer of Title Register, recorded in Book 6, Page 458, of Douglas County Record of Registered Titles, the said parcel being described as follows:

Beginning at the northwest corner of said Block 6; said point being 22 feet distant easterly from (when measured at right angles to) the center line of the Winchester Street connection to the North Umpqua Highway; thence South 85° 52' East along the northerly line of said Block 6 a distance of 10.37 feet; thence parallel to and 30 feet distant from said Winchester connection center line on a 72.32 foot radius curve left (the long chord of which bears South 48° 19' 40" East 26.04 feet) a distance of 26.18 feet; thence South 58° 42' East along a line 30 feet distant northerly from and parallel to said center line a distance of 126.36 feet to the easterly line of said Block 6; thence South 27° 48' West along said easterly line of Block 6 a distance of 52.66 feet; thence South 6° 13' West along said easterly line of Block 6, a distance of 8.21 feet; thence North 58° 42' West along a line 30 feet distant southerly from and parallel to said

OCT 23 1944

center line a distance of 89.24 feet; thence on a 15 foot radius curve left (the long chord of which bears South 57° 04' 40" West 27.02 feet) a distance of 33.63 feet to the westerly line of said Block 6: thence North 7° 09' 30" West along said westerly line of Block 6 a distance of 107.54 feet to the point of beginning, containing 8642 square feet.

Helen Cardwell Hammock property (R 11460 and R 11461)

Parcel No. 1:

A parcel of land lying in Block 1 of Bushey's Addition to the City of Roseburg, Douglas County, Oregon, and being a portion of the following described property: that tract of land which was conveyed by that certain deed to Emma P. Cardwell recorded in Book 57, Page 560, of Douglas County Record of Deeds; the said parcel being described as follows:

Beginning at a point on the east line of North Jackson Street; said point being 113.84 feet north and 38.97 feet east of the city street monument located at the intersection of the center line of Winchester Street and the center line of North Jackson Street; thence North 27° 48' East along the east line of Jackson Street a distance of 21.98 feet to the southwest corner of that tract of land conveyed by that certain deed to O. F. Matot recorded in Book 97, Page 114 of Douglas County Record of Deeds; thence South 85° 52' East along the south line of said property a distance of 21.84 feet; thence North 27° 48' East along the east line of said property a distance of 103.5 feet; thence South 85° 52' East along the south line of East Second Avenue South a distance of 111.72 feet; thence South 62° 08' West a distance of 216.89 feet to the point of beginning; containing 5604 square feet.

Together with the perpetual right and easement to construct, maintain, repair and have free access to all slopes of cuts or fills upon the property of the owners, for a distance of 10 feet, outside of and adjoining on the south side of the property herein described, occasioned by or resulting from the construction, operation or maintenance of a public highway and its appurtenances.

Parcel No. 2:

A parcel of land lying in Block 1, Bushey's Addition to the City of Roseburg, Douglas County, Oregon, and being all of that tract of land which was conveyed by that certain deed to O. F. Matot recorded in Book 97, Page 114, of Douglas County Record of Deeds; the said parcel being described as follows: a strip of land 20 feet by 103.5 feet on Jackson Street, in Block 1, Bushey's Addition to the City of Roseburg, as shown by the official plat

on file in the office of the Clerk of Douglas County; said parcel being more particularly described as follows:

Beginning at the intersection of the east line of North Jackson Street with the south line of East Second Avenue South (North Umpqua Highway); thence South 85° 52' East along said south line a distance of 21.84 feet; thence South 27° 48' West parallel to and 50 feet distant from the center line of North Jackson Street a distance of 103.5 feet; thence North 85° 52' West a distance of 21.84 feet to the east line of North Jackson Street; thence North 27° 48' East along said line a distance of 103.5 feet to the point of beginning; containing 2070 square feet.

4. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

5. That J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, and George Neuner, Attorney General of the State of Oregon, be and they are hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if any there be, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further resolved that the Attorney General of the State of Oregon and J. M. Devers, Assistant Attorney General and Attorney for the State Highway Commission, be and they hereby are requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

6. That this resolution be entered in full in the minutes and records of this Commission nunc pro tunc as of the eleventh day of September, 1944.

The Assistant Attorney brought up for discussion the policy adopted by the former Commission with respect to acceptance of offers of less than $250.00 to purchase properties that are not needed by the Highway Department. He advised that the former Commission set an amount of $250.00 as a minimum that it would consider for any such properties and inquired whether or not the

present Commission desires to continue such policy. He explained that quite frequently offers of lesser amounts are received for properties that are not worth $250.00 and suggested, in order to dispose of such properties, that the Commission reduce the minimum amount that it would consider for them. The Commission decided to do away entirely with the minimum amount. Motion to that effect was made by Commissioner Chessman, seconded by Commissioner Schaupp, and carried by the unanimous vote of the Commission.

The Assistant Attorney presented an offer from Lillian Barzee to purchase fragmentary portions of state-owned lots in Block 34, East St. Johns Addition to Portland. He advised that this property is located adjacent to the access road leading to the Oregon Shipbuilding Corporation in North Portland, and is of no value for highway purposes, being outside of the standard width right of way. The property, he said, is worth only $52.00, but Mrs. Barzee is willing to pay $250.00 for it in view of the minimum price set by the former Commission. The Commission deferred action in the matter pending inspection of the property by the Engineer and his recommendation.

The Assistant Attorney also presented the offer of E. R. Spackman to pay the sum of $82.00 for a small parcel of state-owned property situate adjacent to Interstate Avenue in Portland. He recommended sale of the property to Mr. Spackman if he will pay $100.00 for it and will accept a deed containing a clause prohibiting maintenance of billboards on the property. The Engineer concurred in the recommendation. The recommendation was approved by the Commission by unanimous vote.

The Commission had under discussion the proposed sale of a portion of the property in Eugene that was purchased from A. D. Jones in connection with the acquisition of right of way for a revision of the Pacific Highway between Eugene and Springfield. Mr. C. W. Parker, Right of Way Agent, who was present, advised that he has received an offer from Mrs. Lucy Martin, Eugene, mother of B. A. Martin, Locating Engineer for the Highway Department, to pay $500.00 for the area which lies between the revised railroad right of way and the south bank of the Eugene Power Company millrace. He pointed out that the former Commission paid $650.00 for this property, but in acquiring it also acquired an obligation to pay a portion of the cost of maintaining a bridge over the millrace, the immediate repair of which is estimated to cost about $1100. He gave as his thought that it would be to the advantage of the State to accept Mrs. Martin's offer, because it would eliminate any responsibility in connection with the bridge maintenance or repair; moreover, it would eliminate the expenditure of approximately $300 to destroy the morning-glory vines which now cover the property. He pointed out, however, that it would be necessary to give Mrs. Martin an easement for the use of an existing roadway connecting this property with the highway. The Engineer recommended acceptance of Mrs. Martin's offer. The Commission discussed the matter at considerable length and as a result authorized the sale of the property for the amount of the offer.

In this connection, Mr. Parker also presented the offer of Mrs. Martin to pay $400 for a small tract of land fronting on the highway south of the millrace. He pointed out that this is business property which could be used

to advantage for commercial purposes but Mrs. Martin has stated a willingness to accept a deed which restricts its use for residential purposes only. He recommended acceptance of Mrs. Martin's offer subject to the restricted use of the property. The Engineer and the Attorney concurred. The commission approved the recommendation by unanimous vote.

The Attorney brought up for discussion the exclusion of certain state-owned lands from the Klamath Irrigation District in Klamath County in order to avoid the payment of assessments. He recommended the filing of a petition with the district requesting such exclusion of the state's property. The Commission approved the recommendation and signed the petition on the following day.

The Assistant Attorney brought up for discussion a proposed settlement of a controversy with William J. Donovan and wife concerning real property which the Commission acquired sometime ago as right of way for a revision in the Willamette Highway across lands formerly owned by Frank E. Moore, who subsequently sold the property to the Donovans. He explained that the settlement with Mr. Moore included, among other things, payment by the state of an additional sum for the moving of a residence located on the property, improvement of the detour road that was used during construction of the highway, construction of certain guard fences and assumption by the state of certain responsibilities with respect to a well situate on the premises and used by the owners in connection with the operation of their ranch. It now develops, he said, that the detour road is in a satisfactory condition for use by the present owners, who have agreed to relieve the State from future maintenance of the road and from the other obligations that are covered by the option if the State will pay them the sum of $367.50. He presented a form of agreement with the Donovans covering the matter and pointed out particularly that its acceptance by the Commission will relieve the State from any future responsibility or liability in connection with this property. He also pointed out that the agreement has already been signed by the Donovans and recommended approval by the Commission. The Engineer concurred in the recommendation. The Commission approved the recommendation by unanimous vote and thereupon signed the agreement.

The Assistant Attorney reported the status of negotiations for the establishment of a state park in the John Day fossil area. He advised that Mr. James Cant, one of the owners, refuses to sell his agricultural land for less than $5.00 per acre but will accept $2.50 per acre for the remainder. Also, that Mr. William Mascall, who also owns some of the property, will sell at the rate of $2.50 per acre provided the state will not take his bottom land. He pointed out that if the Commission pays these owners $5.00 per acre for their holdings, then, in fairness, it would be necessary to pay the other property owners the same rate which will add considerably to the total cost of the private holdings. The Commission considered it inadvisable to pay one owner more than others, and as a result of discussion instructed the Assistant Attorney to secure options insofar as is possible at the rate of $2.50 per acre. The action was unanimous upon motion of Commissioner Schaupp which was seconded by Commissioner Chessman. The Commission approved the action of the Assistant Attorney, offering present owners first refusal of grazing rights for a period of five years at the rate of one cent per acre per year.

In this connection the Assistant Attorney presented a form of petition directed to the federal government requesting the withdrawal from public entry of government-owned land within the proposed park area, consisting of approximately 1,609 acres. Commissioner Schaupp moved approval of the petition and that it be filed with the proper federal authority. The motion was seconded by Commissioner Chessman and carried unanimously. The petition was signed on the following day.

The Commission approved and signed a form of release terminating, as of September 21, 1944, Insurance Policy No. CA-24942 of Underwriters at Lloyds of London, Certificate No. 500 issued by Hansen & Rowland, Inc. of Oregon, covering snow removal operations on the Columbia River Highway through the Columbia Gorge, in view of the fact that this policy has been replaced by a new one.

The Commission confirmed the oral arrangement heretofore approved, disposing of the claim of Mr. and Mrs. Verne A. Nelson, who allege damage to their property situate adjacent to the Pacific Highway West (US99W) at Mile Post 5.0, Multnomah County. This claim arises out of the flooding of the Nelson property by reason of the faulty functioning highway drainage facilities. The Nelsons have accepted the sum of $100 as payment in full for their losses.

The Attorney requested instructions concerning signs that are being maintained by the Golden Gate Bridge and Highway District, San Francisco, California, on the Pacific Highway at Goshen and at Grants Pass directing travel to the Golden Gate Bridge. He said that the information contained on both signs is correct insofar as it goes, but is misleading in that the impression is given that the Pacific Highway is the only available route to the Golden Gate Bridge. He pointed out that under present laws, the Highway Commission is made responsible for the erection and maintenance of directional signs along public highways and gave as his thought that if the signs are to remain where they are then the district should be required to revise them so as to conform to the type and character to which the Commission believes the motoring public is entitled. After discussion, the Attorney was instructed to ask the District to change the signs to meet the Oregon requirements, otherwise to remove them from the highway right of way.

The Attorney brought up for discussion the question whether or not to make a charge for equipment rental, insurance, etc., in connection with future billings to secure reimbursement for expense of repairing highway facilities damaged by private parties. He advised that past practice has been to include such items but recently insurance adjusters have interposed objections to the payment of such expense alleging that it is not a just charge. Several cases are now pending, he said, which involve this feature, and in each instance the insurance adjuster has refused to approve the payment of rental on the state equipment that was used in connection with the repair work. In the discussion, it was brought out that the repair work undoubtedly would have cost much more if it had been done by contract. Chairman Banfield suggested that this feature should be brought to the attention of the insurance companies who should be asked how they preferred the work done, by state forces or by contract. The suggestion was approved by the Commission by unanimous vote and the Attorney was instructed to follow such procedure in the settling of future claims.

The Commission authorized the settlement of pending claims without charge for these particular items.

A request was presented from the Oregon Electric Railway Company for permission to erect and maintain at railroad grade crossings non-standard stop signs. The Attorney advised that the company has a lot of these signs on hand which it constructed before it realized that they were not standard, and did not intend to use them. However, due to existing conditions, it is practically impossible to obtain materials to construct standard signs so the company wants to use the signs that they now have as a temporary expedient, and has agreed to change them later on when standard signs are obtainable. The Engineer advised that inspection of the signs reveals that they differ somewhat from the standard sign in that they are smaller, are constructed of wood and do not contain the required wording. He added that the signs are not objectionable and recommended that the company be permitted to use them as a temporary expedient if it will add the words "Railroad Crossing" on the face of each sign, and will replace them with standard signs when requested. The Attorney concurred in the recommendation. The Commission approved the recommendation unanimously, subject to the condition that the signs are to be changed to standard signs as soon as the war is over.

The Commission had under discussion the adoption of a policy with respect to the construction of waiting rooms for bus patrons upon highway rights of way or on state property adjacent thereto. The Engineer recalled the policy adopted by the former Highway Commission, which prohibits the maintenance of such buildings on the highway right of way. He recommended retention of such policy, however, stated that he would offer no objections to the construction of such waiting stations on state property beyond the limits of the standard width right of way provided they are maintained properly and if the owners will agree to move them when requested. As a result of discussion, the Commission decided not to permit construction of such waiting stations on standard width right of way; however, authorized the granting of permits for their construction on state property outside right of way limits subject to the conditions mentioned by the Engineer.

The Engineer reported on his investigation of the claim of Mr. Ernfrid Johnson, who was injured when he fell into an open manhole on the right of way of the Pacific Highway near Oregon City. He advised that while there is some question as to the responsibility of the State, he is convinced that the State has an obligation and that Mr. Johnson is entitled to a reasonable compensation for his injuries and losses. He recommended acceptance of Mr. Johnson's offer to settle his claim in full for the sum of $50.00. The Attorney concurred. The recommendation was approved by the Commission by unanimous vote.

The Engineer also reported on the results of his investigation of the request of Mrs. Charles Redmond for construction of a stairway and bus turnout on the Pacific Highway West (US99W) in front of her premises a short distance west of Portland. He presented a map showing the proposed development which, he said, would cost about $400 to build, using timber construction. The Attorney advised that the Commission is under no legal obligation to construct

the facilities, although it has the legal authority to do so if it wishes. He pointed out, however, that if the state constructs the facilities then it would be the state's obligation to maintain them and the state would also be liable in the event of accidents occurring. The Commission expressed disapproval at assuming such obligation, however deferred a definite decision until the following day, when Mrs. Redmond is scheduled to appear for a discussion of the matter.

The Commission had under discussion the appointment of a member of the Advisory Committee on Travel and Information Matters, to replace Mr. Ed Miller, Eugene, deceased. Commissioner Chessman suggested the name of Mr. William Tugman, Editor of the "Register-Guard", Eugene. The suggestion was approved by the Commission unanimously. The Secretary was intructed to notify Mr. Tugman of the appointment.

The Secretary presented a letter from the County Court of Klamath County requesting state maintenance of the Crescent Lake County Road from the Town of Crescent Lake to its connection with the Willamette Highway, a distance of about two miles, including snow removal. The Court points out that this is an isolated section of county road which the County cannot properly maintain without excessive cost and expense and advises, if the Highway Commission will authorize state crews to perform the maintenance and snow-removal operations, the County will reimburse the State for all costs incurred therefor. It was brought out in the discussion that this is the only road in the north end of Klamath County that the County is obliged to maintain and the cost to maintain it properly is excessive due to the fact that it is about 100 miles from the County's shops in Klamath Falls. The Engineer recommended, in view of these circumstances, approval of the County Court's request. After discussion, the Commission approved the recommendation by unanimous vote.

The Engineer reported on the suggestion of Fred G. Potter, Enterprise, for construction of a water-grade highway down the Grand Ronde River from Elgin, through the Town of Troy, to a connection with the Enterprise-Lewiston Highway at the Washington state line. The Commission considered that it would be impossible to finance the construction of such a highway for many years, particularly in view of the large expenditure that must be made to complete the Enterprise-Lewiston Highway to state highway standards; also, that even then the justification of this road would depend upon the volume of traffic that would use it. The Engineer was instructed to inform Mr. Potter accordingly.

A request was presented from School District No. 85, Springfield, Oregon, for sidewalk construction along the north side of the McKenzie Highway from Paramount Market, near the east city limits of Springfield, to its junction with the Emery County Road, a distance of about .4 mile, as an accommodation and safeguard for school children who are obliged to walk to and from school on this highway. The Engineer advised that this road carries a considerable volume of traffic, including numerous logging trucks, and that a hazardous condition actually exists for pedestrians. He estimated that it would cost about $400 to construct a sidewalk and recommended approval of the expenditure provided the property owners will donate right of way for the

same, there being insufficient room on the existing right of way to accommodate the walk. The Commission approved the recommendation unanimously.

Mr. Floyd Cook, Executive Secretary of Highway Traffic Advisory Committee, was present and reported a proposal by certain timber concerns to publicize the Martin-Decker weighing scales that they are using in connection with their logging operations. Mr. Cook advised that these companies are well pleased with the scales, the use of which, they state, has resulted in the delivery of more logs to the mills with less overloads than heretofore, and want to give the matter publicity if no objections thereto are offered by the Highway Commission. He particularly referred to the operations of the Hammond Lumber Company in Linn County and of the George Gray Logging Company in Clatsop County. He was instructed by the Commission to inform these companies that the Highway Commission has no objection to their bringing this matter to public attention provided the Highway Commission is kept out of the picture.

The meeting adjourned at 5:00 p.m. to reconvene the following morning at 9:00 a.m. in the Stock Exchange Room of the Imperial Hotel.

Portland, Oregon, October 24, 1944

The State Highway Commission reconvened in regular session at 9:00 a.m. in the Stock Exchange Room of the Imperial Hotel with all Commissioners, the State Highway Engineer, the Attorney and the Secretary present. Bids as follows for highway construction and purchase of property were opened and read by the Secretary in conformity with previously published notices, following which Chairman Banfield announced that awards would be made at 3:00 p.m. in the same room:

COLUMBIA RIVER AND MIST-CLATSKANIE HIGHWAYS
CLATSKANIE ROCK PRODUCTION PROJECT

Goodat Crane & Trucking Service, Portland	$24,120.50
+Rogers Construction Company, Dayton, Washington	24,755.00

The Commission had under consideration for approval resolutions from the city councils of the following cities and towns describing plans for the improvement of city streets with funds made available under the State Tax Street Fund Law (Chapter 371, Oregon Laws, 1943):

Bandon	Jordan Valley	Talent
Canyon City	Mitchell	Turner
Eagle Point	Phoenix	Umatilla
Gearhart	Port Orford	Wallowa
Gladstone	Richland	Yoncalla
Hermiston	Riddle	

The Engineer advised that he has examined the plans and has found them to be in conformity with the legal requirements and that they meet with his approval. Following discussion, the Commission approved the respective improvement programs and thereupon, by unanimous vote, adopted the following resolution relative thereto upon motion by Commissioner Chessman which was duly seconded by Commissioner Schaupp:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by this Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1944 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Bandon	$1,378.93	Port Orford	$1,036.94
Canyon City	428.51	Richland	348.85
Eagle Point	333.74	Riddle	293.92
Gearhart	438.13	Talent	523.28
Gladstone	2,237.33	Turner	568.60
Hermiston	1,102.87	Umatilla	508.17
Jordan Valley	376.32	Wallowa	1,150.94
Mitchell	300.78	Yoncalla	380.44
Phoenix	593.32		

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

City of Bandon - Seventh Street West, Cliff Street, Ogden Avenue, June Avenue, First Street North, Harlem Avenue, Caroline Avenue, Third Street East, Fillmore Avenue, Elmira Avenue, Oregon Avenue, Fourth Street West

City of Canyon City - Washington Street, Main Street, Park Street, Izee Street, Bridge Street, Clay Street

City of Eagle Point - 1st, 2nd and 3rd Streets and County Road in original plat of Eagle Point, Main Street, Rogue River Avenue, Cameron Avenue, and 3rd Street in Central Addition

City of Gearhart - First Street, Sixth Street, 11th Street, 12th Street, 13th Street, Cottage Avenue, Ocean Avenue, Marion Avenue and Hager Avenue

Gladstone - Hereford Street, Harvard Avenue, West Gloucester, Portland Avenue

Hermiston - Ridgeway Avenue, Gladys Avenue, Hurlburt Avenue Second Street East, Third Street East and First Street West

Jordan Valley - California Street and Blackaby Street

Mitchell - Nelson Street, High Street, Rosenbaum Street, and Folston Alley

Phoenix - Church Street

Port Orford - Washington Street, 11th Street, Idaho Street, 16th Street, Jackson Street

Richland - Main Street

Riddle - 4th Street

Talent - Gibson Street and "I" Street

Turner - B Street, 2nd Street, C Street, the unnamed street in front of the school, 5th Street, Sunnyside Road, 3rd Street, D Street

Umatilla - Railroad Avenue, E, F, and G Streets

Wallowa - Holmes Street, Storie Street, Alder Street, Spruce Street, Clairmont Street, Douglas Street, Fifth Street, First Street, and the old highway route

Yoncalla - 1st Street, Applegate Avenue, 4th Street, 5th Street, A Street, B Street, C Street, and D Street

2. That the type, plan and character of improvement proposed in the resolutions filed with this Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the fund to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the same.

5. This resolution shall be entered in the minutes and records of this Commission as of the 24th day of October, 1944.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them and the amounts allocated for each. After due consideration the Commission authorized and instructed the Engineer to make such surveys on various sections of the highways of this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Prospecting	1-1440	Baker & Grant	John Day Highway	1st - $ 100.00
Slide	10-1443	Douglas	2½ miles south of Tahkenitch River Bridge, Oregon Coast Highway	1st - $ 220.00

OCT 24 1944

SURVEYS (Cont.)

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Quarry & Stockpile	11-1416	Gilliam	John Day & Wasco-Heppner Hwy.	1st-$ 300.00
Prospecting	113-1429	Harney	Diamond Valley Sec. No. 441	1st-$ 300.00
Plans	15-1448	Jackson	Connection of Central Ave. to Front Street in vicinity of 12th and 13th Sts., Medford, Pacific Highway.	1st-$ 325.00
Quarry & Stockpile	30-1455	Umatilla	Old Oregon Trail, Hermiston and Lexington-Echo Highways	1st-$ 250.00
Quarry & Stockpile	130-1456	Umatilla & Union	Weston-Elgin and Wallowa Lake Highways	1st-$ 250.00

R/W	26-1476	Multnomah &Washington	Willamette Stone Park	1st-$ 75.00

Consideration was given by the Commission to the following requests for extensions of time within which to complete highway contracts:

Erickson Paving Company, Contract No. 2559, for grading and paving the Tongue Point Section of the Columbia River Highway in Clatsop County, requested an extension of time from December 31, 1942 to September 8, 1944 within which to complete this job. The company gave no reasons for failure to complete the project within the specified time limit. The Engineer advised that the contractor failed to complete the contract as originally planned because of labor difficulties and many slides that occurred during

the progress of the work. It was his thought that these reasons justify the granting of an extension of time without penalty and so recommended. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

D. C. & A. L. Williams, Contract No. 2663, for rock production on the Metolius-Redmond Section of The Dalles-California Highway in Deschutes and Jefferson Counties, requested an extension of time of 21 days, from August 31 to September 21, 1944, within which to complete this project. They alleged that their failure to complete the project within the specified time limit was occasioned by scarcity of labor. The Engineer advised that the reason given by the contractor for overrunning the time limit is correct, also, that the State has not been seriously handicapped by reason of the delay and has not incurred any extra expense for engineering supervision. He recommended that the extension of time requested be granted without penalty. The recommendation was approved by unanimous vote of the Commission.

In connection with the discussion of this subject the question of checking into the liability of the bonding company was considered. The Attorney advised that, as instructed by the Commission at the previous meeting, he has given this matter some study and it is his suggestion that contractors be required to request extensions of time and accompany the same with the written consent of the surety prior to the expiration of time limit specified in the contract, otherwise there is a possiblity that a bonding company in some instance may refuse to accept liability for claims incurred against the work after the specified time has expired. He gave as his thought that a contractor who does not secure an extension of time before the specified time limit has expired should be stopped from performance of any further work until this requirement is satisfied. The Commission approved the Attorney's suggestion upon motion by Commissioner Schaupp who moved that the Attorney's suggestion be adopted and that the matter be handled in such manner hereafter. The Attorney was instructed to outline in writing the procedure to be followed, for future guidance.

The Engineer reported that Contracts Nos. 2559, 2675, 2679, 2683, 2688 and 2690, for the construction of state highway projects, have been completed according to the requirements of the contracts of modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2559, with Erickson Paving Co., for grading and paving on the Tongue Point Section of the Columbia River Highway in Clatsop County; completed on September 8, 1944.

Contract No. 2675, with Western Rock Company, for resurfacing and furnishing crushed rock in stockpiles on the Rhea Creek- Rock Creek Section of the Heppner-Spray Secondary Highway in Morrow County; completed on July 10, 1944.

Contract No. 2679, with Babler & Conley, for furnishing crushed rock in stockpiles on the Beaver Marsh-Fort Klamath Section of The Dalles-California Highway in Klamath County; completed on September 18, 1944.

Contract No. 2683, with Western Rock Company, for furnishing crushed gravel in stockpiles on the Meacham-LaGrande Section of the Old Oregon Trail in Umatilla and Union Counties; completed on August 26, 1944.

Contract No. 2688, with Babler & Conley, for removal of detritus encroachment on the Oneonta Section of the Columbia River Highway in Multnomah County; completed on September 15, 1944.

Contract No. 2690, with Western Rock Company, for oiling Sheridan City Streets in Yamhill County; completed on August 24, 1944.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The County Court of Polk County represented by County Judge Herman Van Well and County Commissioners Fred Gibson and H. H. Brant came before the Commission regarding exchange of secondary highways at Camp Adair. The Engineer suggested the following changes:

That the Commission take over as a state secondary highway the new county road which was constructed along the north and west boundaries of Camp Adair from Monmouth to Pedee, about 12.9 miles in length, and turn over to Polk County for future maintenance that portion of the Kings Valley Secondary Highway No. 190 which extends east from Pedee, and that portion of the Dallas-Kings Valley Secondary Highway No. 191, which lies within the borders of Camp Adair, a total of 14.1 miles. By such an exchange, he said, the county would be assuming the maintenance of 14.1 miles of road and the state 12.9 miles, however, the state would also assume the obligation to complete the county road into Monmouth, which is estimated to cost about $46,000, together with the maintenance of such road, which is estimated to cost $10,000 annually. The county's expense, he said, would consist of repairing

the secondary highways that it would take over, which is estimated to cost $37,600, and maintenance of these roads which is estimated to cost $2600 annually. He pointed out that the secondary highways within Camp Adair were not deeded to the federal government when Camp Adair was constructed but are still on the state secondary highway system and are under the control of the State Highway Commission, so the Commission and the county have the legal authority to make the exchange if they so desire. He also pointed out that the Army was responsible for the damage to the secondary highways and there are possibilities that federal funds can be obtained to pay for the repairs. W. H. Lynch, District Engineer, Public Roads Administration, who was present, mentioned that the State is obligated to maintain the Monmouth-Bridgeport-Pedee Road if the county will not assume this responsiblity. The State Highway Engineer advised that action at this time is required because immediate repairs are necessary. He suggested if a decision cannot be reached at this meeting that the county be notified by letter to maintain the county road. Chairman Banfield gave as his thought that the State should not be required to assume the maintenance of the county road in addition to the secondary highways. Judge VanWell stated that the county is willing to exchange roads "even up" if the secondary highways are repaired, but the county is not willing to make the exchange unless the secondary highways are put back in their original condition. He agreed with Chairman Banfield that it would not be fair for the state to assume the obligation for maintaining all three roads.

In the further discussion of this matter, it was brought out that these secondary highways are in need of immediate repairs, that are estimated to cost about $5,000, and unless this work is done now the roads will not be passable this winter. Commissioner Chessman suggested that the state might make $5000 immediately available to the county for such purpose, pending conclusion of the exchange proposal. The suggestion was approved by Commissioner Schaupp and also by Chairman Banfield, who stated that the state's contribution would be in cash and that the county could spend it as it sees fit in the maintenance of the secondary highways under discussion. He pointed out, however, that by such contribution the state would be assuming a $51,000 obligation rather than $46,000 and the county $32,600 rather than $37,600, in the event the exchange of highways materializes. The County Court appeared favorably impressed with this proposition and agreed to give the Commission a definite answer later in the session. After retiring for a few moments for a private discussion of the matter, Judge VanWell reappeared before the Commission and reported that the County Court is agreeable to make the exchange on such basis, if the Commission will help the county in securing reimbursement from the federal government for the cost of repairing the secondary highways. The Commission agreed to do this, and it was understood that the entire matter would be covered by a written agreement between the county and state.

During the discussion of the foregoing subject question arose as to the Commission's agreement with the county with respect to the maintenance of county roads in the vicinity of Independence that were being damaged by trucking operations of State and Army contractors engaged in construction work at and near Camp Adair. The Engineer was instructed to report the status of the agreement at the next meeting of the Commission.

Mr. George P. Stadelman, Mayor of The Dalles, and Mr. O. W. Gustafson, Manager of the Port of The Dalles, appeared before the Commission regarding the adoption of a permanent route for the Columbia River Highway through The Dalles and the completion of the Lewis and Clark monument at The Dalles city limits. Mr. Stadelman advised that industrial development along the Columbia River frontage in The Dalles is being hindered because of the lack of definite information as to where the highway will be located, and urged the Commission to adopt a permanent location so development can proceed properly. He gave as his thought that the proper location for the highway is along the river frontage where it will bypass the city's business district. The Engineer advised that a location survey has not as yet been made through The Dalles, but two routes are under consideration, one of which is along the river frontage and the other below the bluff above the business district. He estimated that it would cost approximately $6,000 to make the survey, which, he said, would include investigations for a "through" highway and consideration of river-front development. He recommended that the Commission authorize the survey now to determine the facts. Chairman Banfield pointed out that monies available to the Commission are limited and there is a question whether or not sufficient funds will be available to undertake this project, taking into consideration the many projects that have been requested and the fact that it would take an enormous amount to satisfy everyone. He gave as his personal thought that the Commission should give preference to the reconstruction of the highway west of The Dalles before undertaking an improvement within the city. However, he added, the adoption of a location through The Dalles is important enough to justify a survey now, although the Commission will not commit itself as to when construction will be undertaken. Commissioner Schaupp concurred, stating that the people should know where the highway is to be located so they can develop their properties accordingly. The location survey was thereupon authorized by the Commission by unanimous vote.

Mr. Stadelman then brought up for discussion the matter of completing the Lewis and Clark monument. He advised that this work was started several years ago as a W.P.A. project and about $70,000 of city and government money was spent in connection therewith, but the job was not finished and in its present condition creates an eyesore which the city wants to eliminate. Estimates of cost to complete the job are now being prepared, he said, and the city will do the work if it is not going to be too expensive, otherwise the city will destroy the work already accomplished. He inquired whether or not the Commission would object if the city destroyed the present work. Chairman Banfield advised that the Highway Commission will offer no objections to the elimination of this eyesore. However, he wished it understood that the state will not contribute any funds toward the costs involved. Commissioners Schaupp and Chessman concurred.

A group representing the Recreational Resources Committee of the Portland Chamber of Commerce, consisting of Alfred A. Loeb, Chairman, H. E. Waterbury, John Carter, K. Wolfe, R. T. Moore and Art Kirkham, was present and discussed with the Commission matters pertaining to the establishment of a "Myrtle Tree Lane" along the Coos Bay-Roseburg Highway between Coquille and Myrtle Point, and the establishment of a small state park at the intersection of Willamette Meridian and Base Line just west of Portland. Chairman

Banfield explained the action taken by the Commission on the previous day with respect to the establishment of the "Myrtle Tree Lane". The Committee expressed its hearty approval of such action.

With respect to the establishment of the small park west of Portland, he advised that he contacted the chairman of the Board of County Commissioners relative to the construction of a parking area adjacent to Skyline Boulevard and gathered from the discussion that there is a question as to the county's authority to spend its money for this purpose in view of the fact that the area is not owned by the county. The Attorney suggested that this feature could be disposed of by deeding the parking area to the county. The Commission approved the suggestion and instructed the Engineer to prepare a description for insertion in the deed. The Attorney advised that he has prepared and forwarded to the Committee the deed transferring the park area to the state but it has not as yet been returned. Mr. Loeb acknowledged receipt of the deed and advised that he would have it signed as soon as possible. (Mr. Tom H. West, member of the Board of County Commissioners, appeared before the Commission later in the session and advised that the county would assume the obligation of preparing the parking area.)

Mrs. Charles Redmond came before the Commission in regard to the construction of a stairway and parking place for buses in front of her restaurant on U.S. Highway 99W a short distance west of Portland. She presented two petitions signed by numerous property owners of Multnomah County, endorsing her request. The Engineer pointed out briefly what Mrs. Redmond has in mind and advised that former Highway Commissions had never seen fit to approve such installations except in a very few instances years ago, when a few were installed as partial consideration in connection with right of way settlements. He exhibited a plan for the proposed stairway, which he estimated could be built for about $185.00 although an additional expenditure of about $100.00 would be required, he said, to install a light so the stairs would be visible during hours of darkness. The Attorney advised that the Commission is not legally obligated to construct such facilities although it has the authority to do so if the facilities are needed for the convenience and safety of the general public, but not for private gain. He pointed out that if the state constructs the stairway then it would be responsible for the maintenance of the same and would be liable if an accident occurred as a result of the presence of the stairway on the highway property. Chairman Banfield stated that he did not care to pass judgment on this matter until he has been informed fully as to the obligations and liabilities that the state would assume if the stairway were constructed. Commissioners Chessman and Schaupp concurred. The Attorney was thereupon instructed to advise the Commission fully with respect thereto.

The Engineer reported the need to post the Vine Maple Bridge over the Nehalem River, at Mile Post 103-03.75, Fishhawk Falls Secondary Highway, Clatsop County, for a maximum load limit of 10 tons in order to carry this structure over the winter. He recalled that bids for the repair of this bridge were received by the Commission on September 11, 1944, but were rejected, and he considers it inadvisable to re-advertise the project at this time, because he is fearful that high water in the river at this time of

the year will damage false work and increase the cost of the work. He recommended posting of the bridge for 10-ton loads until such time as the repairs are completed. The Commission approved the recommendation by unanimous vote.

The Engineer also asked the Commission to confirm the posting of two bridges over the Siletz River on the Siletz Secondary Highway for 5-ton load limits pending repairs that are now under way. The Commission approved such posting. The following resolution reducing the load limit on both highways was adopted by the Commission by unanimous vote upon motion by Commissioner Chessman, which was seconded by Commissioner Schaupp:

WHEREAS, the roads or highways hereinafter named have been designated and declared to be and are State Highways and have been improved and are being maintained by the State Highway Commission, pursuant to the laws of the State of Oregon as state highways;

AND WHEREAS, on each of the said state highways, and on all of them, there are located certain bridge structures which, in the judgment of the State Highway Commission, are incapable of safely carrying the traffic to which they are being subjected, and in order to protect said bridge structures against damage and injury and in order to safeguard traffic over said bridge structures it is deemed and is the judgment of the Highway Commission and said Commission finds that it will be for the best interests of the said bridge structures and each of them and of the traffic which uses the said bridge structures that the maximum weights now permitted and authorized by law be reduced;

AND WHEREAS, the State Highway Commission has, after due investigation, determined and found and it is the judgment of the Commission that the maximum gross loads which shall be permitted upon any single span of any of the said structures at any time shall be reduced and fixed as in this order provided.

NOW THEREFORE, the premises being in part as above stated and the State Highway Commission having as a result of due investigation found that the bridge structures above referred to and hereinafter designated are incapable of safely sustaining or supporting a total gross load in excess of that specified in the table given hereinbelow:

IT IS HEREBY ORDERED, that the total gross weight of combined load and vehicle which at any one time shall be permitted upon any single or individual span of the bridge structures hereinbelow designated shall not exceed the limits given and set forth hereinbelow. In computing the total weight of any single vehicle, the total gross weight of any trailer or trailers attached to said vehicle shall be considered as a component part of the total gross load and shall not be considered as a separate vehicle. This combined gross weight shall not exceed the limits given hereinbelow, to wit:

FISHHAWK FALLS SECONDARY HIGHWAY No. 103
103-03.75 "Vine Maple" Bridge over Nehalem River 10 tons

SILETZ SECONDARY HIGHWAY No. 181
181-20.66 "Ojalla" Bridge over Siletz River 5 tons
181-23.10 "Fuller" Bridge over Siletz River 5 tons

IT IS FURTHER ORDERED, that these rules and regulations as made and found by the State Highway Commission under the provisions of Section 115-394 O.C.L.A., shall be in full force and effect from the twenty-fourth day of October, 1944, until rescinded, modified or revoked by order of the State Highway Commission.

AND IT IS FURTHER ORDERED, that a notice be posted in a conspicuous manner and place at each end of the above-named bridge structures, so that said notice can be readily seen and read, which notice shall state plainly the limitations and prohibitions of the traffic hereby in this order determined and fixed.

AND BE IT FURTHER ORDERED, that a certified copy of this order be furnished to the County Court of each county in which any of said highways are located, and that a certified copy of said order be furnished the Superintendent of the Department of State Police for his information.

In this connection, the Engineer requested authority from the Commission to post for reduced loads bridge or other highway structures that are in a weakened condition and unsafe for traffic, without first securing the Commission's approval for such posting. He also requested authority to make minor repairs on such structures before consulting the Commission in order to restore the structures to a safe condition without excessive delay. The Commission approved the request and thereupon by unanimous vote adopted the following resolution with regard thereto upon motion by Commissioner Chessman, which was seconded by Commissioner Schaupp:

WHEREAS, for the purpose of insuring, in so far as feasible and practicable, safety to the general public, it is the opinion of the Commission that bridges and other highway structures should be frequently inspected, and when defects or other impairments are found or are otherwise disclosed prompt and effective measures should be employed for the purpose of correcting all such defects or impairments; and

WHEREAS, notwithstanding constant inspection and observation of bridge and other highway structures sudden destruction or substantial impairment is often caused by the movement thereover of excessive and unauthorized loads, thereby requiring the prompt imposition of restrictions with respect to load and speed limits pending the repair or reconstruction of the damaged structure; and

WHEREAS, oftentimes conditions with respect to damaged or impaired bridge structures are such that immediate consideration and action by the Commission is not possible, therefore for the purpose of properly safeguarding the public it is deemed by the Highway Commission necessary and proper that certain authority be vested in the State Highway Engineer and certain duties prescribed for his performance;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. The State Highway Engineer be and he hereby is instructed to make or cause to be made as often as good engineering and prevailing conditions require or warrant an inspection of all bridge structures on state highways, the results of which said study and inspections shall be reduced to writing and shall be preserved in the files and records of the Commission at Salem, Oregon

2. If upon inspection of any bridge or other highway structure a weakness, or structural or other defect is found to exist, or if, independent of any such inspection it is disclosed from or by any source that said structure is in a condition which in the opinion of the Engineer renders the same unsafe for the movement thereover of loads and vehicles of a type, size, dimension, description, length or weight or at a speed permitted under the laws of the State, then said Engineer shall promptly determine the maximum load and/or the maximum speed which in his opinion, based upon good engineering practice, should be permitted with respect to said structure, and said Engineer shall thereupon cause to be erected and thereafter maintained for so long a time as may be necessary adequate warning signs disclosing the maximum load which may be transported or moved over such structure and/or the speed at which such vehicle or load may operate.

3. If in the opinion of the Engineer, based upon known facts and upon approved engineering practice, the said structure is in a state of disrepair which renders the same unsafe for any traffic, then said Engineer shall immediately close said structure to all traffic and shall cause to be erected for such purpose proper and adequate barricades.

4. If by moderate and reasonable repairs such structure can again be made safe for normal traffic, then said Engineer shall proceed at once to make or cause to be made such repairs as in his judgment and opinion will be adequate to restore the said structure to its normal or to a safe condition. If, however, the damage or impairment to said structure is of such magnitude as to warrant major reconstruction work or the construction of a new facility, then the Engineer shall report such facts and condition to the State Highway Commission with such recommendation as he may deem appropriate and shall accompany the same with an estimate of the cost incident to the restoration or reconstruction of the said structure.

5. This resolution shall be entered in the minutes and records of the Commission as of the 24th day of October, 1944.

The Commission had under discussion the adoption of a resolution prohibiting the parking of motor vehicles along or adjacent to the Oregon Coast Highway in the Town of Gardiner and at the Schofield River Bridge south of Reedsport in conformity with the action taken by the Commission at a previous meeting. The following resolution was offered and adopted by the unanimous vote of the Commission upon motion by Commissioner Schaupp, which was seconded by Commissioner Chessman:

WHEREAS, it has been brought to the attention of the Commission by the State Highway Engineer that cars are being parked for long periods of time along and adjoining the Oregon Coast Highway at the following points: in the town of Gardiner and at the Schofield River Bridge in Reedsport; and

WHEREAS, it appears that the highway as constructed at said points is not of sufficient width to permit the parking of vehicles on the shoulder or adjacent to the shoulder and at the same time afford to the traveling public a necessary and reasonable degree of safety; and

WHEREAS, it is the opinion of the Commission that because of said conditions and facts the parking of cars along the highway within said areas should be prohibited so that there may be afforded reasonable safety to traffic;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively as follows:

1. That the parking of motor vehicles along or adjacent to the westerly side of the Oregon Coast Highway in the Town of Gardiner between Highway Engineers Station 621+00, M. P. 223.42 and Highway Engineers Station 626+75, M. P. 223.31 hereby is prohibited until such time as conditions may make possible the widening and reconstruction of said highway; and that like parking of vehicles on either side of said highway in the Town of Reedsport at the following points towit: on the easterly side of the highway from a point 500 feet north of the Schofield River Bridge to a point 500 feet south thereof, and on the westerly side of the highway from the north end of said Schofield River Bridge to a point 300 feet north thereof, hereby is prohibited for a like period.

2. That the Engineer be and he hereby is directed to place or cause to be placed at the termini of said areas and at such other places between said termini as in his opinion may be necessary appropriate signs warning the motoring public of the prohibition against parking within said areas.

OCT 24 1944

The Engineer reported a hazardous cross-road condition at Mile Post 18.65 on the Beaverton-Aurora Secondary Highway, such point being at the Clackamas-Marion county line. He advised that a considerable volume of traffic enters this intersection and that the sight distance in each direction is greatly impaired by brush and tree growth. It was his thought that traffic should be required to come to a stop before entering the secondary highway in order to reduce the possibility of accidents occurring, and recommended the adoption of an order to that end. The Commission approved the recommendation and thereupon adopted the following resolution with regard thereto upon motion by Commissioner Schaupp, which was seconded by Commissioner Chessman:

WHEREAS, by the provisions of Section 115-351, O. C. L. A., the State Highway Commission with respect to state highways is authorized to designate main-traveled or through highways or sections thereof by placing at the entrance thereto from intersecting highways signs or markers notifying drivers of vehicles to stop before entering or crossing such designated highway or highways; and

WHEREAS, the Highway Commission has heretofore, to wit: on the twenty-seventh day of April, 1943, adopted a resolution in which a large number of state highways have been declared to be and have been designated as through highways, and the Engineer was instructed to properly mark the same; and

WHEREAS, it is now the judgment and opinion of the Commission that the highway known and designated as the Beaverton-Aurora Secondary Highway has become a highway which carries a large volume of traffic, both local and through traffic, and by reason thereof and by reason of other conditions and facts it is the judgment of the Commission that in the interests of the general public said highway should be declared to be a through highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively, as follows:

1. That the Beaverton-Aurora Secondary Highway, otherwise known as Highway No. 141, hereby is declared to be and is designated as a through highway.

2. All traffic entering said highway over the Butteville County road where said Butteville County road is intersected by said highway at mile point 18.50 shall come to a stop before entering said State Highway No. 141.

3. That the State Highway Engineer be and he hereby is instructed to place, or cause to be placed, and thereafter maintain the necessary signs and markers to accomplish the traffic control and regulation contemplated by this resolution. Such signs as may be erected at said points of intersection shall conform to the types and standards heretofore approved by the Commission.

4. The Engineer is instructed to place such signs or markers as nearly as practicable at the place where said intersecting road meets a prolongation of the nearest property line of such through highway, and such signs or markers so placed or installed shall indicate or designate to all drivers of motor vehicles entering said highway from said intersecting road the place where the stop shall be made.

5. This resolution shall be entered in the minutes and records of the Commission as of the twenty-fourth day of October, 1944, and a duly certified copy thereof delivered to the Public Roads Administration, to the County Court of Clackamas County and to the County Court of Marion County.

The Engineer also reported a dangerous condition existing on the Sams Valley Secondary Highway where it passes through the military reservation known as Camp White. He advised that in April, 1942, the former Highway Commission ordered the closing of that portion of this highway for the duration, subject to the provision that upon advice, in writing, from the proper officer in charge of the cantonment that the closing of the highway no longer is necessary in the interests of the War Department, the Highway Commission would adopt a resolution declaring the highway open again for public use. He pointed out that the cantonment is not now being used by the Army to the extent and for the purpose which prevailed when that resolution was adopted and inquiry has been made of the commanding officer as to whether or not it is in the interests of the U. S. War Department that the closure be continued inasmuch as people are using the road through the cantonment area. The Army's reply, he said, is not definite and for that reason gave as his thought that the public should be warned as to the condition of the highway and the operations of the War Department. He suggested the erection of appropriate signs on the highway at the point where it crosses the boundaries of the reservation, calling public attention to the conditions and warning that travel beyond those points is at the traveler's own risk. The Commission approved the suggestion and thereupon by unanimous vote adopted the following resolution with regard thereto upon motion by Commissioner Schaupp, which was seconded by Commissioner Chessman:

WHEREAS, in response to a request made by an officer of the United States Army in charge of maneuvers at Camp White in Jackson County, Oregon, the State Highway Commission adopted a resolution on the thirtieth day of April, 1942, by which the Commission ordered that a portion of the Sams Valley Secondary Highway in said County be closed for the duration, but said resolution provided that "upon advice in writing by proper officer in charge of said cantonment that the closing of said section of said highway to public traffic is no longer in the interests of the United States War Department, then said section of said secondary highway shall be by resolution of this Commission declared open again for public traffic"; and

WHEREAS, it appears that the said cantonment is not now being used by the Army to the extent and for the purpose which prevailed when said resolution was adopted, but this Commission has been unable to obtain from the Army written or other advice that conditions now prevail which render safe the opening of said road for public traffic; and

WHEREAS, in response to an inquiry addressed to the Commanding Officer at Camp White under date of May 9, 1944, there was addressed to R. H. Baldock, State Highway Engineer, a communication dated May 22, 1944, over the signature of John W. Horsley, Lieutenant Colonel, FA, Executive Officer, Headquarters Camp White, Medford, Oregon, which contained the following information:

> "Travel over State Highway No. 234 across the Camp White military reservation has been permitted continuously, except when artillery firing was actually going on, at which times range guards were posted on either side of the impact area to stop traffic for safety reasons. In recent weeks there has been no artillery firing and traffic is now moving freely across the area. It is not known when the training program may again call for the use of the range and the exclusion of traffic during firing periods. But no objection is seen to the operation of a survey party along the road this summer, provided that they keep in close contact with this headquarters to receive notice of any change in the training program that might affect their safety."

AND, WHEREAS, inspection of said highway made by the Highway Department disclosed that said highway is in such condition as to make the same unsafe for public traffic, but, because of the fact that the Highway Commission has been unable thus far to obtain from the United States Army definite information with respect to the continuance or renewal of conditions which in the first place brought about the closing of said road, the Highway Commission has been unable to undertake any work looking toward the repair of the surface of said highway; and

WHEREAS, it is the judgment of the Commission that under existing conditions and circumstances the said road should be posted as unsafe for public traffic;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. The Highway Commission does hereby find and declare that, based upon the advice and report of the State Highway Engineer, the section of the Sams Valley Highway which is within the military reservation known as Camp White is unsafe for public traffic and should therefore be so posted.

2. The State Highway Engineer is hereby ordered and instructed to erect and thereafter maintain at each end of the section of

said highway which was heretofore closed to traffic appropriate signs or boards upon which shall appear in plain and legible letters the following words:

"Road Closed--Military Reservation--Travel beyond this point at own risk--Oregon State Highway Commission".

3. That this resolution be entered in the minutes and records of the Commission and a duly certified copy thereof sent by registered mail to the officer in charge of said camp, a like copy sent to the District Engineer, Public Roads Administration, and a like copy sent to the County Judge of Jackson County.

The Engineer requested instructions whether or not to press the Commission's claim against the Army Engineers for the rental of a pull-type grader which was placed at their disposal during the Central Oregon maneuvers in 1943. The bill, he said, amounts to only $16.56, but the Army refuses to pay it, giving as their understanding that the arrangement was that the Army Engineers would maintain certain roads if the Highway Commission would loan them the equipment with which to do the work. He gave as his thought that there may be some grounds for misunderstanding and suggested, in view thereof, that the Commission approve the cancellation of the claim in order to close the books on the subject. After discussion, Commissioner Schaupp moved that the claim be cancelled. The motion was seconded by Commissioner Chessman and carried by the unanimous vote of the Commission.

The Engineer reported briefly on the sale of obsolete equipment and scrap materials for which the Commission took bids on September 11, advising that practically all of the high bids received for such material were satisfactory and that he has sold it in conformity with authority granted him by the Commission. The Commission approved the Engineer's action in this matter.

The Commission also confirmed oral authority previously given to the Engineer to take bids in Salem on September 27, 1944, for the purchase of a P & H shovel, being one of the items for which an unsatisfactory bid was received on September 11. The Engineer advised that bids were received as advertised and, as a result thereof, the shovel was sold for an amount $2,150 higher than the high bid received for it on September 11. The Commission by unanimous vote confirmed the oral authority previously given to advertise this sale, and approved the sale of the shovel to the high bidder as reported.

In this connection, the Attorney presented a form of resolution for adoption by the Commission outlining a proposed plan for the receiving, reading and opening of bids at the Salem office of the Commission for sale of personal property in order to avoid loss of time in reading bids for such property at the regular meetings of the Commission. The Commission approved the proposed plan and by unanimous vote adopted a resolution relative thereto, as follows, upon motion by Commissioner Schaupp:

WHEREAS, in connection with the acquisition of real properties, the maintenance of shops, the construction, maintenance and betterment of highways, and the conduct generally of Highway Department business and activities there is acquired and accumulated much personal property which becomes obsolete, worn out, or for other reasons becomes economically unusable by the Highway Department; and

WHEREAS, by the provisions of Section 100-115, O.C.L.A., the Highway Commission is authorized to dispose of personal property, including equipment and materials which in the opinion of the Highway Commission are no longer needed, required or useful for highway purposes; and

WHEREAS, the law does not fix or prescribe any method or procedure to be followed in the disposition of such personal property but vests in the Commission authority to dispose of such property in such manner as "in the judgment of the Commission will best serve the interests of the State and will most adequately conserve highway funds"; and

WHEREAS, it is the judgment of the Commission that, unless special and particular circumstances warrant some other procedure, all personal property exchanged, sold or otherwise disposed of should be sold, exchanged or disposed of to the highest and best bidder as a result of a call for competitive bids; and

WHEREAS, it is further the judgment of the Commission that the interests of the State in connection with the disposition of personal property can be best served and the time and attention of the Commission kept free for regular business of the Department and for discussion with persons or delegations having business to bring before the Commission if bids for personal property offered for sale are received, opened and read at the Commission's office in Salem, Oregon;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Highway Commission, all members being present and voting affirmatively, as follows:

1. All peronal property belonging to the State of Oregon, acting by and through its Highway Commission, hereafter offered for sale, exchange or other disposition by the Commission shall be sold to the highest and best bidder as a result of a callfor competitve bids, except as may be otherwise ordered by the Commission.

2. When any personal property is by order of the Commission offered for sale, exchange or other disposition by the Commission a formal call for bids shall be published pursuant to the approved and adopted method, which call shall announce that bids will be received, opened and read at the office of the State Highway Commission in Salem, Oregon, at an hour and on a day fixed in said call.

3. At such time and place all bids received shall be publicly opened and read by the Secretary in the presence of the State Highway Engineer and the Chief Counsel, and thereafter all such bids shall be properly tabulated and submitted to the Highway Commission for consideration and for acceptance or rejection.

4. If the personal property offered in said call for bids involves property acquired in connection with the activities and functions of the Right of Way and Legal Department such tabulation of bids shall be accompanied by a recommendation by the Chief Counsel. Bids involving any other personal property so offered for sale shall be accompanied by the recommendation of the State Highway Engineer.

5. This resolution shall be entered in the minutes and records of the Commission and shall, until rescinded or changed, become the policy and procedure of the Highway Commission with respect to the sale, exchange or other disposition of personal property; provided, however, that the Commission may by special order under special or peculiar circumstances provide a different method or procedure for the sale, exchange or disposition of a specific or particular piece of personal property.

The Engineer reported an offer from Mr. M. G. Summerlin, Coquille, to pay the sum of $15.00 for an old, obsolete tidegate and a short section of corrugated iron pipe which have been stored at Coquille for a long time. He advised that this material is of no value whatsoever for highway purposes and recommended acceptance of the offer. The Commission approved the recommendation unanimously upon motion of Commissioner Schaupp.

A letter was presented from the Inland Navigation Company requesting the privilege of maintaining a radio aerial pole on the Interstate Bridge between Portland and Vancouver to improve radio communication with the company's boats operating on the Upper Columbia River. The Engineer recommended that the request be denied in order to avoid the establishment of a very undesirable precedent. The Attorney concurred in the recommendation. Motion was made by Commissioner Schaupp that the request be denied. The motion was seconded by Commissioner Chessman and carried by unanimous vote.

The Commission discussed the application of the West Coast Telephone Company for a permit to construct a telephone pole line along the west side of the Oregon Coast Highway between the Town of Gardiner and Lake Tahkenitch, in Douglas County. The Engineer advised that the east side of the highway has already been reserved for power line construction so is not available for communication lines in view of the Commission's policy which prohibits more than one pole line on either side of the highway. He also recalled the Commission's policy which prohibits the construction of pole lines on the westerly side of this highway if the facilities interfere with the ocean view. He pointed out that the highway, for the most part, along this section is more than a mile from the ocean and that a heavy stand of timber intervenes so that the scenic view will not be obstructed except for about 1000 feet just north of the Town of Gardiner and at Elbow Lake. He recommended, in view thereof, that the West Coast Telephone Company be permitted to construct its pole line along the

westerly side of the highway for the entire distance except at these two points. The recommendation was approved by the Commission by unanimous vote with the understanding that the action is not to be considered a deviation from its standard policy covering such matters.

The Commission had under discussion the delegation of authority to certain field employees to sign permits in behalf of the Commission covering emergency movements over state highways, involving dimensions and weights in excess of the legal specifications. It was pointed out that the only person now having such authority is the Commission's Secretary who, according to a recent opinion of the Commission's Attorney, cannot delegate it to others. The Engineer suggested that certain field employees be given similar authority in order to expedite the issuance of permits and to avoid delaying movements that are of an emergency nature. The Attorney advised that the Commission can legally grant such authority if it so desires. After discussion, the Commission approved the Engineer's suggestion and thereupon by unanimous vote adopted the following resolution with regard thereto upon motion by Commissioner Schaupp, which was seconded by Commissioner Chessman:

WHEREAS, pursuant to and within the meaning of Section 115-393, O.C.L.A., the Commission is authorized, after due investigation, to issue permits for the movement over state highways of any vehicle, article, property or thing having a combined weight in excess of that permitted by law or of a size or description not permitted by law upon such terms, rules, stipulations and conditions as the Commission may deem necessary or desirable; and

WHEREAS, in response to instructions given by the Highway Commission, the State Highway Engineer has made or caused to be made an inspection of the highways which constitute the State Highway system and as a result of such investigation said Engineer has determined what in his opinion is the maximum load which each highway can sustain without undue damage thereto, including structures thereon and without unnecessary hazard to the traveling public, and has also determined the overall length of vehicle and load which in his opinion may with safety to the traveling public be permitted to move over the several highways of the State or sections thereof; and

WHEREAS, the data and information obtained as a result of and in connection with such study and inspection of highways, together with the conclusions reached, have been made and are a part of the records and files in the office of the Highway Commission at Salem, Oregon, and are available for appropriate reference and application; and

WHEREAS, it appears that many of the movements for which permits are required are of emergency character requiring action at times when the Commission is not in regular or special session; and

WHEREAS, for the purpose of contributing to the orderly and speedy movement of traffic and materials, some of which are essential

to the war effort, it is the purpose of the Commission to make possible and to provide for the clerical administrative functions incident to the issuance of permits upon conditions and in conformance with requirements and limitations heretofore approved by the Commission; and

WHEREAS, for the accomplishment of such purpose the Commission deemed it advisable to adopt and approve standard forms of permits which may be used when permits are issued pursuant to and within the meaning of the said statute and within the scope and purpose of this resolution;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:

1. The forms of permits hereto attached, which for identification purposes are marked Exhibit A and Exhibit B, are hereby approved and adopted as the forms of permits to be used when permits are issued under the provisions of Section 115-393, O.C.L.A., as authorized by this resolution.*

2. When an application is filed for a permit under said law the State Highway Engineer shall examine the same and determine whether or not the equipment as to size, weight, description and overall length and whether or not the particular property, article or thing are such as can with due regard to the preservation of the highway involved and with due regard to the safety of the public be operated or moved over the highway or highways designated or any section thereof. If, as a result of such examination it be found by said Engineer that said movement is within the reach and purpose of this resolution and the terms of said statute, then a permit may be issued as provided herein.

3. Permits issued pursuant to the provisions and within the meaning of this resolution shall be issued in the name of the Commission, using for such purpose the appropriate attached approved form after the necessary and appropriate data and other information has been incorporated therein.

4. Any permit issued as provided herein shall be valid when signed for the Commission by any one of the following state highway employees:

*(The permit forms mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, and are further identified as being permit forms No. 215 and No. 250, and said forms by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

5. Each permit shall contain an express period of time for which the permit is valid.

6. In addition to the study and investigation already made or caused to be made by the Engineer of state highways and structures thereon, said Engineer shall from time to time make or cause to be made other and repeated inspections of said highways, together with all structures thereon for the purpose and to the end that the physical and structural conditions of the same may be known and the records with respect thereto kept current. The results of such repeated inspections shall be preserved in the files and records of the Commission at Salem, Oregon.

7. A fully completed and executed copy of each permit issued hereunder shall be filed and preserved in the office of the State Highway Commission at Salem, Oregon.

8. This resolution shall be entered in the minutes and records of the Commission as of the twenty-fourth day of October, 1944.

The Commission had under discussion a letter from the Oregon Chapter of the American Institute of Architects offering the services of that organization in the selection of architects to assist in the design of contemplated postwar construction work. The Commission evidenced appreciation of the offer, however, considered that the highway organization is now well equipped with competent men to perform such functions.

The Commission had under discussion the designation of officials who are to represent Oregon at the annual meeting of the American Association of State Highway Officials, in Cincinnati on November 27 to 30, inclusive. The following were authorized to attend such meeting at state expense, subject to approval by Governor Snell: Commissioners A. W. Schaupp and M. R. Chessman; R. H. Baldock, State Highway Engineer; J. M. Devers, Chief Counsel; and one other engineer to be selected by Mr. Baldock.

The oral authority heretofore given Richard Rosecrans, Engineer's Specialist, to attend a conference of engineers in Seattle from October 9 to 14 at state expense, for discussion of tests on suspension bridges was confirmed by the Commission.

The Engineer reported receipt of a suggestion from Mr. Fred C. Inkster, President of the League of Oregon Cities, that both the Highway Commission and the League might receive benefits if a committee were appointed by the directors of the League to work with the Commission in the solution of problems that are of mutual concern and inquiring as to the Commission's reaction thereto. The Engineer gave as his thought that advantages would be gained if such a committee were appointed and recommended approval of the suggestion. The Commission aproved the recommendation subject to the condition that the League's contact with the Commission should be through the State Highway Engineer and the Attorney except when major problems are involved.

The Engineer brought up for discussion a request from the Gilchrist Timber Company for permission to truck-haul logs directly across The Dalles-California Highway in the Town of Crescent. He advised that the company expects to haul loads that are larger and heavier than are allowed by the statutes; that the company's trucks are not licensed, and do not operate under special carrier permit; and that company does not pay a tax on the gasoline that is used in the trucks. He further advised that the company proposes to operate over a public street in the Town of Crescent which is under the jurisdiction of the County Court, and that the company has arranged with the County Court to operate its trucks over such street without the payment of fees and taxes, which is not legal according to a recent opinion of the Commission's Attorney. The Attorney advised that he is conversant with the facts in this case, and, in his opinion, the Commission cannot logically sanction the crossing unless the company complies with the statutory requirements. After considerable discussion, the Commission instructed the Engineer and the Attorney to ascertain whether or not the company is complying with the legal requirements governing their operations, and to tell the company to comply therewith if the investigation reveals that the law is being violated.

In this connection, the Engineer advised that a similar situation exists in connection with proposed operations of the Kinzua Pine Mills Company, directly across the Heppner-Spray Secondary Highway in Wheeler County. He was instructed by the Commission to proceed in this case as in the other.

The Engineer brought to the Commission's attention a dangerous condition that exists along the Wilson River Highway where logs are being removed

from steep hillsides above the highway. He said that falling trees and sliding logs create an unnecessary hazard for highway traffic, which is offered no protection at the present time, and recommended action by the Commission to correct the situation. The Attorney suggested that the company be ordered to protect the public, and, if the order is not obeyed, that the company's operations be entirely stopped by injunction. The Commission approved the suggestion and so ordered. The Attorney was informed that the Commission considers it his duty to take care of such matters automatically without first presenting them to the Commission.

The Commission had under discussion the setting of a date for its next regular meeting and decided unanimously to hold such meeting on Monday afternoon, December 18 and Tuesday, December 19, 1944. The Secretary was instructed to make the usual arrangements to hold this meeting in the Imperial Hotel, Portland.

The Commission also discussed the following items of unfinished business:

1. Request of Douglas County for state assistance in the maintenance of county roads that are being damaged by log hauling, and for designation of the North Umpqua County Road as a state secondary highway. The Engineer advised that his investigations are not yet complete so he is not ready to report at this meeting.

2. Sale of timber in Joaquin Miller State Park near Glennda. Lane County. The Engineer advised that a buyer has not yet been found for this timber. In this connection he reported an inquiry from parties by the name of Winter to purchase "down" timber, snags and a few live trees on the Wolf Creek Highway, a short distance west of the Washington-Tillamook County Line. He said that there are about 150,000 F.B.M. of fallen timber and snags and about 50 live trees that this party wishes to purchase, all situate on an area about ten acres in extent. It was his thought that this would be a good opportunity to get the highway cleaned up and recommended the sale of the timber to the highest bidder therefor, also; that he be authorized to advertise the sale for bids to be received in Salem prior to the next regular meeting of the Commission in accordance with the Commission's new policy. The Commission approved the recommendation.

3. Report on the cost to widen several points on the Coos Bay-Roseburg and Oregon Coast Highways to facilitate truck and trailer movements 60 feet in length. The Engineer advised that investigations reveal that the work on the Coos Bay-Roseburg Highway will cost about $40,000.00 and that on the Coast Highway will cost about $60,000.00, or a total of about $100,000.00 or more. The Commission took no action on this report.

4. Survey to determine ownership of a proposed park at Wallowa Lake. The Engineer advised that the survey will be made in the near future.

5. Status of proposed railroad grade separation project on Dewey Ave., Baker. The Engineer advised that this project was authorized by the former Highway Commission in January 1941 for construction in 1942, and was submitted to the Public Roads Administration for approval. However, such approval was not given at once because the Public Roads Administration did not care to approve it until January of the calendar year in which the money was to be expended. In the meantime the federal funds were "frozen" when the United States became involved in the war with Japan, so it has not been possible to proceed with the construction. He advised that additional right of way will be required which is estimated to cost about $4500, and that construction will cost about $150,000 based on estimated postwar prices. The Commission took no action on this matter.

Thomas H. West, Chairman, Board of County Commissioners, Multnomah County, was present and filed with the Commission a letter stating that Multnomah County will construct a parking space for automobiles adjacent to Skyline Boulevard, for the convenience of people who wish to visit Willamette Stone State Park, if the other conditions governing establishment of this park are satisfied. The Commission accepted the letter as satisfaction of its requirements with respect to this park.

Mr. West also discussed with the Commission the disposal of a pile of scrap material that was deposited on the right of way of US Highway 99W near Capitol Highway Junction in southwest Portland during one of the scrap drives. He advised that the material is of no value for the purpose intended and should be removed, as it is only and "eyesore" where it is, but no one seems willing to assume the responsibility to take it away. He gave as his thought that it would take about a week to clean up the site and suggested that the state might furnish a truck and derrick for this purpose. The Commission instructed the Engineer to discuss the matter with the County Commissioners.

The Commission recessed at 12:00 o'clock noon for luncheon and reconvened at 2:00 p. m. in the same room with the same persons being present and participating.

The Attorney brought up for discussion the Highway Department's claim against Giles Wagner, Mehama, Oregon for rental of a highway department grader which he took without permission and used for private purposes. He advised that the claim, which amounts to $109.00, represents a charge for rental at the standard rate but Mr. Wagner ignores requests for payment. He explained in considerable detail the facts surrounding the case (see correspondence in files for details) and requested instructions whether or not to sue Mr. Wagner for the states losses. After discussion, motion was made by Commissioner Schaupp that the Attorney be authorized to take court action to collect the amount of the claim. The motion was seconded by Commissioner Chessman and carried by the unanimous vote of the Commission.

The Attorney also brought up for discussion the matter of petitioning the Westland Irrigation District for the exclusion of certain state-owned lands situate within the district boundaries. He advised that the District is retiring some of its outstanding bonds and in doing so has incurred certain expense, a portion of which, $514.69, is chargeable to the Highway Department as owner of lands within the district. He suggested in order to avoid further expense of this nature, that the state lands be excluded from the district, and advised that he has a letter from the district stating its willingness to exclude the state lands if and when the current bill is paid. The Commission decided to take advantage of this offer and thereupon approved payment of the $514.69 now due. Commissioner Schaupp's motion to that effect was seconded by Commissioner Chessman and carried unanimously. The Attorney was instructed to take the necessary legal action to effect the exclusion of the state lands from the district.

The Commission discussed with the Engineer the bids received at the morning session for construction work and sale of property. The Engineer pointed out that the combination bid submitted by the Rogers Construction Company for the Clatskanie Rock Production Project and for surfacing and oiling the Clatskanie Army Works Access Road Project in Columbia and Clatsop Counties, based on the use of tar, at $53,019.00 is the low bid received for these jobs. He recommended award of both contracts to the Rogers Construction Company, when assurance has been received that sufficient federal funds are available to finance the access road job. The Commission approved the recommendation and thereupon referred the bids to the Engineer with authority to award both contracts to the Rogers Construction Company when such information has been furnished.

Discussion of the bids received for the Roseburg Access Road Project on the Pacific Highway and North Umpqua County Road revealed that of Chas. Shannon & Son, Roseburg, to be low at $50,954.00. The Engineer advised that the conditions governing the award of this contract have all been satisfied except that the county and the city have not yet executed the agreement covering the working arrangement. He recommended award of the contract to the low bidder when the agreement has been signed by all parties. The Commission approved the recommendation and referred the bids to the Engineer with authority to award the contract to Chas. Shannon & Son at their bid price when this condition has been satisfied.

In this connection, the Engineer requested instructions relative to awarding the contract for the construction of the bridge over Deer Creek on the Roseburg Access Road Project, bids for which were received by the Commission at its meeting on September 11, 1944. He recalled that the low bid was submitted by Harry I. Hamilton, Eugene, in the amount of $13,871.00, and that this bid was considered satisfactory at the time, but the award of the contract was deferred pending the result of bids received at this meeting for the construction of the grading and paving project. He recommended the award of this contract to the low bidder, Mr. Hamilton, when the city and county have signed the agreement covering this entire project. The Commission approved the recommendation and thereupon referred the bids to the Engineer with authority to award the contract when this condition has been satisfied.

Construction of a concrete pipe to replace an existing timber bridge on Nehalem Avenue in the City of Rockaway. The Engineer advised that only two bids were received for this job, that of Dolan Construction Company, Tillamook, being low at $1,941.00. He recommended award of the contract to the Dolan Construction Company, if the city will concur in the award and will pay the Commission, in advance, the amount called for in the written agreement covering the project. The Commission approved the recommendation subject to the condition that the city shall signify its concurrence in writing.

Sale of triangular tract of land in Block 22, Long and Lander Addition to Cottage Grove. The Engineer advised that only one bid was received for the purchase of this property, being that of the Signal Oil Company of Portland, in the amount of $2,155.00. He recommended acceptance of this offer. The Commission approved the recommendation unanimously.

Sale of tract of land adjacent to the Corvallis-Newport Highway, one mile east of Toledo. The Engineer advised that the Commission received no bids for the purchase of this property. He requested authority to negotiate the private sale of this property, subject to approval of the price by the Commission. The Commission approved the request by unanimous vote.

A letter was presented from County Judge Nelson B. Higgs, Harney County, requesting that an amount of $10,000 be included in the Commission's 1945 budget for improvement to the Princeton-Diamond Secondary Highway. The Engineer was instructed to bring this project to the Commission's attention at the next meeting when it is proposed to discuss the 1945 budget.

The Commission discussed a request from the State Board of Control for engineering assistance in the preparation of plans for a new state office building, which the Board proposes to construct under authority of Chapter 446, Oregon Laws, 1941. The Engineer advised that what the Board wants is a small amount of survey work which would cost about $300, and that the Board would pay this expense when actual construction of the building is authorized. He recommended approval of the request. The Commission approved the recommendation unanimously.

The Attorney reported a proposal offered by the Arch Cape Land Company for the cleaning up of its property adjacent to the Oregon Coast Highway just south of the Arch Cape Tunnel. He advised that the Company has stated its intention to accept the Commission's offer of settlement of the controversy, which includes among other things the removal of debris from some of the company's land, and has offered to have the work done by the company's contractor who is doing similar work on adjacent property, if the state will pay its proportionate share of the costs. The Attorney gave as his thought that the state would save money by accepting the proposition and recommended approval thereof. The Engineer concurred in the recommendation, which was approved by the Commission by unanimous vote.

In the discussion of this matter Commissioner Chessman inquired whether or not the state has received the deed from L. E. Donelson and A. F. Koppisch (D. & K. Lumber Co.) conveying land which the company agreed to give

to the state as part consideration for the purchase of state-owned timber in Short Sand Beach State Park and for the privilege of constructing a logging road across the park. The Attorney advised that the deed has been received but investigation reveals there are delinquent taxes against the property which the company refuses to pay, the company having been dissolved in the meantime. He inquired whether or not the Commission wishes to assume the payment of these taxes. He was instructed to report the amount of the taxes to the Commission at the next meeting when instructions will be given relative thereto.

The Engineer reported the results of investigations for a proposed bridge over the Willamette River on the Eugene-Coburg County Road, construction of which is included in Eugene's postwar highway program. He advised that the proposed site requires the building of a new connection with the Pacific Highway in Eugene that involves, on one location, the acquisition of right of way that will cost about $80,000. A portion of this expense, he said, would be chargeable to the City of Eugene, and a portion to the state if the Pacific Highway were relocated along Mill Creek. He recommended in view of the other obligations that the Commission now has in Eugene, the uncertainty that the city could finance its share, and the fact that an immediate decision is not necessary, that the taking of options for the right of way be deferred. The Commission so ordered.

As a matter of explanation the Engineer advised that the investigations now being made were authorized by the Commission some time ago and are limited to studies of alternate lines for a connecting road between the Pacific Highway in Eugene and the proposed county bridge over the Willamette River on the Eugene-Coburg County Road. He added that the investigations are not complete so he is not prepared to make a definite recommendation on the subject. He was instructed by the Commission to submit a written report when ready.

At 3:00 p. m. Chairman Banfield announced the following awards of contracts and sale of property, bids for which were taken at the morning session, the awards having been previously approved by the Commission by unanimous vote.

"Clatskanie Rock Production Project on the Columbia River and Mist-Clatskanie Highways, in Clatsop and Columbia Counties, and the Clatskanie Army Works Access Road Project in Columbia County. Bids for these projects were received separately and in combination. The tabulation of all bids reveals that the combination bid submitted by Rogers Construction Company, Dayton, Washington, in the amount of $53,019.00, based on the use of tar, is the low bid received. The next low bid for both projects was that submitted by D. F. Whittaker, Seattle, at $56,441, based on the use of aspahlt. There were four higher bids. The bid of Rogers Construction Company is satisfactory to the Commission; however, the award of the contracts has been deferred pending the satisfaction of certain conditions. The Commission has referred the bids to the Engineer with authority to award both contracts to the Rogers Construction Company, the low bidder, when these conditions have been satisfied.

"Roseburg Access Road Project on the Pacific Highway and North Umpqua County Road, Douglas County, involving grading and paving. Charles Shannon and Son, Roseburg, submitted the low bid on this project in the amount of $50,954. The next low and only other bid was that submitted by Salem Sand and Gravel Company of Salem at $53,919.50. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Charles Shannon and Son, when certain conditions have been satisfied."

In this connection Chairman Banfield also announced that the Commission has authorized the Engineer to award the contract for the construction of a timber log bridge over Deer Creek on the Roseburg Access Road Project in Roseburg, bids for which were received by the Commission on September 11, 1944, when the conditions covering the award of the grading and paving project have been satisfied.

"Construction of concrete curb on N. Ninth Street (Klamath Falls) Section of The Dalles-California Highway in Klamath Falls. Angelo A. Doveri, Klamath Falls, submitted the low bid for this project in the amount of $2,574. Tru-Mix Concrete Company, Medford, submitted the next low bid in the amount of $3,217.50. Clifford A Dunn submitted the only other bid in the amount of $4,095. The Commission has awarded this contract to Angelo A. Doveri, the low bidder.

"Replace an existing timber bridge with concrete pipe on Nehalem Avenue in the City of Rockaway. The low bid for this project was submitted by Dolan Construction Company, Tillamook, in the amount of $1,941. The next low and only other bid was that submitted by Vernie Jarl, Gresham, in the amount of $1,974.50. This project was advertised in behalf of the City of Rockaway. The low bid submitted by Dolan Construction Company is satisfactory to the Commission and the contract will be awarded to that company in the event that the City of Rockaway concurs. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder if the Rockaway City Council aproves the award.

"Sale of a tract of land in Cottage Grove. The only bid received by the Commission for the purchase of this property was that submitted by Signal Oil Company, Portland, in the amount of $2,155. The Commission has accepted this offer and has sold the land to the Signal Oil Company at its bid price."

W. H. Lynch, District Engineer, Public Roads Administration, who was present suggested a conference sometime during November among the Highway Commission, the Public Roads Administration and the U. S. Forest Service to arrange a program for forest highway funds that may become available next year. The Commission agreed to such conference but left it with the State Highway Engineer to arrange a definite meeting date sometime between the 13th and 16th of November.

Mr. Lynch also brought up for discussion the matter of constructing the two units of the Pacific Highway, viz, Steiwer Hill-Albany Section and the Coyote Creek-Grave Creek Section, which were disallowed by the War Production Board sometime ago on the grounds that there was insufficient labor and materials available for the work. He suggested that the Commission renew its application for such projects in view of improved conditions. The Commission instructed the State Highway Engineer to file the necessary papers with Mr. Lynch.

The Commission had under discussion the construction of the North Santiam Highway between Mill City and Detroit. The Engineer recalled the three-party agreement executed by the former Highway Commission, providing for this improvement, in connection with which the state is obligated to pay $100,000 annually until the obligation has been paid in full. It now appears, he said, that the War Department wants to expedite this project and has made inquiry whether or not the State would be willing to increase the annual payments to $300,000. The matter was discussed briefly, but action was deferred pending study.

The Commission approved and signed agreements, etc., as follow:

Petition directed to the Secretary of the Interior, Washington, D. C., requesting the withdrawal from public entry of certain lands situate adjacent to the John Day Highway in Grant County, and title thereto vested in the State of Oregon as a state park.

Petition directed to the Secretary of the Interior, Washington, D. C., requesting the appraisal of certain lands heretofore leased in The Cove State Park and value fixed so the sale to the state may be completed.

Petition for the exclusion of certain lands from Klamath Irrigation District.

Agreement with Verne A. Nelson and wife, disposing of their claim for damages arising out of the flooding of their property adjacent to the Pacific Highway West, Multnomah County, said property being known as the Englewood Motel at 10727 S. W. Pacific Highway, approximately Mile Post 5.0.

Rental agreement with Dewey E. Peterson, whereby the State rents to the Petersons a portion of the property acquired from Hudson D. Reeves and wife as right of way for a proposed revision in the Pacific Highway East, Marion County.

Bargain and sale deed conveying unto Jesse C. Plankinton and wife 0.4 acre of land situate adjacent to the Oregon Coast Highway in Lot 2, Section 2, Township 14 South, Range 12 West, W.M. Lincoln County.

Bargain and sale deed conveying unto M. F. Fry and Rozella Stalnaker 1.86 acres of land situate in the NE¼ of the SE¼ of the NE¼ of Section 33, Township 6 North, Range 35 East, W. M. Umatilla County.

Rental agreement with J. M. Gallaway, whereby Mr. Gallaway leases property acquired by the State from Jurgen Lafrentz and wife, in Lots 3 and 4, Block 54 of the recorded plat of North Plains, Washington County; said property lying southerly from the right of way boundary of the Wolf Creek Highway.

Agreement with William J. Donovan and wife, disposing of a right of way controversy.

Release terminating the insurance policy covering snow removal operations along the Upper Columbia River Highway. (New policy purchased)

Agreement with J. S. Fenwick and wife, disposing of a controversy concerning Mr. Fenwick's irrigation system, which was affected by the reconstruction of the I. O. N. Highway, Malheur County.

The meeting adjourned at 3:20 p. m.

Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

OCT 24 1944

Portland, Oregon, November 14, 1944

The State Highway Commission convened in regular session at 9:30 a.m. in the Rainbow Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner A. W. Schaupp arrived at 10:30 a.m.

The Engineer brought up for discussion a plan to improve the Schmeer County Road connection with U. S. Highway 99W (Denver Avenue), North Portland. He explained that this matter comes up at this time as a result of request from a Mr. Roy Anderson who is constructing a store building close to the intersection and wants permission to cut the concrete curb in front of the premises for the convenience of his patrons. The Engineer stated that this is a very dangerous intersection on account of the heavy travel along Denver Avenue and the impaired sight distance prevalent here; also that in his estimation the danger would be greatly increased if vehicular traffic were allowed to leave and enter the highway at this point. He pointed out that the Commission has tentative plans to widen Denver Avenue south of the Vanport undercrossing to connect with the Schmeer Road, which, when completed, will eliminate to a large extent the existing dangerous conditions inasmuch as traffic could then have access to Mr. Anderson's premises by means of a third lane. He estimated the cost to widen the highway between Schmeer Road and the present widened section near the Vanport City underpass at approximately $7,000.00 and suggested that now would be a good time to do the work before Mr. Anderson completes construction of his store building. He also pointed out that it would be necessary to acquire extra right of way about 25 feet wide for a distance of about 500 feet between these points. The Attorney advised that the property owner is entitled to a reasonable entrance to the highway from his property and in his opinion the Highway Commission could not refuse to let him have such entrance. The Commission discussed the matter at considerable length and as a result thereof authorized the Engineer to complete the survey and to advertise the project for bids when the right of way has been acquired. The Attorney was authorized to secure options for the right of way.

The Engineer discussed briefly with the Commission matters concerning which delegations are scheduled to appear before the Commission at this meeting, viz., programing of forest highway funds that were "frozen" when war was declared in 1941, and matters concerning the truck-hauling of logs over state highways. Action on these matters was deferred by the Commission until the delegations appeared.

The Attorney brought up for discussion a proposed settlement with the Westland Irrigation District for the purchase of a quarry site in Umatilla County.

He advised that the tract containes 13 acres situate adjacent to the Boardman-Stanfield Highway; also, that the Irrigation District refused to accept the Commission's offer to purchase the property so it was necessary to file condemnation proceedings, but the case has not as yet come to trial. He further advised that the District has now stated a willingness to accept the sum of $850.00 for the property, which is about $100.00 more than the amount of his offer, and recommended settlement on such basis, in view of the fact that such sum is less than the amount at which the property was recently appraised by two competent appraisers. The Commission approved the recommendation unanimously.

The Attorney also brought up for discussion the matter of leasing about 30 acres of land in Cape Arago State Park, Coos County. He advised that the tract is suitable for the growing of bulbs and that the State Parks Superintendent has received an offer of $25.00 per acre per year for a five-year lease of the property but questions the advisability of accepting the offer, in view of the fact that others in the same vicinity are paying as much as $80.00 per acre for similar land. The Commission decided that the rental rate should be established by competitive bidding and thereupon ordered that the lease of the land be advertised for bids to be received at the next meeting.

At 10:30 a.m. the Commission conferred with representatives of the Public Roads Administration and U. S. Forest Service with regard to the programing of forest highway funds which were "frozen" when the United States entered the war. The Public Roads Administration was represented by W. H. Lynch, District Engineer, H. J. Andrews, Senior Highway Engineer, and H. D. Farmer, Senior Highway Engineer. The U. S. Forest Service was represented by James Frankland, Acting Regional Forester. Mr. Lynch headed the group. He advised that cash in the amount of $1,386,000 is available to finance such a program and presented for the Commission's consideration a list of projects proposed therefor. After careful consideration of each individual project, mutual agreement was reached with respect to a sufficient number of projects to take up the funds available. The following letter directed to the Chief, Forest Service, and to the Commissioner of Public Roads, Washington, D. C., was thereupon signed by all parties concerned.

November 14, 1944

Chief, Forest Service,
Commissioner of Public Roads,
Washington, D. C.

Gentlemen:

A conference attended by representatives of the Oregon State Highway Commission, the Forest Service and the Public Roads Administration has agreed to recommend the following Forest Highway Program for the State of Oregon to be financed from funds authorized for the fiscal years 1942 and 1943.

Funds available (Balance in the State contingent)..... $1,386,000
Less Administration and Equipment (Approximately 10% of unapporopriated cash)..... 154,800

Cash available for program..... $1,231.200

In addition there are a number of projects cited in the following tabulation which were previously financed and approved by the Secretary for the fiscal year of 1941 or 1942 but which were never constructed. Most of these projects are carried herein for the purpose of recommending the necessary increases or decreases to adjust the funds to current estimates to construct.

LIST OF PROJECTS:

No.	Project	Probable Cost	Remaining In Present Authorization	New Funds Increases & Decreases	Remarks
3-B1	Oregon Coast Highway Grad., Surf. & Bit.Surf. Length: 2.0 miles	$160,000		$160,000	Schooner Creek to Siletz River
3-B2	Oregon Coast Highway Bridges Length: .09 mile	115,000		115,000	Schooner Creek & Drift Cr. Brs.
10-D1, E	Oregon Coast Highway Grad., Surf. & Bit.Surf. Length: 2.32 miles	405,000	$170,000	235,000	Port Orford Rocky Point
21-M	Willamette Highway Surf., and Bit. Surf. Length: 4.6 miles	105,000	87,800	17,200	Odell Lake Sec.
23-H3 I3,J2 K4,L3	Santiam Highway Surf. & Bit. Surf. Length: 15.5 miles	215,000		215,000	No.Santiam Jct.West
23-G5 H3,I3	Santiam Highway Surf. & Bit. Surf. Length: 12.2 miles		160,000	-160,000	to be cancelled.Replaced by proj. above.
23-K4, L3	Santiam Highway Slide Correction		45,000	-45,000	Cancel.Use funds to finance surfacing
25-A7	Mt. Hood Highway Bridge, Grading, Surfacing and Bit. Surfacing Length: 2.6 miles	295,000		295,000	Forest Bdry. Rhododendron Twin and Mile Bridges

NOV 14 1944

No.	Project	Probable Cost	Remaining In Present Authorization	New Funds Increases & Decreases	Remarks
27-A1	Ochoco Highway Grading and Bridge Length: 6 miles	$300,000		$300,000	End of State Construction-East.
30-A3, E1	Klamath Falls-Lakeview Highway, Grad.,Surf. and Bit. Surfacing Length: 5.2 miles	150,000	(F.H. 33,000) (Coop.23,000)	94,000	Completion Quartz Mt. East
36-A2	John Day Highway Surf. & Bit. Surf. Length: 5.2 miles	125,000	190,000	-65,000	Dad's Creek Dixie Summit
42-A1	Warm Springs Highway Grading Length: 6.9 miles	230,000	160,000	70,000	Wapinitia Hwy.-Forest Bdry.
	Total	2,100,000	FH 845,800	1,231,200	

OREGON COAST HIGHWAY

Grading, Surfacing and Bituminous Surfacing, Project 3-B1
Length: 2 miles

Bridges, Project 3-B2
Length: .09 mile

This project is divided into two contracts. One consists of the reconstruction of two existing untreated timber bridges over Drift Creek and Schooner Creek which have now reached the end of their useful life and must be replaced. The second contract provides for the necessary aproach grading, surfacing and bituminous surfacing from a point near Schooner Creek to the Siletz River.

Grading, Surfacing and Bituminous Surfacing, Project 10-D1,E
Length: 2.319 miles

A shorter section of this same project was approved for construction in the 1941 program but was never let to contract because of the developing war conditions. The project is now extended to include the reconstruction of some very bad alignment on the existing road and to connect with somewhat better existing construction at Rocky Point. The proposed work lies both to the north and south of the Hubbard Creek Bridge which was reconstructed in 1941 and 1942 as Forest Highway Project 10-D2. This structure is not useable until the work now recommended is completed.

WILLAMETTE HIGHWAY

Surfacing and Bituminous Surfacing, Project 21-M
Length: 4.568 miles

This project was approved in the fiscal year 1941 program, was let to contract and was cancelled before any actual construction began. It involves the surfacing of a section previously stabilized with pit run gravel which now requires a standard surfacing to make it suitable for travel. It is on one of the more important state highways.

SANTIAM HIGHWAY

Surfacing and Bituminous Surfacing, Project 23-G5,H3,I3 -- TO BE CANCELLED
Length: 12.2 miles

This project was approved in the fiscal year 1942 program but was never started due to war conditions. Several changes are now desirable which are incorporated in a new project hereinafter recommended. It is, therefore, recommended that the old project be cancelled.

Slide Correction, Project 23-K4,L3 -- TO BE CANCELLED

This project, approved in the fiscal year 1943 program was deferred in order to conduct further investigations. Since an adequate detour is available, it is recommended that the corrective work be postponed until after the war and the project cancelled to make the funds available for other work.

Surfacing and Bituminous Surfacing, Project 23-H3,I3,J2,K4,L3
Length: 15.5 miles

This project involves the surfacing and bituminous surfacing from the junction with the North Santiam Highway westerly to an existing bituminous surfaced section of the road constructed by the State. It involves the bituminous surfacing of Project 23-I2,J1,K3,L2 let to contract to the E. C. Hall Company in 1941 which was cancelled by Change Order No. 2 approved March 2, 1943, after having completed the surfacing and production of aggregates.

MT. HOOD HIGHWAY

Grading, Surfacing, Bit. Surfacing and Bridges, Project 25-A7
Length: 2.6 miles

This project involves the reconstruction of four bridges, namely Zig Zag, Mile Bridge and Twin Bridges, one of which is an untreated wooden structure in very poor condition and the others are of reinforced concrete but so narrow as to be extremely hazardous. There is also involved the reconstruction of the approaches to the several bridges and a relocation between the Forest Boundary and Rhododendron to eliminate some very poor alignment on the existing road. The relocation will eliminate the necessity of

reconstructing the Still Creek Bridge by crossing Zig Zag River below the confluence of the two streams.

OCHOCO HIGHWAY

Grading and Bridges, Project 27-A1
Length: 6 miles

The funds here recommended will continue a program of reconstruction on this cross-state route which, outside of the National Forest, has already been improved with Federal Aid funds (F.A. Project 175). The improvement of this section will open up a body of merchantable timber much needed in the war effort. It is the initial project in a long needed program of reconstruction of the present low standard road.

KLAMATH FALLS-LAKEVIEW HIGHWAY

Grading, Surfacing and Bituminous Surfacing, Project 30-A3,E1
Length: 5.236 miles

The funds recommended for this project are planned to complete the work initiated under Project 30-A2,E which was discontinued in 1943 due to war conditions. The contract is now in process of cancellation which when accomplished will leave approximately $33,000 of previously approved Forest Highway funds and $23,000 of cooperative funds to partially finance the proposed project. It is recommended that in addition to the new funds cited in the tabulation the balances above-mentioned be approved to assist in financing the project.

JOHN DAY HIGHWAY

Surfacing and Bituminous Surfacing, Project 36-A2
Length: 5.2 miles

Funds recommended are to finance a surfacing and bituminous surfacing project on sections of the road graded from Forest Highway, State and Federal Aid funds in the years just prior to the War. The surfacing on the present low standard road has deteriorated to such a degree that reinforcement is necessary and it is now proposed to place the metal on the newly constructed roadbed. A longer project having the same designation was approved in the fiscal year 1942 program for $190,000. The State has improved a short section of it and the balance at a reduced cost is recommended in this program.

WARM SPRINGS HIGHWAY

Grading, Project 42-A1
Length: 6.9 miles

This project was cleared in 1941 and 42 as Forest Highway Project 42-A. It is now proposed to finance the grading which will connect the Wapinitia Forest Highway and a section of improved road inside of the Indian Reservation previously improved with Public Lands funds.

Very truly yours,

NOV 14 1944

The Assistant Attorney requested authority to purchase certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with offers that he recommended in connection with each parcel. After careful consideration the Commission approved the purchase of the properties listed at the prices recommended and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed;

NOW, THEREFORE, BE IT RESOLVED that the several offers, or bases of settlement hereinafter enumerated be, and the same hereby are, approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

GARDNER RANCH-BERGER RANCH SECTION, WOLF CREEK HIGHWAY

6510-	Berger, Elise, Ernest Berger and Henry Berger Right of Way	10.3 acres *LUMP SUM SETTLEMENT	$4,250.00	Collins

MILTON-STATE LINE SECTION, OREGON-WASHINGTON HIGHWAY

10553-A	Markham, Octavia L. Right of Way	1,829 sq. ft. at 2¢	$ 36.58	Cozad
10551-A	Homan, Edward James Right of Way	1,811 sq.ft. at 2¢ cherry trees-3 at $15.00	36.22 45.00 81.22	Cozad

CIRCLE BRIDGE-HUG POINT SECTION, OREGON COAST HIGHWAY

10825-	Green, Margaret E. et al Right of Way	2.20 acres at $150.00 Cost of moving garage	$ 330.00 100.00 $ 430.00	Witt

NOV 14 1944

STEIWER HILL-MURDER CREEK SECTION, PACIFIC HIGHWAY EAST

11052- Fisher, Floyd E.	21.57 acres at $100.00	$2,157.00		
Right of Way	406 rods fence at $1.50	609.00		
	Anchor posts, gates, maintenance new fence, waiver access, advertising signs, severance damages,	2,626.50	Benson	
		$5,392.50	Parker	
10647-A McCourt, Estate James	.89 acre at $150.00	133.50	Benson	
Right of Way	waiver access, advertising, etc.		Parker	
10648-A Truax, H.B. and G. R.	1.44 acres at $150.00	216.00		
Right of Way	6 cherry trees, $10 each	60.00		
	waiver access, advertising, etc.		Benson	
		276.00	Parker	
10645-A Burkhart, John G.	0.44 acre at $100.00	44.00		
Right of Way	waiver access, advertising, etc.	56.00	Benson	
		100.00	Parker	
11045- Meeker, Olive A.	7.78 acres at $100.00	778.00		
Right of Way	9.94 acres at $50.00	497.00		
	2.34 acres at $25.00	58.50		
	fencing, posts, gates, waiver of access, advertising signs, damage severance, maintenance new fence, compromise	1,566.50	Benson	
		$2,900.00	Parker	
	State to pay for any growing crop at time of actual construction			

ASTORIA-NAVAL HOSPITAL SECTION, NEHALEM HIGHWAY

11531- Clatsop County

SUNSET TUNNEL-BUXTON SECTION, WOLF CREEK HIGHWAY

5234-A Sullivan, F. J. and Bessie M. Drain Tunnel	1.35 acres	LUMP SUM	$ 25.00	Collins

---

The Assistant Attorney brought up for discussion and requested instructions relative to the issuance of permits during the calendar year 1945 for the use of state-owned land, such as unused right of way and excess property acquired in connection with right of way transactions. He advised that it has been the practice for several years past to rent these properties on an annual basis until they are needed for state highway purposes and suggested that the practice be continued, at least during the year 1945. The Commission approved the suggestion by unanimous vote.

The Commission had under discussion the sale of a parcel of state-owned land at Grants Pass, to Mr. G. W. McLean. The Assistant Attorney advised that this tract contains only one-fifteenth of an acre and that Mr. McLean has offered to pay $275 for the same with complete restriction as to access to the state highway on which it fronts. He recommended acceptance of this offer. The Engineer concurred in the recommendation stating that the land is not needed for highway purposes. The Commission voted unanimously to sell the property to Mr. McLean for the amount which he offered.

The Attorney presented a form of revocable license prepared by the Army Engineers covering the storage of some 600 cubic yards of road building material now stock piled on a site formerly owned by the state but now contained in the Camp White Military Reservation. He advised that the United States acquired this tract by eminent domain but refused to pay for the removal of the material located thereon; also, that it is necessary to leave the material where it is because state forces and equipment are not available to move it. The license now before the Commission for approval, he said, simply covers the storage of this state-owned material on the Government's property

without liability on the part of the United States or its agency. He recommended acceptance of the permit. The Engineer concurred. The Commission approved the recommendation and thereupon by unanimous vote adopted the following resolution authorizing the Attorney to sign the acceptance of the permit on behalf of the Commission.

WHEREAS, in connection with Camp White Cantonment and reservation the United States acquired from the State of Oregon by eminent domain a tract of land owned by the State and referred to in said condemnation proceeding as Tract No. 254, Camp White Military Reservation; and

WHEREAS, at the time said tract was appropriated by the United States, the State Highway Commission had stockpiled thereon a quantity of roadbuilding materials which it was impossible to move; and

WHEREAS, there is still stockpiled on said Tract No. 254 approximately six hundred cubic yards of roadbuilding materials which are needed by the State, but which because of shortage of manpower and equipment the Highway Commission cannot move and store elsewhere at this time; and

WHEREAS, the United States has tendered to the State of Oregon, by and through its State Highway Commission, a revocable license to permit said materials to remain on said tract but without liability on the part of the United States or its agencies; and

WHEREAS, it is the judgment of the Commission that said offer of revocable license should be accepted;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Highway Commission that J. M. Devers, as Chief Counsel to the Oregon State Highway Commission, be and he hereby is authorized to sign for the Commission acceptance of said revocable permit or license.

BE IT FURTHER RESOLVED that this resolution be entered in the minutes and records of the Commission as of November 14, 1944, and a duly certified copy thereof attached to the said revocable license for delivery to Colonel John R. Young, F. A., Commanding Officer, Army Service Forces, Ninth Service Command, Headquarters, Camp White, Oregon, with appropriate acceptance noted thereon.

The Engineer presented the following statement showing the cost of truck inspection and weighing by state weighmasters as compared with revenues received from fines imposed by Justices of Peace for traffic law violations, covering the years 1940 to 1944, inclusive.

	1940	1941	1942	1943	1944*
Truck Inspection Costs	-----	$16,642	$44,203	$52,200	$64,150
Revenue - Traffic Violations	$30,292	$41,145	$47,054	$54,690	$80,000

*Estimated from reports to September 30, 1944

The Commission took no action on this report.

The Engineer also reported on his investigation of the Commission's agreement with Polk County covering the maintenance of county roads in the vicinity of Independence, as instructed by the Commission at the previous meeting. He advised that according to the provisions of the agreement the state is obligated to maintain the roads at state expense for the duration of the present war and six months thereafter. (See Miscellaneous Contract and Agreement #669) The Commission took no action in this matter.

The Engineer reported the award of the following contracts in conformity with authority previously granted him by the Commission, the conditions of the awards having been satisfied.

Roseburg Access Road Project on the Pacific Highway and North Umpqua County Road, in Douglas County. Bids received October 24, 1944. Contract awarded to Charles Shannon & Sons, low bidder, on October 26, 1944.

Deer Creek Bridge on the Roseburg Access Road Project, in Roseburg. Bids received September 11, 1944. Contract awarded to Harry I. Hamilton Company, low bidder, on October 26, 1944.

Construction of a 48-inch concrete pile culvert on Nehalem Avenue, City of Rockaway, Tillamook County. Bids received October 24, 1944. Contract awarded to Dolan Construction Company, the low bidder, on November 3, 1944.

Clatskanie Rock Production Project on the Columbia River and Mist-Clatskanie Highways in Clatsop and Columbia Counties. Bids received October 24, 1944. Contract awarded to Rogers Construction Company, low combination bidder, on November 3, 1944.

Clatskanie Army Works Access Road Project on County Roads, in Columbia County. Bids received October 24, 1944. Contract awarded to Rogers Construction Company, low combination bidder, on November 3, 1944.

The Commission by unanimous vote confirmed the award of these contracts as reported.

The Commission discussed a petition from users of the Weston-Elgin Secondary Highway requesting that this highway be kept free of snow and open for travel during the coming winter season. The Engineer pointed out the

scarcity of manpower and snow-fighting equipment; also, the fact that former Highway Commissions have never attempted to keep this road open during the winter months throughout its entire length because of the expense involved. After discussion the Commission ordered that every reasonable effort be made to keep the road open and if it appears that this cannot be done, then that the facts be reported to the Commission for further instructions.

In this connection the Engineer reported that snow conditions on the Mt. Hood Highway between Wapinitia Junction and Parkdale have become so bad that immediate closure of this road is required. He advised that the road does not carry much travel at this time of the year and requested authority to close it at once and to erect barricades. He requested similar authority with respect to the McKenzie Highway. The request was granted by the Commission by unanimous vote.

The Commission had under discussion the following requests for extensions of time within which to complete highway construction contracts:

Peter Kiewit Son's Company, Contract #2642 for grading, surfacing, and oiling the Monmouth-Pedee Section of the Bridgeport-Monmouth County Road and Dallas-Kings Valley Secondary State Highway, in Polk County, requested an extension of time from July 31 to October 10, 1944, within which to complete this job. They gave the following reasons for failure to complete the project within the specified time limit: Difficulties in obtaining labor and equipment required for the job due to war-time conditions, unsuitable weather in the spring of 1944 which handicapped grading operations, and shut-down of the work during the winter months as ordered by the Engineer. The Engineer advised that the reasons given by the contractor for overrunning the specified time limit are substantially correct. He further stated that the traveling public was not materially inconvenienced by the delay because the road for the most part is on new alignment. He recommended in view of the circumstances that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Rogers Construction Company, Contract #2668 for re-grading surfacing, and oiling the Hooker Creek-Jordan Creek Section of the Jordan Valley Secondary Highway in Malheur County requested an extension of time of 60 days, from September 30 to November 30,1944, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions, bad condition of the highway which delayed delivering the road equipment to the job, and the necessity to revise their operating schedule because of the insufficiency of suitable rock from a designated quarry. The Engineer advised that the reasons given by the contractor for failure to complete the contract within the specified time limit are substantially correct. He recommended in view thereof that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Adminis-

tration concurring therein. The Commission approved the recommendation unanimously.

Rogers Construction Company, Contract #2669 for grade widening, surfacing, and oiling the Jordan Creek-Scotts Butte Creek Section of the I.O.N. Highway in Malheur County, requested an extension of time of 60 days, from September 30 to November 30, 1944, within which to complete this job. They attributed their failure to complete the project within the specified time limit to bad road conditions which made it difficult to move in equipment, adverse weather, difficulties attributable to war-time conditions, and a change in the specifications necessitated by insufficiency of rock available from one of the quarries. The Engineer advised that the reasons given by the contractor for failure to comolete the project within the soecified time limit are substantially correct. He recommended that the extension of time requested be granted without penalty A letter was oresented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Northwest Development Company, Contract #2673 for rock production on the Medical Springs Section of the Medical Springs Secondary Highway in Baker and Union Counties, requested an extension of time of forty days from August 31 to October 11, 1944, within which to complete this job. They gave no reason for failure to complete the project within the specified time limit. The Engineer advised that the contractor had considerable trouble in operating its plant due largely to unfamiliarity with this type of work and poor crushing equipment. Also, that the contractor experienced trouble with the pit operations because of a great excess amount of fine material. The delay in completing the project, he said, did not inconvenience the public nor the state's oiling program. Moreover, the engineering costs for supervision were not increased because the engineers were engaged on other work in the vicinity at the same time. He recommended in view of the circumstances that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

M. C. Lininger & Sons, Contract #2685 for rock production on the Klamath Falls-Lakeview and Fremont Highways in Lake County requested an extension of time from September 30, 1944, to May 1, 1945, within which to complete this contract. They gave no reasons for their failure to complete the project within the specified time limit. The Engineer advised that the main reason for the contractor's failure to complete the project within the specified time limit was the lateness in starting the job due to the necessity to complete another job for the state on the Central Oregon Highway. The overrun of time limit, he said, will not inconvenience Highway Department oiling operations next season; neither will it increase the costs of engineering supervision. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

J. F. Johnston, Contract #2689, for repairing the bridge over the Wilson River on the Wilson River Highway in Tillamook County, requested an extension of time of twenty-one days, from September 30, to October 21, 1944, within which to complete this job. He attributed his failure to complete the project within the specified time limit to difficulties in securing labor and materials. The Engineer advised that the reasons given by the contractor for overrunning the time limit are correct, he being unable to obtain the necessary lumber because of competition with the Army and Navy which had higher priority for such material. He recommended that the extension of time requested by the contractor be granted without penalty. The Commission approved the recommendation.

A. H. Barbour & Son, Contract #2693, for painting the bridge over Coos Bay on the Oregon Coast Highway, in Coos County requested an extension of time of twenty-six days, from September 30 to October 26, 1944, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions. The Engineer advised that the contractor had a sufficient number of men on the job all of the time to have completed the work within the specified time limit had weather conditions been suitable, which they were not. He recommended in view of the circumstances that the extension of time requested be granted without penalty. The Commission approved the recommendation.

The Engineer reported that Contracts Nos. 2663, 2673, 2689, 2693, and 2695 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission.

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2663, with D. C. and A. L. Williams, for furnishing crushed rock in stockpiles on the Metolius-Redmond Section of The Dalles-California Highway in Deschutes and Jefferson Counties; completed on September 21, 1944.

Contract No. 2673, with the Northwest Development Co., for furnishing crushed materials in stockpiles on the Medical Springs Section of the Medical Springs Secondary Highway in Baker and Union Counties; completed on October 11, 1944.

Contract No. 2689, with J. F. Johnston, for repairs to Wilson River Bridge on the Wilson River Highway in Tillamook County; completed October 20, 1944.

Contract No. 2693, with A. H. Barbour & Son, for painting the Coos Bay Bridge; completed on October 26, 1944.

Contract No. 2695, with Johnston Painting Company, for painting Milwaukie Division Headquarters Building; completed on October 31, 1944.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission by unanimous vote confirmed the oral authority given the Engineer on November 4, 1944, to purchase from the Federal Government an Adams road grader for the sum of $250.

A letter was presented from Mr. Lewis A. McArthur, President, Oregon Historical Society suggesting the appointment by the Highway Commission of someone to represent the Commission on the Society's Committee on memorials. It was Mr. McArthur's thought that this committee would serve the Highway Commission satisfactorily in passing on historical monuments etc., and would eliminate the necessity of the Commission appointing a special committee for this purpose. After discussion Commissioner Chessman moved adoption of Mr. McArthur's suggestion and that Mr. H. G. Smith, Construction Engineer, be selected to serve on this committee. The motion was seconded by Commissioner Schaupp and carried unanimously. The Engineer was instructed to convey such information to Mr. McArthur and to ask him to furnish the Commission with the names of the other members of the committee.

The Commission discussed a letter from The Dalles Chamber of Commerce requesting adoption of the Trans-Columbia River Interstate Bridge report, and the design and construction of the proposed bridge in The Dalles at the earliest possible time. The Commission took no action on this matter due to the fact that the report is still being studied and the Commission is not yet ready to pass on it.

A letter was presented from W. McDaniels, Klamath Falls, requesting permission to move a house, thirty feet by thirty-six feet in dimension, over The Dalles-California Highway for a distance of about 500 feet, about three-quarters of a mile south of Fort Klamath Junction. Mr. McDaniels estimates that it will not take longer than fifteen minutes to move this building on the state highway, and states a willingness to comply with all of the rules and regulations that the Commission sees fit to specify with respect to this movement. As a result of discussion, motion was made by Commissioner Schaupp that the permit be granted. The motion was seconded by Commissioner Chessman and carried by the unanimous vote of the Commission.

The Secretary presented an application from The Texas Company for permission to drill test holes on certain state highways in connection with the company's investigations for oil. The Attorney advised that the company is now prospecting for oil on county roads in the vicinity of Newberg and wishes to extend the operations to the state highways in that vicinity. He explained that the drilling consists of test holes about sixty feet deep into which is placed a small charge of powder; the powder is exploded and the results of the concussion recorded on a seismograph recorder for the information of the company scientists in determining the possibilities of oil in that locality. The Engineer gave as his thought that it would be satisfactory to grant the company's request if the work is properly handled and highway traffic properly protected. After considerable discussion, the Commission approved the company's request subject to the condition that the company will furnish public liability and property damage insurance in sufficient amounts to protect the public, and that the operations are limited to only one section of highway at a time. The first operation is to be considered as an experiment to determine whether or not to extend the privilege to other highways. The matter was referred to the Attorney to prepare the permit, the Engineer to furnish the details.

The Engineer brought up for discussion the matter of designating a portion of Front Avenue, Medford, as a route of the Pacific Highway. He recalled that the former Highway Commission, in order to relieve the congestion of traffic on Riverside Avenue, the original route of the Pacific Highway through Medford, designated this street as a one-way traffic route for north bound travel and routed south bound highway traffic along Central Avenue. Such routing, he said, was approved by the Medford City Council and apparently was satisfactory from all standpoints except that business interests along Central Avenue objected to the noise created by trucks operating on that street. In order to eliminate this objection, he added, the City Council adopted an ordinance routing trucks along Front Avenue from Fourth Street to Eleventh Street which seemed to satisfy the businessmen but not the interstate truckers who allege that the routing jeopardizes their I.C.C. permits under which they are required to operate over the Pacific Highway, and Front Avenue has not been so designated. In order to overcome this difficulty, the Engineer suggested that the Highway Commission might designate this section of Front Avenue as a route for the Pacific Highway. If that were done, he said, the state would have to maintain the few blocks concerned and construct diagonal connections to Central Avenue which would not be very costly. The matter was discussed at considerable length, but action thereon was deferred by the Commission pending receipt of formal application from the City for such routing. The Engineer was instructed to secure such application in writing.

The Commission had under discussion the abandonment of the old right of way of the Willamette Highway between Goshen and Pleasant Hill where the highway has been reconstructed on permanent alignment. The Engineer advised that the old road for the most part is of no value for state highway purposes and recommended that it be turned over to Lane County for future maintenance as a county road if the County wants it. The Commission approved the recommendation and thereupon by unanimous vote adopted the following resolution with regard thereto upon motion of Commissioner Schaupp which was seconded by Commissioner Chessman.

WHEREAS, in order to afford a better alignment and a more satisfactory, safe and convenient highway for the traveling public the Highway Commission found it necessary to and did relocate a portion of the Willamette Highway in Lane County, Oregon; and

WHEREAS, by reason of said relocation and the construction of a highway thereover there were eliminated and made unnecessary as parts of the permanent highway right of way of said highway certain sections which are more particularly defined and described hereinafter in this resolution and are shown on the map attached hereto; and

WHEREAS, there were also eliminated certain sections of said highway which will no longer be within the highway right of way proper but ownership and possession of which are retained by the State and which are more particularly defined and described hereinafter in this resolution and are shown on the map attached hereto; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as parts of said highway the segments or sections hereinafter designated; and

WHEREAS, it appears that some segments or sections of said highway which are eliminated as parts of said new location must be maintained as a public road for the service of people residing thereon, and other parts retained by the State for public use; and

WHEREAS, the County Court of Lane County has indicated a willingness to take over the said sections or segments needed for local use and maintain the same as a county road for the service of people living thereon;

NOW, THEREFORE, the premises being in general as stated above, it hereby is resolved by this Commission, all members being present and voting affirmatively as follows:

1. That the segments or parcels of land confined within the areas hereinafter described, which segments or parcels of highway right of way were formerly parts of the Willamette Highway but by reason of the relocation of said highway are no longer parts thereof, be and said segments or parcels hereby are abandoned as parts of the said Willamette Highway, and said segments or parcels hereby are permitted to revert to the status of a county road under the jurisdiction of the County Court of Lane County, Oregon. The segments or parcels of said highway right of way hereby eliminated as parts of the Willamette Highway and which hereafter shall be under the jurisdiction of the County Court of Lane County are described as follows, to wit:

All those certain parts of the old right of way of the Goshen-Pleasant Hill Section of the Willamette Highway lying on each side of the right of way required for the reconstructed Willamette Highway which lie between Highway Engineer's Station 75+20 and Highway Engineer's Station 86+45 on the easterly side of the reconstructed center line, and also between Highway Engineer's Station 87+20 and the east line of Section 30, Township 18 South, Range 2 West, W.M., on the southwesterly side of the reconstructed center line, and also between Highway Engineer's Station 202+50 and Highway Engineer's Station 240+10, on the northeasterly side of the said center line of said highway.

2. The following described parcel of land formerly within the right of way of said highway, but which now is eliminated therefrom by reason of the relocation of said highway, is to be retained by the State and title to and possession thereof shall remain in the State for such public purpose and use as the Highway Commission may deem appropriate, necessary and proper:

That certain part of the old right of way of the Goshen-Pleasant Hill Section of the Willamette Highway lying on the westerly side of the right of way required for the reconstructed Willamette Highway which lies between the east line of Section 30, Township 18 South, Range 2 West, W.M., and the intersection of the old right of way with the reconstructed line of the Willamette Highway at Engineer's Station 202+60 of said highway.

3. The following described section of the right of way of the Willamette Highway as heretofore located shall be retained for public highway purposes until the completion of the Willamette Highway project, and thereafter said right of way shall be permitted to revert to Lane County to be maintained by said County as a county road:

That certain part of the old right of way of the Goshen-Pleasant Hill Section of the Willamette Highway lying on the westerly side of the right of way required for the reconstructed Willamette Highway which lies between the intersection of the Pacific Highway and the south line of Section 14, Township 18 South, Range 3 West, W.M., and the intersection of the old right of way with the reconstructed line of the Willamette Highway at Engineer's Station 72+70.

4. That the Highway Commission's Chief Counsel be and he hereby is instructed to negotiate with the County Court of Lane County an agreement or understanding by which the County will take over the jurisdiction of said segments or sections of the Willamette Highway and will in the future maintain the same as a county road for public service.

NOV 14 1944

5. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof promptly delivered to the County Court of Lane County, together with a copy of said map or white print, for such action as said County Court may desire to take with respect thereto.

6. There is attached hereto a map or print marked Exhibit A and by this reference made a part hereof, which said map for identification purposes bears the signatures of C. B. McCullough, Assistant State Highway Engineer, H. G. Smith, Construction Engineer, and K. D. Lytle, Division Engineer, on which map or print there are shown colored in red the parcels or segments described under paragraph 1 on page 2 hereof, which parcels are to be eliminated from the highway right of way and are to revert to the County to be maintained as a county road; there is shown colored in blue on said map the segment of said highway described under paragraph 3 on page 3 hereof, which parcel is to be retained by the State until said highway project is completed, and thereafter said segment shall be permitted to revert to the County as herein provided; and there is shown on said map colored in yellow the parcel of land described in paragraph 2 on page 3 hereof, which parcel of land is to be retained by the State for highway and other public purposes. Said map bears date of October 5, 1944. *

*(Map filed in "Right of Way Abandonment and Retention" File - No. 121

The Secretary presented two resolutions from the County Court of Columbia County accepting jurisdiction over the following abandoned sections of state highways:

(1) Columbia River Highway between Engineer's Stations 35+50 and 101+25 south of Scappoose.

(2) The Treharne Section of the Nehalem Secondary Highway between Highway Engineer's Stations 99+00 and 144+50.

The Commission approved the resolutions and ordered them filed.

The Engineer reported that repairs to the "Ojalla" and "Fuller" Bridges over the Siletz River on the Siletz Secondary Highway in Lincoln County have been completed and that there no longer exists any occasion for maintaining the five-ton reduced load limit that the Commission ordered for these bridges at its last meeting. He recommended the adoption of an order by the Commission lifting such reduced load limit. The Commission approved the recommendation and thereupon by unanimous vote adopted the following resolution with regard thereto.

WHEREAS, on the 24th day of October, 1944, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on the following state highway bridges:

SILETZ SECONDARY HIGHWAY No. 181

181-20.66	"Ojalla" Bridge over Siletz River	5 tons
181-23.10	"Fuller" Bridge over Siletz River	5 tons

and

WHEREAS, subsequent to the passage of said resolution conditions have changed so that it is now no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limits set out in said resolution on the said state highway bridges;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the said bridges be and the same is hereby rescinded and cancelled as of this date, and the maximum load limit permissible on the said highway bridges hereafter shall be the maximum load limit provided by law; and it is further ordered that a certified copy of this resolution be furnished to the county clerk of the county in which said highway bridges are located, and that a certified copy of this resolution be furnished to the Superintendent of the Department of State Police for his information.

The Engineer requested authority to purchase three tractor loaders for use by maintenance crews. He estimated the cost at $2,700 each or a total of $8,100. The Commission approved the request on the condition that the purchase is made through the state purchasing agent as a result of competitive bidding.

County Judge Nelson B. Higgs of Harney County was present and asked the Commission to include in its 1945 budget an item of $10,000 to finance additional improvements to the Diamond Valley Secondary Highway between Follyfarm and Diamond, the improvement to consist of work similar to that performed this year north of Follyfarm. He advised that this road serves a most productive valley and is the only outlet available for the people of the district to market their produce; also, that the most important section to be improved is that over Smith Hill which is practically impassable several months of the year. The Engineer advised that this is one of the projects that will be considered by the Commission at its next meeting when the Maintenance and Minor Betterment Budget will be discussed. The Commission took no action on the matter.

The Engineer reported briefly on the following matters of unfinished business:

(1) Exchange of secondary highways with Polk County at Camp Adair. He advised that the agreement and resolutions to effect the exchange have been prepared and are now in the hands of the County Court for acceptance, and it is likely that they will be ready for approval by the Highway Commission at its next meeting.

(2) Establishment of "Myrtle Tree Lane" along the Coos Bay-Roseburg Highway between Coquille and Myrtle Point. The Engineer advised that the State Parks Superintendent is now preparing specimen trees as instructed by the Commission.

(3) Survey for proposed park at Wallowa Lake. The Engineer advised that this survey is now under way.

(4) Proposed development project in Champoeg State Park. The Engineer advised that the Parks Superintendent is contacting the Oregon Historical Society with respect to this matter, as instructed.

(5) Proposed sale of excess property in Portland to Lillian Barzee. The Engineer advised that he has not yet had an opportunity to inspect this property so is not ready to make a recommendation.

(6) Request of Harney County for the improvement of the Diamond Secondary Highway. The Engineer advised that this is one of the projects that he intends to submit to the Commission at its next meeting for c onsideration in the adoption of a Maintenance and Minor Betterment Budget for 1945.

(7) 1945 budget for highway funds. The Engineer advised that the budget is now being prepared and will be submitted to the Commission for adoption at its next meeting.

(8) Request of Douglas County for state aid in maintaining county roads that are being damaged by log hauling traffic. The Engineer advised that his investigations are not yet complete so he is not ready to report.

(9) Proposed stairway construction on the Pacific Highway West in front of Mrs. Redmond's restaurant a short distance west of Portland. The Attorney gave as his opinion that the responsibility for the stairs cannot be divided between the State and Mrs. Redmond and if the stairway is constructed by the State, then it is the legal obligation of the State to maintain it in a reasonably safe condition for use. He also stated that if the stairway is to serve Mrs. Redmond alone, then the Commission does not have legal authority to spend state money to construct it. On the other hand, if the stairway were constructed by Mrs. Redmond under a permit issued by the Commission, the facility would be the property of Mrs. Redmond and the maintenance of and responsibility for the stairway would then be Mrs. Redmond's obligation and under those conditions neither the Commission nor the Engineer would be liable, except as to the obligation to see that the facility did not become a hazard to highway traffic. He gave as his further opinion that the Commission is not legally obligated to build the stairway with highway funds unless it is essential to the

convenience and safety of the public. The Engineer advised that the proposed improvement would serve some fifteen or twenty families in this district. He suggested that if Mrs. Redmond is allowed to build the stairway and elects to do so at her own cost and expense that the State then oil the shoulders adjacent to the highway pavement so as to provide a parking place for automobiles. The Attorney stated his concurrence in the Engineer's suggestion. In the discussion that followed Chairman Banfield gave as his understanding that the State is not obligated to provide this facility or any part thereof. He suggested, however, that Mrs. Redmond be given a permit to construct her own stairway, if she wants to, provided she will build it in conformity with approved design and under the Engineer's general supervision, will install a satisfactory light so the stairs can be seen at night time, and will relieve the State from maintenance of both stairway and light, and obligation should accidents occur. He further suggested, if Mrs. Redmond builds the stairway, that the state then provide a parking area for cars. Commissioners Schaupp and Chessman approved the suggestion. The Commission thereupon ordered that Mrs. Redmond be so informed.

(10) Request of the Gilchrist Logging Company to truck-haul logs directly across The Dalles-California Highway in the Town of Crescent. The Attorney advised that he has written the company that the Highway Commission is without legal authority to grant the permit that they request and is of the feeling that permits in the same category heretofore issued by the Commission should be cancelled; further, that the company has replied to the effect that they are considering the advisability of building their own private road up to the highway so as to avoid using any public road or street. He said, if the company carries out this plan then it would need a permit from the Highway Commission simply to cross the state highway. After discussion the Commission referred the matter to the Attorney to work out a solution of the problem that will be satisfactory from all standpoints.

(11) Question of payment of delinquent taxes against property acquired by the State from the D. & K. Logging Company, Seaside. The Attorney advised that the delinquent taxes amount to $276.22. He recommended payment of the same by the state in view of the fact that the D. & K. Logging Company has been dissolved and no longer can be held responsible for payment. The Commission approved the recommendation unanimously, it appearing that the land is worth at least the amount of the unpaid taxes.

(12) Report on studies made by the Engineer incident to the post-war highway plans of the City of Eugene. The Engineer advised that he is not yet ready to make a complete report on this subject.

The Commission recessed at 12:00 noon and reconvened in the Stock Exchange room of the Imperial Hotel at 1:30 p.m., with all Commissioners, the State Highway Engineer, the Attorney, and the Secretary present.

The Commission conferred with the following representatives of the logging and lumbering industries who were present at the invitation of the

Commission for discussion of matters concerning the trucking of logs over state highways:

Representing the West Coast Lumbermen's Association:

Orville Miller, Ex-President, Portland
J. R. Blunt, Manager Columbia Valley Section, Portland, representing Col. W. B. Greeley, Secretary-Manager, Seattle

Representing Willamette Valley Lumbermen's Association:

H. J. Cox, Secretary-Manager, Eugene

Representing Western Pine Association:

Stewart Moir, Forester, Portland

Representing Columbia River Loggers Association:

George S. Gray, Seaside

Representing Timber Operator's Association:

Roy A. Gould, President, Mayfield, Washington

Representing Pacific Northwest Loggers Association:

Lloyd Crosby, Manager, Portland Section
Chet Sorensen, Portland, representing E. T. Clark, Secretary-Manager, Seattle

Representing Pacific Logging Congress:

M. Wishnant, Secretary, Portland

Representing Trucker's Association:

Hon. J. S. Greenwood, State Representative, Wemme

Representing Hammond Lumber Company:

H. C. Patton, Portland

Representing State Forestry Department:

N. S. Rogers, State Forester, Salem

Chairman Banfield opened the conference by stating that the Commission has called the meeting simply for a round-table discussion of matters of mutual concern; that the Highway Commision is not antagonistic toward log haulers or other haulers but it does have a duty to the State as a whole because public money

is being used to build and maintain highways and the Commission considers that it is its duty to protect the public's interests. The Highway Commission, he said, is endeavoring to administer the state highway law in a manner that it considers was intended and at the same time is doing everything it can to help the logging operators get the logs to the mills; however, there is a limit to what the Commission can do with the funds, manpower, and equipment that are available. Commissioners Schaupp and Chessman endorsed the remarks of Chairman Banfield. There followed a general discussion of log hauling problems.

Mr. Miller inquired as to the Highway Department record of overloads during the last two or three months. It was his thought that the percentage of overloads might have dropped because tires are becoming extremely hard to obtain and the operators are holding down their loads in order to conserve them. This is being done, he said, by carrying fewer logs, shortening the hauls, and by using a new type of scales in the woods. He was informed by the Engineer that of all the trucks weighed only between two percent and three percent were observed with overloads. Chairman Banfield stated that the records disclose that by far the greatest percentage of log haulers are responsible and try to cooperate with the Highway Commission, but there are a few, commonly known as "gippos", who do not respect the rules and regulations and they are the ones that the Commission feels should be sternly dealt with. These few, he said, are consistent violators and are the operators who are damaging the highways. He suggested that the industry could be of greater assistance to the Commission in taking care of them. He pointed out that the Commission could cancel the permits of these operators, but does not wish to go to that extreme. On the other hand the Commission believes that the industries can help to solve the problem more than it has in the past and suggested the adoption of standards by the industries which the Commission could back up. Mr. Miller admitted there is room for education by the industry and asserted that the industry would be glad to cooperate with the Highway Commission in every way possible.

Commissioner Schaupp inquired as to the position of the log haulers, do they think that they should be allowed to haul more logs or is it a matter of the individual loads? Mr. Miller replied that each log hauler feels that he should be allowed to haul bigger loads. Some of them, he said, deliberately overload, but in general the violations are unintentional.

Mr. Patton recited the experience of the Hammond Lumber Company since August when the Company installed a new type of scales for the purpose of weighing each log as it is loaded on the truck. Since the use of the scale was started, he said, the Company has had only one gross overload on all of its trucks, and at the same time has been delivering more logs to the mill, but its main difficulty is in the axle overloads. He added that the Company is trying its best to comply with the wishes of the Highway Commission but finds it extremely difficult to gauge the weight on the individual axles. He suggested that the Commission might allow a 2000 pound axle tolerance which, in his estimation, would eliminate entirely all overloads and in turn would relieve the haulers from payment of fines. In the discussion of this feature it was brought out that no state in the West allows more axle weight than does Oregon.

Also, that it is the axle overload that is causing the most damage to the highway surfaces, so an additional tolerance could not be allowed.

The basis of imposition of fines was also mentioned, and in this connection, the Commission's Attorney advised that under present laws the Justice of Peace sets the amount of the penalty. He pointed out, however, that the legislature has authority to make new rules and to establish a sliding scale of fines if it so desires, and if it did so then the Justices of Peace would have to comply therewith.

The question of single-log loads was brought up for discussion by Mr. Greenwood, who gave as his thought that a Justice of Peace should not fine an operator who is apprehended for overload when only one log is being carried on the truck. It was explained to Mr. Greenwood that the Commission now has a special ruling with respect to single log movements and issues permits for such movements up to the extent that the highway facilities will stand; also, that the permits are limited to a certain section of highway and can not be issued on a blanket permit basis because of the difference in the carrying capacity of the highway sections.

Mr. Crosby expressed appreciation for the cooperation that the industry has received from the State Highway Commission during the past year in connection with log hauling. He advised that insofar as he knows the industry has no cause to complain.

Mr. Gould spoke in behalf of the independent log hauler whose troubles for the most part, he said, can be attributed to the difference between the size of a log as determined by log scale measurement and the actual wood content of the log. He declared that the problem of loading cannot be solved without giving consideration to this feature since under the log scale measurement plan the hauler actually delivers a considerable quantity of wood for which he receives no compensation. Particularly is this true, he added, in the case of small logs where the difference is much greater than where large logs are hauled, and as a consequence the hauler is inclined to protect his interests by overloading, which could be avoided if the rate of pay were properly adjusted. He suggested that the rate of pay for the hauling of logs be set by the State Highway Commission, which system, he alleged, is now being used in the State of Washington. He was informed by Chairman Banfield that the Highway Commission is not particularly concerned with the rate of pay but believes that to be a matter entirely between the log hauler and the industry. After further discussion, Chairman Banfield raised the question, what is to be done to the hauler who deliberately overloads? Commissioner Chessman added that the Highway Commission is not a law enforcing agency and has no jurisdiction over the State Police, that the Commission is sympathetic and is trying to cooperate with the industry in every way possible and to avoid penalizing the flagrant violators by canceling their permits. He suggested that it might be in order for the industries to appoint a committee to act as a liason between the industries and the Highway Commission for consideration of problems that are of mutual concern and to recommend penalties for imposition upon log haulers who do not respect the rules and regulations. Mr. Miller approved the suggestion in behalf of the industries. The suggestion was also approved by Chairman Banfield and

Commissioner Schaupp, whereupon Mr. Miller advised that such committee would be appointed by the industries.

The conference was concluded at 3:00 p.m. with appropriate remarks by Chairman Banfield.

The Engineer reported that a dangerous condition exists in the Town of Myrtle Creek, where log-haulers turn off the highway to deliver logs to the E. W. Picco Mill which is located at the west end of Fourth Street. He advised that some of the logs are brought to the mill from the north over the Pacific Highway and in making the turn onto Fourth Street the loads take up the entire street creating a very serious traffic hazard. A similar hazard, he said, exists where logs are brought into the mill over the Pacific Highway from the south, but in this case highway traffic is subjected to an additional hazard where the logging trucks enter the highway from Second Street, involving a right angle turn. He suggested that the log-haulers be required to maintain flagmen where the loads leave the highway at Fourth Street, and at the Second Street intersection if they wish to continue to enter the highway at such point, otherwise that the north bound loads be rerouted on a city street that will require only the crossing of the highway at Fourth Street. The Commission approved this suggestion and instructed the Secretary to notify all operators who are hauling logs to this mill in conformity therewith.

The Commission had under discussion the approval of a form of contract with the United States Department of Interior covering construction of an irrigation canal and laterals across The Dalles-California Highway (U.S. Highway 97) in Jefferson County. The Engineer advised that the contract as prepared is satisfactory from the engineering standpoint and recommended approval of the same. The Attorney advised that he has approved the proposed contract as to form. In view of these reports the Commission approved the contract by unanimous vote and thereupon signed the same.

The Engineer brought up for discussion a proposed exchange of a portion of the Crooked River-Paulina Secondary Highway for a county road in Crook County. He advised that the Bureau of Reclamation plans to construct a dam across the Crooked River which, eventually, will inundate several miles of the secondary highway, and in order to provide roadway facilities for the people residing in the upper reaches of the Crooked River the Reclamation Service has arranged with the Crook County Court for a roadway connection across Coombs Flat, southeasterly from Prineville. This road, he says, has already been built and inspection of the same reveals that it has been constructed to proper standards except that it is in need of additional surfacing to bring the road to a standard comparable with the present highway. He estimated the cost of such surfacing at $30,000, and advised that the expense should be paid by the Reclamation Service. He further advised that according to the information at hand, the Crook County Court has agreed to the exchange of roads but pointed out that the County has an implied agreement with the Ochoco Timber Company for the maintenance of the road for about three years, during which time the Company is to be allowed to truck-haul logs over the same without regard to weight. He gave as his thought that the exchange of roads is to the

State's advantage and recommended approval thereof when the County's agreement with the Ochoco Timber Company has been satisfied, provided the Reclamation Service will see to it that the road is turned over to the State in a condition comparable with the existing road. Following discussion of this matter, the Commission approved the arrangement subject to the condition that the exchange shall not be made until such time as the Coombs Flat County Road can be turned over to the State without encumbrance of any kind. The Commission ordered that the arrangement be covered by written agreement among the parties concerned.

The Engineer presented a list of Rock Production projects, as follows, which he requested authority to advertise for bids to be received at the meeting scheduled to be held on December 19, 1944, so that material will be available for use in connection with special maintenance jobs during 1945.

Section	County	Quantity	Est. Cost
Shutler-Condon	Gilliam	10,300	$ 32,000
Union	Baker & Union	8,000 S. Piles	
		1,500 Resurfg.	30,600
Hermiston	Umatilla	15,400	43,400
Elgin	Umatilla & Union	11,000	32,900
Austin Jct.-Unity Jct.	Baker & Grant	6,000	21,000
Newport	Lincoln	12,120	31,500
Hendricks Br.-Nimrod	Lane	8,500	26,000
Sandy-Govt. Camp	Clackamas	7,600	26,700
Quartz Cr.-Sunset Camp	Clatsop, Till. Col. & Wash.	12,000	33,000
		Total.	$277,100

He explained that these jobs are included in the $1,000,000 Special Maintenance and Rock Production Budget which he plans to present to the Commission for adoption at the next meeting. After discussion the Commission by unanimous vote authorized the Engineer to advertise these projects for bids to be received at the December meeting.

The Engineer reported on the cost to widen two curves on the Oregon Coast Highway at Mile Post 322.0 and at Mile Post 326.71, in the vicinity of Brush Creek, Curry County, so as to permit movement of a combination of vehicles sixty feet overall in length without taking up more than one-half the traveled roadway. The widening work, he said, is required at this time particularly to facilitate the truck-hauling of gasoline into Gold Beach from Marshfield, which cannot be done under present conditions with equipment available without endangering other traffic at these two points. He estimated the cost of the widening work at approximately $10,000 and recommended that the expenditure be authorized. The Commission approved the project by unanimous vote.

The Commission discussed briefly a letter from Mr. Clyde Palmer, Condon, Oregon, urging improvement of the Cottonwood Grade Section of the

Wasco-Heppner Secondary Highway, in the Commission's postwar construction program. The Secretary was instructed to advise Mr. Palmer that the Commission is not in position at the present time to adopt a program for the postwar funds and cannot do so until Congress has acted on the pending postwar highway construction bill and until the Commission receives the rules and regulations that will govern the expenditure of the Federal money; however, the Commission will be pleased to consider this project with others in the formation of such program.

The Commission considered and signed agreements, etc., as follows:

Agreement with F. J. Sullivan and wife with reference to an approach road which is to be constructed on their property adjacent to the Sunset Tunnel-Buxton Section of the Wolf Creek Highway in Washington County, as a right of way consideration.

Agreement with the City of Ashland covering the installation of a siphon across the Pacific Highway at Mile Post 326.11, Jackson County.

Agreement with Ostrander Railway & Timber Company authorizing the Company to truck-haul logs across two secondary state highways near Molalla, Clackamas County.

Agreement with H. W. Kuhn covering rental by Mr. Kuhn of buildings situate in Williamson State Park, Yamhill County.

Two agreements with the City of Roseburg covering maintenance of the Roseburg Federal Access Road project upon completion of construction by the state.

Agreement with E. A. Hughes, et al, covering lease of a gravel pit for use in connection with the surfacing of a section of the Cape Blanco Secondary Highway in Curry County.

Agreement with the U. S. Bureau of Reclamation covering construction of an irrigation canal, laterals, and other facilities of the Reclamation Service across The Dalles-California Highway in Jefferson County.

Bargain and Sale Deed conveying unto G. W. McLean a parcel of land situate adjacent to the Pacific Highway south of Grants Pass in Josephine County. Right of Way File #R6626.

Bargain and Sale Deed conveying unto Caroline Margaret Bowers, et al, certain property on the Halsey-Harrisburg Section of the Pacific Highway in Linn County. Right of Way File #10262.

There being no further business to come before the Commission at this time, the meeting adjourned at 4:00 p.m.

Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

NOV 14 1944

Portland, Oregon, December 18, 1944

The State Highway Commission met in regular session at 1:30 p.m. in Room 615 of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

The Commission had under discussion the approval of budgets for 1945 expenditures. First consideration was given to the Maintenance and Minor Betterment Budgets covering primary and secondary highways. After careful consideration, the following budgets for such items were adopted by the Commission by unanimous vote upon motion of Commissioner Chessman which was seconded by Commissioner Schaupp:

PRIMARY MINOR BETTERMENT BUDGET

Stabilize Roadbed		$ 8,700
Pendleton-John Day Highway near Albee Jct.	$ 1,200	
John Day Highway near Mt. Vernon	3,500	
Central Oregon Highway near Harper	4,000	
Widening Curves		16,300
Siuslaw Highway at Horton Road	7,000	
Coast Highway in Curry County	8,800	
Ochoco Highway in Wheeler County	500	
Widen Surfacing at Umatilla Junction		250
Widen Pavement in Pilot Rock		250
Shoulder Oiling		9,280
Pacific Highway through Portland	4,320	
Junction City to Eugene	4,960	
Culverts, Catch Basins, etc.		7,228
Drainage Tunnels, Siskiyou Slides		20,580
Arizona Inn Slide, Curry County		1,000
Flume for Irrigation Ditch at John Day		400
Ditches through Irrigation Area, Ochoco Highway		500
Road Approaches		6,050
Guard Fence		1,840
North of Oswego	940	
Klamath Falls-Lakeview Highway	900	
Site Posts, Gales Creek		50
Concrete Curb over Retaining Walls, Columbia River Hwy.		1,500
Wire Mesh Slope Protection, Cabin Creek and Starvation Creek		1,000
Bridges		12,655
Riprap	4,335	
Widening Timber Bridges in Connection with Reconstruction	3,755	
Construct Concrete Smoke Guards	940	

(Continued on next page)

DEC 18 1944

PRIMARY MINOR BETTERMENT BUDGET. Bridges (Cont.)

Replace Timber Culverts with Pipe or R. C. Box Culverts	3,000	
Concrete Foundations	625	
Sand Bunkers		15,000
Traffic Signals		6,000
Highway Illumination		1,000
Contingencies		15,417
TOTAL MINOR BETTERMENT		$125,000

PRIMARY MINOR BETTERMENT BUDGET

GENERAL SUMMARY

Division I	$ 9,835.00
Division II	5,020.00
Division III	45,843.00
Division IV	4,480.00
Division V	9,750.00
Sand Bunkers	15,000.00
Bridges	12,655.00
Traffic Signals	6,000.00
Highway Illumination	1,000.00
Contingencies	15,417.00
TOTAL MINOR BETTERMENT	$125,000.00

SECONDARY MINOR BETTERMENT BUDGET

Stabilize Roadbed		$ 930
Powers Secondary Highway	$ 450	
Weston-Elgin Highway	480	
Rock Surfacing		12,650
Rome-Princeton Highway	1,750	
Diamond Valley Highway	10,000	
Hermiston Highway	900	
Oil Surfacing		19,100
Monmouth Secondary Highway	17,500	
Albany-Lyons Highway	1,600	
Culverts		2,355
Road Approaches		4,150
Widening Curves		750
Paulina Highway	250	
Beech Creek Secondary Highway	500	
River Channel Protection, Lexington-Echo Highway		500
Oil Foot Path, Hermiston		150

CONSTRUCTION OF BUILDINGS AND IMPROVEMENTS AT MAINTENANCE STATIONS

Maintenance Station - Betterment

Division 1	Total Minor Betterment	$1,000
Division 2	Total Minor Betterment	2,500
Division 3	Total Minor Betterment	700
Division 4	Total Minor Betterment	3,330
Division 5	Total Minor Betterment	625
Contingencies		1,845
Total Maintenance Station Betterment		$10,000

Maintenance Station - New Construction *

Proposed Maintenance Building Program approved by State Highway Commission September, 1944.

(Continued on next page)

DEC 18 1944

Maintenance Station - New Construction * (Cont.)

Proposed buildings at the following sites:

Division 1 - Multnomah, Troutdale, Newberg and St. Helens
Division 2 - Macanicum, Grande Ronde, Woodburn, and Newport
Division 3 - Marshfield, Cave Junction, Prospect and Florence
Division 4 - Hood River, Post, Lapine, Maupin and Moro
Division 5 - Hereford, Arlington, Jordan Valley

Estimated Cost		
4 sites at $1500.00	$ 6,000	
20 storage sheds at $8000.00	160,000	
4 houses at $5000.00	20,000	
Contingencies	4,000	
Total Maintenance Station New Construction		$190,000 *

Total Construction of Buildings and Improvements at Maintenance Stations $200,000

*Note:- This item approved by Commission subject to condition that no building is to be constructed until the Commission authorizes the work to proceed.

CONSTRUCTION OF BUILDINGS AND IMPROVEMENTS ON MISCELLANEOUS PROPERTIES

Truck Scale Betterment	$ 400	
Stockpile Sites, Quarries, Gravel Bars and Fencing	1,600	
Stockpile Sites, Quarries, Clearing and Grading	2,500	
Stockpile Sites, Quarries and Road Approaches	1,500	
Contingencies	4,000

In the discussion of this matter the Commission ordered that hereafter all purchases of rock, asphalt, oil, and similar materials shall be charged to holding accounts for later transfer to the various sections of highway on which the material is used. The Engineer was instructed to put the order into effect immediately and to render a quarterly report to the Commission on such holding accounts.

The Engineer was also instructed to revise his monthly report to the Commission covering receipts and expenditures so as to show further details with respect to the items included therein, particularly the ramifications of Federal Aid collections and the statement of cash on hand available for construction

DEC 18 1944

The Commission next discussed the General Highway Budget for 1945. The Engineer presented a blue print tabulation showing estimated receipts and estimated expenditures for 1945, as compared with actual receipts and expenditures for the years 1942 and 1943, and the 1944 budget. Careful consideration was given by the Commission to each item listed thereon. As the result of discussion the following budget was approved in principle by the Commission, by unanimous vote upon motion of Commissioner Chessman, which was seconded by Commissioner Schaupp. The maintenance, operation and administration expenditures as listed heretofore were specifically approved, with the understanding that the other items such as construction would require specific approval before expenditures were made.

GENERAL STATE HIGHWAY FUND

	1945 (Estimated)
RECEIPTS	
State Funds:	
Motor vehicle license fees and operators' fees	$ 3,300,000
Gasoline tax	9,600,000
Diesel fuel tax	220,000
Motor transportation fees	1,800,000
Fines for traffic law violations	75,000
Cash discounts	4,000
County cooperation	2,000
Miscellaneous cooperative funds	- - -
Gross Receipts, state funds	$15,001,000
Less contributions to State Police	336,000
Less contributions to Counties (15.7%)	2,336,000
Less contributions to Cities (5%)	744,000
Net receipts, state funds	$11,585,000
Federal Cooperative Funds:	$ 4,840,000
Net receipts for highway purposes	$16,425,000
First of year balance	7,859,000
Estimated total available funds	$24,284,000

Bond interest	228,000
Service charge on bond payments	1,000
Estimated total expenditures	$16,292,000
Unexpended balances	$ 7,992,000

*Note:- The State Parks Superintendent was present and entered into the discussion of the park items. He was informed by the Commission that while the amount of $100,000 has been approved for acquisition of park properties during 1945, the Commission expects him to secure the Commission's approval for the individual purchases before closing any deal. He was also informed that while the Commission has approved an expenditure of $10,000 for betterments in state parks, expenditures for the individual items shall not be made until the Commission's approval thereto has been secured. However, such approval need not first be obtained for expenditures necessary for maintenance and operation of the parks. The Parks Superintendent inquired whether or not he could carry over for expenditure in 1945 the unexpended balance of his 1944 budget. The Commission disapproved such carry-over.

After discussion of the budget, the Parks Superintendent reported on the following matters:

1. Proposed Improvements in Champoeg State Park during 1945: - The Parks Superintendent advised that he has not yet completed his contact with the Oregon Historical Society with respect to this matter but will render a full report to the Commission as soon as possible.

2. Purchase of Parking Areas along the Oregon Coast Highway: - The Parks Superintendent suggested the acquisition of wayside ocean parking lots of about one acre each at numerous locations throughout the length of the Oregon Coast Highway. He was authorized by the Commission to look into the matter. However, it was pointed out to him that the Commission has approved a budget of $100,000 for park acquisitions during 1945 and is depending on the Parks Superintendent to recommend acquisitions that are most desirable.

3. Request of Veterans of Foreign Wars to Acquire State Property at Bonneville: - The Parks Superintendent reported receipt of a request from the Veterans of Foreign Wars, Oregon Department, that the State deed to this organization a tract containing 3.76 acres located on the north side of the Columbia River Highway directly opposite Bonneville Dam. He advised that the Veterans of Foreign Wars is acquiring from the Bonneville Power Administration some twenty buildings formerly occupied by the United States Coast Guard and the plan is to re-establish these buildings on the above-mentioned state property if it can be obtained. He pointed out that at present there is a splendid view of Bonneville Dam from the highway at this location which would be obstructed if buildings were placed on this property and recommended that the request be denied and that the suggestion be made to the Veterans of Foreign Wars that it arrange for the use of United States forest land which is available near by. He added that the property in question adjoins a state park and is really needed in connection therewith. The Commission's Attorney advised that if the property is needed for state purposes the Commission does not have authority to dispose of it. After discussion The Commission voted unanimously to retain the property.

4. Establishment of Proposed Myrtle Lane along the Coos Bay-Roseburg Highway:- The Parks Superintendent reported orally on this matter and exhibited pictures showing specimen trees before and after improvements had been made. He advised that he has contacted local sponsors of the project in regard to the extent of the possible development and these people are unanimous in their approval of the project as disclosed by the specimen trees. He estimated the cost to prepare the sites during the first year at $4,233.40 and advised that the annual maintenance expense would be much less. Chairman Banfield expressed his approval of the project if the local people will leave it

with the Highway Commission to determine the extent of the development. Commissioners Schaupp and Chessman also approved the project on such basis making the decision unanimous. The Commission ordered the matter covered by written agreement between the Commission and parties concerned, which agreement is to state clearly that the Highway Commission is to select the locations to be developed and that the development is not to be a continuous improvement. Such information is to be included in the written agreement for the benefit of future Highway Commissions so that no misunderstanding will result.

5. Exchange of Forest Lands on Tracts Adjacent to the Klamath Falls-Lakeview Highway on Quartz Mountain:- The Parks Superintendent recalled that the Commission at its meeting on October 23, 1944, authorized the sale or trade to the United States Forest Service of a wayside timber tract containing about seventy-four acres at this location. He advised that since that time he has discussed the matter with the U. S. Forest Service officials who suggest that the simplest way to effect the desired exchange would be through the Bly Timber Company, which is now negotiating an exchange of some of its adjacent property for forest land, and could include the state's property in the exchange. He recommended approval of this suggestion as did also the Attorney who explained the transaction in more detail. The Commission approved the recommendation by unanimous vote.

The Assistant Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties and the offer that he recommended in connection with each parcel. After careful consideration of each item, the Commission approved the request and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed;

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

ASTORIA-NAVAL HOSPITAL SECTION, NEHALEM HIGHWAY

11541-Skipper, H. H., Grade Change Damages	Damages by reason of grade change in lieu of construction new concrete garage or altering existing concrete garage	$300.00	Landon

11500-Walker, Vernon & Pearl, and E.M. Crystal Right of Way Option expires April 11, 1945	0.33 acre at $2,000 per	$ 660.00	
	17 Poplar trees at $5 ea.	85.00	
	5 large ornamental shrubs at $5.00 each	25.00	
	10 large rosebushes to be moved at 50¢ each	5.00	
	3 rows raspberries	10.00	
	Move clothes line posts	15.00	
	Constructing 300 feet ornamental iron fence at $1.50 yard	150.00	
		$ 950.00	
	Moving 2 apartment auto cabins (Estimated)	600.00	
		$1,550.00	Witt

DENVER AVENUE SECTION, PACIFIC HIGHWAY

11552-Northwest Properties Inc. Easement	0.05 acre for slope easement	$1.00	Parker
11551-Phipps, Ivan E. Easement	0.08 acre for slope easement	1.00	Parker

CONDON SECTION JOHN DAY HIGHWAY

11521-Madden & Arlington Lumber Co. Stock Pile Site Option expires June 13, 1945	60,000 sq. ft.	$10.00	Cozad

---

*Note:- The Commission's approval of this item was on the condition that the Standard Brands, Inc., would vacate the premises without extra compensation whenever asked to do so by the Commission and in any event within two years and provided further that the company will pay rentals if it still needs the use of the property after the expiration of such two-year period. See ahead for Attorney's report on this subject.

DEC 18 1944

**Note:- This property is not to be leased unless the state's contractor actually uses this gravel pit.

The Assistant Attorney presented an offer from Mrs. Eugene Little to pay the sum of $10 for some old buildings situate on property acquired by the Commission from Edna Mildred Caraway in connection with the securing of right of way for the permanent location of the Wolf Creek-Grave Creek Section of the Pacific Highway in Josephine County. He advised that according to Division Engineer K. D. Lytle the buildings are of no value whatsoever and that it would be of advantage for the state to get rid of them. He recommended acceptance of this offer. The Engineer concurred. The Commission approved the recommendation unanimously.

The Commission's Attorney asked the Commission to confirm oral authority given him on November 17, 1944, to pay the sum of $1,742.75 for moving a service station from property that is being acquired from Mr. Hammock in Roseburg as right of way for the North Umpqua Access Road improvement at that place. He advised that it was necessary to condemn the Hammock property inasmuch as a satisfactory settlement could not be reached with the owner. The Condemnation case, he said, has not as yet been tried but it is necessary that the service station be moved prior thereto because the contract has been awarded and work was under way. He further stated that if the case goes to trial then the amount paid for the moving will be taken out of the condemnation action. The Commission confirmed the payment by unanimous vote.

The Engineer brought up for discussion the question of acquiring from Clatsop County certain property in Astoria that it was planned to use in connection with a proposed new ferry landing at that place. He advised that the present ferry landing is at the foot of Fourteenth Street but the plan was to move it to the foot of Seventeenth Street several years ago when the state contemplated operation of a state-owned ferry at this place in conjunction with the State of Washington. The State of Washington, he said, could not join in the undertaking so the matter was dropped temporarily. He gave as his understanding that the county is willing to deed the property to the state without cost and suggested that it would be advisable to acquire this property now so as to make certain that it will be available whenever the ferry landing is changed. Commissioner Chessman gave us his thought that the Commission should acquire the property while it is available, particularly in view of the fact that it is desirable property and there are many people who would like to own it. After discussion the Commission referred the matter to Commissioner Chessman with power to act as he considers best.

The Engineer also brought up for discussion the matter of acquiring right of way for a prooosed revision of the Santiem Highway through the Louis Hill holdings in Linn County. He recommended that the Attorney be authorized to negotiate this right of way because as he understands it the Hill interests are favorably inclined now to deed it to the state without cost. The Commission approved the recommendation.

The Commission had under discussion the granting of a formal lease to the United States of America, War Department, covering the use of Pilot Butte State Park at Bend, Deschutes County. It was recalled that the Commission at a special meeting held at Enterprise on September 14, 1944, orally authorized the Army to use this property for a period ending six months after termination of the war, but it now appears that the War Department wants the arrangement covered in writing and has submitted to the Commission for approval, a form of agreement which provides, among other things, that the Government shall surrender possession of the premises in as good condition as that existing at the time the Army took over the property.

The Engineer recommended approval of the agreement, advising that a joint physical survey of the property has already been made for comparative purposes. The Attorney advised that the form of agreement is acceptable and concurred in the recommendation. After discussion the Commission approved the recommendation by unanimous vote. The agreement was signed by all members of the Commission on the following day.

The Assistant Attorney reported on the offer of Lillian Barzee to purchase fragmentary portions of state property in East St. Johns, Portland, which matter was deferred from the last meeting. He advised the property is located in Block 34, East St. Johns Addition and fronts on the North Portland Access Road which leads to the Oregon Ship Building Corporation plant; further, that Mrs. Barzee has stated the willingness to pay $100 for the property. He recommended acceptance of the offer. The Engineer concurred. The Commission by unanimous vote approved the sale of the property at such figure.

The Commission discussed City of Portland Ordinance #80582 which has to do with a leasing of certain city-state-owned property along Front Avenue, Portland, heretofore used by Poole, McGonigle & Jennings in connection with the servicing of ships. It appears that Poole, McGonigle & Jennings have arranged to use other premises so have no further use for the city-state-owned property, and in view thereof the city by ordinance has approved re-leasing the property to the Northwest Marine Iron Works subject to the conditions, terms, and agreements of the revocable permit issued to Poole, McGonigle & Jennings. The Attorney advised that according to the ordinance and the previous agreement the state would benefit to the extent of forty percent of the income received from rentals which run from $3,000 to $6,000 per month, and in addition thereto the state would probably receive the city's sixty percent share of such revenue, in accordance with the provisions of the Commission's agreements with the city covering the Front Avenue project. After discussion the Commission approved the arrangement and by unanimous vote adopted the following resolution with regard thereto subject to the condition that the matter shall be covered by written agreement among the parties concerned.

WHEREAS, the City of Portland by the passage of Ordinance No. 79766 granted to Poole, McGonigle & Jennings a revocable permit to fasten and service ships at the west side seawall along or in front of Front Avenue; and

WHEREAS, this Commission by resolution duly adopted and entered in its minutes approved the action of the City; and

WHEREAS, it now appears that, owing to changes in national defense activities, the Northwest Marine Iron Works is in need of using the area covered by said permit for servicing ships, and it appearing further that Poole, McGonigle & Jennings are willing to release in favor of the Northwest Marine Iron Works its interest acquired by virtue of said permit; and

WHEREAS, the State, by and through its State Highway Commission, is cooperating with the City of Portland in the construction of Front Avenue and the acquisition of real properties in connection with said street improvement, and is therefore interested in the area involved in said permit; and

WHEREAS, it is the judgment of the Commission that the interests of the State will be conserved by joining with the City in the proposed transfer of said permit from Poole, McGonigle & Jennings to the Northwest Marine Iron Works;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively, as follows:

1. That the Commission does hereby approve and consent to the termination of the rights and privileges granted Poole, McGonigle & Jennings under and by virtue of Ordinance No. 79766 of the City of Portland, and the granting to the Northwest Marine Iron Works of a permit to fasten and service ships at the westside seawall as provided for in Ordinance No. 80583 of the City of Portland.

2. This approval and consent is given in consideration of the provisions and conditions provided for in said Ordinance No. 80583, and the benefits which will accrue to the State of Oregon by reason of said terms and provisions.

3. This resolution shall be entered in the minutes and records of the Commission as of the 18th day of December, 1944.

The Engineer reported on the results of the taking of bids in Salem on November 18 for the purchase of down timber, snags, and a few live trees situate on the state property adjacent to the Wolf Creek Highway.

He advised that only one bid was submitted, being that of Winter Brothers, Newberg, at $1.00/f.m.b.m. for the lumber obtained from the fallen trees and snags and $2.50/f.m.b.m. for lumber produced from the green timber. He asked the Commission to confirm its oral acceptance of this bid on November 18. The Commission by unanimous vote approved the sale of timber to Winter Brothers on the basis of their bid.

The Commission had under discussion a letter from Hon. C. A. Meeker, mayor of the City of Medford, requesting that Front Street between Fourth Street and Eleventh Street, with connections to Central Avenue, be designated an alternate route for the Pacific Highway in Medford. It appears that the Medford City Council adopted an ordinance prohibiting the use of Central Avenue between Fourth Street and Riverside Avenue by trucks having a conbined weight of one and one-half tons or more and by such ordinance also routed truck traffic along Front Street from Fourth Street to Eleventh Street. However, certain truck operators in interstate commerce refuse to use such route alleging that it would be a violation of their I.C.C. permits which route them over the Pacific Highway, whereas Fourth Street has not been so designated to date. Mr. Meeker suggests that the Highway Commission designate Front Street between Fourth Street and Eleventh Street as an alternate route for the Pacific Highway for truck purposes which, he asserts, will not only solve the problem but will also help the city in the enforcement of its ordinance. The Engineer advised that if the Commission approved this designation it would mean that the state would have to maintain the route and in addition thereto would have to pay for the rounding off of the turns at Fourth Street and Eleventh Street. The maintenance expense, he said, would be small and the cost to round the corners he estimated at about $2,000. He recommended approval of the city's request. The Attorney advised that the Commission has authority to do this if it so desires; moreover, if the Commission wanted to later on, it could rescind the designation. After discussion the Commission approved the recommendation. The following resolution covering the matter was adopted by the Commission by unanimous vote:

> WHEREAS, Central Avenue in the City of Medford has heretofore been selected and designated by the Highway Commission as one of the streets of said City over which to route Pacific Highway traffic; and
>
> WHEREAS, because of the increased volume of traffic which flows into and through said City over the Pacific Highway, it has become necessary to provide an additional traffic artery for a portion of said traffic; and
>
> WHEREAS, it is the judgment of the Commission that Front Avenue between Fourth Street and Eleventh Street in said City should be selected and designated as a street of the City of Medford over which to route certain Pacific Highway traffic; and

WHEREAS, it is the opinion and judgment of the Commission that the traffic needs of the general public using the Pacific Highway into and through the City of Medford and the conveniences of the people locally will be best served if said additional traffic artery is made available;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Highway Commission, all members being present and voting affirmatively, as follows:

1. That Fourth Street in the City of Medford from its junction with Central Avenue, thence to its junction with Front Avenue, and Front Avenue, from Fourth Street to Eleventh Street, and Eleventh Street from Front Avenue to Central Avenue, be and said sections of said streets hereby are selected and designated as sections of streets in the City of Medford over which there shall be routed Pacific Highway traffic in said City.

2. The streets or sections of streets hereby selected and designated shall constitute and be an alternate route of said Pacific Highway in said City of Medford. All truck traffic entering, passing through and leaving the City of Medford over the Pacific Highway shall be routed over said alternate route.

3. The municipal authorities of said City are hereby requested to supplement by ordinance, or other proper procedure, the acts of this Commission with respect to the routing of truck traffic over said alternate route.

4. That the Engineer be and he hereby is instructed to properly post and sign said streets or sections of said streets herein designated so that traffic will be properly advised and directed thereover.

5. The action of the Commission as disclosed in and recorded by this resolution is taken under the authority of Section 100-122, O. C. L. A., and under the authority of Section 115-309, O. C. L. A.

6. This resolution shall be entered in the minutes and records of the Commission as of December 19, 1944, and a duly certified copy thereof delivered to the city authorities of Medford, the Superintendent of State Police, the County Court of Jackson County, and the Public Roads Administration.

The Engineer reported on the request of property owners and residents of Shady Cove, Jackson County, for the construction of a sidewalk on the bridge which spans the Rogue River on Crater Lake Highway at Shady Cove. He advised that the existing bridge is very narrow and that there is

sufficient pedestrian traffic over the bridge daily to justify widening of the structure for a twenty-four foot roadway, with sidewalks. He recommended approval of the petition and requested authority to proceed with the improvement, which he estimated would cost about $18,500, on the contract basis. The Commission approved the request by unanimous vote.

The Commission had under discussion the matter of repairing a five-mile section of the Santiam Highway between Albany and Cottonwood Corners which is being damaged by log-hauling traffic. The Engineer advised that the highway is rapidly deteriorating on account of heavy traffic and will have to be repaired shortly. He estimated the cost of such repairs at $83,500 and requested authority to prepare the project for contracting in the early spring. Following discussion the Commission approved the project by unanimous vote.

The Engineer brought up for discussion the furnishing of housing facilities for maintenance forces whose headquarters are at Seneca, in Grant County. He advised that Seneca is a mill town and that practically every residence in the town is owned by the Edward Hines Lumber Company which will not rent the houses to anyone except its own employees. He gave as his thought that it will be advisable for the Highway Commission to provide living quarters for the men, consisting of two houses, one for the foreman and one for the foreman's helper, with a conbination maintenance shed and shoo bay, which would cost a total of about $3,800. The Commission deferred its decision in the matter pending a further attempt to secure accommodations from the Lumber company. The Engineer was instructed to contact the company relative thereto.

The meeting adjourned at 5:00 p.m. to reconvene the following morning at 9:00 a.m.

Portland, Oregon, December 19, 1944

The State Highway Commission reconvened in regular session at 9:00 a.m. in the Stock Exchange Room of the Imperial Hotel with all Commissioners, the State Highway Engineer, the Attorney and the Secretary present. Bids as follows for highway construction work and for the purchase of a tract of land in northeast Portland were opened and read in conformity with previously published notices, following which Chairman Banfield announced that the awards would be made at 3:00 p.m.

JOHN DAY HIGHWAY

SALE OF TRACT OF LAND IN NORTHEAST PORTLAND

	Alternate No. 1	Alternate No. 2
E. F. Wilson, Portland	$1,216.00	$1,316.00
Harry Hoffman, Portland	911.00	1,012.00
Alford T. Olson, Portland	800.00	1,000.00
W. S. Miller, Portland	---	450.00

The Attorney brought up for discussion the acquisition of right of way from the Standard Brands, Inc., for the Front Avenue Project in Portland (Right of Way File No. 11022), action on which was deferred from the previous day. He advised that a local representative of the company has agreed to recommend to his superiors acceptance of the state's offer to pay $35,000 for this property provided the company will vacate the premises at any time the Commission asks them to do so and, in any event, within two years, and provided further that if the premises are not vacated within such two-year period then the company will pay a reasonable rental for the use of the property thereafter. The Commission approved the purchase of the property if an agreement can be reached with the company on such basis.

The Commission had under discussion requests from the school board of District #90, Blachly, Oregon, and others, for the improvement of the Siuslaw Highway at its junction with the Horton County Road to alleviate a dangerous condition which, they allege, exists at this intersection because of the heavy volume of traffic that passes through this intersection and the shortness of the sight distance along the highway. The Engineer advised that investigation reveals that a dangerous condition actually exists at this point and that it will cost about $7,700 to correct the situation. He recommended approval of the project as a Primary Minor Betterment for 1945 construction, the money to come from the amount budgeted by the Commission on the previous day for this class of work. The Commission approved the recommendation unanimously.

The Secretary presented a resolution from Jasper Grange #532, Lane County, and a petition from other users of the Springfield-Creswell Secondary Highway urging the oiling of this highway between Jasper and its junction with the Willamette Highway. He was instructed to inform the petitioners that the Commission is not now in a position to definitely pass on this project due to the uncertainty of the funds with which the project would have to be financed; however, the Commission will give consideration in the formulation of future construction programs.

The Secretary was also instructed to make a similar reply to a petition from residents of Josephine County for the oiling of the unoiled section of the Rogue River Loop Secondary Highway between "Robertson" Bridge and the junction with the Redwood Highway.

Letters were presented from the Portland Union Stock Yards Company and Swift and Company requesting the widening of the Swift Secondary Highway for four lanes of traffic in front of the Union Stock Yards and the Swift Company's plant. The Engineer was instructed to inspect the premises and report his findings.

The Secretary presented resolutions from the following cities and towns outlining plans for the improvement of city streets with funds made available under Chapter 371, Oregon Laws 1943:

Adams	Dayville	Fossil
Aumsville	Dufur	Monroe
Carlton	Echo	Yamhill
Clatskanie	Florence	

The Engineer advised that he has examined the plans which are in conformity with the regular requirements. He pointed out, however, that the resolution from the cities of Echo, Adams, and Monroe are substitutes for resolutions that were approved by the Commission on May 9, 1944, and are required because the cities have found it impossible because of war-time conditions to perform this year the work contemplated in the original resolutions. He recommended approval of the changes and that the programs as outlined in all of the resolutions be approved and adopted. The recommendation was approved by the Commission. The following resolution in regard thereto was adopted by the Commission by unanimous vote upon motion by Commissioner Schaupp which was seconded by Commissioner Chessman:

> WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by this Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1944 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Adams - - - - - -	$ 232.11	Echo - - - - - - -	$384.56
Aumsville - - - -	238.98	Florence - - - - -	629.03
Carlton - - - - -	1,186.65	Fossil - - - - - -	730.67
Clatskanie- - - -	972.39	Monroe - - - - - -	427.14
Dayville- - - - -	186.79	Yamhill- - - - - -	574.10
Dufur - - - - - -	538.39		

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

City of Adams - Hale Street, Main to College

City of Aumsville - All gravel streets of the city

City of Carlton - East Polk Street, South Third Street, North 4th Street, North 3rd Street, North 2nd Street, North 1st Street, East Monroe Street, South Park Street, South Kutch Street, West Grant Street, North Scott Street, West Monroe Street, North Kutch Street, West Madison Street, West Jefferson Street, West Johnson Street, West Lincoln Street, North Howe Street

City of Clatskanie - 13th Street, Conyers Street, 10th Street, 9th Street, Tichenor Street, Alder Street, 2nd Street, Poplar Street, 4th Street Wye, 8th Street, County Road

City of Dayville - Street running from U. S. Highway 28 west to city limits toward school house and street running south from U. S. Highway 28 to city limits, which street connects with county road

City of Dufur - Second Street, Klinger Street, 1st Street, Fourth Street, Court Street

City of Echo - Bridge Street, Dupont Street, Bonanza Street

City of Florence - Front Street, Main Street

City of Fossil - Adams Street, 5th Street, 6th Street, Jay Street, 3rd Street, Main Street, Rutledge Street, Chase Street, "B", Broadway Street

City of Monroe - Commercial Street, Main Street to Railroad Street, Railroad Street, Walnut Street, Chestnut Street, Wilson Street, Howard Street

City of Yamhill - 3rd Street, 1st Street, Laurel Street, Elm Street

2. That the type, plan and character of improvement proposed in the resolutions filed with this Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That resolutions formerly adopted by the cities of Echo, Adams, and Monroe and approved by the State Highway Commission on May 9, 1944, shall be canceled, in accordance with the requests of the several cities on file in the records of the Oregon State Highway Department, and resolutions hereby approved be substituted therefor.

5. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plan submitted by the city.

6. This resolution shall be entered in the minutes and records of this Commission as of the 19th day of December, 1944.

The Commission approved and signed an agreement with Klamath County providing for the maintenance of the Crescent Lake County Road between the Town of Crescent Lake and its junction with the Willamette Highway, a distance of about two miles.

The Engineer brought up for discussion the claim of Henry L. Horn, contractor for the construction of the Denver Avenue-Union Avenue traffic interchange project in Portland, for extra compensation arising out of this job. He advised that the claim originally submitted by Mr. Horn was for $9,891.04 and included an amount of $2,391.04 for duplication of expense for Workmen's Compensation. This latter mentioned item, he said, has been disallowed because of a provision in the contract which requires a contractor to carry on his work under protection of the Workmen's Compensation Act, regardless of whether or not he has already purchased private insurance coverage, which leaves a total of $7,500 to be disposed of. He recommended that Mr. Horn be allowed an extra amount of $3,219.50 for the following reasons:

1. During the progress of work a fire occurred at the Peninsula Golf Club House adjoining the improvement which made necessary certain changes in the reconstruction of the Club's sewage disposal system and in turn required the contractor to change his construction plans accordingly with the result that he was put to extra expense totaling $465.50.

2. According to the specifications the contractor was required to salvage and rebuild 1100 feet of wire guard rail. It was found necessary, however, to replace 130 lineal feet of this fence, so he considers it equitable to allow the contractor twenty-five cents per lineal foot for removing it inasmuch as otherwise he would have been put to that expense without compensation. The allowance recommended for this item, he said, is $32.50.

3. Following the award of the contract the U. S. Army Engineers requested the raising of the grade of Swift Secondary Highway so it would more effectively act as a dyke for the protection of the Vanport Housing Project from high water in the Columbia River. This required the placement of 3962 cubic yards of additional material under adverse traffic conditions for which the contractor is entitled to pay at the rate of twenty-five cents per cubic yard or a total of $990.50 more than was contemplated for this item in the original contract.

4. At the time of the award of the contract, construction of one of the structures known as No. 4 had not been approved by the War Production Board and provision was made in the specifications for the elimination of this structure; however, when the contract was nearing completion the contractor was given authority to proceed with the work which cost about $3.00 per cubic yard more than if the work had been done when working conditions were suitable. This extra expense amounted to $1,731.00.

The Engineer gave as his thought that the contractor is entitled to extra compensation in the total amount of these four items, or $3,219.50, and recommended approval thereof. The Attorney concurred in the recommendation.

Following discussion motion was made by Commissioner Schaupp that the recommendation be approved. The motion was seconded by Commissioner Chessman and carried by the unanimous vote of the Commission. An agreement between the Commission and Contractor Horn covering the matter was thereupon signed.

A delegation representing the County Judges and Commissioners Association appeared before the Highway Commission with respect to increasing the allotment of the State Highway Funds to the counties. The group consisted of Mr. Tom H. West, Chairman, Board of County Commissioners, Multnomah County, County Judge E. L. Pope, Clackamas County, and County Commissioner James Elliott, Clatsop County. Mr. West pointed out that the present allocation to the counties is 15.7 percent of the total highway revenue with a minimum of $2,000,000. He advised that such sum is not sufficient to take care of the county road needs, and in view thereof the Association proposes to ask the 1945 Legislature to increase the allotment to twenty percent, which would give the counties about $3,000,000 annually. It was his thought that in view of the fact that the state's bonded indebtedness for highways is now only a little over $6,000,000 that such increase would not disrupt the Highway Commission's program and accordingly asked the Commission to support the counties' bill in the legislature. Judge Pope alleged that the cost to maintain Clackamas County highways has doubled during the past three years due to war-time conditions, and the county is faced with the serious problem of maintaining its road system because of the tax limitations. He pointed out that most of the log hauling is over county roads, which were not constructed for continuous traffic of that kind, and as a result the roads are going to pieces and the county cannot repair them properly because of lack of funds to finance the work. Commissioner Elliott endorsed the remarks of the other speakers advising that conditions in Clatsop County are very similar to those in other counties.

Chairman Banfield advised that the State Highway Commission does not now have enough income to finance all of the state highway improvements that are needed. He pointed out that as a result of the Commission's canvass of the state last year, projects estimated to cost about $300,000,000 were presented to the Commission for construction in the post war period, whereas, at that time the Commission anticipated that with federal aid it could undertake a $60,000,000 program during the first three years immediately following the war. The anticipated federal aid has not materialized, he added, and it now appears that the program for that period cannot exceed $26,000,000. Such amount, he said, is not sufficient to take care of the state's needs, so, under the circumstances it does not appear possible for the Commission to approve the increasing of the counties' allotment. Moreover, the Commission could not go to the Legislature and say that it has more money than it needs for state highway purposes, because that would not be a fact. Commissioner Schaupp endorsed Chairman Banfield's remarks. Discussion followed and was concluded by Chairman Banfield who stated that the Commission would take the matter under advisement.

A delegation headed by Mr. Harry R. Fuller, Regional Fire Supervisor, U. S. Grazing Service, Burns, Oregon, and including Messrs. S. R. Bennett, District Grazier, Baker, and John Krebs, Stockman, Cecil, Oregon, came before the Commission in regard to the "fire proofing" of state highways in Morrow, Umatilla, and Gilliam Counties. They asked for state aid in the suppression of fires in this area. Mr. Fuller advised that a large number of fires have occurred along the highways in these counties during the past two years, most of which, he said, have originated on highway rights of way as a result of carelessly thrown cigarette stubs. He also said that the livestock industry, forests, and ranchers have suffered considerable losses because of these fires, and that the cost to maintain the railroads and highways in the district has increased due to extra expense in removing sand blown from the burned over areas. He predicted that the losses will increase unless the fires are controlled. He mentioned a meeting of interested parties in Heppner recently when this matter was the subject of discussion and advised that the conclusion reached at such meeting was that if the highway right of way were seeded with crested wheat, or some other suitable grass, as has been done along the Old Oregon Trail west of Pendleton, the prospects of fires occurring would be greatly reduced.

Chairman Banfield pointed out that if the Highway Commission were to contribute toward such a project in one part of the state, it would have to extend operations to all parts of the state which the Commission is not prepared to do now. The Commission's Attorney expressed his opinion that while the project may be a worthy one the Commission would have to limit its cooperation to the protection of state land under its control. He also said that it would be illegal for the Commission to spend highway funds to protect privately owned property or the property of some other state agency. Mr. Fuller estimated the cost of furnishing fire protection at not to exceed $1 per acre. He also said that according to the records, 32,599 acres of land have been burned over because of fires started along highways. He suggested that the Highway Commission might cooperate to a certain extent in reducing this fire hazard and might recommend to the Legislature a program to that end. Mr. Krebs gave as his thought that the project should be appealing to the State Highway Commission because it would result in reducing highway maintenance expense by eliminating "sandblow". Mr. Bennett suggested that it would be helpful if words cautioning the public against the throwing of lighted cigarettes on the highway right of way were painted on the highway surfaces as is now being done in the State of Idaho.

Mr. Fuller then inquired if the Commission cannot cooperate as requested, whether or not the Commission would authorize its maintenance crews to render more service than it has in the past in the suppression of fires. He said that the men would only be called upon in emergencies and that the Grazing Service would furnish all facilities. The Engineer advised that the maintenance men already have instructions to extinguish fires that occur on highway rights of way but not off the right of way. After further discussion Chairman Banfield concluded the conference by stating that the entire matter will have to be given very careful con-

sideration by the Commission because it involves the establishment of a general policy. He asked Mr. Fuller to furnish full information in regard to the Grazing Service protective area and instructed the Engineer to analyze the information when received and report to the Commission the feasibility and cost to cooperate as has been requested. The Attorney was instructed to advise the Commission as to its legal authority in the matter.

Mr. Fred Judges, manager of the Oregon State Motorists Association, came before the Commission in the interests of a school for traffic training which is to be conducted at Oregon State College, Corvallis, for two weeks sometime during the month of March, 1945. Mr. Judges advised that the National Institute for Traffic Training, Washington, D. C., is sponsering this school, the purpose of which is to develop traffic engineering, including such subjects as highway engineering, safety, and other traffic problems. He further advised that this is the first time that the shcool has been held in the West, and that Oregon is co-host to the eleven western states from which students are expected. He gave as his thought, inasmuch as the school is in the scope of the State Highway Department, that the Commission might approve the contribution of $200 towards the promotional expenses which is estimated at $1,200. The State Highway Engineer recommended such contribution if it is not illegal. The Attorney requested more time to look into the legality of the expenditure. The Commission took the matter under advisement.

Messrs. John A. Laing, Chairman, and Dr. E. B. McDaniels, Member, of the Advisory Committee on Travel and Informational Matters, appeared before the Commission in regard to the 1945 budget for the Travel and Information Department. Mr. Laing advised that at a meeting of the Committee held on October 27, 1944, the members present voted unanimously to recommend a budget of $37,050 for this purpose, subject to an increase in the amount later on if travel conditions are satisfactory. He presented a budget as follows for the Commission's consideration and explained details thereof:

601	Supervision and General Expense	
	Salaries	$ 9,000.00
	Travel, Supplies & Miscel.	1,000.00
610	Magazine Advertising	10,000.00
613	Motion Pictures	1,800.00
614	Specialty Advertising	1,000.00
616	Literature Distribution	500.00
617	Maps	3,500.00
618	Booklets	5,000.00

(Continued on next page)

DEC 19 1944

619	Cuts and Mats.....	$ 500.00
620	Photographs.....	250.00
621	Postage and Express.....	1,500.00
622	Photographic Laboratory Charges.....	3,000.00
		$37,050.00

In the discussion that followed, Chairman Banfield advised that the Commission on the previous day adopted a budget for 1945 expenditures, including an item of $40,000 for the Travel and Information Department, which is slightly more than the amount the Advisory Committee has recommended.

Mr. Laing then brought up for discussion salary increase for the secretary of the director of the Travel and Information Department. He recommended an increase from $155 per month to $175 per month, if that is in conformity with the Commission's standard rates of pay. The Commission referred the matter to the Engineer.

Dr. McDaniels brought up for discussion the payment of the expenses of Mr. Harold B. Say, former director of the Travel and Information Department, who is now connected with the U. S. Navy in Washington, D. C., to check the "set-up" of the Travel Department. He advised that Mr. Say expects soon to have a vacation and has indicated that he will come west and make such a check if the Highway Commission will pay his expenses to and from Washington, D. C., and his salary while making his investigations. Dr. McDaniels gave as his thought that this is an opportunity to get a thorough check-up on the activities of this department and recommended approval of the expenditure, the same to be paid out of the Travel budget. The members of the Commission expressed themselves in favor of the expenditure but left it with the Advisory Committee to make the final decision.

Messrs. H. R. Williams, Member, Legislative Committee, and E. J. Barry, Executive Secretary, representing the Oregon Motor Transport Association, were present in regard to proposed legislation with respect to the size and weight of motor vehicles, or combinations thereof that operate over Oregon state highways. They presented a copy of the bill that they propose to submit to the 1945 Legislature which extends indefinitely the privileges granted under the Highway Commission's war time emergency permits and asked the Commission to endorse the bill. The Commission referred the bill to the Engineer and the Attorney to analyze and report back to the Commission.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them for the records. After discussion the Commission by unanimous vote approved the following surveys, being all of those listed with the exception of a proposed survey at Wallowa Lake to determine the ownership of property which has been recommended for state park purposes. It was decided not to conduct the survey at Wallowa Lake.

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Prospecting	1-1441	Baker	Old Oregon Trail Highway near Baker	1st- $500.00
Plans	6-1436	Coos & Curry	Oregon Coast and Coos Bay-Roseburg Highways	1st- $1,000.00
Slide	15-1449	Jackson	Near Ashland on Pacific Hwy.	1st- $300.00
Plans	218-1474	Klamath	Access road to Klamath Falls Marine Barracks	1st- $500.00
Plans	20-1462	Lane	Near Blachley on Siuslaw Hwy.	1st- $200.00
Plans	21-1471	Lincoln	Near Newport Airport on Oregon Coast Hwy.	1st- $250.00
R/W	24-1448	Marion	Woodburn Maintenance Site	1st- $250.00
Plans	24-1450	Marion	12th St. Junction to Pacific Hwy. south of Salem	1st- $100.00
Plans	24-1451	Marion	New State Office Bldg.	1st- $500.00
Plans	10-1431	Douglas	Canyonville (Pacific Hwy. relocation.)	5th- $2,000.00 Total to date $34,000.00
Plans & R/W	118-1468	Klamath	Diversion Canal-Midland Overcrossing Section, Midland Secondary Hwy.	2nd- $460.00 Total to date $1,460.00
R/W	21-1463	Lincoln	Siletz Bay-Newport Sec. Oregon Coast Hwy.	2nd- $650.00 Total to date $1,050.00
Prospecting	23-1434	Malheur	Vale, Central Oregon Hwy. Vale Rock Prod. Project	2nd- $500.00 Total to date $650.00
Plans	27-1427	Polk	Grande Ronde Maintenance Site	2nd $75.00 Total to date $150.00

S U M M A R Y

Total Previously Authorized for these Surveys	$33,625.00
Total Additional Authorization Requested	7,285.00
GRAND TOTAL.....	$40,910.00

The Commission recessed at 12:00 noon and reconvened at 2:00 p.m., with the same persons present and participating.

Mr. Claude M. Bristol, Portland, appeared before the Commission in regard to the proposed relocation of the Columbia River Highway which affects his property near Troutdale. Mr. Bristol advised that the proposed location severs his land which is extremely valuable for celery growing purposes, and if the highway is constructed on such alignment celery growing would have to be stopped to such an extent that he would not then be able to sell or even rent the property. Moreover, there are some fifty families that are dependent on work in the celery gardens for a livelihood who would be thrown out of work. He suggested the rerouting of the highway along the north side of his property where there is a dedicated county road, which would not only preserve his property intact but would also save the state a considerable sum for right of way, his land being worth from $1,000 to $2,500 per acre. The

DEC 19 1944

Commission referred the matter to the Engineer for investigation and report. He was instructed to inspect the premises in company with Mr. Bristol at the earliest opportunity.

The Commission had under discussion the following requests for extensions of time within which to complete highway construction projects:

Porter W. Yett, Contract No. 2504, for grading and construction of bituminous macadam surfacing on the Banzer Bridge-Mist Section of the Nehalem Secondary Highway in Columbia County, requested an additional extension of time from June, 1943, to October 30, 1945, within which to complete this job. He gave no reason for failure to complete this project within the specified time limit. The Engineer advised that this contract was awarded on August 14, 1941, and the specifications called for completion on or before August 31, 1942; however, work was discontinued early in 1942 because of the war, and it was only a short time ago that the Public Roads Administration authorized resumption of operations. He anticipated that it would take all of the summer of 1945 to complete the project. In the meantime, he said, the old road is being used by the public which has not been unduly inconvenienced. He recommended that the extension of time requested be granted without penalty because of the circumstances under which the work was held up. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Morrison-Knudsen Co., Inc., Contract No. 2649, for grading, surfacing, oiling and construction of the bridge on the Molloy Ranch-Hooker Creek Section of the I.O.N. Highway, in Malheur County, requested an extension of time from July 31, 1944, to November 10, 1944, within which to complete this job. They attributed their failure to complete this project within the specified time limit to inclement weather during the months of May and June, and serious labor shortage. The Engineer advised that the contract was awarded on August 27, 1943, and that the contractor commenced operations two weeks later and completed all of the grading work, except for finishing, by January 8, 1944. He gave as his thought that labor and equipment troubles were the main reasons for over run of the specified time limit, although inclement weather did prevail in May and June, as stated by the contractor. The traveling public, he said, has not been inconvenienced by the delay because the project is on new alignment and the old road was available at all time for public use. He recommended that the extension of time requested be granted without penalty, notwithstanding that the cost of engineering supervision is in excess of that anticipated. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

C. J. Eldon, Contract No. 2590, for grading, surfacing, and construction of bituminous macadam on the Goshen-Pleasant Hill Section of the Willamette Highway, in Lane County, requested an extension of time from June 30, 1943, to October 15, 1944, within which to complete this job. He gave the following reasons for failure to complete the project within the specified time limit: Adverse weather conditions which seriously affected progress of the work and required considerable drainage ditch construction to get rid of excess water in the roadway; a change in plans for carrying on the work with the equipment that was available and obtainable; shortage of labor, it being impossible to secure sufficient personnel with which to man the operation to more than twenty-five percent efficiency; and priority regulations which made it difficult to obtain necessary supplies. The Engineer advised that in the main war time restrictions were the basic causes of the delay. He further advised that traffic was not materially handicapped by the delay because the old road was available for public use at all times; however, the cost of engineering supervision over ran the budget some $2,000. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

J. S. Risley, Contract No. 2637, for furnishing crushed rock in stockpiles for the Belknap Springs-Fourmile Butte Section of the McKenzie Highway in Lane and Deschutes Counties, requested an extension of time from October 31, 1943, to September 30, 1945, within which to complete this job. He gave adverse weather conditions and difficulties in securing labor as the reasons for his failure to complete the project within the specified time limit. The Engineer advised that labor and equipment were very hard to secure for this job which greatly handicapped the progress of the work. He further stated that the public has not been unduly inconvenienced by the delay, neither has the state been put to much extra expense for engineering supervision. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

C. H. Wheeler, Contract No. 2644, for grading and construction of bituminous macadam on the Astoria Airport Section of the Oregon Coast Highway in Clatsop County, requested an extension of time from August 31, 1944, to October 1, 1945, within which to complete this job. He stated that the extra time is needed to pile and burn brush and debris that has accumulated, which work cannot be done until next year because of the wet condition of the ground. The Engineer advised that the reason given by the contractor for overrunning the specified time limit is substantially correct. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

M. C. Lininger & Sons, Contract No. 2664, for the production of rock for the Brothers-Harney County Line Section of the Central Oregon Highway in Deschutes and Lake Counties, requested an extension of time from August 31 to October 18, 1944, within which to complete the job. They attributed their failure to complete the project within the specified time limit to labor shortages and the necessity to rescreen a considerable amount of the rock. The Engineer advised that the main reason for the contractor's failure to complete this job within the specified time limit was the inability to hire truck drivers. He also said that the public has not been greatly inconvenienced by the delay, and there has been no appreciable increase in the cost of engineering supervision. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

Morrison-Knudsen Co., Inc., Contract No. 2667, for grade widening, surfacing, and oiling the Idaho State Line-Molloy Ranch Section of the I.O.N. Highway, in Malheur County, requested an extension of time from August 15 to November 10, 1944, within which to complete this job. They gave inclement weather and labor shortages as the principal reasons for their failure to complete this project within the specified time limit. The Engineer advised that labor shortage was the main reason for the delay. He also said that the public has not been unduly inconvenienced by the delay because the old road has been available for its use, and the cost for engineering supervision has not exceeded that estimated. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The recommendation was approved by the Commission by unanimous vote.

Oscar Joelson, Contract No. 2671, for construction of the Lexington Rock Production Project on the Heppner and Lexington-Echo Highways, in Morrow County, requested an extension of time from July 31, 1944, to January 31, 1945, within which to complete this job. He advised that his contract with the state at Hermiston took considerable more time than he expected due to an increase in the yardage of material that he had to furnish, and due to several breakdowns of his equipment; also, that he was required to furnish considerable more yardage for the road leading to the Umatilla Ordnance Depot which was not included in the contract but was authorized by the state. These circumstances, he said, caused a rather late starting of the Lexington Rock Production Project, and together with difficulties in securing labor was the reason that he failed to complete this project within the specified time limit. The Engineer advised that the contract was awarded on December 23, 1943, but the contractor did not start work until April 8, 1944, and progress was slow from that time on because of difficulties that he had with equipment

breakdowns. The main reason for overrunning the time limit, he said, was that the job was not started early enough, however, that is accounted for by the fact that he had to finish the job at Hermiston before he could start the new one and that he did not have enough equipment to handle both jobs at the same time. The public, he said, has not been greatly inconvenienced by the delay, neither has the state incurred any extra expense for engineering supervision. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Western Rock Company, Contract No. 2674, for production of rock for the Kimberly-Dayville Section of the John Day Highway, in Grant and Wheeler Counties, requested an extension of time of twenty days from October 31, 1944, to November 20, 1944, within which to complete this job. They attributed their failure to complete this project within the specified time limit to shortage of labor and difficulties in obtaining replacement parts for their equipment. The Engineer advised that the contract was awarded on February 17, 1944, but no work was done until September 1, 1944, when the contractor started to set up his plant. He admitted that labor and material shortages were operative but these did not excuse the contractor for his late start. Neither the public nor the state's maintenance program was inconvenienced by the delay and the state did not incur any extra expense for engineering supervision. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

Frank Watt Construction Co., Contract No. 2687, for construction of four bridges on the Halsey-Harrisburg Section of the Pacific Highway East, in Linn County, requested an extension of time from December 31, 1944, to April 30, 1945, within which to complete this job. They attributed their failure to complete the contract within the specified time limit to difficulties in securing lumber and other materials. The Engineer advised that the work was held up for about four months due to the contractor's inability to secure necessary lumber and materials. He recommended in view thereof that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

The Engineer reported that Contracts Nos. 2590, 2642, 2649, 2664, 2667, 2674, and 2698 for the construction of state highway projects have been completed according to the requirements of the contracts or modifica-

tions thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2590, with C. J. Eldon, for grading, surfacing and bituminous macadam on the Goshen-Pleasant Hill Section of the Willamette Highway in Lane County, was completed on August 12, 1944.

Contract No. 2642, with Peter Kiewit Sons' Co., for grading, surfacing and oiling on the Monmouth-Pedee Section of the Bridgeport-Monmouth County Road and Dallas-Kings Valley Secondary Highway in Polk County, was completed on October 10, 1944.

Contract No. 2649, with Morrison-Knudsen Co., Inc., for grading, surfacing and oiling on the Molloy Ranch-Hooker Creek Section of the I.O.N. Highway in Malheur County, was completed on November 10, 1944.

Contract No. 2664, with M. C. Lininger & Sons, for furnishing crushed material in stockpiles on the Brothers-Harney County Line Section of the Central Oregon Highway in Deschutes and Lake Counties, was completed on October 18, 1944.

Contract No. 2667, with Morrison-Knudsen Co., Inc., for grade widening, surfacing and oiling on the Idaho State Line-Molloy Ranch Section of the I.O.N. Highway in Malheur County, was completed on November 10, 1944.

Contract No. 2674, with Western Rock Co., for furnishing crushed materials in stockpiles on the Kimberly-Dayville Section of the John Day Highway in Grant and Wheeler Counties, was completed on November 20, 1944.

Contract No. 2698, with Angelo Doveri, for curb construction on North Ninth Street in Klamath Falls, Klamath County, was completed on December 1, 1944.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

DEC 19 1944

The Engineer requested authority to purchase the following equipment and tools:

		Est. Cost	
6 200-gal.	Maintenance Asphalt Kettles	$700 ea.	$4200.00
1 5 KVA	Diesel Light Plant for Austin	1200 "	1200.00
1 4-inch	Wood Borer for Bridge Crew	200 "	200.00
1 9/16	Multivane Pneumatic Wood Drill for Bridge Crew	150 "	150.00
1 only	Pneumatic Impact Wrench Set for Bridge Crew	260 "	260.00
3 10-ton	Hoists for Bridge Dept. Trucks	300 "	900.00
1 10-ton	Floor Jack for LaGrande Shops	150 "	150.00
1 only	Carboloy Tool Grinder for LaGrande Shops	150 "	150.00
1 only	Cylinder Boring Bar for Salem Shops	400 "	400.00
1 only	Buffer & Grinder for tire repairs at Salem Shops	150 "	150.00
1 only	Metal Spray Tool for Salem Shops	750 "	750.00
1 only	Trench Hoe Attachment	1400 "	1400.00
1 only	Pneumatic Auger Drill	190 "	190.00
	Estimated Total - - - - - -		$10100.00

The Commission approved the request by unanimous vote upon motion by Commissioner Schaupp, which was seconded by Commissioner Chessman.

The Commission confirmed the oral authority given the Engineer on December 6 to sell an obsolete road grader to the City of Wallowa for the sum of $150.

The Engineer requested authority to advertise for bids for the purchase of a number of tourist cabins and contents which were acquired in connection with a right of way transaction involving a revision of the Oregon Coast Highway at Spencer Creek, about seven miles north of Newport, Lincoln County. The request was granted by the Commission by unanimous vote, subject to the condition that bids be taken for the buildings and contents separately, and with the understanding that the Commission reserves the right to retain one or more of the buildings for use by engineers or contractors in connection with highway construction in this vicinity.

The Commission approved and signed an agreement with Polk County providing for an exchange of secondary highways and county roads at Camp Adair. In this connection the secretary presented resolutions from the Polk County Court requesting that certain secondary state highways be eliminated from the State Secondary Highway System and that certain county roads be placed on such system in lieu thereof. The resolutions (four resolutions) were approved by the Commission. The following resolutions covering such exchange of roads were thereupon adopted by the Commission by unanimous vote upon motion of Commissioner Chessman, which was seconded by Commissioner Schaupp:

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Polk County Court of the State of Oregon, has heretofore selected and regularly adopted, as provided by law, the Kings Valley Secondary Highway No. 190, and

WHEREAS, it is now the intention of the State Highway Commission, by mutual agreement with the Polk County Court of the State of Oregon, to eliminate and remove from the system of secondary state highways, under the provisions of Chapter 248, Oregon Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the hereinafter described section of the Kings Valley Secondary Highway No. 190, and

WHEREAS, it is mutually understood and agreed by the State Highway Commission and the Polk County Court of the State of Oregon, that from and after the adoption of this resolution by the State Highway Commission the hereinafter described section of the Kings Valley Secondary Highway No. 190 shall, under the provisions of the Laws of Oregon, become a county road, and the construction, repair, maintenance or improvement, and the jurisdiction thereof, shall be exclusively under the County Court of Polk County;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating as follows:

1. That the following described section of the Kings Valley Secondary State Highway No. 190 is hereby eliminated and removed from the Secondary State Highway System, to wit:

A Section of the Kings Valley Secondary State Highway No. 190

Beginning at a point on the former route of the West Side Pacific Highway at a point approximately 3½ miles south of Monmouth; thence in a westerly and southwesterly direction to a point where the Kings Valley Secondary Highway as now designated is intersected by the McTimmonds Valley Road, approximately 0.7 mile north of Pedee, a distance of 10.83 miles.

DEC 19 1944

2. That the said above described section is hereby declared to be eliminated and removed from the secondary system of highways and from and after the adoption of this resolution shall become a county road, and the construction, repair, maintenance or improvement, and the jurisdiction thereof, shall be exclusively under the County Court of Polk County, as provided by law.

3. That this resolution be entered in the minutes of the Commission and a duly certified copy thereof mailed to the County Court of Polk County.

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Polk County Court of the State of Oregon, has heretofore selected and regularly adopted, as provided by law, the Dallas-Kings Valley Secondary State Highway No. 191, and

WHEREAS, it is now the intention of the State Highway Commission, by mutual agreement with the Polk County Court of the State of Oregon, to eliminate and remove from the system of secondary state highways, under the provisions of Chapter 248, Oregon Laws of 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Laws of 1939; the hereinafter described section of the Dallas-Kings Valley Secondary Highway No. 191, and

WHEREAS, it is mutually understood and agreed by the State Highway Commission and the County Court of Polk County of the State of Oregon, that from and after the adoption of this resolution by the State Highway Commission the hereinafter described section of the Dallas-Kings Valley Secondary Highway No. 191 shall, under the provisions of the laws of Oregon, become a county road, and the construction, repair, maintenance or improvement, and the jurisdiction thereof, shall be exclusively under the County Court of Polk County;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating as follows:

12303

1. That the following described section of the Dallas-Kings Valley State Secondary Highway No. 191 is hereby eliminated and removed from the Secondary State Highway System, to wit:

A Section of the Dallas-Kings Valley Secondary State Highway No. 191

Beginning at a point on the Dallas-Kings Valley Secondary State Highway No. 191 at mile point 7.54 where the said secondary state highway is intersected by the Falls City Road; thence in a southerly and southeasterly direction to a point where the present designated Dallas-Kings Valley Secondary State Highway intersects the present designated Kings Valley Secondary State Highway No. 190, a distance of 3.27 miles.

2. That the said above described section is hereby declared to be eliminated and removed from the secondary system of highways and from and after the adoption of this resolution shall become a county road, and the construction, repair, maintenance or improvement, and the jurisdiction thereof, shall be exclusively under the County Court of Polk County, as provided by law.

3. That this resolution be entered in the minutes of the Commission and a duly certified copy thereof mailed to the County Court of Polk County.

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Polk County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Polk County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

A Section of the Dallas-Kings Valley Secondary State Highway No. 191

Beginning at a point on the Dallas-Kings Valley Secondary State Highway No. 191 at Mile Point 7.54 where the said secondary state highway is intersected by the Falls City Road; thence in a southerly direction to a point on the present designated Kings Valley Secondary State Highway approximately 0.7 mile north of Pedee, a distance of approximately 5.9 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws of 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Oregon Laws of 1939; and amendments thereof.

3. That this resolution be entered in the minutes of the Commission and a duly certified copy thereof mailed to the County Court of Polk County.

WHEREAS, under the provisions of Chapter 248, Laws of 1931; Chapter 196, Laws of 1935; and Chapter 529, Laws of 1939; the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with thePolk County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions ofsaid acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State HighwayCommission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Polk County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Monmouth Secondary State Highway No. 194

Beginning at a point on the Dallas-Kings Valley Secondary State Highway No. 191 near the Little Luckiamute River; thence easterly to the West Side Pacific Highway in Monmouth, a distance of approximately 7.0 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Chapter 248, Oregon Laws of 1931; Chapter 196, Oregon Laws of 1935; and Chapter 529, Oregon Laws of 1939; and amendments thereof.

3. That this resolution be entered in the minutes of the Commission and a duly certified copy thereof mailed to the County Court of Polk County.

The Commission also approved and signed an agreement with Lane County covering the abandonment of a section of the old Willamette Highway between Goshen and Lowell when the highway has been reconstructed on permanent alignment, and particularly covering the section between Pleasant Hill and Lowell which has not yet been rebuilt. (This agreement provides for the abandonment of the Pleasant Hill-Lowell Section at such time in the future when the new highway between these points has been constructed. The abandonment of the section between Goshen and Pleasant Hill was effected by resolution of the Commission adopted on November 14, 1944.) In this connection the Secretary presented a certified copy of the resolution from the Lane County Court, accepting jurisdiction over the abandoned section of this highway between Goshen and Pleasant Hill, for county road purposes. It was approved by the Commission and ordered filed.

A letter was presented from Hood River Post, American Legion, requesting permission to maintain two small buildings on the Columbia River Highway right of way at the Hood River city limits for use as service men's shelters. The Commission approved the request subject to the condition that it does not involve a deviation from the Commission's newly established policy with respect to such matters.

Similar action was taken by the Commission on the request of the Dilley Community Club, Dilley, Oregon, for permission to maintain a shelter for school children on the right of way of the Tualatin Highway in Dilley. Both requests were referred to the Engineer for handling.

Consideration was given by the Commission to the application of Mr. L. M. Christensen for permission to take "smeltsand" from the ocean beach at Yachats for use in connection with the construction of buildings that he proposes to erect at this place. The Attorney advised that the Commission has control over the beach sand up to the high water mark, and can legally grant this application if it so desires. He explained that Mr. Christensen plans to construct numerous buildings on the property which is owned by a British Syndicate and fronts on the ocean for about two miles. Chairman Banfield expressed himself in favor of granting such permission with certain restrictions. He gave as his thought, however, that an opinion, as to whether or not the taking of the sand would adversely affect the spawning of smelt, should be secured before action is taken on the matter. The suggestion was approved by Commissioners Schaupp and Chessman, whereupon the Attorney was instructed to secure such opinion from the State Fish Commission.

The Commission had under discussion the setting of a date for its next regular meeting and decided to hold such meeting on Monday afternoon and Tuesday, January 22 and 23, 1945. The Secretary was instructed to make the usual arrangements to hold this meeting in the Imperial Hotel, Portland.

The Commission considered the following matters of unfinished business:

1. Request of Douglas County Court for designation of the North Umpqua County Road as a state secondary highway. The Engineer advised that it is his intention to report on this matter as soon as possible.

2. Survey for determining ownership of proposed state park property at Wallowa Lake. The Engineer advised that the crew is about ready to make the survey. The Commission ordered the work stopped in conformity with previous action taken at this meeting.

3. Report of Engineer on the status of his studies relative to Eugene's postwar highway plans. The Engineer advised that this report is not ready.

The Attorney reported receipt of an application from the Bonneville Power Administration in behalf of Douglas County Cooperative Association, to construct a power transmission pole line across several state highways north of Drain, Douglas County, and along a short section of the Pacific Highway between Comstock and Anlauf. The Commission approved the application subject to the condition that the installations will not conflict with any permits heretofore issued for similar purposes at such locations, and that construction is in conformity with approved standards.

The Engineer brought up for discussion a controversy that exists in the Springfield district with respect to the weighing of log loads. He said that log hauling conditions in this vicinity are reaching the critical stage inasmuch as the operators do not show an inclination to comply with the regulations and complain when ordered by the State Police to legalize the weight of their loads either by dumping a log, or by sawing off the end of the log in case of an axle overload. The place where the greatest amount of trouble is being experienced, he said, is at the scales on the McKenzie Highway about 3½ miles east of Springfield where there is no adequate site available near the scales on which to dump the logs. He suggested in view of the circumstances, that it would be advisable to purchase a small tract near the scales for this purpose which, he thought, could be acquired for about $150. The Commission approved the suggestion and authorized the Attorney to negotiate the purchase of this property.

The Commission discussed with the Engineer the bids received at the morning's session for highway construction work and for the purchase of a tract of land in northeast Portland. The Commission decided by unanimous vote to award the contract to the low bidder in each instance with the following exceptions: The low bid received for the construction of the Marine Barracks Access Road Project in Klamath County was approved by the Commission but the award of the contract was deferred until certain conditions have been satisfied. The Commission referred the bids to the Engineer with authority to award the contract at that time. With respect to the Newport Rock Production Project, inspection revealed that identical low bids were submitted by T. W. Thomas, Portland, and a partnership consisting of T. F. Skelton and H. H. Wiecks, Toledo. The Commission approved the amount of the bid and decided to award the contract on the flip of the coin if no objections are offered by the contractors involved. As to the sale of property in northeast Portland the Commission decided to accept the bid of E. F. Wilson on Alternate No. 1 which permits access to the highway at only one point.

At 3:00 p.m., Chairman Banfield made the following public announcement of the awards:

"Austin Junction-Unity Junction Rock Production Project on the John Day Highway in Baker and Grant Counties. M. C. Lininger & Sons, Medford, submitted the low bid for this project in the amount of $17,600. Oscar E. Joelson, Eugene, submitted the only other bid in the amount of $18,000. The Commission has awarded this contract to M. C. Lininger & Sons, the low bidder at their bid price of $17,600."

"Union Rock Production and Resurfacing Project on three highways, in Baker and Union Counties. M. C. Lininger & Sons, Medford, submitted the low bid for this project in the amount of $26,350. The next low bid was that submitted by Rogers Construction Co., Dayton, Washington, in the amount of $32,977. There were two higher bidders. The Commission has awarded this contract to M. C. Lininger & Sons, Medford, the low bidder, at their bid price of $26,350.

"Sandy-Government Camp Rock Production Project on the Mt. Hood Highway in Clackamas County. The low bid submitted for this project was that of Vernie Jarl, Gresham, in the amount of $22,520. The next low bid was that of J. S. Risley, Milwaukie, in the amount of $24,400. There were three higher bidders. The Commission has awarded this contract to Vernie Jarl, the low bidder, at his bid price."

"Elsie-Sunset Camp-Vernonia Rock Production Project on four highways in Clatsop, Columbia, Tillamook, and Washington Counties. F. H. McEwen & Jed Wilson, Seaside, submitted the low bid for this project in the amount of $30,355. The next low bid submitted was that of Vernie Jarl, Gresham, in the amount of $40,740. There were five higher bidders. The Commission has awarded this contract to F. H. McEwen & Jed Wilson, Seaside, low bidder, at their bid price of $30,355."

"Shutler-Condon Rock Production Project on the John Day and Wasco-Heppner Highways in Gilliam County. Oscar E. Joelson, Eugene, submitted the low bid for this project in the amount of $25,835. The next low bid submitted was that of R. O. Dail, Portland, in the amount of $27,899.50. There were eight higher bidders. The Commission has awarded this contract to Oscar E. Joelson, Eugene, low bidder, at his bid price of $25,835."

"Alameda-City Limits (Klamath Falls) Section of the Marine Barracks Access Road in Klamath County. The low bid submitted for this project was that of Clifford A. Dunn, Klamath Falls, in the amount of $16,943.50. Tru-Mix Concrete Co., Medford, submitted the next low bid in the amount of $19, 214. The only other bid was that submitted by Babler and Conley, Portland, at $19,477.50. The Commission has referred these bids to the Engineer with authority to award the contract to the low bidder, Clifford A. Dunn, when certain conditions have been satisfied."

"Hendricks Bridge-Nimrod Rock Production Project on the McKenzie Highway in Lane County. The low bid submitted for this project was that of J. S. Risley, Milwaukie, at $19,970. The next low bid was submitted by Newport, Kern, & Kibbe, Portland, at $22,750. There were four higher bidders. The Commission has awarded this contract to J. S. Risley, Milwaukie, low bidder, at his bid price of $19,970.

"Newport Rock Production Project on three highways, in Lincoln County. T. W. Thomas, Portland, and a partnership consisting of T. F. Skelton and H. H. Wiecks, Toledo, submitted identical low bids for this project, each being in the amount of $26,928. The third low bidder was Rogers Construction Co., Dayton, Washington, at $28,968. There were

four higher bidders. The Commission has decided to award this contract on the flip of a coin if that is satisfactory to the low bidders. (The two contractors, who were present, were then called to the rostrum and agreed to accept the results of the coin flip. The coin was flipped by Paul Hauser, Oregonian reporter. It was won by T. F. Skelton and H. H. Wiecks. Chairman Banfield thereupon announced that the Commission awards the contract to Skelton and Wiecks.)

"Elgin Rock Production Project on the Weston-Elgin and Wallowa Lake Highways in Umatilla and Union Counties. M. C. Lininger & Sons, Medford, submitted the low bid in the amount of $31,800. The next low bid was submitted by Rogers Construction Co., Dayton, Washington, in the amount of $32,900. There were two higher bidders. The Commission has awarded this contract to M. C. Lininger & Sons, Medford, low bidder, at his bid price.

"Hermiston Rock Production Project on four highways in Umatilla County. F. R. Hewett Co., Spokane, Washington, submitted the low bid in the amount of $37,460. The next low bid was submitted by J. A. Terteling & Sons, Boise, Idaho, in the amount of $38,360. There were nine higher bidders. The Commission has awarded this contract to F. R. Hewett Co., Spokane, Washington, low bidder, at its bid price of $37,460.

"Sale of tract of land in northeast Portland. The high bid submitted for the purchase of this property was submitted by E. F. Wilson, Portland, at $1,216 under Alternate No. 1 which permits access to the highway at only one point, and $1,316 under Alternate No. 2 which permits access at more than one point. The next high bid was that submitted by Harry Hoffman, Portland, at $911 under Alternate No. 1 and $1,012 under Alternate No. 2. There were two lower bidders. The Commission has accepted the bid of E. F. Wilson on the basis of Alternate No. 1."

The Commission considered and signed agreements, etc., as follows:

Agreement with Lane County re abandonment of the old Willamette Highway between Goshen and Lowell, when the new highway has been constructed.

Agreement with Polk County re exchange of highways at Camp Adair.

Agreement with Klamath County re maintenance of Crescent Lake County Road.

Agreement with Contractor Henry L. Horn, disposing of his claim for extra compensation arising out of Denver Avenue-Union Avenue project.

Lease Agreement with U. S. A. covering use of Pilot Butte State Park.

Acceptance of permit from Bonneville Power Administration authorizing maintenance of traffic sign guy wires on Government property at Astoria Substation site.

Agreement with H. H. Skipper & wife, disposing of claim for damages arising out of highway construction at Astoria.

Agreement with P. W. and J. W. Williams covering rental to the Williams' of state-owned property situate on the south side of the Wilson River Highway at McNamers Camp, Tillamook County.

Agreement with S. P. Mathney, covering construction of a logging road approach to the Pacific Highway, in Douglas County.

Bargain and Sale Deed conveying unto Signal Oil Company property in Lot 2 of Long and Landess Addition to Cottage Grove.

Bargain and Sale Deed conveying unto Alma Gibson Inman, Lots 31 and 32, Kenton, Portland.

Bargain and Sale Deed conveying unto D. W. Starkey and wife, Lot 18, Block 30, Hot Springs Addition, Klamath Falls.

Bargain and Sale Deed conveying unto Lucy R. Martin, portion of Block 32, Amended Plat of Fairmount, Eugene.

Bargain and Sale Deed conveying unto Lucy R. Martin, portion of Block 34, Amended Plat of Fairmount, Eugene.

Bargain and Sale Deed conveying unto Lillian Barzee, portion of Block 34, East St. Johns, Portland.

There being no further business to come before the Commission at this time, the meeting adjourned at 3:30 p.m.

Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

DEC 19 1944

Portland, Oregon, January 22, 1945

The State Highway Commission convened in regular session at 1:30 p.m. in Room 615 of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

Commissioner Chessman was excused from attending this meeting as was also the Commission's Attorney, J. M. Devers.

The Commission approved and signed the minutes of the meetings held on October 23 and 24, November 14, and December 18 and 19, 1944, subject to approval by Commissioner Chessman. (The above minutes were orally approved and signed by Commissioner Chessman later.)

Consideration was given by the Commission to the acquisition of real property that is needed for various highway purposes throughout the state. The Assistant Attorney presented a list of such properties together with the offer that he recommended in payment for each parcel. After careful consideration, the Commission approved the purchase of such properties and by unanimous vote adopted the following resolution with regard thereto:

> WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and
>
> WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and
>
> WHEREAS, it is the judgment of the Commission that the said options should be aproved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed;
>
> NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

CIRCLE BRIDGE-HUG POINT SECTION, OREGON COAST HIGHWAY

10818-Barbur, A. D. Right of Way Option expires June 10, 1945	0.11 acre	$00.00	Witt

GARDNER RANCH-BERGER RANCH SECTION, WOLF CREEK HIGHWAY

6512-Berger, Rosa Right of Way Option expires July 8, 1945	LUMP SUM SETTLEMENT (6.87 acres, fencing, severanace damages, waiver of access)	$3,600.00	Collins

BERGER RANCH-BARNES ROAD SECTION, WOLF CREEK HIGHWAY

5201-Siegenthaler, Louis and Hannah Right of Way Option expires July 15, 1945	LUMP SUM SETTLEMENT (3.64 acres, fencing, trees, moving buildings, damages, etc, loss of business,-)	$7,000.00	Collins

STEIWER HILL-MURDER CREEK SECTION, PACIFIC HIGHWAY

11051-Miller, Wick Right of Way Option expires March 8, 1945	4.74 acres at $100.00	$ 474.00	
	70 rods fence at $1.50	105.00	
	4 anchor posts at $1.50	6.00	
	House 4-room	1,750.00	
	Chicken house	100.00	
	Old barn	100.00	
	New well	400.00	
	Yard fence	100.00	
	Trees (fruit)	645.00	
	Shrubbery, lawn, strawberries	135.00	
	Loss building site	400.00	
	Waiver of access and advertising agreement	100.00	
		4,315.00	
	Less credit (salvage of buildings estimate)	250.00	Benson
		$4,065.00	Parker

11050-Metropolitan Life Insurance Company, and Wick Miller Right of Way Option expires March 8, 1945	11.84 acres at $100.00	$1,184.00	
	126 rods fence at $1.50	189.00	
	8 anchor posts at $1.50	12.00	
	Waiver of access and advertising agreement	50.00	Benson
		$1,435.00	Parker

JAN 22 1945

STEIWER HILL-MURDER CREEK SECTION, PACIFIC HIGHWAY (Cont.)

11528-Manela, Olive E. and Nelson T. Right of Way Option expires July 16, 1945	0.14 acre at $250.00 Waiver of access and advertising restriction	$35.00 30.00 $65.00	Benson

ROOSEVELT BEACH-SQUAW CREEK SECTION, OREGON COAST HIGHWAY

892-A Schreiber, Jack C. and Lenore C. Schreiber Stock Pile Site Lease Expires January 15, 1947	2 year lease on 0.459 acre at $25.00 year	$50.00	DeSouza

SOUTH BEACH-BEAVER CREEK SECTION, OREGON COAST HIGHWAY

11491-DeFrance, I. A. Park strip	12,524 sq. ft. at 1¢	$125.24	Benson

NEWPORT-WALDPORT SECTION, OREGON COAST HIGHWAY

11515-Lincoln County Wayside strip	29,418 sq. ft.	$00.00	Benson
11588-Mashell Coal & Coke Company Drainage Easement	0.63 acre (To travel over for purpose of maintaining the drainage ditch)	00.00	Benson

NORTH BEND-MARSHFIELD SECTION, OREGON COAST HIGHWAY

11285-Culver, W. T. (Co.) Maintenance Patrol headquarters	1,500 sq. ft. at 20¢	$300.00	Parker
11286-Coos County Maintenance Patrol headquarters	1.03 acres at $728.16	750.00	Parker

FLORENCE SECTION, OREGON COAST HIGHWAY

11574-Tarr, John C., and Bernard Sines Stock pile site and Maintenance headquarters Option expires July 4, 1945	11,880 sq. ft. at .013¢ less	$150.00	Parker

SPRINGFIELD-COGSWELL HILL SECTION, MCKENZIE HIGHWAY

11569-Rossiter, Darrell and Margaret L. Right of Way Option expires July 3, 1945	1,000 sq.ft. at 2½¢ Moving fence and shrubs, (Estimated $25.00)	$25.00 25.00 $50.00	Parker
11568-Jorgensen, Nels T. Right of Way Option expires June 1, 1945	0.05 acre at $1,000 per acre	50.00	Parker
11567-Nicholas, Ralph F. Right of Way Option expires May 21, 1945	0.37 acre - 0.145 acre 0.225 acre at $1,000 State to move shrubs, brick gate posts and fencing estimated at	00.00 225.00 100.00 $325.00	Parker

EAGLE POINT-TRAIL SECTION, CRATER LAKE HIGHWAY

11520-Shelton, Lillian and Charles Gravel Pit site (Bar) Option expires June 22, 1945	11.05 acres at $50.00 plus	$554.00	Witt

BURNS-BUCHANAN SECTION, CENTRAL OREGON HIGHWAY

11549-McGowan, Archie and Juanita McGowan Stock pile site Option expires June 19, 1945	1.38 acres at $10.00 Plus fencing	$13.80	Cozad
11550-Withers, Harry A. & Olivia Withers Stock pile site Option expires July 1, 1945	1.38 acres at $10.00 Plus fencing	13.80	Cozad

BROTHERS-HARNEY COUNTY LINE SECTION, CENTRAL OREGON HIGHWAY

11554-Deschutes County Stock Pile Site	6.50 acres (4 parcels)	$00.00	Chandler

JAN 22 1945

VALE SECTION, JOHN DAY HIGHWAY

11573-Taylor Grazing, U. S. Gravel Pit and Hauling Road	23.1 acres	$00.00	Cozad
11572-Bisher, Art E. Haul road Option expires July 8, 1945	1.92 acres at $50.00	96.00	Cozad

JUNCTION #5-HARNEY COUNTY LINE SECTION, JOHN DAY-BURNS HIGHWAY

11315-Craddock, C. W. Stock Pile Site Option expires June 20, 1945	3.62 acres at $10.00 Plus fencing	$36.20	Cozad

PELICAN CITY-SOUTH 6th STREET SECTION, KLAMATH FALLS-MALIN HIGHWAY

11547-Robins, Ada Right of Way Option expires June 17, 1945	6,500 sq.ft. at 1½¢	$97.50	Witt

---

The Assistant Attorney requested authority to condemn certain parcels of real property that are needed for various highway purposes and concerning which he has been unable to reach satisfactory settlements with the owners. He presented a list of such properties together with offers that he recommended in condemnation as follows:

VADIS-GARDNER RANCH SECTION, WOLF CREEK HIGHWAY

6544	J. E. Tapp, et ux.	$5,500.00

FLORENCE MAINTENANCE SITE

11575	N. F. Shafer	$50.00

BAKER SECTION, BAKER-HOMESTEAD HIGHWAY, BAKER COUNTY

11595	Lee A. Duncan	$987.50

After careful consideration the Commission approved the offers and authorized condemnation in each instance. The following resolution with regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways or for any other purpose designated by the United States; and

WHEREAS, on the third day of April, 1941, the Highway Commission adopted a resolution by which, among other things, the Commission found and declared that for the purpose of making possible a highway adequate for the needs of the traveling public, with respect to the Wolf Creek Highway, there should be acquired in addition to the necessary rights of way all rights of access to said highway except at such places as might be agreed upon by the Highway Commission and the property owners; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by J. E. Tapp, et ux., which property is located in the Charles McNary D. L. C. No. 73 in Sections 1, 2, 11 and 12, Township 1 North, Range 3 West, W. M., Washington County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as file R 6544, which property is being acquired for right of way purposes in connection with the Wolf Creek Highway and the Wilson River Highway; *

Real property owned by Newton F. Shafer, which property is located in Lots 11 and 12, Block 26, Gallagher's Addition to the City of Florence, Lane County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 2, and is further identified in the records of the Highway Commission as file R11575, which property is being acquired for maintenance headquarters purposes and is located adjacent to the Oregon Coast Highway; *

Real property owned by Lee A. Duncan, which property is located in the north half ($N\frac{1}{2}$) of the northwest quarter ($NW\frac{1}{4}$) of Section 10, Township 9 South, Range 40 East, W. M., Baker County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 3, and is further identified in the records of the Highway Commission as file R 11595, which property is being acquired for the purpose of securing roadbuilding materials therefrom in connection with the Baker-Homestead Highway. *

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. The Commission does further find and declare that in addition to the acquisition of the real property described on the attached sheet as Parcel No. 1 it is necessary, in order to make possible the proper construction and maintenance of the Wolf Creek Highway over said property, that there be acquired all right of access from abutting property to the said Wolf Creek Highway where the same is constructed over Parcel No. 1 and that access from the property abutting upon said Parcel No. 1 shall be provided only for two farm crossings at points which may be mutually agreed upon between the Highway Commission and the owner of the property abutting upon said parcel, which crossings shall be across the Wilson River Highway, which likewise is to be constructed over a portion of Parcel No. 1.

4. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description,

JAN 22 1949

and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

5. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and is authorized and directed to acquire, in addition to title to the said described parcels of land, all rights of access to Parcel No. 1 save and except access for two farm crossings at points to be mutually agreed upon between the Highway Commission and the property owners, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property, and all rights of access to Parcel No. 1 save and except access for two farm crossings at points to be mutually agreed upon between the Highway Commission and the property owners.

6. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any of them, or any interest therein the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

7. That this resolution be entered in full in the minutes and records of this Commission.

---

*(The detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 49, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

JAN 22 1945

The Engineer and the Assistant Attorney reported the results of the taking of bids in Salem on December 27, 1944, for the purchase of several cottages that were acquired in connection with the acquisition of right of way for a proposed revision of the Oregon Coast Highway at Spencer Creek, about seven miles north of Newport, in Lincoln County. The Engineer advised that two bids were received, the high one being that submitted by Charles Collins, Portland, in the amount of $326 for the buildings and contents, and the other being that of Kenneth Dodd, Toledo, in the amount of $200 for buildings and contents. He asked the Assistant Attorney to explain further details. The Assistant Attorney advised that pursuant to the suggestion of the Commission at the previous meeting that the buildings might be of use to highway contractors when working in that vicinity, he made inquiry of the two bidders and of a number of other parties whether or not they would be interested in the purchase of fixtures alone and as a result thereof received an offer from Mr. Ray Congdon, Horton, Oregon, to pay $119 for the contents of the buildings, and an offer from Mr. Dwight Wadsworth, Portland, to pay $450 for both the buildings and the contents, which is slightly less than the appraised value. Instructions were requested from the Commission as to disposal of the bids. Action in the matter was deferred by the Commission pending personal inspection of the buildings by Chairman Banfield during the following week end.

The Secretary presented a reimbursement voucher received from the United States Indian Service, execution of which by the Commission is required in order to secure a refund of $50 heretofore paid to the Indian Service for a hauling road easement to a quarry site situate in Klamath County. He explained that advance payment of the fee is required in cases of this kind but in this particular instance the hauling road was not used so the Indian Service has stated a willingness to reimburse the state for the amount advanced but requires the signing of the voucher in order to effect the payment. The Commission approved the voucher which was signed on the following day.

The Commission discussed an opinion from the Attorney to the effect that the Commission does not have legal authority to contribute state highway funds toward the cost of conducting a traffic training school at Corvallis and decided in view thereof not to contribute toward such expense.

The Engineer brought up for discussion the taking of membership in the National Association of Travel Officials. He advised that this matter was before the Commission some time ago when action on the matter was deferred pending a recommendation from the Advisory Committee on travel and informational matters. He presented letters from the individual members of the Committee indicating their approval of such membership, the annual dues of which are $50. It was the opinion of the Commission that if benefits are to be gained by belonging to this organization, membership therein should be obtained by Botsford, Constantine & Gardner with whom the Commission has a contract to handle publicity matters, it being the thought of the Commission that it is the duty of this company to do whatever may be necessary to enable the company to properly handle the business of the Highway Department. The Engineer was thereupon instructed to discuss the matter with the Travel Agency.

The Engineer reported on his studies of the postwar plans of the City of Eugene, particularly of the proposed new connection between the Coburg County Road and the Pacific Highway, involving construction of a new bridge over the Willamette River just north of the Eugene City Limits. According to the report there are two routes available, one known as the Mill Race Route and the other High Street Route, both of which involve traffic interchanges at the east end of Sixth Avenue. The Engineer advised that there is very little difference in the estimated cost to construct the two routes, each being slightly in excess of $900,000. He also said that either route will give satisfactory service, but in his estimation the so-called Mill Race Route offers the greatest advantages. He exhibited maps showing both routes. The matter was discussed at some length but the Commission took no action thereon. (See Engineer's report directed to the City Council and City Planning Commission of Eugene dated January 8, 1945, in General Files for details.)

The Engineer reported that the bridge over Duval Creek on the Willamette Highway in Lane County is in a bad state of repair and should be replaced with a new structure at the earliest possible time in order to safeguard traffic. He estimated the cost of a new bridge at $8,000 and advised that an increase in the budget is not required to meet this expense because the amount set up in the Maintenance Budget for 1945 is ample. He requested authority to do the work by contract and to advertise the project for bids at the next meeting. The Commission approved the request unanimously.

Advisability of authorizing the Engineer to receive bids in Salem between regular meetings of the Commission for emergency repairs to Highway surfaces and bridge structures which are estimated to cost not in excess of $2,000, was considered by the Commission. The Engineer explained that frequently it is necessary to do emergency repair work in order to avoid the occurrence of accidents which work in normal times is done by regular maintenance crews; however, on account of wartime conditions and shortage of labor it is not possible to handle the work in such a manner without neglecting other work so it would be to the state's advantage if the Commission would authorize the contracting of the work and the taking of bids in Salem between regular meetings of the Commission. The following resolution with regard thereto was adopted by the Commission by unanimous vote upon motion by Commissioner Schaupp, it being understood that when it is necessary to take bids in the manner provided therein, the Engineer will secure the Commission's approval in advance and will also consult with the Commission with regard to the award of the contract:

> WHEREAS, it has been and is the established policy and procedure of the Commission with respect to repair of highways, bridge structures, buildings and other highway facilities to perform such repair work with the Commission's own forces and to some extent the Commission's own equipment; and
>
> WHEREAS, because of war emergencies it has become difficult, and in some instance almost impossible, to accomplish with the Commission's forces and equipment all of the necessary repair

of highways and highway facilities; and

WHEREAS, it is deemed necessary in order to meet the obligations imposed by law on the Commission with respect to maintenance of highways to modify for the emergency the Commission's said established policy;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and affirmatively voting, as follows:

1. That, until rescinded as herein provided, the State Highway Engineer hereby is authorized with respect to the repair of state highways, highway structures, bridges, culverts, buildings and other highway facilities to call for competitive bids for the repair of any highway or section of highway or any bridge culvert or other structure thereon, or any buildings or other property owned by or under the jurisdiction of the Highway Commission; provided, however, that before any such repair work may be done, except repairs of an emergency nature, which subject has heretofore been covered by a resolution and order of this Commission, and before any call may be issued for bids, formal or informal, the Engineer shall submit to the Commission a statement in sufficient detail to acquaint the Commission with the nature of the proposed repair work, together with an estimate of the probable cost.

2. The call for bids for any such work may direct that bids shall be received at the office of the Highway Commission in Salem, Oregon, on a date and at an hour fixed in said call.

3. On the day and at the hour fixed in the call said bids may be opened and read by the Secretary in the presence of the State Highway Engineer and/or the Assistant State Highway Engineer, and the Chief Counsel.

4. All bids so received, opened and read shall be tabulated, and thereafter the State Highway Engineer, or in his absence the Assistant State Highway Engineer, shall advise the Commission by telephone, or otherwise, with respect to the bids received, and the Commission shall then instruct the Engineer concerning the acceptance or rejection of the lowest and best bid received; provided, however, that the entire transaction shall be formally considered for ratification by the Commission at its first meeting following the opening and receipt of such bids.

5. The policy and procedure hereby provided for shall apply only to repair work, the estimated cost of which does not exceed the sum of $2,000.

6. This resolution shall be entered in the minutes and records of the Commission as of the twenty-second day of January, 1945, and shall be in full force and effect until modified or rescinded by action of the Commission.

JAN 22 1945

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them for the records. After discussion the Commission by unanimous vote approved the following surveys and authorized the Engineer to make such surveys on various sections of the highways in this state, which said sections of highways together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures are as follows:

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Plans	20-1463	Lane	Vicinity Map of Florence Maintenance Quarters Site	1st- $100.00
Plans	26-1477	Multnomah	Intersection at Schmeer Rd. and Denver Ave., Portland	1st- $200.00
Plans	14-1423	Hood River	Vicinity map of Hood River Maintenance site	1st- $100.00
R/W Markers	10-1445	Douglas	Town of Gardiner, right of way stakes Oregon Coast Highway	1st- $300.00
Plans	34-1439	Washington	Intersection of Tualatin Valley Hwy. and Canyon Lane	1st- $200.00
Plans	18-1443	Klamath	So. 6th Street Section of Klamath Falls-Lakeview Hwy.	6th-$1,500.00 Total to date $10,000.00

Commissioner Schaupp brought up for discussion the matter of securing Federal funds to finance the improvement of the highway which extends southeasterly from Klamath Falls to Hatfield, California, via Merrill. The Engineer advised that this road is not a Federal Aid highway and would have to be designated as such in order to secure Federal Aid money to improve it. He was instructed in view thereof to do what is necessary to secure such designation and to solicit help from Mr. C. H. Purcell, Director of Public Works, California, to that end.

The Engineer requested authority to advertise for bids for the improvement of the Schmeer County Road Intersection with Denver Avenue (Pacific Highway West) in North Portland, on a revised plan. He explained that the original plan which the Commission approved some time ago and which was estimated to cost about $8,000 consisted simply of widening the present highway between the Schmeer Road and Vanport Underpass in order to eliminate the hazardous condition that existed in front of the store near by owned by Mr. Anderson, when traffic turned off the highway to go to the store. However, further study reveals that such an improvement would not entirely

satisfy the condition, particularly from the standpoint of traffic that enters Schmeer Road from the north. To provide for such traffic, he said, would require the construction of a deceleration lane for a short distance on the west side of the highway with an underpass connection with the Schmeer Road. He exhibited a map showing the proposed plan, construction of which he estimated would cost about $30,500, and recommended approval of the project from the safety standpoint in view of the heavy volume of traffic that enters the intersection from both roads. After careful consideration and in view of the apparent emergency that exists, the Commission approved the revised project by unanimous vote and authorized the taking of bids for construction as soon as plans and specifications can be prepared.

The Engineer reported the results of his inspection of the proposed revision of the Columbia River at Troutdale in company with Mr. Claude Bristol, Portland, who appeared before the Commission at the previous meeting. He advised that as a result of this inspection he has changed the proposed alignment somewhat so as not to impair the value of the celery lands which was the basis of Mr. Bristol's complaint. He exhibited a map showing the alternate routes considered and recommended adoption of the "L1" line which, he said, extends along the approximate edge of the best celery land, and in his estimation will cause the least possible damage to the property that is used for celery growing. He estimated the cost to construct a four-lane paved highway on the revised location, two and a half miles in length, at about $1,106,000 as compared with $1,105,000, the estimated cost to construct the "L4" location as originally proposed, and $987,000, the estimated cost of construction if the present route through the Town of Troutdale were utilized. He pointed out that the "L1" line makes a good connection with the present highway leading into Portland and provides for a cheaper connection with the proposed highway into Portland following Sullivan's Gulch, if and when that highway is built. He asked the Commission to take action on the matter at this meeting which would make it possible to complete the design of the project and have it ready for construction on short notice when he is authorized to proceed. The matter was discussed by the Commission at considerable length, during which Chairman Banfield stated his preference for the "L1" location as recommended by the Engineer. Commissioner Schaupp expressed himself similarly. The Attorney was instructed to prepare an appropriate form of resolution covering the matter for adoption by the Commission at its next meeting.

The Commission had under consideration the following requests for extensions of time within which to complete highway contracts:

Rogers Construction Company, Contract No. 2668, for regrading, surfacing and oiling the Hooker Creek-Jordan Creek Section of the Jordan Valley Secondary Highway in Malheur County, requested an additional extension of time of five days, from November 30 to December 5, 1944, within which to complete this job. They attributed their failure to complete the project within the previously extended time limit to scarcity of labor and adverse weather conditions. The Engineer advised that contractor's failure to complete the project within the specified time limit is directly attributable to unsatisfactory working conditions resulting from the

wartime emergency. He recommended that the additional extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Rogers Construction Company, Contract No. 2669, for grading, widening, surfacing and oiling the Jordan Creek-Scotts Butte Creek Section of the I. O. N. Highway in Malheur County, requested an additional extension of time of five days, from November 30 to December 5, 1944, within which to complete this job. Scarcity of labor and adverse weather conditions were given by the contractor as reasons for failure to complete the project within the previously extended time limit. The Engineer advised that the overrun of time limit is directly attributable to wartime conditions over which contractor had no control. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Chester T. Lackey, Contract No. 2670, for the furnishing of crushed rock for the Juntura-Hope Rock Production Project on the Central Oregon Highway in Malheur County, requested an extension of time from September 30, 1944, to June 1, 1945, within which to complete this job. Mr. Lackey alleged that he lost two months' operations by reason of adverse weather conditions and his work was further handicapped by shortage of manpower and hauling equipment, the owners of dump trucks being reluctant to use their trucks on this kind of work because of difficulties in securing tire replacements. The Engineer advised that the delay in completion of this project has not interfered with oiling operations by state forces in this vicinity, and recommended that the extension of time requested be granted without penalty, notwithstanding that there has been a slight increase in the cost of engineering supervision. The Commission approved the recommendation unanimously.

J. A. Terteling & Sons, Inc., Contract No. 2692, for grading and paving the Astoria-Naval Hospital Section of the Nehalem Secondary Highway in Clatsop County, requested an extension of time from November 30, 1944, to January 6, 1945, within which to complete this job. They gave no reason for their failure to complete the project within the specified time limit. The Engineer advised that the contractor carried on this job during the fall months under rather difficult conditions and recommended in view thereof that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Harry I. Hamilton Company, Contract No. 2699, for construction of a bridge over Deer Creek on the Roseburg Access Road

Project in Douglas County, requested an extension of time of seventy-five days, from December 31, 1944, to March 16, 1945, within which to complete this job. They attributed their failure to complete the project within the specified time limit to the delay in the award of the contract by the State Highway Commission, and adverse weather conditions which prevailed after receiving notification of the award. The Engineer advised that bids for this project were taken by the Commission on September 11, 1944, but due to the fact that the Commission did not receive an acceptable bid for the grading and surfacing work which was involved under another contract, decided to hold the award of the bridge project pending the readvertising of the grading work. He further stated that forty-five days' time was lost on this account and as a result the bridge work carried into the time of year when weather conditions were not favorable. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

The Engineer reported that Contracts Nos. 2668, 2669 and 2692 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2668, with Rogers Construction Company, for regrading, surfacing and oiling the Hooker Creek-Jordan Creek Section of the Jordan Valley Secondary Highway in Malheur County; completed on December 5, 1944.

Contract No. 2669, with Rogers Construction Company, for grade widening, surfacing and oiling on the Jordan Creek-Scotts Butte Creek Section of the I. O. N. Highway in Malheur County; completed on December 3, 1944.

Contract No. 2692, with J. A. Terteling & Sons, Inc., for grading and paving the Astoria-Naval Hospital Section of the Nehalem Highway in Clatsop County; completed on January 6, 1945.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Engineer requested authority for Mr. E. H. Clymer, cost analyst, to go to Boise, Idaho, at state expense to inspect the books of the Morrison-Knudsen Company, highway contractors, as is necessary in order to dispose of the company's claim for extra compensation arising out of its contract with the Highway Commission for the construction of the Molloy Ranch-Hooker Creek Section of the I. O. N. Highway, Contract #2649. He gave as his thought that it would require two or three days' time to make the check and that the expense involved would not exceed $50. The Commission approved the request subject to concurrence by Governor Snell covering the out of state travel expense.

The Engineer reported that on January 3, 1945, he awarded to Mr. Clifford A. Dunn, the low bidder, the contract for construction of the Alameda-City Limits Section of the Marine Barracks Access Road Project in Klamath County, bids for which were received by the Commission on December 19, 1944, the conditions of the award having been satisfied. The Commission confirmed the award of this contract as reported.

The Engineer recalled that the Commission in June of 1943, authorized the purchase of four motor truck scales at an estimated total cost of $5,500. He said that the order for the scales was placed with Fairbanks, Morse & Company at $1,350 each, this company being the low bidder meeting with specifications, but delivery could not be made because of inability to secure the necessary priority preference rating. It now appears, he said, that the War Production Board has lifted certain restrictions and the company is ready and willing to deliver the scales at the original bid price if the Highway Commission still wants them. He advised that said scales are needed and recommended acceptance of the offer because very likely the scales will cost more later on. The Commission voted unanimously to purchase the scales.

The Commission discussed a letter from the City of Ontario requesting the Commission's approval of the routing of livestock and gasoline truck traffic along certain city streets so as to avoid the business district of the town. The Engineer explained that the Old Oregon Trail is now routed along Oregon Avenue, the town's main business street, and that the city wants truck traffic taken off that street and routed along West First Street, particularly between Idaho Avenue, where a spur highway leads to Idaho points, and South Fourth Avenue, where the highway turns west toward Nyssa. Such routing, he said, involves five city blocks which are all surfaced with an oil mat surfacing in good condition, and the city will maintain the route if the Commission will approve it. He estimated the annual cost to maintain the five blocks at $150 and suggested if the Commission sees fit to approve the truck route that the state assume this expense, notwithstanding the city's willingness to do so. After discussion the Commission approved the suggested truck routing subject to the condition that the City Council will adopt an appropriate ordinance relative thereto. The Commission also decided to relieve the city from maintaining the five blocks involved.

The Commission authorized payment of the 1945 membership dues in the American Association of State Highway Officials, amounting to $450.

Consideration was given by the Commission to a joint request from the Ostrander Railway & Timber Company and the Weyerhaeuser Timber Company for permission to operate logging trucks across two state secondary highways at grade in the vicinity of Molalla. The Engineer explained that both companies are using the same private road that intersects the two secondary highways; also that a permit was issued to the Ostrander Railway Company some time ago covering its trucks, but the permit did not include the trucks of the Weyerhaeuser Timber Company which is now requesting the same privilege. He gave as his thought, inasmuch as both companies are using the same road, that a new permit should be issued making both companies jointly responsible and he so recommended. The Commission approved the recommendation unanimously. (Permit was signed on the following day.)

The Commission discussed a proposed settlement offered by the U. S. War Department for the use of a portion of Cape Arago State Park, Coos County. The Engineer explained that the Army has been using this park since March, 1943, under lease from the Commission, but has recently vacated (or is about to vacate) the premises and wants to be relieved of further obligation. He advised that according to the original lease the War Department agreed to return the property to the state in as good condition as it was when the Army took it over and to that end a physical examination has been made of the property by representatives of the War Department and the State Highway Department and settlement mutually agreed upon. According to tentative arrangement, he said, the War Department relinquishes to the state certain property and improvements valued at $3,660, and the state pays to the War Department cash in the sum of $676 and in addition thereto assumes responsibility for repairs and the clean-up of premises which is estimated by the War Department to cost about $2,984. He gave as his opinion that such settlement is of advantage to the state inasmuch as in his estimation the property being turned over to the state is worth considerably more than the value placed thereon by the War Department, and because the cost to repair and clean up the premises, if done by state forces, will be less than that estimated by the Army Engineers. He recommended settlement on the basis of the report and execution of a supplemental agreement with the War Department covering the matter. The Commission approved the recommendation unanimously and signed the agreement on the following day.

The Commission discussed the date for its next regular meeting and decided to hold such meeting on Monday afternoon and Tuesday, March 12 and 13, 1945. The secretary was instructed to make the usual arrangements to hold the meeting in the Imperial Hotel.

The following matters of unfinished business accumulating from previous meetings were discussed by the Commission:

1. Request of Douglas County Court for designation of the North Umpqua County Road as a state secondary highway: - The Engineer advised that it is his intention to inspect this road personally with the members of the County Court in the not distant future and to render a report at the next meeting of the Commission, when the County Court will be present for a discussion of the matter. Commissioner Shcaupp suggested that action on this matter should be

deferred until the rules and regulations which are to govern the expenditure of federal funds have been received because it may be that under the regulations the counties will be able to finance their own roads. Chairman Banfield approved the suggestion and it was so ordered.

2. Report of State Parks Superintendent concerning proposed improvements in Champoeg State Park during 1945: - The Engineer advised that the Parks Superintendent has nothing further to report at this time except that he is still endeavoring to contact the members of the Historical Committee of the Oregon Historical Society relative thereto.

3. Report on housing facilities for maintenance forces at Seneca in Grant County: - The Engineer advised that inquiry of the Hines Lumber Company who owns most of the buildings in this town reveals that the company is now furnishing housing facilities for the maintenance men as a temporary proposition, but may not be able to do so continuously. The Commission decided, in view of the fact that the emergency has been relieved, to defer the construction of houses for maintenance forces until later when the need is more apparent.

4. Request of Portland Union Stock Yards Company and Swift & Company for the widening of Swift Secondary Highway to accommodate four lanes of traffic: - The Engineer advised that inspection of the premises reveals that if the highway were to be widened additional right of way must be obtained. The companies concerned, he said, originally agreed to donate land for this purpose, but changed their attitude later, so if widening work is to be done, right of way will have to be purchased. The Commission desired additional information so deferred action pending further report from the Engineer.

5. Request of the Association of Oregon Counties for the Highway Commission's endorsement of their proposed bill to increase the counties' share of state highway funds from 15.7% to 20%: - The Commission decided that it could not endorse this bill for reasons stated at the previous meeting.

6. Request of Oregon Motor Transport Association for the Highway Commission's endorsement of a proposed bill to increase the weight and length of truck and trailer conbinations operating over state highways: - The Commission took the attitude that this is a matter for the Legislature to decide. However, indicated that it would not oppose the bill if the privileges granted thereunder do not extend for a period longer than two years, and that it would so state to the Legislative Committee, if asked for a recommendation. (The matter was discussed further with a committee representing the Oregon Motor Transport Association on the following day.)

7. Illegal signs being maintained on the Pacific Highway at Goshen and at Grants Pass: - The Engineer advised that the sign at Goshen contains the wording, "Keep to right, Golden Gate Bridge" which would indicate to the public that the Pacific Highway is the only route available to the Golden Gate Bridge, whereas the Willamette Highway is also available from this point. The sign at Grants Pass, he said, does not contain exactly the same wording but leaves the same impression in the minds of the public and to that extent is illegal because the law places in the Highway Commission the authority to "erect and maintain suitable directional road signs on the state highways within the State of Oregon at such places and of such material and design as it may elect." He gave as his thought that the signs would meet the requirements if the wording that points out a specific direction were deleted and recommended that the Golden Gate Bridge and Highway District, which owns these signs, be so informed and requested to make changes accordingly. The Commission approved the recommendation.

The Engineer reported receipt of resolutions from the following cities and towns outlining plans for city street improvements that they propose to finance with moneys made available under the State Tax Street Fund Law, Chapter 371, Oregon Laws, 1943:

Amity	$ 748.52	Cornelius	$874.88
Antelope	123.61	Imbler	249.97
Cascade Locks	965.52	Island City	243.10
Coburg	626.29	Scio	482.08
Coquille	4,569.42	Waldport	865.26
		Willamina	929.82

He advised that he has examined the individual plans and has found them to be in conformity with the legal requirements; moreover, the individual projects have been inspected on the ground. He recommended approval of the projects as submitted. After due consideration the Commission approved the recommendation and thereupon adopted the following resolution with regard thereto upon motion of Commissioner Schaupp which was seconded by Chairman Banfield:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by this Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1944 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Amity	$ 748.52
Antelope	123.61
Cascade Locks	965.52
Coburg	626.29
Coquille	4,569.42
Cornelius	874.88
Imbler	249.97

(Continued on next page)

Island City - - - - - - - - - - - - - - - -	$ 243.10
Scio- - - - - - - - - - - - - - - - - - - -	482.08
Waldport- - - - - - - - - - - - - - - - - -	865.26
Willamina - - - - - - - - - - - - - - - - -	929.82

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

City of Amity - Maddux Street, Woodson Street, Sherman Street, Oak Street

City of Antelope - Maupin Street, Baird Street, McGreer Street

Cascade Locks - Moody Avenue, 3rd Street, Prospect Avenue, 4th Street, Levens Street, Olin Avenue, 6th Street, Hazel Street, Lakeview Addition, part of Edgewood Drive, Watts Street, Cates Avenue

City of Coburg - Van Duyn Street, Harrison Street, Locust Street, Diamond Street, Mill Street, McKenzie Street, Delaney Street, Dixon Street, Coleman Street, Miller Street

City of Coquille - Willard Street, First Street, also bridges on Beach Street, Henry Street, Fourth Street

City of Cornelius - Park Street

City of Imbler - Third Street, Main Street, Fifth Street, Sixth Street, Seventh Street, Esther Street, Lone Pine Avenue, Second Street

City of Island City - "C" Street

City of Scio - Smith Street, Oak Street, Main Street,

City of Waldport - The Hospital Road

City of Willamina - "B" Street, "C" Street, "D" Street, 1st Street, 2nd Street, 3rd Street, 4th Street, Fir Street, Willow Street, End Street

JAN 22 1945

2. That the type, plan and character of improvement proposed in the resolutions filed with this Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the same.

5. This resolution shall be entered in the minutes and records of this Commission as of the 22nd day of January, 1945.

The Engineer requested authority to receive bids in Salem on February 9, 1945, for the purchase of certain state-owned property in the Town of Sheridan, described as Lots 7 and 8 of Block 2, Fosters Addition to the City of Sheridan. He advised that this property was purchased a long time ago for use as a stockpile site but is no longer of value for such purpose or any other highway activity, so in his estimation, should be sold if a satisfactory price can be obtained. The Commission approved the request unanimously.

The Commission discussed at some length the so-called "free-way" bill which is now pending in the Oregon Legislature and decided to recommend and approve this bill to the Legislative Committee if requested for a statement. The Commission also discussed matters pertaining to log hauling over state highways but took no action thereon at this time. (See minutes of the following day when this matter was discussed with the Logging Industry Advisory Committee)

The meeting adjourned at 5:00 p.m. to reconvene on the following morning at 9:00 a.m.

Portland, Oregon, January 23, 1945

The State Highway Commission met in regular session at 9:00 a.m. in the Stock Exchange Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner M. R. Chessman was excused from attending this meeting.

JAN 23 1945

Bids as follows for highway construction work and for the purchase of "down" timber in Joaquin Miller State Park were opened and read in conformity with previously published notices, following which Chairman Banfield announced that the awards would be made at 3:00 p.m. in the same room:

FOUR STATE HIGHWAYS IN BAKER COUNTY
BAKER ROCK PRODUCTION PROJECT

Rogers Construction Company, Dayton, Washington	$27,107.50
*P. B. Doherty, Portland	30,881.20
R. O. Dail, Portland	33,023.80
M. C. Lininger & Sons, Medford	33,049.00
Quinn Bros. & Robbins, Boise, Idaho	38,984.00
Babler & Conley, Portland	40,764.50
Morrison Knudsen Co., Boise, Idaho	45,512.50

* Bidder will accept only one project.

CASCADE AND WOODBURN-SANDY SECONDARY HIGHWAYS IN CLACKAMAS COUNTY
OREGON CITY-MOLALLA-EAGLE CREEK ROCK PRODUCTION PROJECT

Rogers Construction Company, Dayton, Washington	$40,889.00
R. O. Dail, Portland	41,856.00
Babler & Conley, Portland	42,895.00
Warren Northwest, Inc., Portland	49,283.00
J. S. Risley, Milwaukie	49,536.00
Homer G. Johnson, Portland	49,697.50
*P. B. Doherty, Portland	50,304.00
Fisher Bros., Oregon City	51,840.00
E. C. Hall Co., Portland	54,528.00
C. J. Eldon, Portland	54,582.50
Walling Sand & Gravel Co., Salem	54,799.50
D. F. Whittaker, Seattle, Washington	59,520.00
Chas. Shannon & Son, Roseburg	65,957.50

* Bidder will accept only one project,

SILVER CREEK FALLS SECONDARY HIGHWAY IN MARION COUNTY
SILVERTON-SILVER CREEK ROCK PRODUCTION PROJECT

Rogers Construction Company, Dayton, Washington	$22,327.50
Fisher Bros., Oregon City	24,565.00
E. C. Hall Co., Portland	24,590.00
*P. B. Doherty, Portland	25,124.00
D. F. Whittaker, Seattle	26,633.00
Babler & Conley, Portland	26,987.50
Vernie Jarl, Gresham	30,050.00
C. J. Eldon, Portland	32,395.00

* Bidder will accept only one project.

SALE OF TRACT OF TIMBER IN JOAQUIN MILLER STATE PARK

Hanson Bros. & Worthylake, Florence $800.00

A delegation representing the Advisory Committee of the Logging Industry consisting of Messrs. George Gray, Chairman, Chet Sorenson, Secretary, Faye Abrams, A. F. Baker, L. A. Christensen, and Harry Patton were present for discussion of log hauling matters. Mr. Gray was principal spokesman. He presented for the Commission's consideration several suggestions, as follows, which he said the committee believes are reasonable and necessary in order to secure maximum log production and at the same time to protect and safeguard state highway traffic through proper methods of control:

1. Increase the axle load on both single and dual axle trucks 2,000 lbs. with no increase in the gross load.

2. Amend the weight law to prevent the unloading of overloaded trucks hauling logs, poles and piling.

3. Adopt a uniform method of fines for overloading, such as follows:

1st 2,000 lbs. 1/4¢ per lb.
next 2,000 lbs. 1/2¢ per lb.
over 4,000 lbs. 1¢ per lb.

4. We would approve the lifting of license plates of operators refusing to cooperate.

5. Increase the length of "overhang" on the rear bunk.

6. Increase the load height to 12½ feet.

7. Relieve the responsibility of the Highway Commission's liability for traffic violations in all cases.

Mr. Gray presented oral arguments in behalf of the suggestions as follows: He said that approval of the first suggestion would particularly benefit operators who have their own scales at the point of loading and whose violations consist for the most part of axle overloads which are difficult to adjust. A reasonable increase in the axle load, he said, would solve this difficulty. He offered objections to the removal of a portion of the load in order to meet the weight requirements because of the dangers involved and the delay entailed, and declared that such ruling is unfair to the operator who has only an occasional overload.

As to the imposition of fines, he said that there is not enough profit in log hauling to justify a penalty of one cent per pound for the excess weight and recommended the adoption of the sliding scale fine as suggested by the committee. Concerning the taking up of the license plates of offending haulers, Mr. Gray stated that the members of his committee consider that that is right

JAN 23 1945

and proper if the operator is a consistent violator, but not otherwise. With reference to the suggestion that the length of overhang, beyond the rear bunk of the trailer, be increased, Mr. Gray stated that this is of particular benefit when logs forty-eight feet long are being hauled. He explained that many times the large end of a log is placed at the front of a load and in those cases the extra length overhang would be of great help in equalizing the weight on the several axles. He urged approval of their request for an increase in the overall heighth to twelve and one-half feet, stating that many loads are now being hauled that are more than eleven feet high, the present limit. He gave as his understanding that the Highway Commission has legal authority under present laws to grant such a request. He also gave as his understanding that under present laws the individual members of the State Highway Commission can be held personally responsible and liable in some cases of traffic violations and advised that it is the opinion of the committee that the law should be amended so as to relieve the Commission members entirely in all cases.

In the discussion that followed, Chairman Banfield questioned the justification of an increase in the axle weight in view of the tire weight limitations established by the O. P. A. The Engineer stated that he could not recommend an increase in the individual axle weights. However, he would recommend an increase in the allowable weight on tandem axles from 32,000 pounds to 34,000 pounds.

Chairman Banfield advised that the Highway Commission does not want to create a hardship on log haulers but simply wants them to respect and comply with the legal requirements. He pointed out that there are certain haulers who will not confine their loads to the prescribed limits and that past experience reveals that this class of violators cannot be controlled by taking up the P. U. C. plates. However, the situation has been helped by requiring the removal of a portion of the load, which requirement the Commission will be pleased to change if the industry can suggest some other way to handle the situation.

Mr. Gray declared that State Police Officers are too arbitrary in their attitude toward log haulers and suggested that Highway Department weighmasters would be more reasonable. He was informed that the weighmasters do not have police powers.

Commenting on the suggestion that a sliding scale of fines be imposed on violators, Chairman Banfield gave as his thought that such an arrangement would not prove satisfactory because it would not properly reach the operator who consistently and deliberately overloads. The object of the Commission, he said, is to protect the highways and not to secure the additional revenue that would accrue by reason of the fines.

With reference to increasing the length of overhang, the Chairman advised that this is an engineering matter which the Commission will refer to the Engineer for study. The Commission indicated that it would not object to such increase if the matter can be worked out satisfactorily from the Engineering standpoint. The Commission also referred to the Engineer the matter of increasing the height of loads, the thought being that such increase in

height could be granted by special permit under existing laws if the weight requirements are not exceeded and ample clearances are available.

Following further discussion Chairman Banfield offered the suggestion that perhaps operators could be controlled by classifying them according to the record of their violations. He gave statistics assembled from weighmaster records covering the entire state to show how operators could be placed in five classifications ranging from those who have committed no violations whatsoever to those who are consistent violators. The record discloses, he said, that by far the largest number of violations are committed by only a few of the operators, and that of 75% of all the loads that crossed the state scales during 1944, overload violations amounted to only 0.9 of 1% of the total loads that were weighed, which indicates that operators can keep their loads within the weight requirements. It is the consistent and deliberate violator whom the Commission is trying to control and it wants to do that and still protect and help the operator who is trying to cooperate. He advised that the Commission has in mind to establish an experience rating for each operator, and that under such a system an operator with a good rating probably would not be required to remove a portion of his load in order to reduce the weight until his violations necessitated a change in his classification. At Chairman Banfield's request, the Attorney advised that it might be possible to work out some such arrangement legally, but under present laws he did not know how the members of the Highway Commission could escape personal liability if they had knowledge of a violation and corrective measures were not taken. He pointed out that weighmasters do not have authority to order the removal of the excess load, but the Commission could instruct the weighmasters not to request the unloading if the overweight were not excessive. The Commission could not give such instructions directly to the State Police Officers, he added, because it has no jurisdiction over them. Commissioner Schaupp expressed his approval of the arrangement explained by Chairman Banfield provided it can be worked out satisfactorily. The members of the delegation also approved the arrangement whereupon Chairman Banfield stated that he would ascertain the attitude of the superintendent of the State Police with regard thereto, following which arrangements would be made to continue the discussion of the matter with the members of the committee. This concluded the conference.

Representatives of the Corvallis Chamber of Commerce and City Planning Commission were present and urged the re-routing of the Pacific Highway West into and through Corvallis. Included in the group were Messrs. V. L. Goodnight, City Engineer and Member of the Planning Commis ion; Charles Whiteside, President of the Chamber of Commerce and Chairman of the Planning Committee; T. J. Starker, Member of the Planning Commission; and Vance Taylor, Secretary of the Chamber of Commerce. Mr. Goodnight was principal spokesman. The delegation offered for the Commission's consideration a relocation of the highway along a diagonal route beginning at a point on the present highway a short distance north of the North City Limits and extending southeasterly therefrom to connections with North Fourth Street and North Third Street extended northerly, and the improvement of these two streets as state highway routes pending the time the diagonal route can be extended to North First Street which street the city hopes will eventually be designated as the permanent route of this highway through Corvallis. Mr. Goodnight explained that their plan provides for the

designation of Fourth Street as a one-way street for south bound traffic and for the designation of Third Street as a one-way street for north bound traffic, which will necessitate the construction of a short piece of road from the south end of Fourth Street to a connection with the present highway at Mary's River, including a new bridge across Mary's River. He pointed out the possibilities of connectingthe Albany-Corvallis Highway to the proposed diagonal road by construction of a new road parallel with the Southern Pacific Railroad for a short distance north of Corvallis, and the possibilities of extending the diagonal to a connection with North First Street at some future date. He urged favorable consideration of the project as a means of relieving traffic congestion which now obtains in the town's business district until such time as the highway is routed on First Street. The State Highway Engineer estimated the cost to construct the north end of the proposed improvement, including a separation structure at the crossing of the Southern Pacific Railroad at about $205,000, and the cost to construct the connection at the south end of Fourth Street, including the bridge over the Mary's River, at about $87,000 additional. This matter was discussed at considerable length but action thereon was deferred by the Commission pending receipt of additional information which the Engineer was instructed to furnish.

The delegation also requested the further improvement of the Alsea Highway as a postwar project, particularly the straightening and widening of the present highway from Alsea Mountain to Tidewater. It was explained to the delegation that this is a forest highway section, the improvement of which is under the jurisdiction of the Public Roads Administration, but the Commission will keep it in mind when the programing of forest highway funds comes up for discussion. Mr. Goodnight also brought to the Commission's attention a plan for the relieving of the traffic congestion that follows football games at Oregon State College. His plan contemplates the construction of a new road westerly from the Pacific Highway West at a point about one-fourth mile north of the Corvallis city limits, to a connection with the North 30th Street, extended northerly; thence, south along North 30th Street to a connection with the Corvallis-Newport Highway. He pointed out that such a route would not only relieve traffic congestion because of football games but would also provide a way for coast bound traffic to get through Corvallis without traveling through the business district. The Commission took no action on this matter, it appearing to the Commission that the relieving of the football game traffic congestion is a problem for local authorities to solve.

The following persons representing the U. S. Indian Service were present in the interests of the Sprague River County Road in Klamath County: H. J. Doolittle, District Highway Engineer, Spokane; Boyd Jackson, Secretary, Klamath Tribal Council, Klamath Agency; and Frank Parker, Road Engineer, Klamath Agency. Mr. Doolittle was spokesman. He reviewed briefly the history of the proposed improvement of this road, pointing out that Congress in 1941 appropriated $150,000 as a special fund for reconstruction on the condition that the State of Oregon would contribute an equal amount of state money. The former State Highway Commission, he said, budgeted $150,000 for this purpose in December of that year and an agreement was executed which contained provisions whereby the state would spend its money for the improvement of the section starting at the Klamath Falls-Lakeview Highway Junction and

extending westerly therefrom as far as the funds will permit, including one bridge over the Sprague River, and the Indian Service would spend its money on the adjoining section which includes two bridges. Expenditures to date by the State Highway Department, he stated, amount to only $6,000 for surveys, it not having been possible to spend more because of the wartime freezing of funds; however, the Indian Service did spend the sum of $55,000 for grading and surfacing a seven-mile section west of the Town of Sprague River before the stop order was made by the War Production Board, so there remains an unexpended balance of $239,000. He asked the Commission to confirm the obligation created by the former Highway Commission and to approve a modification of the previous agreement so as to provide for construction of all three of the bridges by the state at an estimated cost of $81,000, and for the expenditure of the remaining state funds for grading, surfacing and oiling. If the Commission will do that, he added, the Indian Service will spend its money for grading and surfacing only. The State Highway Engineer recommended approval of the request in order to secure uniformity and harmony in the bridge design and construction. The Commission approved the recommendation with the understanding that the State of Oregon would not be requested to increase the amount of its obligation. A supplemental agreement providing for such modification was thereupon signed by the Commission.

Mr. Doolittle then advised that the Indian Service is anxious to complete construction of the Sprague River Road throughout its entire length if funds can be obtained. He estimated the additional amount needed to complete the project at $617,500 and suggested that this be assumed by the state and the Indian Service on the basis of the terms of the previous agreement, 50% by the State and 50% by the Indian Service. He explained that a delegation representing the Klamath Tribes is leaving shortly for Washington, D. C., for the purpose of securing a Federal appropriation if possible, and that it would be helpful if the delegation could take with it assurance from the Highway Commission that state funds will be contributed to pay one half of the expense. Without such assurance, he said, it is doubtful that the Federal money can be obtained.

Chairman Banfield advised that the Commission will complete its obligation under the original agreement as modified today but cannot go farther than that at the present time because of the many other obligations that the Commission has to meet, and because of the uncertainties that still exist with respect to the expenditure of the Federal appropriations recently authorized by Congress. Moreover, the Commission cannot pass on the further improvement of the Sprague River Road until it has a report from the Engineer covering among other things the need for the road. Mr. Jackson stated that it would be helpful to the delegation if the Highway Commission would indicate in some way a willingness to cooperate in this project. In reply, Chairman Banfield stated that the best the Commission can do now is to state that it is not unfavorable to the project. This concluded the conference.

Mr. Claude Bristol, Portland, was present and discussed with the Commission the proposed relocation of the Columbia River Highway across his celery farm at Troutdale. He advised that he inspected the proposed location in company with the State Highway Engineer and while he has approved the location as revised since he appeared before the Commission at the previous meeting,

he still believes that the highway should be located along the back end of his land. He gave as his understanding that the present plan contemplates only two openings under the highway, about one-fourth mile apart, for industries and farmers, one of which is in the Town of Troutdale and the other at the Sundial Road, and that the farm property on the north side of the highway will be served by a service road. Such plan, he said, will require farmers to travel a considerable distance out of their way to reach their property on the north side of the highway, in view of which he urged the construction of an additional underpass about midway between the other two. The matter was discussed at some length and was referred by the Commission to the Engineer for further study in the design of this improvement.

Mr. Bristol also brought up for discussion the possibilities that the construction of a highway embankment across his property will interfere with sub-irrigation and cause serious damage to his celery land. It was his thought that something should be done to obviate this condition. He was informed by Chairman Banfield that the state could be held liable if his land were damaged on this account. The Attorney confirmed such statement. During further discussion Mr. Bristol was assured that construction of this project will not be undertaken until the war is over and that in the meantime the things mentioned by him will be given careful study in the design of the project.

The Commission recessed at 12:00 noon for luncheon and reconvened at 1:30 p.m., with the same persons present and participating.

The Engineer brought up for discussion a proposed improvement of the Oregon Coast Highway through the Town of Taft, particularly the construction of curbs and sidewalks heretofore conditionally approved by the Commission. He reported receipt of an agreement with the property owners concerned and advised that all of them, except Mr. Fred C. Robison, have pledged themselves to construct sidewalks in front of their respective properties fronting on the highway within ninety days after the curbs have been built by the State Highway Commission. He gave as his thought that the project should not be held up by refusal of Mr. Robison to sign the agreement and requested authority to advertise for bids for the construction of the curbs, which he estimated would cost about $7,500, and authority for the Attorney to condemn the right of way needed from Mr. Robison if necessary. Following discussion the Commission authorized the taking of bids for the curb construction on the condition that the property owners, including Mr. Robison, construct sidewalks in conformity with the provisions of the agreement bearing their respective names. The Attorney was authorized to condemn Mr. Robison's property if necessary. In this connection the Engineer reported the need to replace the existing bridge over Drift Creek on the Oregon Coast Highway a short distance south of Cutler City. He advised that the present bridge is in a very weakened condition and should be replaced as soon as possible; also, that it is not on permanent alignment, so when a new one is built it should be erected in the proper location which will require the purchase of extra right of way. He estimated the cost of the structure at $95,000, all of which, he said, will be paid with forest highway funds, the state's obligation being limited to the furnishing of right of way. The Engineer also pointed out that the bridge replacement is only part of a major forest highway improvement extending south from Taft, which was approved by the Commission on November 14, 1944, but it

is not intended to do all of the work at this time. He recommended approval of the project, including both bridge and approaches thereto, and that the Attorney be authorized to obtain the necessary right of way. Chairman Banfield stated his approval of the bridge project as an emergency proposition. Commissioner Schaupp concurred. The Engineer was thereupon instructed to notify the Public Roads Administration of the action taken so the work can be gotten under way as soon as possible. The Attorney was authorized to secure options for the right of way that is needed for the entire improvement south from Taft and to condemn the same if it cannot be obtained at reasonable prices. Chairman Banfield advised that he would inspect the properties the coming week end, whereupon Commissioner Schaupp stated his willingness to leave the entire matter with Chairman Banfield to decide.

The Attorney reported on the request of Mr. L. M. Christensen for permission to remove "smeltsand" from the Ocean Beach at Yachats for use in connection with building construction at that place. He advised that as instructed by the Commission he inquired of the State Fish Commission whether or not the removal of the sand would adversely affect the spawning of smelt and received a reply from Mr. M. T. Hoy, Secretary and Master Fish Warden, to the effect that it would not affect the smelt unless the sand were taken during the spawning season. In view of this report, the Commission voted unanimously to grant Mr. Christensen a revocable permit to remove sand from this beach on the condition that the sand is not taken during the time that the smelt are spawning. The Attorney was instructed to ascertain from the Fish Commission the time when the smelt spawn and to incorporate such information in the permit.

The Commission discussed a request from Mr. Ward C. Russell, Aurora, for permission to use for agricultural purposes certain state-owned land situate within the limits of the right of way of the West Portland-Hubbard Highway opposite the Aurora Flight Strip. The Attorney advised that such use of the state's property will not interfere with public use of the highway nor hurt the highway in any way; on the other hand he believed the Highway Department would benefit in that such use of the property would destroy weed growth, reduce maintenance expense to a certain extent, and would improve the roadside appearance. He recommended that a revocable permit be issued to Mr. Russell. The Commission approved the recommendation.

The Engineer and the Attorney reported on the request of the United States Grazing Service for state assistance in the "fireproofing" of state highways in the Echo Grazing District comprising Gilliam, Morrow, & Umatilla Counties. The Engineer advised that the district contains about 110 miles of state highway and that it would cost about $16,000 to do the work as requested, including the planting of special grasses; however, if the work were limited to the plowing of furrows on the highway to prevent the spread of fires to adjacent property the cost could be reduced to about $2,000. He pointed out that when weeds, grass, and brush are cut and allowed to dry out on the highway, a condition is created which might aid in the spread of fires and suggested as a means of preventing such a condition the plowing of furrows where necessary. The cutting of grass and weed growth on highway rights of way, particularly noxious weeds, he said, is one of the regular maintenance functions during normal times, but the work has been greatly curtailed during the present wartime period because of a shortage of man power.

The Attorney advised that the Commission has legal authority to spend state highway funds for "fireproofing" as may be necessary to protect state-owned property under its control, but it does not have authority to spend highway funds for the seeding of the right of way with special grass seed in order to protect private or public property against the careless acts of highway users. He also said that the Commission is obligated by law to prevent the spread of noxious weeds. In the discussion that followed, Chairman Banfield suggested that the State Highway Department might cooperate with the Grazing Service by the plowing of furrows where necessary as mentioned by the Engineer, but not to the extent of planting special grass seed. The suggestion was approved by Commissioner Schaupp whereupon the Engineer was authorized and instructed to proceed on such basis.

The Attorney requested instructions whether or not to take action against the U. S. Navy Department to collect the cost of repairing State Highway equipment that was damaged in a collision with Navy equipment while engaged in sanding the Lower Columbia River Highway near St. Helens. It appears that the collision occurred at a curve and was the direct result of the Navy vehicle being driven around the curve at an excessive rate of speed; also, that it cost $100 to repair the state equipment. The Attorney questioned whether or not the Commission could collect from the Navy Department and suggested in view thereof that the matter be dropped. The Commission approved the recommendation.

The Attorney also requested instructions regarding settlement of the state's claim against Mr. Giles Wyner who appropriated a Highway Department road grader stored at Detroit for his own personal use without permission. The Attorney recalled the circumstances and advised that Mr. Wyner's attorney was told that the case would be dropped if Mr. Wyner would pay the state $50 as rental for the equipment. Mr. Wyner, he said, is unwilling to accept settlement on such basis but has offered to pay $33. The Attorney recommended refusal of this counter offer and that Mr. Wyner be required to pay the original sum of $50. The Engineer concurred in the recommendation. The Commission approved the recommendation by unanimous vote.

The Attorney brought up for discussion a right of way settlement with Mr. A. F. Elkins, Monmouth, concerning a revision of the Pacific Highway West in the vicinity of Camp Adair. It appears that a standard width right of way was acquired but Mr. Elkins is fearful that the highway embankment is going to slide and damage his land so believes the state should purchase another ten-foot strip along his frontage. The Attorney advised that Mr. Elkins is willing to deed the strip to the state; in fact, has already presented a deed which contains certain conditions and demands for things which were denied him under the original right of way settlement, such as the construction of a floor in the underpass that was built for his use. Mr. Elkins alleges, he said, that he was promised such a floor by the former chairman, but the facts do not bear him out; in fact, his demand was denied. The Engineer confirmed the Attorney's statement in this regard. The Attorney requested instructions whether or not to accept the deed with the conditions. He suggested that it might be advisable for the Engineer to again check the condition of the embankment before definite action is taken on the matter, so as to determine whether or not there is danger of a slide occurring that would encroach upon Mr. Elkin's property, it being his thought that measures could be taken to correct the

situation without buying additional land from Mr. Elkins. The Commission approved the suggestion and instructed the Engineer to make such investigation and report his findings at the next meeting.

The Commission had under consideration the apportionment to the cities and towns of the State of Oregon of moneys credited to the state highway fund during the calendar year 1944, as provided by Chapter 371, Oregon Laws, 1943. (State Tax Street Fund Law). The Engineer advised that the amount available for apportionment under this law is $745,461.30; however, there should be added thereto the sum of $1,852.78 from the 1943 apportionment which was not paid out because the cities and towns to whom such amount was apportioned are no longer operating as incorporated areas, thus making a total of $747,314.08 to be apportioned to the cities and towns at this time. He presented a list of those eligible for such funds and the proposed amount to be apportioned to each. After due consideration the Commission approved the apportionment as presented and thereupon by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, it is provided by Chapter 371, Oregon Laws, 1943, that:

"Beginning with the year 1943 and annually thereafter there shall be and hereby is appropriated out of the state highway fund such sums of money as will equal 5 per cent of all moneys credited to the state highway fund by the state treasurer between January 1 and December 31 of each year, and which have accrued from funds transferred to the state highway fund by the state treasurer under the provisions of section 115-135, O. C. L. A., and under the provisions of section 115-528, O. C. L. A., and under the provisions of section 110-1705, O. C. L. A., and from fines and penalties assessed and collected for violations of the motor vehicle and transportation laws, and which have been paid to the state treasurer, which appropriation shall be distributed among the several cities as provided in this act; but in no event shall payment under this act be made to cities for any year unless more than $11,000,000 is credited to such fund, and allocations hereunder shall be made to cities only from any excess over $11,000,000 credited to such fund in any year."

AND, WHEREAS, the moneys which have been credited to the state highway fund by the state treasurer between January 1 and December 31 of the year 1944, and which have accrued from the sources designated in said Chapter 371, Oregon Laws, 1943, amount to $14,909,225.97, being as follows:

Under provisions of Section 115-135, O. C. L. A. - - - -	$ 3,300,038.92
" " " Section 115-528, O. C. L. A. - - - -	1,891,880.27
" " " Section 110-1705, O. C. L. A. - - -	9,637,960.11
From fines and penalties assessed and collected for violations of the motor vehicle and transportation laws, and which have been paid to the state treasurer -	79,346.67
Total - - - - - -	$14,909,225.97

JAN 23 1945

AND, WHEREAS, the five per cent of this $14,909,225.97 which is available for apportionment to the cities and towns amounts to $745,461.30;

AND, WHEREAS, an additional sum of $1,852.78, which was apportioned to cities and towns for the year 1943, but which was not paid by reason of the cities and towns to whom this amount was apportioned having been found to be no longer operating as incorporated areas, is also available for inclusion in the amount to be apportioned for the year 1944, said amount comprising 1943 apportionments as follows:

City or Town	Amount of 1943 Apportionment Not Paid	City or Town	Amount of 1943 Apportionment Not Paid
Austin	$134.60	Harney	$ 4.12
Bourne	26.09	Juntura	229.36
Cornucopia	487.57	Metolius	54.94
Crane	199.15	Monument	162.07
Drewsey	79.66	Westfall	20.60
Goble	123.61	Whitney	26.10
Greenhorn	6.87	Lakeside	184.04
Hardman	114.00		
		Total	$1,852.78

AND, WHEREAS, the total amount to be apportioned to the cities and towns for the year 1944 is $745,461.30 plus $1,852.78 or $747,314.08;

AND, WHEREAS, by applying the factors of allocation provided for in said Chapter 371, Oregon Laws, 1943, the State Highway Commission has arrived at and made its apportionment of the said $747,314.08 to the several cities and towns of the State;

NOW, THEREFORE, the State Highway Commission does hereby certify to the Honorable Robert S. Farrell, Jr., Secretary of State of the State of Oregon, the following apportionment or appropriations out of said state highway fund for the calendar year 1944, to wit:

City	1940 Census	Amount
Albany	5,654	$ 7,902.86
Ashland	4,744	6,630.91
Astoria	10,389	14,521.20
Baker	9,342	13,057.76
Bandon	1,004	1,403.34

JAN 23 1945

That before said last named cities may expend funds apportioned to them out of said state highway fund they must first qualify by submitting to the State Highway Commission for approval plans for the expenditure of such funds.

That a certified copy of this resolution and certificate be delivered to the said Secretary of State for his use and guidance in the administration of said law.

That this resolution be entered in the minutes and records of the Commission as of January 23, 1945.

The Commission also discussed the selection of an agency to handle publicity matters for the Travel and Information Department during 1945 and decided to continue the services of Botsford, Constantine & Gardner who have handled such matters for the Commission in the past. The Commission thereupon signed a supplemental agreement extending the previous contract with this company.

The Assistant Attorney requested instructions relative to renewing contracts with the National Hospital Association and the Oregon Physicians Service for providing medical service to the Highway Department employees. He advised that the present contracts are continuous in form and will remain in force and effect indefinitely unless cancelled by the Commission, so no formal agreement is needed if the Commission wishes to continue them. He recommended that the records show that the matter has had the attention of the Commission and that the Commission approves continuation of the present contracts with these companies. The Commission approved the recommendation unanimously.

Messrs. Wm. Tugman, Chairman, Eugene City Planning Commission and Allen P. Wheeler, County Commissioner, Lane County, were present and urged early action by the Commission in the matter of acquiring right of way for a number of postwar projects in and adjacent to the City of Eugene, particularly the following:

(1) U.S. 99 and Oregon 58 from Judkins Point to Goshen including such land as will be needed for the future overhead crossing of the Southern Pacific's branch line to Medford.

(2) U.S. 99 on Broadway within the City of Eugene from the intersection of Broadway and Franklin Blvd. to and including the proposed connection with Sixth Avenue and Seventh Avenue, the present routes of U.S. 99.

(3) Proposed relocation of U.S. 99 along the west side of Eugene from the present right of way terminus near Eleventh Avenue to the Old City Airport near Thirteenth Avenue, and from the point where the projected location leaves the Old City Airport to the point where the projected line enters relatively undeveloped country near Spencers Butte.

(4) New highway connections with main county roads.

Mr. Tugman advised that the areas adjacent to the above-described locations are developing rapidly and gave as his thought that the state could save considerable money and could avoid conflicts if the right of way were obtained now. He also said that they are not asking for immediate construction of these projects but are simply calling to the Commission's attention the conditions that exist so the Commission can take such action as may be necessary to simplify and expedite projects when they are ready to go forward. In support of his oral remarks, Mr. Tugman presented letters from Clinton Hurd, County Judge of Lane County, Frank Kinney of the Oregon Settlement Association, and Earle L. McNutt, Mayor of Eugene. He also presented a map showing the location of the several projects.

Chairman Banfield advised that the Highway Commission has spent a considerable sum of money in the Eugene vicinity during the past two years and in his estimation it does not appear to be in order to authorize additional expenditures at this time, particularly in view of the fact that there is considerably less money in sight now for construction purposes than the Commission anticipated would be available a couple of years ago. He expressed the belief that it would not be treating the people of Eugene fair if the Commission should lead them on by acquiring right of way now when the prospects for construction are not very bright. He also pointed out that the Commission has many other obligations for the moneys that are available in view of which it would not seem proper to tie up a large sum of money in right of way at this time when it is needed badly for other purposes elsewhere. It was his thought that Lane County as a whole would not approve the expenditure in Eugene of the large sum of money that is represented by the projects mentioned. Mr. Tugman reiterated that they are not asking for construction at this time but are simply asking for investigation of the right of way situation, and following that the acquisition of right of way if the Commission considers that proper and advisable. He urged favorable consideration of the request because of the increase in population of Eugene which is causing the development of the areas under discussion, including homes and domestic facilities such as sewers, lights, water, etc. He also said that some of the right of way can be acquired now at a small cost, whereas in his estimation the cost will be considerably more later on. The discussion that followed centered on the acquisition of right of way for the proposed relocation of U.S. 99 west of Eugene. Concerning this project, Mr. T. M. Davis, Senior Highway Engineer, Public Roads Administration, who was present, advised that the Federal Government, which has funds to spend for right of way acquisition, will not contribute toward this project until the present project between Eugene and Goshen has been completed. The State Highway Engineer estimated that it would cost about $300 to appraise the right of way required along this route. The Commission approved the expenditure of such amount for appraisals with the definite understanding that it is not incurring any obligation whatsoever as to construction.

Messrs. E. J. Barry and James Morrill representing the Oregon Motor Transport Association were present and urged the Commission to recommend enactment into law of the "Big Truck Bill" (Senate Bill #5) that is now pending in the Oregon Legislature. Mr. Barry made a strong plea in behalf of this

legislation which would extend the privileges now granted in the Highway Commission's emergency transportation permits for Group 1 and Group 2 highways for an indefinite period. Chairman Banfield remarked that this is a matter for the Legislature to decide. He gave as his personal opinion, however, that the time limit for the issuance of such permits should not extend for a longer period than two years. He added that the Commission has not yet discussed the matter so is not in a position to make a definite statement at this time. Following departure of the delegation, discussion of this subject was resumed and it was decided, if the Legislative Committee asks the Highway Commission for a recommendation, to tell the Committee that the Commission has no objections to the bill as written except that it believes that the authority granted by the bill should expire within two years.

The Commission discussed with the Engineer the bids received at the morning session for several highway projects and for the purchase of "down" timber located in Joaquin Miller State Park. The Commission decided to award the contracts to the low bidder in each instance and to sell the timber to Hanson Bros. & Worthylake Company who submitted the high bid therefor.

At 3:00 p.m. Chairman Banfield publicly announced the awards of contracts and sale of timber as follows:

"Baker Rock Production Project on four state highways in Baker County. The low bid for this project was submitted by Rogers Construction Company of Dayton, Washington, in the amount of $27,107.50. The next low bid was that submitted by P. B. Doherty, Portland, in the amount of $30,881.20. There were five higher bidders. The Commission awards the contract to the low bidder, Rogers Construction Company at its bid price of $27,107.50.

"Oregon City-Molalla-Eagle Creek Rock Production Project on the Cascade and Woodburn-Sandy Secondary Highways in Clackamas County. Rogers Construction Company, Dayton, Washington, submitted the low bid for this project in the amount of $40,889.00. The next low bid was submitted by R. O. Dail, Portland, at $41,856. There were eleven higher bidders. The Commission awards the contract to the low bidder, Rogers Construction Company at its bid price of $40,889.

"Silverton-Silver Creek Rock Production Project on the Silver Creek Falls Secondary Highway in Marion County. The low bid for this project was submitted by Rogers Construction Company, Dayton, Washington, at $22,327.50. Fisher Brothers, Oregon City, submitted the next low bid at $24,565. There were six higher bidders. The Commission awards the contract to the low bidder, Rogers Construction Company, at its bid price of $22,327.50."

"Sale of 'down' timber in Joaquin Miller State Park adjacent to the Oregon Coast Highway at Glenada in Lane County. The only bid received for this timber was that submitted by Hanson Brothers & Worthylake, Florence, in the amount of $800. The Commission has accepted this bid and has sold the timber to Hanson Brothers & Worthylake at their bid price."

The Commission discussed informally a number of the bills that affect the State Highway Department and are now pending in the Oregon Legislature.

The Commission considered and signed the following agreements, etc:

Agreement with the U. S. Department of the Interior, Bureau of Indian Affairs, modifying previous agreement, dated December 18, 1941, covering improvement of the Sprague River Road, Klamath County, as a cooperative project.

Modification of Project Agreement with the P.R.A., increasing from $3,000 to $5,000 Federal contribution to finance snow removal operations on the Mt. Hood Highway, between Cooper Spur and Robin Hood Ranger Station.

Supplemental agreement with the U. S. War Department, terminating use by the Army Engineers of Cape Arago State Park, Coos County.

Permit authorizing the Ostrander Railway & Timber Company, and the Weyerhaeuser Timber Company to operate logging trucks across two secondary highways near Molalla.

Public voucher to secure reimbursement of $50.00 advanced for the securing of an easement for a hauling road in Klamath County, across land owned by the Klamath Indian Agency.

Agreement with Botsford, Constantine & Gardner, extending former agreement, dated February 16, 1940, with respect to publicizing the scenic values of the State of Oregon.

Agreement with Edward K. Piasecki, covering an easement for a logging road across Camas Mountain State Park, Douglas County.

Bargain and Sale Deed conveying unto Henry Dieckman and wife, Lots 7 and 8 of Block 29, Hot Springs Addn. to the City of Klamath Falls. (R/W matter, consideration - $1,100.00)

Bargain and Sale Deed conveying unto Lucy R. Martin property situate in Lots 25, 26 and 27X of Block 34, Amended Plat of Fairmount, Eugene.

Bargain and Sale Deed conveying unto Ernest Franklin Wilson and wife, property situate in Lots 1, 2, 3, 4 and 5 of Block 2, Zwalhen Home Sites, Northeast Portland.

Agreement with United States of America, Department of Interior, Bureau of Reclamation, covering construction of Klamath Straits drain outlet across The Dalles-California Highway.

Agreement with Clyde C. Montag for lease of a residence building situate in The Cove State Park, for a period of 6 months, beginning December 20, 1944 - consideration $20.00 per month.

Agreement with Forest W. Casey, foreman, James A. Houck, truck driver, and Charles A. Pence, watchman, former employees of the State Highway Department, disposing of state's claim for damages that arose out of accidents which occurred when state-owned equipment was being used for personal purposes.

The meeting adjourned at 4:00 p.m.

State Highway Engineer — Chairman

Secretary — Commissioner

Portland, Oregon, March 12, 1945

The State Highway Commission met in regular session at 1:30 p.m. in Room 615 of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner M. R. Chessman was excused from attending this meeting.

The Engineer discussed briefly with the Commission matters concerning which delegations are to appear on the following day, but no action was taken thereon at this time.

The Assistant Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with the offer that he recommended in connection with each parcel. After careful consideration of each item, the Commission approved the request and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed;

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

CIRCLE BRIDGE-HUG POINT SECTION, OREGON COAST HIGHWAY

**11593	International Pac. Pulp & Paper Co.	80.00

SCHMEER ROAD SECTION, PACIFIC HIGHWAY WEST

11683	Warren Packing Co.	$300.00

* Item 11701. Gravel pit owned by Donald M. Brown. This property is not to be acquired unless it is used as a source of materials by the contractor to whom is awarded the contract for the Trent-Salt Creek Falls Rock Production Project.

** Items 11592 and 11593. Essie G. Douty and International Pacific Pulp and Paper Company. Condemnation of these two properties is authorized by the Commission but proceedings in condemnation are not to be commenced until the balance for the right of way for the Taft Siletz River Section has been acquired.

After careful consideration the Commission approved the request and the offers as recommended. The following resolution with regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, air fields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Donald M. Brown, et ux., which property is located in Government Lot 4 (NW¼ SW¼) of Section 17, Township 21 South, Range 3 East, W. M., Lane County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as file R 11701, which property is being acquired for the purpose of securing roadbuilding materials therefrom in connection with the Willamette Highway; *

Real property owned by Rowland S. Kemp, et al., which property is located in Lot 9, Block 24, Hot Springs Addition to Klamath Falls, Klamath County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 2, and is further identified in the records of the Highway Commission as file R 11399, which property is being acquired for right of way purposes in connection with the Klamath Falls-Malin Highway; *

Real property owned by Daisy I. Whiton, which property is located in Lots 5 and 6, Block 5, Sylvan Park, situated in Section 6, Township 4 North, Range 10 West, W. M., Clatsop County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3, and is further identified in the records of the Highway Commission as file R 10345, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; *

Real property owned by the Estate of George Johnston, which property is located in Lots 3 and 4, Block 9, Norriston Park, situated in Section 18, Township 4 North, Range 10 West, W. M., Clatsop County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 4, and is further identified in the records of the Highway Commission as File R 10827, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; *

Real property owned by Wm. J. Wineberg, which property is located in Lots 2 and 3, Block 6, Silver Point Terraces, situated in Section 6, Township 4 North, Range 10 West, W. M., and in Lot 8, Block 2, Arcadia, situated in Section 7, Township 4 North, Range 10 West, W. M., Clatsop County, Oregon, and is more particularly des-

cribed on the attached sheets and designated as Parcels Nos. 5 and 6, and is further identified in the records of the Highway Commission as file R 10804, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; *

Real property owned by Essie G. Douty, which property is located in Government Lot 7 (SW¼ NW¼) of Section 2, Township 8 South, Range 11 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 7, and is further identified in the records of the Highway Commission as file R 11592, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; *

Real property owned by International Pacific Pulp and Paper Co., which property is located in Government Lot 8 (NW¼ of SW¼) of Section 2, Township 8 South, Range 11 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 8, and is further identified in the records of the Highway Commission as file R 11593, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; *

Real property owned by Warren Packing Company, which property is located in the northeast quarter (NE¼) of Section 9, Township 1 North, Range 1 East, W. M., Multnomah County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 9, and is further identified in the records of the Highway Commission as file R11683, which property is being acquired for right of way purposes in connection with the Pacific Highway West. *

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

MAR 12 1945

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to ac quire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any of them, or any interest therein the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court proceedure connected with or prosecuted for the ac quisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission.

---

*(The detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 50, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

The Attorney reported a request from Mr. Ralph Cake, Portland, to acquire a state-owned quarry site, consisting of about twenty acres, near Bend in Deschutes County. It appears that the property is entirely surrounded by land owned by Mr. Cake and circumstances are such that Mr. Cake cannot make proper use of his land. The Attorney explained that Mr. Cake wants to fence his property, but cannot do so without blocking the state's access to the quarry, hence his desire to acquire the state's tract, if possible. If the Commission is unwilling to deed the property to him, then Mr. Cake suggests that the solution would be to install a gate where the fence crosses the road that leads from the highway to the quarry. The gate would be padlocked but the Highway Department would be given a key so that maintenance forces could have access to the quarry at all times. The Engineer advised that the quarry is needed for highway purposes whereupon the Commission decided not to dispose of it. Mr. Cake's suggestion as to fencing and the installation of a gate with

lock was approved by the Commission on the condition that investigation reveals there are no objections. The matter was referred to the Attorney to investigate.

The Assistant Attorney requested instructions relative to the sale or lease of what is known as the "Duck Pond" property, containing 264.59 acres, situate adjacent to the Stanfield-Boardman Highway in Umatilla County. He advised that the property is not needed for highway purposes and recommended sale of the same at $3,000 if he can secure a purchaser at such figure. The Commission approved the recommendation by unanimous vote.

The Commission had under discussion advisability of selling a small triangular tract of land situate at the southwest corner of the intersection of "L" Street and 16th Street in the Town of Reedsport which was purchased in connection with the acquisition of right of way for a proposed realignment of the Umpqua Highway at this place. The Engineer advised that the property is not needed for highway purposes, being outside of the right of way limits, and recommended sale of the property to the highest bidder therefor. The Commission approved the recommendation and authorized the taking of bids in Salem in accordance with recently established policy. If the property is sold, the deed of conveyance is to contain a clause denying the purchaser right of access to the highway from the property.

The Commission also discussed the advisability of selling two small tracts of land containing 2.42 acres and 0.76 acre, respectively, at Troutdale, particularly situate on the south side of the O. W. R. & N. Company railroad and west of the Sandy River. The Engineer advised that the property is not needed for highway purposes and recommended that it be sold to the highest bidder therefor. He pointed out, however, that the Commission has not as yet formally adopted the relocated highway alignment at this point, and cannot do so until all members of the Commission are present. After discussion the Commission approved the taking of bids for the sale of this property at the next regular meeting of the Commission, at which time the matter of adopting the revised alignment will be considered. In the event the Commission formally approves the revised alignment of the highway, then the property will be sold to the highest bidder therefor, if a satisfactory offer is received.

The Commission thereupon decided to hold its next regular meeting on Monday and Tuesday, April 16 and 17, 1945. The Secretary was instructed to arrange for a room in the Imperial Hotel, Portland. It was also decided not to hear delegations on either day.

The advisability of leasing a portion of Cape Arago State Park for the growing of bulbs had the attention of the Commission. The Commission decided in view of the fact that the property was acquired for park purposes not to lease it for any other use. If investigation reveals that the tract is not needed for the purpose for which it was originally acquired, then it is to be sold.

The Attorney requested instructions relative to the sale of excess land along the Wolf Creek Highway west of Portland where the highway has not as yet been constructed. He advised that he has received numerous inquiries

relative to the purchase of land that is not needed by the state and gave as his thought that the Commission will have no trouble in selling the property if it so desires. He recommended, however, that no sales be made until the highway is constructed in view of the likelihood that better prices can be realized at that time. The Engineer concurred in the Attorney's recommendation. The Commission approved the recommendation by unanimous vote and so ordered.

The Commission discussed and approved field agreements with the U. S. Grazing Service renewing previous agreements providing for the protection of Juniper Wayside Strips along the Central Oregon Highway between Bend and Horse Ridge, along the Ochoco Highway between Redmond and Prineville, and along the McKenzie Highway between Sisters and Redmond. (The agreements were signed on the following day.)

The Commission discussed a request from Mr. H. W. Kuhn for a one-year extension of his lease of a residence building in Williamson State Park adjacent to the Salem-Dayton Highway near Hopewell, in Yamhill County. The Secretary presented a letter from the State Parks Superintendent advising that it would not be possible to do any development work in this park during the next year and recommending that Mr. Kuhn be allowed the use of the building for another year at a charge of $10 per month. The Commission approved the recommendation.

The Assistant Attorney brought up for discussion the question of sale of houses in Klamath Falls that were acquired in connection with right of way purchases. Commissioner Schaupp gave as his thought that the buildings should be sold now in order to take advantage of high prices, and he so recommended. Chairman Banfield concurred whereupon the Commission authorized the taking of bids for the purchase of the houses. The Attorney was instructed to formally notify the occupants to vacate the buildings.

The Attorney requested instructions relative to the Commission's claim against O. P. Beecher and J. A. Turner for damaging a traffic light pole on the Pacific Highway East in the Town of Milwaukie. He advised that each of the parties was driving a car and as a result of confusion both were involved in the accident that caused damage to the signal pole amounting to $172.94. One of the parties, he said, carries no insurance and investigation reveals that he is irresponsible, but the other one does carry insurance with the General Casualty Company of America which has agreed to pay its one-half share of the expense, or $86.47. He gave as his thought, in view of the circumstances, that it would be advisable to accept this payment as settlement in full for the damage as it does not appear possible to collect from the other party. The Engineer concurred. The Commission by unanimous vote approved settlement on such basis.

The Commission discussed a letter from the City of Pendleton requesting state cooperation in the improvement of Southeast 12th Street for a distance of one block between Southeast Court Place and Southeast Byers Avenue. The request was on the understanding that the State Highway Department owns the property on one side of this street which would justify the Commission paying one-half of the expense of the improvement which is estimated to cost a total of $2,800. The Engineer advised that the statement as to the state's

ownership of the abutting property is correct and gave as his thought in view thereof, that the improvement should be accomplished by state forces sometime in the future when the necessary materials can be obtained and a state crew is available. The Commission approved the suggestion and instructed the Secretary to so inform the city.

The Engineer reported receipt of a request from Mayor McKenzie of Hermiston for the widening of the oiled surface on the Hermiston Secondary Highway for full width between curbs from East 4th Street to East 7th Street in Hermiston. He estimated that the improvement would cost about $836 and advised that it would be necessary for the Commission to make a special appropriation for the purpose because no provision was made for it in the 1945 budget, although the budget does contain an item of $900 for similar work on this highway in the eastern part of Hermiston. He suggested that the work be deferred until next year, particularly because of the improvement contemplated this year at this place and because necessary materials are difficult to obtain. The Commission approved the recommendation and instructed the Secretary to so inform Mayor McKenzie.

A letter was presented from the Carlton Chamber of Commerce requesting the designation and construction of a new secondary state highway extending from the Tualatin Valley Highway at Carlton easterly and northerly about five miles to a connection with the Yamhill-Newberg Secondary Highway, in order to provide a shorter and more convenient route for traffic between Carlton and Newberg and the Portland area beyond. The Engineer advised that the proposed road will reduce the state highway travel distance between Carlton and Newberg by about five miles and that in his estimation has considerable merit. He estimated the cost to construct the new route at about $100,000, exclusive of right of way, and said that the city is asking that the project be given consideration by the Commission for postwar construction, notwithstanding it was not included in the list of projects that was recommended by the county court some time ago. A letter from the Yamhill County Court endorsing the project was also presented. The matter was discussed at some length but action thereon was deferred by the Commission for future consideration.

The Secretary presented a resolution from Franklin Grange No. 751, Lane County, requesting the improvement of the Territorial Secondary Highway between Elmira and the junction with the Siuslaw Highway, a distance of about eight miles. The Commission ordered that the Grange be informed that the project will be given due consideration in the formulation of the postwar construction program but the Commission is not in position at the present time to make any definite promises or commitments with respect thereto.

The Commission discussed a letter from the City of Klamath Falls requesting the construction of a sidewalk on the Freemont Bridge over Link River on the Klamath Lake Secondary Highway. The Engineer estimated the cost to construct the walk at $2,050 and recommended approval of the request as a safety measure in order to protect the many pedestrians who cross the bridge. He pointed out, however, that the 1945 budget does not include this item so if the Commission approves the project it will be necessary to increase the

amount of the budget by such sum. The Commission approved the project by unanimous vote.

A petition was presented from residents of Crook and Grant Counties requesting construction as a postwar project of an extension to the Crooked River Secondary Highway from its present terminus at Paulina, easterly to a connection with the John Day-Burns Highway. The Commission denied the request because there are so many other projects throughout the state that have a higher priority rating and for the further reason that the Commission considers that postwar funds will not be sufficient to justify the assumption of additional obligations.

The Commission discussed a petition from residents and property owners of Bayocean, Tillamook County, requesting personal inspection and investigation of the conditions at Bayocean with the view in mind of entering into a cooperative project for the protection of property against destruction by forces of nature. The Secretary was instructed to inform the petitioners that the undertaking of projects such as they have in mind is physically and financially beyond the means of the state to perform.

The Commission had under consideration approval of the plans submitted by a number of cities and towns for street improvements to be financed with state tax street funds apportioned to such cities and towns for disbursement during the calendar year 1944. The Engineer advised that the plans meet with his approval and that appropriate resolutions have been submitted in each instance in conformity with legal requirements. He recommended approval of the plans by the Commission at this time and that an apporopriate record be entered in the minutes. The Commission approved the recommendation and thereupon adopted the following resolution with regard thereto:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by this Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1944 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Athena	$ 704.57
Bay City	520.53
Bonanza	320.01
Brownsville	1,076.77
Butte Falls	465.59

Wasco	416.15
Weston	683.97

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Athena - 2nd Street, Washington Street, Adams Street, Current Street

Bay City - Warren Street, McCoy Avenue, Tillamook Avenue, Ninth Street, Portland Avenue, Sixth Street, "A" Street, "B" Street, "D" Street, Trade Street, Main Street, Fourth Street, Pacific Street, Second Street, Ocean Street

12366

Bonanza - Seattle Avenue, College Street, 4th Avenue, Mission Street, 6th Avenue, Central Street, 3rd Avenue, Market Street

Brownsville - General maintenance of all city streets

Butte Falls - Bluff Street, Fee Street, Broad Street, Main Street and South Street

Canby - Maple Street, Second Street, Third Street, Fourth Street, Fifth Street, "A" Street, "C" Street

Central Point - Third Street, Ash Street, Oak Street, First Street, Second Street, Maple Street

Columbia City - "L" Street, 2nd Street, "E" Street, "I" Street, 1st Street, Mattie Street

Cottage Grove - South Tenth Street, South Eighth Street, "G" Street, West Main Street

Creswell - Oregon Street, 1st Street, "C" Street

Empire - Broadway Street

Gaston - First Street, Oak Street, Cottonwood Street

Grants Pass - West "A" Street, East "A" Street, East "C" Street, East "D" Street, East "E" Street, East "F" Street, North 5th Street, East Mill Street, 2nd Street, North 3rd Street, Booth Street, Foundry Street, South 7th Street, "N" Street

Grass Valley - Market Street, 2nd Street

Haines - Cole Street, Birch Street, First Street, Second Street, Fifth Street, School Street

Hammond - Myler Avenue, Boone Avenue, Pacific Avenue, Willow Street, Jackson Street, Harrietta Street, Park Street, Ford Street, East 1st Street

Helix - Main Street, Solar Street, Cleveland Street, Concord Street, Aurora Street, Vesper Street

Huntington - Lincoln Street, 1st Street East, 1st Street West, 2nd Street West

Ione - 2nd Street, "H" Street

John Day - Mandarin, Braught and South First Streets, Church, Canyon and Bridge Street; also new deck and repairs to bridge on Bridge Street

MAR 12 1945

Long Creek - 2nd Street

Madras - "C" Street

Merrill - McKinley Street, Roosevelt Street at Front Street, Clay Street

Moro - 1st Street, Scott Street, Bidwell Street

Mosier - Washington Street, Third Avenue

Mt. Angel - Marquam Street, Taylor Street, College Street, Charles Street, Church Street, Garfield Street, Cleveland Street, Sheridan Street, Alder Street

Myrtle Creek - 3rd Street, Oak Street, 1st Street, 2nd Street, Division Street

North Powder - "G" Street

Oakland - Locust Street, Stearns Avenue, Second Street, Cypress Street

Ontario - Improving or oiling unoiled city streets in city

Pendleton - S. W. 10th Street (re-deck bridge and re-surface approaches), improve Main Street Bridge

Pilot Rock - Willow Street, Bluff Street

Prairie City - Bridge Street, Main Street

Reedsport - "L" Street, 15th Street, Rainbow Plaza, 16th Street, 14th Street, East Railroad Avenue, "H" Street, 8th Street, "L" Street, West Railroad Avenue, Second Street

St. Paul - All city streets

Shaniko - "E" Street, 4th Street

Sherwood - Railroad Street

Stayton - Locust Street, 4th Street, 5th Street, Ida Street

Sutherlin - Ash Street, Pine Street, Willamette Street, 3rd Avenue, 2nd Avenue, 1st Avenue, South Side Road

MAR 12 1945

Tualatin - Park Street, Grove Street, Depot Street

Wasco - Fulton Street

Weston - Reconstruction of Lower Franklin Street Bridge, reconstruction of Upper Broad Street Bridge, reconstruction of Upper Franklin Street Bridge

2. That the type, plan and character of improvement proposed in the resolutions filed with this Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the same.

5. This resolution shall be entered in the minutes and records of this Commission as of the 12th day of March, 1945.

In this connection the Engineer requested instructions with regard to the expenditure of the sum of $584 for street improvements in the Town of Columbia City, being an accumulation of funds heretofore approved by the Commission for expenditure in this town during the years 1942 and 1943 before the present State Tax Street Fund Law was enacted. He explained that the money was not spent as proposed because a satisfactory program could not be arranged and that Mayor Heglund is now asking that this money be made available for the city's use along with the 1944 and 1945 allocation of state tax street funds. He further advised that Columbia City is the only town in the state that did not benefit by reason of the special appropriation made by the Highway Commission and in view thereof recommended approval of Mayor Heglund's request. The Commission approved the recommendation unanimously subject to the condition that the State Highway Department shall retain control over the expenditure of the money.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them for the records. After discussion the Commission by unanimous vote approved the following surveys and authorized the Engineer to make such surveys on various sections of the highways in this state, which said sections of highways together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures are as follows:

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Bench mark monuments & 3rd order levels	127-1428	Polk	Betw. Monmouth & Pedee	1st- $200.00
Plans	15-1452	Jackson	Crater Lake Hwy. at Shady Cove bridge	1st- $300.00
Plans	4-1473	Clatsop	Wolf Creek Hwy.	1st- $100.00
R/W	4-1474	Clatsop	Hug Pt.-Cannon Beach, Ore. Coast Hwy.	1st- $500.00
R/W	12-1437	Grant	John Day Fossil Park	1st- $300.00
Plans	4-1475	Clatsop	Hug Pt.-Manzanita Sec. Ore. Coast Hwy.	1st- $600.00
Plans	24-1453	Marion	Bldg. for St. Deaf School	1st- $200.00
Plans	24-1454	Marion	Bldg. for St. Blind School	1st- $200.00
Plans & R/W	124-1449	Marion	Gates-Niagara Sec. North Santiam Hwy.	

Amount Previously Authorized	$2,500.00
Additional Authorization Requested	1,500.00
Total	$4,000.00

Reconnaissance	28-1413	Sherman-Wasco-Jefferson	Route for The Dalles Calif. from Madras to Columbia Rvr.	

Amount Previously Authorized	$8,250.00
Additional Authorization Requested	500.00
Total	$8,750.00

Plans & R/W	26-1477	Multnomah	Schmeer Road Connection	

Amount Previously Authorized	$ 200.00
Additional Authorization Requested	510.00
Total	$ 710.00

S U M M A R Y

Total Original Authorization Requested	$ 2,400.00
Total Additional Authorization Requested	2,510.00
Total Amount Previously Authorized	10,950.00
Total Amount of Surveys	$15,860.00

The Engineer requested authority to complete surveys, plans, specifications, and estimates for the following proposed postwar highway improvements:

MAR 12 1945

MAR 12 1945

12373

FOURTH PARTIAL PROGRAM FOR SURVEYS, PLANS, SPECIFICATIONS AND ESTIMATES FOR POSTWAR HIGHWAY IMPROVEMENTS

County	Location & Termini	Length (Miles)	Contemplated Construction	Work To Be Done Now	Est. Cost	Federal Funds Requested
Marion	Gates-Niagara Sec., North Santiam Hwy. No. 162	4.0	Grade, surf. and oil, new alignment	Survey & Plans	$ 4,000	$ 2,480
Linn	3 miles East of Crabtree to Lyons on Albany-Lyons Hwy. #211	16.7	Grade, surf. and oil	Survey & Plans	10,000	6,200
Lincoln	Davis Creek to Cedar Creek (M.P. 12.5 to 15.5) of Siletz Hwy. No. 181	3.0	Grade, surf. and oil	Survey & Plans	3,000	1,860
Wasco	Columbia River Hwy. thru The Dalles	2.0	Realignment, grad. & paving	Survey & Plans	5,000	3,100
Deschutes	McKenzie-Bend Hwy. from Tumalo to Bend	5.0	Realignment, grad. surf. oil & bridge	Survey & Plans	7,500	4,650
Klamath	The Dalles-Calif. Hwy. from N. lmts. Klamath Falls to Weyerhauser Junction	5.0	Grade. surf. paving & structures	Survey & Plans	9,000	5,580
Malheur Lake	From Adrian So. to Homedale Spur Warner Hwy. #461: From Fremont Hwy. East 6 miles	8.0 6.0	Grade, surf. oil Regrad. surf. oil	Sur. & Plans Sur. & Plans	8,000 6,000 $52,500	4,960 3,720 $32,550
	ADDITIONAL PROJECT IN ADVANCE ENGINEERING PROGRAM					
Washington Multnomah	Holbrook-Cedar Mill	10.0	Grade. surf. pave	Sur. & Plans	$10,000	$ 6,000

He explained that with the exception of the first listed survey all of the projects are contemplated for construction after the expiration of the three-year period immediately following the war, but the making of the surveys at this time is essential in order to keep the engineering crews busy; otherwise, it would be necessary to dispense with their services which is not advisable because they will be needed badly later on. Chairman Banfield expressed himself as opposed to the making of surveys for projects that are not proposed for construction within the three-year postwar period unless that is absolutely essential in order to provide employment for the engineering crews. Commissioner Schaupp expressed himself similarly and it was so ordered. Following further discussion the Commission authorized the Engineer to submit the above listed surveys to the Public Roads Administration for approval on the basis of the above action.

The Commission considered the following requests for extensions of time within which to complete highway construction contracts:

Contract No. 2591 with Tom Lillebo for construction of bridges on the Goshen-Pleasant Hill Section of the Willamette Highway in Lane County, requested an extension of time from December 31, 1942, to December 7, 1944, within which to complete this project. He alleged that his failure to complete the project within the specified time limit was due to the fact that he had to wait until the contract for the construction of the adjacent sections was completed, it being impossible for him to remove the old bridge and complete his contract until the new road was made available for traffic. The Engineer advised that the reason given by the contractor for overrunning the time limit is substantially correct. He recommended in view of the circumstances that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Contract No. 2671 with Oscar Joelson for the production of rock for the Heppner and Lexington-Echo Secondary Highways in Morrow County, requested an additional extension of time of one day from January 31, to February 1, 1945, within which to complete this job. He advised that the one-day extension is required simply to give him time to shape up one of his stockpile sites, all other work having been completed before the previously extended time limit expired. The Engineer recommended that the extension of time as requested be granted without penalty. The Commission approved the recommendation.

The Engineer reported that Contracts Nos. 2591, 2671, and 2685 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2591, with Tom Lillebo, for construction of bridges on the Goshen-Pleasant Hill Section of the Willamette Highway in Lane County; completed on December 7, 1944.

Contract No. 2671, with Oscar E. Joelson, for furnishing crushed material in stockpiles on the Lexington Section of the Heppner and Lexington-Echo Highways in Morrow County; completed on February 1, 1945.

Contract No. 2685, with M. C. Lininger & Sons, for furnishing crushed rock in stockpiles on the Lakeview Section of the Klamath Falls-Lakeview and Freemont Highways in Lake County; completed on March 7, 1945.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Secretary presented a letter from Mr. S. L. Burton, Publisher of the "Curry County Reporter", Gold Beach, advising that a movement is under way to incorporate this town and requesting "a direct statement from the Highway Commission" as to the probable status of the Oregon Coast Highway in the event such incorporation is effected; also, inquiring whether or not such incorporation would make it incumbent upon the citizens to pay the cost of reconstructing the highway through this place. The Attorney advised that so long as the Highway Commission retains the present route of the highway through Gold Beach, it would be the obligation of the state to reconstruct and to maintain it at state expense regardless of whether or not the city incorporates. The Engineer advised that it was the decision of the former Highway Commission to reconstruct the highway along its present route on Main Street; further, that this Commission authorized the improvement but the work was not undertaken due to the United States becoming involved in the war with Japan. The Commission's decision with respect to the routing of the highway, he said, was the result of numerous conferences with the local citizens. In view of the reports of the Engineer and the Attorney, the Commission decided to retain the present route of the highway on Main Street through this town and instructed the Secretary to inform Mr. Burton that so long as the highway is routed along this street it will be the responsibility and obligation of the State Highway Commission to reconstruct it in conformity with modern standards when the time is propitious, and to maintain it thereafter at state expense. The Secretary pointed out that while the former Highway Commission authorized the improvement

of the highway along the present route through Gold Beach, it did not formally adopt the route as a state highway. In view of this information the Commission instructed the Attorney to prepare an appropriate form of resolution for adoption at the next meeting.

In this connection the Attorney advised that when the improvement of the Oregon Coast Highway through the Town of Gold Beach was under discussion by the former Highway Commission, there was considerable talk about the width of the right of way and the Commission finally decided to rebuild the highway on right of way eighty feet wide which involved, among other things, the moving of some of the buildings in the town, including the bank building. Due to the fact that the improvement was not undertaken because of the war, he said, none of the buildings were moved, but it now appears that the bank must enlarge its quarters, wherefore the state has been asked to take action immediately so far as this particular building is concerned. He estimated the cost to move the bank building at $5,000, being a quotation given him by a competent house mover. He gave as his thought that $5,000 is a fair amount to pay and suggested that it would be advisable from the state's standpoint to pay such sum to the bank which would then assume full responsibility for the moving of the building. He also said that the bank officials are agreeable to handling the matter in such manner. The State Highway Engineer concurred with the recommendation. After discussion, the Commission authorized settlement with the bank in conformity therewith.

The Attorney requested instructions relative to the collection of rental from a Mr. Henris, Klamath Falls, from whom the Commission purchased certain property, including the building situate thereon, in a right of way transaction. It appears that an option to purchase the property was obtained from Mr. Henris in May of 1944, and it was thought at the time that the transaction would be closed and Mr. Henris paid for the property by August 1, in view of which Mr. Henris agreed to pay rental for the use of the property from that date. However, the transaction was not consumated until January 10, 1945, in view of which Mr. Henris refuses to pay rental for the use of the property between August 1 and January 10, amounting to some $180. The Attorney gave as his thought that there is justification in Mr. Henris' complaint. Following discussion the Commission referred the matter back to the Attorney with authority to settle with Mr. Henris in the best possible manner.

The Engineer brought up for discussion the following Federal aid matters:

(1) Adoption of interstate system of highways.

(2) Determination of urban areas for use in connection with the allocation of Federal moneys.

(3) Adoption of a Federal aid secondary highway system.

Each of these subjects was discussed briefly but action on each was deferred by the Commission until Commissioner Chessman is present.

MAR 12 1945

The Engineer reported receipt of a letter from the Public Roads Administration concerning the $100,000,000 Federal fund that has been authorized by the Federal Aid Act of 1944 for immediate use. The Public Roads Administration, he said, wants to know how much of Oregon's share of this fund can be used before July 1, 1946, such share being estimated at $1,416,872. The Engineer explained that this money can be spent for surveys, rights of way, and for construction of projects that have been approved by the War Production Board and gave as his thought that full advantage should be taken of this offer. He requested authority to apply for the full amount of Oregon's share of this fund and to submit along with the application a list of the projects on which there is reasonable prospect that considerable progress is being made in the purchase of rights of way or, in the case of construction projects, some prospects of completion, or at least of beginning construction before the dead line of July 1, 1946. It was the thought of the Commission that an attempt should be made to secure the maximum amount of funds that are to be apportioned to the State of Oregon. Accordingly, the Engineer was authorized to file an application for all of the Federal moneys that there is likelihood of obtaining under this Federal Aid Act.

The Engineer reported that the Crooked River and Deschutes River Bridges on the Culver-Grandview Market Road, Jefferson County, have been repaired in conformity with the agreement between the Commission and Jefferson County Court dated June 7, 1944, and there no longer exists any reason to continue the reduced load limit that has been in effect on these bridges since last September. He recommended adoption of an order restoring legal weight loads on these structures. The Commission approved the recommendation and thereupon by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, on the 12th day of September, 1944, at a meeting of the Oregon State Highway Commission, all members being present and participating, the Commission passed and adopted a resolution reducing the maximum load limit on the following state highway bridges:

CULVER-GRANDVIEW COUNTY ROAD, JEFFERSON COUNTY

M.P. 6.0 Crooked River Bridge 8 tons
M.P. 7.5 Deschutes River Bridge 8 tons

and

WHEREAS, subsequent to the passage of said resolution conditions have changed so that it is now no longer necessary or desirable, and the Commission hereby finds that it is no longer necessary or desirable to maintain the reduced load limits set out in said resolution on the said state highway bridges;

NOW, THEREFORE, BE IT RESOLVED that the action of the State Highway Commission reducing the maximum permissible load limit on the said bridges be and the same is hereby rescinded and cancelled as of this date, and the maximum load limit permissible on the said highway

bridges hereafter shall be the maximum load limit provided by law; and it is further ordered that a certified copy of this resolution be furnished to the county clerk of the county in which said highway bridges are located, and that a certified copy of this resolution be furnished to the Superintendent of the Department of State Police for his information.

Dated this 12th day of March, 1945.

The Engineer requested authority to purchase 15,000 gallons of lacquer to be used for painting traffic lines during the 1945 season. He estimated the cost at $2.20 per gallon, or a total of $33,000. The Commission approved the request by unanimous vote.

The Engineer also requested authority to purchase the following equipment that is needed in connection with maintenance operations:

2 Hystevators	Estimated cost	$1,400.00
3 Tractor-Loaders	" "	6,600.00
1 Athey Loader	" "	6,300.00
Estimated total cost		$14,300.00

The Commission approved the request by unanimous vote.

The Commission also authorized the purchase of the following equipment for use by the State Parks Department: 2 Farm Tractors, 2 Plows, 2 Discs, 2 Harrows, 2 Mowers, 2 Rakes at an estimated total cost of $4,000.

The Engineer reported on the sale of the tourist cabins that were acquired in connection with right of way settlement at Spencer Creek on the Oregon Coast Highway, about seven miles north of Newport, Lincoln County. He advised that in conformity with oral authority given him by the Commission he sold the buildings, which consisted of thirteen cabins and one laundry building, to Mr. D. Wadsworth, Portland, for the sum of $675 and that he sold to Mr. Ray L. Congdon, Horton, Oregon, five toilets and eight gas plates for the sum of $115. The balance of the contents of the buildings, he said, was sold to Mr. Wadsworth for the sum of $40. He pointed out that the high bid received on December 27, 1944, for all of the buildings and contents was $326, so it appears that the Commission is fully justified in rejecting this bid and negotiating the private sale of the property. The Commission by unanimous vote confirmed the sale as reported.

The Engineer also reported the results of reception of bids in Salem on February 9, 1945, for the sale of a small tract of state-owned land situate in Block 2, Foster's Addition to the City of Sheridan. He advised that two bids were received, one being that of Martin & Brown Wood Yard, Sheridan, in the sum of $155, and the other that of Otto W. Heider, Sheridan, in the amount of $100. He recalled that the Commission orally authorized the rejection of these bids because they were far below the value of the property as appraised by the Right of Way Department. He asked the Commission

to confirm the rejection. The Commission by unanimous vote approved the rejection of the bids as reported.

The advisability of permitting log hauling on the Santiam Highway between Cascadia and the junction with the North Santiam Highway and on the Crater Lake Highway between Crater National Park boundary and the junction with The Dalles-California Highway was discussed by the Commission. The Engineer advised that requests have been received for permits authorizing log hauling over these two highways, which in his estimation should be denied because neither of the highways is in suitable condition to withstand such heavy traffic. He pointed out that the Santiam Highway between Sheep Creek and the junction with the North Santiam Highway has not been oiled, the present surfacing consisting of a thin coating of cinders capable of carrying light traffic only. If log hauling were permitted over this section during the wet season, he said, the road would soon become impassable for any kind of traffic, and besides one-way traffic is required at several places where slides have occurred. As to the Crater Lake Highway, he advised that the surfacing consists of an oil treatment suitable for light traffic only; moreover, a considerable portion is across low marshy land with high water table and a few days of log hauling would severely damage it. He recommended that log hauling be not permitted over either of these highways until the sub-grade has dried out sufficiently or until standard type surfacing has been constructed. The Commission approved the recommendation unanimously and authorized the erection of appropriately worded signs notifying the public that log hauling is not permitted on either of these highways between the points under discussion. The Engineer was also authorized to post other highways where similar conditions obtain. The Secretary was instructed to ask the Public Utilities Commissioner to include in the special carrier permits hereafter issued from his office a clause prohibiting log hauling over any section of state highway which has been so posted by the State Highway Commission. During the discussion of this matter the Engineer pointed out the possibilities of securing Federal timber access road moneys with which to finance the improvement of the Santiam and Crater Lake Highways sufficiently to withstand log hauling traffic. He was authorized by the Commission to secure such funds if possible.

The Secretary presented a request from the Gold Beach Utilities for permission to construct a short section of a power transmission pole line along the west side of the Oregon Coast Highway from Eucher Creek to Ophir School in Curry County, a distance of about 1,700 feet. He advised that there is an unobstructed view of the ocean scenery from the highway at this point so under Commission policy of many years' standing it would be necessary to deny the use of the west side of the highway for this purpose. However, the easterly side of the highway is now occupied by a telephone pole line so could not be specified for the power line in view of another policy of the Commission which prohibits the construction of two pole lines on the same side of the highway. The Secretary requested instructions, pointing out that the company has already built its line on the west side of the highway, notwithstanding orders from the District Maintenance Superintendent, Mr. D. J. Sage, to the contrary. As a result of discussion the Commission referred the matter to the Attorney with instructions to notify the company that it must remove its facilities from the highway right of way or place them underground.

The meeting adjourned at 5:00 p.m., to reconvene on the following morning.

Portland, Oregon, March 13, 1945

The State Highway Commission reconvened at 9:00 a.m., in the Stock Exchange Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
R. H. Baldock, State Highway Engineer
H. B. Glaisyer, Secretary

Commissioner M. R. Chessman was excused from attending this meeting.

Bids as follows for highway construction work were opened and read in conformity with previously published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room:

CRATER LAKE HIGHWAY IN JACKSON COUNTY
PROSPECT-ANTELOPE CREEK ROCK PRODUCTION PROJECT

*E. C. Hall Company, Portland	$31,050.00
*Guerin Brothers, San Francisco, Calif.	31,200.00
*T. W. Thomas, Portland	37,540.00

* Bidder will not accept this project unless also awarded the Union Creek Rock Production Project.

CRATER LAKE AND WEST DIAMOND LAKE HIGHWAYS IN JACKSON COUNTY
UNION CREEK ROCK PRODUCTION PROJECT

**T. W. Thomas, Portland	$27,990.00
*E. C. Hall Company, Eugene	29,940.00
***Guerin Brothers, San Francisco, Calif.	30,336.00
J. N. & M. J. Conley, Portland	38,700.00

* Bidder will not accept this project alone
** Bidder will make lump sum reduction of $2,500.00 if also awarded Prospect-Antelope Creek Project. Will not accept this project alone.
*** Bidder will make lump sum reduction of $750.00 if also awarded Prospect-Antelope Creek Project. Will not accept this project alone.

COMBINATION BIDS FOR:
(1) PROSPECT-ANTELOPE CREEK ROCK PRODUCTION PROJECT
(2) UNION CREEK ROCK PRODUCTION PROJECT

	(1)	(2)	Reduc.	Low Com. Bid
Guerin Brothers San Francisco, Calif.	$31,200.00	$30,336.00	$ 750.00	$60,786.00
E. C. Hall Company, Eugene	31,050.00	29,940.00	---	60,990.00
T. W. Thomas, Portland	37,540.00	27,990.00	2,500.00	63,040.00

CRATER LAKE HIGHWAY IN JACKSON COUNTY
WIDEN TRAIL BRIDGE OVER ROGUE RIVER

*Norris & Philpott, Portland	$18,532.00
Lindstrom Brothers, Portland	19,900.00
Harry I. Hamilton, Eugene	22,320.00
Tru Mix Concrete Co., Medford	24,736.00
C. J. Montag & Son, Portland	27,726.00

* Bidder will accept only one project.

THREE STATE HIGHWAYS IN HARNEY COUNTY
BURNS ROCK PRODUCTION PROJECT

E. C. Hall Company, Portland	$30,204.00
J. N. & M. J. Conley, Portland	30,557.00
Oscar E. Joelson, Eugene	30,696.00
Homer G. Johnson, Portland	31,204.00
Rogers Construction Company, Dayton, Wash.	32,886.00
M. C. Lininger & Sons, Medford	33,876.00
C. J. Eldon, Portland	42,920.00

THE DALLES-CALIFORNIA AND EAST DIAMOND LAKE HIGHWAYS IN KLAMATH COUNTY
CHEMULT-BEAVER MARSH ROCK PRODUCTION PROJECT

*Rogers Construction Company, Dayton, Wash.	$18,727.00
*E. C. Hall Company, Portland	20,832.00
J. N. & M. J. Conley, Portland	25,434.75
Fisher Brothers, Oregon City	30,960.00

* Bidder will not accept this project unless also awarded the Fort Klamath-Lobert Rock Production Project.

FIVE STATE HIGHWAYS IN KLAMATH COUNTY
FORT KLAMATH-LOBERT ROCK PRODUCTION PROJECT

*Rogers Construction Company, Dayton, Wash.	$24,800.00
*J. N. & M. J. Conley, Portland	26,275.00
*E. C. Hall Company, Portland	27,300.00

* Bidder will not accept this project unless also awarded the Chemult-Beaver Marsh Rock Production Project.

MAR 13 1936

WILLAMETTE HIGHWAY IN LANE COUNTY
TRENT-SALT CREEK FALLS ROCK PRODUCTION PROJECT

Fisher Brothers, Oregon City	$50,400.00
E. C. Hall Company, Portland	52,800.00
Skelton & Weicks, Toledo	56,640.00
Rogers Construction Co., Dayton, Wash.	57,576.00

R. O. Dail, Portland	18,525.00
Vernie Jarl, Gresham	22,009.00

* Bidder will not accept this project if awarded the two other projects on which he submitted bids at this letting.

The Commission had under discussion a request from the Consolidated Timber Company for permission to obtain approximately 300 cubic yards of rock from a state-owned quarry situate at M.P. 36 on the Wilson River Highway. The Company advises that the rock is needed to repair the approach to a bridge on a logging road that was washed out by high water during the recent storm. It appeared to the Commission that an emergency exists that would justify deviation from the Commission's established policy that prohibits the taking of material from state-owned quarries for private purposes. For this reason and for the further reason that the Consolidated Timber Company donated the right of way for the highway at this point, the Commission approved the request.

A delegation representing the Rainier Commercial Club, consisting of Ed Britts, President, T. L. McBride, Secretary, William Reid, Fred McKinley, and Earl Baltazar, came before the Commission in regard to the improvement of the Lower Columbia River Highway between Rainier and St. Helens. Mr. Reid was principal spokesman. He urged the reconstruction of this section of the highway at the earliest possible time advising that it is the project of most importance to the people of this district. Chairman Banfield advised that the Commission is not in a position at the present time to make any definite commitment or promise with respect to the proposed improvement, but will keep it in mind for consideration in the formulation of the postwar program. He pointed out that while Congress has authorized certain Federal funds to finance highway construction when the war is over, the rules and regulations that are to govern the expenditure of the money have not yet been received, in view of which the Commission cannot make a selection of the projects. The program will be decided, he says, when the regulations are available after further consultation with the respective counties. This concluded the conference.

The Engineer reported on his further study of the proposal made by the Corvallis delegation at the previous meeting with respect to the establishment of two one-way streets for highway traffic passing through Corvallis. He exhibited a map showing the lay-out as proposed by the delegation, which

contemplates the rerouting of the Pacific Highway West southeasterly from a point near the north city limits of Corvallis to connections with Fourth and Third Streets extended northerly; the designation of Fourth Street as a one-way street for southbound traffic and the designation of Third Street as a one-way street for northbound traffic, with a new connection with the present highway at the south end of Fourth Street including a new bridge over Mary's River. He recommended approval of the plan and the designation of the two one-way streets, but suggested on account of scarcity of funds that construction for the time being be limited to the improvement at the southern end of the city which he estimated would cost about $87,000 including the new bridge over Mary's River. The major improvement at the north end of the city, he said, should be postponed until further funds are available to finance the work. The Commission took no action on the report except to authorize the Engineer to discuss the matter with the city officials and to ascertain whether or not the city would be willing to adopt an ordinance designating the one-way streets immediately following the war.

The Commission discussed briefly formal adoption of the proposed relocation of the Columbia River Highway at Troutdale, but deferred action until all members of the Commission are present.

The Engineer reported that the City of Ontario has complied with the Commission's requirements with respect to the routing of truck traffic along West First Street between Idaho Avenue and Fourth Avenue South, so the Commission is at liberty to formally designate such truck route if it so desires. In view of this report, the Commission approved the city's request for such routing and thereupon by unanimous vote adopted the following resolution with regard thereto:

> WHEREAS, the Highway Commission has heretofore by formal resolution duly adopted and recorded in the minutes and records of the Commission designated the streets of Ontario over which to route state highway traffic, by which said resolution Oregon Street from its intersection with Fourth Avenue Southwest to the northerly boundary of the said City of Ontario has been designated as one of the streets of said City over which state highway traffic is routed; and
>
> WHEREAS, the City of Ontario by resolution adopted February 5, 1945, has requested the Commission to designate as an additional route over which to route truck traffic using the state highway in the City of Ontario a portion of First Street Southwest and a portion of Idaho Avenue West; and
>
> WHEREAS, it is the judgment of the Commission, after due consideration, that public interests will be served by the designation of the sections of streets hereinafter named as an additional route over which state highway traffic may be routed in the City of Ontario;
>
> NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED, a majority of the Commissioners being present and voting affirmatively, as follows:

1. That First Street Southwest from its intersection with Fourth Avenue Southwest to an intersection with Idaho Avenue West; thence Idaho Avenue West to Oregon Street be and said sections of said streets hereby are selected and designated as sections of streets in the City of Ontario over which there shall be routed state highway traffic.

2. That the traffic which shall be particularly and specifically routed over said additional streets shall be all truck traffic entering and/or leaving the City of Ontario over the Old Oregon Trail.

3. That the Engineer be and he is further authorized, instructed and directed to maintain the said additional parts or portions of streets with state highway funds.

4. That this resolution be entered in the minutes and records of the Commission as of the 13th day of March, 1945, and a certified copy thereof mailed to the Mayor of the City of Ontario and a like certified copy to the County Judge of Malheur County, and a like certified copy to W. H. Lynch, District Engineer, Public Roads Administration, Portland, Oregon.

The Engineer reported that pursuant to the Commission's instructions, he has made a personal investigation of the slide conditions complained of by Mr. A. F. Elkins, Monmouth, along the Pacific Highway West near Camp Adair and has been unable to find any place where the embankment slopes extend beyond the present right of way limits; moreover, the investigation discloses that the danger of future sloughing of the fills is quite remote although there are possibilities that encroachments may occur. In order to avoid such encroachments he recommended acquisition of an additional ten-foot strip of land along Mr. Elkins' frontage, which he estimated could be purchased for about $500, provided Mr. Elkins will deed the property to the state unconditionally and without any obligation on the part of the state to do certain things for him, such as the paving of the underpass that was constructed for his use. After discussion, during which the Attorney recited the history of this case, the Commission voted unanimously to acquire the extra ten-foot strip subject to the conditions mentioned by the Engineer.

Pursuant to previous instructions from the Commission, the Engineer reported results of his discussion with Botsford, Constentine & Gardner, the Commission's Travel Agency, regarding the taking of membership in the National Association of Travel Officials. The Assistant State Highway Engineer advised that he contacted Mr. Ray Andrews of the Advertising Agency and was informed that from their standpoint such membership is not worthwhile and that they would not receive sufficient benefit to justify the expense involved. Before definitely passing on the matter, the Commission decided that it would be advisable to consult the members of the Advisory Committee on Travel Matters. The Engineer was thereupon instructed to ascertain the attitude of the committee members advising them that while the Commission is not particularly in favor

of taking membership in this organization, it will do so if the Advisory Committee still feels that such membership will result in benefits to the State of Oregon.

The Commission discussed briefly plans for proposed improvements in Champoeg State Park during 1945. The Engineer advised that the Parks Superintendent was instructed some time ago to contact the members of the Parks Advisory Committee relative to such improvements and the proposed major development of this park, but he has been unable as yet to get any of the members to accompany him to the park so has nothing to report. The Commission ordered that the members of the committee be informed that the Commission is ready to commence the development work but cannot proceed until the committee has passed on the plans and has viewed the premises.

The question of classifying log haulers according to their experience rating as was suggested at the previous meeting was discussed briefly by the Commission. The Engineer advised that data are being collected and forms are being prepared to effect the classifications. He was instructed by the Commission to include in the record, among other things, a showing of the time that log haulers lose waiting at the scales to be weighed, inasmuch as there has been considerable complaint in that regard. To facilitate the securing of such information, the Commission authorized the purchase of time clocks for use at the scale houses.

The County Court of Douglas County, including County Judge D. N. Busenbark and County Commissioners H. B. Roadman and J. Ross Hutchinson, came before the Commission in regard to the North Umpqua County Road, which extends easterly from Roseburg to Diamond Lake. Also present and entering into discussion were the following Federal officials:: Representing the Public Roads Administration were: W. H. Lynch, District Engineer, T. A. Davis, H. D. Farmer, and F. E. Andrews. Mr. James Frankland, Acting Regional Forester represented the United States Forest Service.

Judge Busenbark urged the Commission to take over this road as a state secondary highway, particularly that portion which extends from Roseburg to a place known as Steamboat, in order to relieve the county of maintenance expense which he declared is extremely high as the result of damage caused by log hauling traffic. He said that the county is not financially able to maintain the road under conditions now obtaining and they feel that the obligation to maintain rightfully belongs to some other agency, in view of the fact that the county receives no financial benefits from the road, it being primarily a logging road and will continue to be such for many years. He advised that according to present estimates 143,000,000 board feet of timber is to be taken annually from the timber stands adjacent to this road on a sustained yield basis, all of which will be truck hauled over the road.

The State Highway Engineer reported results of an economic analysis of the road, including estimates of cost to reconstruct it to standards that would accommodate log hauling traffic, and to maintain the road thereafter, together with information as to the probable revenues that the state would receive from operations over the road. (See typewritten report dated March, 1945, in General Files for details.) He pointed out that the lower section of

the road between Roseburg and Rock Creek, about twenty-four miles in length, was improved several years ago as a Federal Aid secondary highway project for light farm traffic, but since then has been used by log haulers with the result that the road has suffered severe damage. The Public Roads Administration, he said, recognizes the situation and last fall spent about $1,000 per mile for repairs but there is a question if the appropriation will be continued. He gave as his understanding that the county wants the state to maintain the twenty-four mile section as a state secondary highway and the Federal Government to assume the responsibility for the adjoining twenty miles up to Steamboat, as a forest service road. He estimated that it would cost between $50,000 and $75,000 annually to maintain the twenty-four mile section under present conditions.

Mr. Andrews suggested that the road be placed on the Forest Highway System which would make it eligible for forest highway funds. Following a lengthy discussion of the matter, Chairman Banfield concluded the conference by stating that the Commission is not unsympathetic to the county's needs but is not in a position at this time to give the county a definite answer. Moreover, an answer cannot be given until the matter has been thoroughly discussed and studied by all members of the Commission, Commissioner Chessman being absent at this meeting, and until the Federal authorities have been consulted as to just what cooperation can be expected from governmental sources. The Engineer was thereupon instructed to discuss the matter with the representatives of the Public Roads Administration and U. S. Forest Service before the next meeting is scheduled for programing forest highway funds.

A delegation from Baker was present and urged the Commission to construct a new road extending westerly from Baker to a connection with the Austin Spur Section of the John Day Highway at Bates, Grant County, via Sumpter and Whitney. The delegation was headed by County Judge Charles E. Baird and included the following: A. S. Grant, Attorney and President of the Baker Chamber of Commerce; Blaine Hallock, Attorney; County Commissioners, R. M. Phipps and G. B. Saunders; Henry McKinney, Mayor of Baker; Armond W. Perkins, Stockman and former County Commissioner; and Earle Hoge, Manager of the Baker Chamber of Commerce.

Following brief open remarks by Judge Baird, Mr. Grant made an urgent plea for a road from the standpoint of "preserving the very existence" of the City of Baker. He advised that at the present time three lumber mills operate in the City of Baker with an aggregate payroll of $1,867,000 annually, and that the city is dependent upon this industry to maintain its present status. Two of these mills, he said, Stoddard Lumber Company and Collins Pine Company, are going to close down operations in the not distant future because of the exhaustion of their timber supplies and the third company, Oregon Lumber Company, has announced its intention to move its plant to Brogan when the war is over in order to reduce transportation expense, it being contended that the haul from the company holdings at Bates to Brogan is more feasible than the present haul to Baker. This company's payroll in 1944, he said, amounted to $844,241.00, the loss of which to the City of Baker will seriously affect the economic life of the community. He further stated that the people of Baker realize that it will be necessary for the Stoddard Lumber Company and the Collins Pine Company to close down their operations within a short time, but are of the belief that the

operations of the Oregon Lumber Company can be retained if the proposed highway were constructed, and they wish to offer that as a solution of their problem. He pointed out that the Oregon Lumber Company is now cutting about 40,000,000 board feet of timber in the Bates area under contract with the U. S. Forest Service which will keep the company operating for about four years, and that the Forest Service has a sustained-yield timber unit within reach of the proposed road that will supply about 35,000,000 board feet annually. The people of Baker, he said, wish to secure the benefits of this timber and in order to realize these benefits the proposed road between Bates and Baker must be built.

Mr. Hallock endorsed the remarks of Mr. Grant. He pointed out that the highway would not only serve the timber interests but will encourage mining in the district, the biggest undeveloped mineral area in the world, which, he said, cannot be worked because of the lack of transportation facilities. In addition thereto, he added, the road would accommodate the general traveling public. He declared that they are not asking for this road just in order to "have something" but because they must have it in order to "survive", and they feel that they are entitled to it in view of the manner in which Baker County has cooperated with the state in the past financially as otherwise in the matter of highway building. He also mentioned that the proposed road would eliminate sixteen miles of dangerous mountain grade on the Dooley Mountain section of the Baker-Unity Highway over which logs are now being hauled.

Judge Baird gave statistics relative to the mileages of state highways in Baker County and he recited the history of the county's financing of road building, including primary highway construction, asserting that the county has spent about $2,000,000 for such purpose, whereas it has received back from the state only about $360,000. He urged the construction of the proposed road in the Commission's postwar program. Mayor McKinney spoke for the road from the standpoint of accommodations to the public and the shortening of tonnage haul.

The Engineer exhibited a map showing present routes from Bates to Baker and to Brogan, also showing the proposed route. He declared that the records reveal that the total rise and fall on the present route to Baker is less than that on the John Day Highway to Brogan, which would indicate that the Oregon Lumber Company would not realize the saving of transportation costs that it contemplates were its plant moved to Brogan. He also pointed out the cost to truck haul timber over highways to Brogan is practically the same as the cost to ship it by rail to Baker. He estimated the cost to construct the proposed highway at between $2,500,000 and $3,000,000, based on such information as was available in the office as no field survey has been made. Chairman Banfield stated that the Commission appreciates that the City of Baker has a serious problem on its hands, but, he said, the State Highway Commission also has serious problems and the question arises how would the other counties of the state feel if the Commission should spend such a large sum of money for the construction of a new road in Baker County while there remains such a large mileage of unconstructed road on the present highway system. Commissioner

Schaupp expressed himself similarly, pointing out that construction of this road would mean that other parts of the state would suffer.

After further discussion Chairman Banfield concluded the conference by stating that the Commission cannot settle this matter today but will take it under advisement and will have a complete analysis made of the project. The Engineer was thereupon authorized and instructed to make a reconnaissance survey of the proposed road and to render to the Commission an economic analysis of the project. It was made clear to the delegation that the Commission by authorizing the reconnaissance survey is making no commitment whatsoever at this time with respect to construction; also, that whatever may be the Commission's decision, there is no possibility that funds will be available to finance the work until the present emergency is a thing of the past.

The Commission recessed for luncheon at 12:30 p.m. and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

Messrs. O. L. Hoffman and Mark L. Nelson, U. S. Army Engineers, came before the Commission regarding the development of recreational areas adjacent to reservoirs created by dams constructed under the supervision of the U. S. War Department. Mr. Hoffman advised that under the Flood Control Act recently passed by Congress the War Department has considerable more authority with respect to the development of such areas, which can be handled either by the War Department itself or cooperatively with the states in which the reservoirs are located, or with private parties. He read aloud a portion of Section 4 of the Act (Public 534-78th Congress, Chapter 665-2nd Session-H. R. 4485) relating thereto and mentioned three such projects now ready for development, viz: Fern Ridge Project near Eugene, Cottage Grove Project, and the Bonneville Project, and advised that a number of other projects are contemplated for the future. He inquired as to the attitude of the State Highway Commission with respect to joining in the development, and asked the Commission to assist in the preparation of a master plan of development which, he said, is the first thing to be considered. Chairman Banfield advised that this is something with which the Commission is unfamiliar so will have to be given thorough study before a decision can be reached. He pointed out that the Commission will have to ascertain how much expense is involved and whether or not such undertaking would interfere with the Commission's plans for development of other state parks. The Commission, he says, does not wish to incur additional obligations until it knows whether or not they can be met. He added that the Commission might be favorable to the project as proposed but is not in a position to make a definite statement at this time. The Engineer and the Attorney were thereupon instructed to analyze the project and report back to the Commission as to its feasibility and probable cost to the state.

A delegation from Eugene consisting of William Tugman, Chairman, City Planning Commission, [illegible] McNutt, Mayor of Eugene, Allen Wheeler, Lane County Commissioner, and Frank Kenney, Realtor, came before the Commission and urged the acquisition of right of way for the proposed relocation of the Pacific Highway west of the City of Eugene. Mr. Tugman headed the group. He advised that the district through which the new highway is projected is being built up

rapidly, and in their estimation now is the time for the Commission to secure the right of way while land can be acquired at comparatively small cost. C. W. Parker, right of way buyer, estimated that it would cost about $300,000 to acquire standard width right of way along the proposed route between Sixth Street and the junction with Willamette Street extended southerly. He pointed out that the proposed line passes through a district where homes have already been constructed and if the line were changed to miss these houses, the right of way expense probably could be reduced to about $250,000. The Engineer stated that the Pacific Highway will have to be rerouted east Eugene some time in the future and that the proposed route has been considered the most feasible from the engineering standpoint. He suggested in view thereof that it might be advisable to acquire right of way now across the vacant properties along the route, which is estimated to cost about $40,000, so as to avoid possible extra expense when the road is constructed. Mr. Kenney confirmed Mr. Tugman's statement as to the growth of the City of Eugene and pointed out that the district south and east of the city is the only location that is available for future development. He advised that he controls about 500 acres of land through which the highway is projected and offered to sell right of way through this property at the rate of $50 per acre which, he said, is much less than he can get for it from private parties now, and is only about one-tenth of the price that it will bring in ten years. He predicted that the City of Eugene will continue to grow rapidly after the war is over and advised that they are not asking the Commission to construct the highway at this time but simply to acquire the right of way while it can be obtained as farm land. Chairman Banfield pointed out that the State Highway Commission has spent considerable money in and adjacent to Eugene during the past few years on the present highway route and anticipates further expenditures in the future to complete the work already started. He gave as his opinion that the Commission's finances will not permit the construction of two highways through Eugene or through any other place, and questioned the advisability of doing so while there are some cities in the state that are not accommodated by even one highway. It was his thought that it would not be treating the other localities fairly if the Commission constructed the second highway at Eugene. He also pointed out the possibilities that some future Highway Commission will decide to change the location of the highway, in view of which it would not be advisable to acquire right of way at this time. Commissioner Schaupp expressed himself similarly. Further discussion followed. The Commission deferred a final decision in the matter pending consultation with Commissioner Chessman.

The Commission discussed with the Engineer the bids received at the morning session for several highway construction projects, and decided unanimously to award the contracts to the low bidder in each instance. The contracts for the Prospect-Antelope Creek Rock Production Project and Union Creek Rock Production Project, in Jackson County, were awarded to Guerin Brothers, San Francisco, this company having submitted the low combination bid for both projects.

At 3:00 p.m. Chairman Banfield publicly announced the awards of contracts as follows:

"Prospect-Antelope Creek Rock Production Project on the Crater Lake Highway in Jackson County. E. C. Hall Company,

Portland, submitted the low bid in the amount of $31,050. Guerin Brothers, San Francisco, submitted the next low bid in the amount of $31,200. T. W. Thomas, Portland, submitted the only other bid in the amount of $37,540. Each of these bidders qualified their bids by stating that they would not accept the award of this contract unless also awarded the contract for the Union Creek Rock Production Project. Guerin Brothers submitted the low combination bid for both projects which the Commission has accepted. The contract for the Prospect-Antelope Creek Rock Production Project therefore has been awarded to Guerin Brothers on the basis of their combination bid.

"Union Creek Rock Production Project on the Crater Lake and West Diamond Lake Highways in Jackson County. T. W. Thomas, Portland, submitted the low bid for this project in the amount of $27,990. He offered to make a lump sum reduction of $2,500 if awarded also the Prospect-Antelope Creek Rock Production Project, but he stated that he would not accept either project alone. E. C. Hall Company, Portland, submitted the second low bid in the amount of $29,940. This contractor will not accept this project alone. Guerin Brothers, San Francisco, submitted the third low bid in the amount of $30,336 and offered to reduce the amount by a lump sum of $750 if also awarded the Prospect-Antelope Creek Rock Production Project. They will not accept either project alone. J. N. & M. J. Conley, Portland, submitted the only other bid in the amount of $38,700. The Commission has awarded this contract to Guerin Brothers who submitted the low combination bid for both projects.

"Widen Trail Bridge over Rogue River on the Crater Lake Highway in Jackson County. Norris & Philpott, Portland, submitted the low bid for this project in the amount of $18,532. Lindstrom Brothers, Portland, submitted the next low bid in the amount of $19,900. There were three higher bidders. The Commission has awarded the contract to the low bidder, Norris & Philpott, at their bid price of $18,532.

"Burns Rock Production Project on three state highways in Harney County. E. C. Hall Company, Portland, submitted the low bid for this project in the amount of $30,204. J. N. & M. J. Conley, Portland, submitted the next low bid in the amount of $30,557. There were five higher bidders. The Commission has awarded the contract to the low bidder, E. C. Hall Company at their bid price of $30,204.

"Chemult-Beaver Marsh Rock Production Project on The Dalles-California and East Diamond Lake Highways in Klamath County. The low bid was submitted by Rogers Construction Company, Dayton, Washington, in the amount of $18,727. E. C. Hall Company, Portland, submitted the next low bid in the amount of $20,832. Both of these contractors stated that they would not accept the award of this contract unless also awarded the contract for the Fort Klamath-Lobert Rock Production Project. There were two higher bidders. Inspection of the bids received for the Fort Klamath-Lobert Rock Production Project reveals

that of Rogers Construction Company to be low, in view of which the contract for the Chemult-Beaver Marsh Rock Production Project has been awarded to Rogers Construction Company at their bid price of $18,727.

"Fort Klamath-Lobert Rock Production Project on five state highways in Klamath County. Rogers Construction Company, Dayton, Washington, submitted the low bid for this work in the amount of $24,800. J. N. & M. J. Conley, Portland, submitted the next low bid in the amount of $26,275. E. C. Hall Company, Portland, submitted the only other bid in the amount of $27,300. Each of these contractors stated that they would not accept the award of this contract unless also awarded the contract for the Chemult-Beaver Marsh Rock Production Project. The combination bid submitted by Rogers Construction Company was low for both projects in view of which the Commission has awarded to the Rogers Construction Company the contract for the Fort Klamath-Lobert Rock Production Project at its bid price of $24,800.

"Trent-Salt Creek Falls Rock Production Project on the Willamette Highway in Lane County. Fisher Brothers, Oregon City, submitted the low bid for this work in the amount of $50,400. E. C. Hall Company, Portland, submitted the next low bid in the amount of $52,800. There were eight higher bidders. The Commission has awarded the contract to Fisher Brothers, the low bidder, at their bid price of $50,400.

"Reconstruct Duval Creek Bridge on the Willamette Highway in Lane County. Tom Lillebo, Reedsport, submitted the low bid in the amount of $7,005. Norris & Philpott, Portland, submitted the next low bid in the amount of $7,500. There were three higher bidders. The Commission has awarded the contract to the low bidder, Tom Lillebo, at his bid price of $7,005.

"Construction of concrete curbs and retaining wall on the Taft Section of the Oregon Coast Highway in Lincoln County. The low bid for this work was submitted by Edlefsen-Weygandt Company, Portland, in the amount of $5,437.50. Ocean Lake Sand & Gravel Company, Ocean Lake, submitted the next low bid in the amount of $6,008. There were two higher bidders. The Commission has awarded this contract to the low bidder, Edlefsen-Weygandt Company at their bid price of $5,437.50.

"Albany-Crabtree Corner Section of the Santiam Highway in Linn County. Warren Northwest, Inc., Portland, submitted the low bid for this project in the amount of $72,796.25. The joint bid of J. C. Compton & E. C. Hall Company, McMinnville, in the amount of $73,266 was the second low bid received. There were four higher bidders. The Commission has awarded the contract to the low bidder, Warren Northwest, Inc., at their bid price of $72,796.25.

"Schmeer Road Junction Section of the Pacific Highway West in Multnomah County. Parker Schram Company, Portland, submitted the low bid for this work in the amount of $21,493. The next low bid was submitted by Porter W. Yett, Portland, in the amount of $21,738.50. There were six higher bidders. The Commission has awarded the contract to the low bidder, Parker Schram Company at their bid price of $21,493.

"Maupin-Criterion Rock Production Project on The Dalles-California Highway in Wasco County. The low bid for this work was submitted by Fisher Brothers, Oregon City, in the amount of $15,175. The next low bid was submitted by E. C. Hall Company, Portland, in the amount of $15,825. There were seven higher bidders. The Commission has awarded the contract to the low bidder, Fisher Brothers, at their bid price of $15,175."

Messrs. R. E. Steele, Secretary, Hood River Chamber of Commerce, and Luke Nichols, Member of the Hood River Port Commission, came before the Commission at this time in regard to the rerouting of the Columbia River Highway through the Town of Hood River. Mr. Steele was spokesman. He advised that the people of Hood River are practically unanimous in favor of the proposed line which lies between the Union Pacific Railroad and the Columbia River, by-passing the city's business district. He presented a map prepared in the office of the State Highway Engineer showing the approximate location of such route, being alternate route "A", and asked the Commission to adopt such route as a permanent location for this highway. He pointed out that construction of the highway along such route will require considerable embankment with rock slope protection and suggested, rather than spend the money for such purpose that the Commission might be willing to join with the city and the Port Commission in constructing a retaining wall in the Columbia River in connection with the reclamation of about 110 acres of land, which the city plans to use as an airplane landing field and for industrial purposes. He explained that the Port Commission proposes to use dredged materials from the Columbia River to fill in back of the retaining wall which would eliminate the necessity to riprap the highway embankment slope and would save the state a considerable sum of money for slope protection. The Port Commission, he said, will pay all costs in excess of the estimated cost of the slope protection and will assume maintenance of the wall. Chairman Banfield stated that the Highway Commission might cooperate with the city in this matter to the extent of the savings that would accrue by reason of the elimination of the riprapping and is willing to give the matter consideration, but is not in a position to take action until the city formally advises the Commission as to its preference with respect to the proposed highway alignment. The attitude of the Highway Commission, he said, is favorable for working this matter out if it is found feasible, but the Commission must know first which of the alternate highway routes is preferred by the people of Hood River. This concluded the conference.

The Commission by unanimous vote approved the minutes of the Commission meeting held on January 22 and 23, 1945.

The Engineer requested authority to widen the Pacific Highway for a short distance in the City of Roseburg where the highway crosses the Southern Pacific Company spur track at grade near the intersection with the North Umpqua

County Road. He explained that certain vehicles are required by law to stop before crossing the railroad tracks, and a hazard is created when such a vehicle is followed by one that is not required to stop, because there is no passing lane available. In order to avoid accidents occurring, he suggested the construction of an additional lane on the west side of the highway for southbound traffic, the cost of which he estimated would not exceed $5,000. He recommended the project from the traffic safety standpoint. The Commission approved the project by unanimous vote.

The Attorney requested instructions concerning the Commission's claim against the Belyea Trucking Company, Los Angeles, for services rendered by the State Highway Department on December 29, 1944, in pulling some of the company's equipment out of the ditch on Sun Mountain on The Dalles-California Highway in Klamath County, and towing the company's equipment over this mountain. He advised that the bill amounted to $127.69 but the company refuses to pay the full amount thereof without further explanation alleging that the charge is excessive. He pointed out that the high cost of performing the service was due to the fact that the men were required to work considerably more than eight hours in clearing the highway for which it was necessary to pay them double time in conformity with legal requirements. It was his thought that the company should pay the full amount of the claim and so recommended. The Engineer concurred therein. The Attorney was instructed to give the company full facts with respect to this claim.

The Engineer brought up for discussion the proposed improvement of the Oregon Coast Highway south from Port Orford, Curry County. He recalled that the Commission at a previous meeting approved an expenditure of $100,000 in 1945 for the widening of certain points on this highway to permit movement of vehicle combinations sixty feet overall in length without encroachment in the opposing traffic lane. Included in the plan, he said, is certain widening work just south of Port Orford which is estimated to cost about $20,000. He questioned the advisability of spending such sum because the road is not on permanent alignment and there are possibilities that approval can be obtained from the War Production Board to construct a major project on permanent alignment from Port Orford to Rocky Creek, a distance of about three and one-half miles. He advised that prior to the time that the United States became involved in war with Japan, the Port Orford-Rocky Creek project had been approved by the Federal authorities for construction as a forest highway project but the contract was not awarded because of the freezing of the Federal funds. However, a contract was awarded for construction of a bridge over Hubbard Creek and this bridge was constructed by the contractor although it has not been used because of the lack of approaches thereto. Federal forest highway funds are available to finance the construction of this unit, he said, if the War Production Board will release them for immediate undertaking, and he suggested that an attempt should be made to obtain such approval so as to secure a much needed improvement now rather than after the war is over and to avoid the expense of widening the present highway which will be of no value when the highway has been realigned. He added that the work would be done as a forest highway project under the direction of the Public Roads Administration and pointed out that it is one of the projects that were approved by the Commission at a conference with representatives of the Public Roads Administration

and the U. S. Forest Service on November 14, 1944, when a tentative program for forest highway funds was adopted. It appeared to the Commission that it would be advisable to secure this improvement as proposed whereupon the Engineer was authorized by the unanimous vote of the Commission to take such action as may be necessary to obtain the approval of the War Production Board. He was instructed to request such approval through the people of Port Orford who are particularly concerned.

The Engineer requested authority to acquire additional land along the Pacific Highway West (U.S. 99W) through Camp Adair in order to provide a right of way 100 feet wide through this section. He advised that the property is still owned by the Federal Government and in his estimation now would be the proper time to negotiate for the full width right of way before the property gets into private ownership. He suggested that the Attorney be authorized to negotiate for the extra right of way. The Commission approved the suggestion by unanimous vote.

The Commission discussed a letter from the Baker Historical Society requesting permission to plant a tree on the Medical Springs Secondary Highway at its junction with the Baker-Halfway Highway, to commemorate the "Lone Pine Tree" which was one of the original markers of the Old Oregon Trail, but which was destroyed in the year 1843. The Engineer advised that this matter was referred to the Memorials Committee of the Oregon Historical Society which points out that the location selected is a considerable distance from the point where the original tree stood, and which considers that it would be logical and preferable to place the tree as near as possible to the original tree site with a marker erected on the highway pointing to the spot. Otherwise the public would be given an erroneous conception of the tree and the Old Oregon Trail. The Commission concurred in the viewpoint of the Memorials Committee and ordered that the Baker Historical Society be so informed, and that the Society be also informed that the Highway Commission will offer no objection to the placing of a marker on the highway pointing out the location of the tree.

The Commission had under discussion the matter of permitting logging trucks that operate exclusively over privately owned roadways to cross state highways at grade without licensing their equipment or obtaining special carrier permits from the Public Utilities Commission. The Attorney advised that following previous discussion of this matter certain operators who are interested indicated a desire to clarify the law with respect to such operations and intended to have the 1945 Legislature pass on the matter. However, the bill was not presented so no change in the law was effected. Under the circumstances, he said, the operations must be continued under existing laws which require the equipment to be licensed and the owner to obtain special carrier permits from the Public Utilities Commissioner under certain conditions. In view of the Attorney's report, the Commission authorized the granting of permits for direct crossings on the highways provided the equipment used in connection therewith is properly licensed in the State of Oregon and operates under proper P. U. C. permit. Otherwise, the requests for such privileges are to be denied.

The Engineer requested authority to attend an executive meeting of the Directors of the American Association State Highway Officials in Washington, D. C., sometime during the month of May for discussion of important matters

pertaining to the expenditure of Federal funds under the Postwar Highway construction Act of 1944. The Commission approved the request and authorized payment of his expenses out of the State Highway Fund subject to the concurrence by Governor Earl Snell, provided the expense is not paid by the Federal Government.

The Commission considered and signed agreements, etc., as follows:

Field agreements with the U. S. Grazing Service covering protection of Juniper Wayside Strips on state highways in the vicinity of Redmond and Bend.

Modification of Project Agreement with the Public Roads Administration covering the Roseburg Access Road Project (DA-RM 85).

Bargain and Sale Deed conveying unto the Bly Land Company a timber strip lying adjacent to the Klamath Falls-Lakeview Highway in Lake County. This conveyance is made in order to effect an exchange of state-owned land for national forest lands and the arrangement provides that the Bly Land Company will deed the forest lands to the state when the exchange has been consumated.

Agreement with W. J. and Theresa H. Sweet providing for a ten-year lease of a stockpile site situate in Curry County.

Extension of Lease with Harry C. Shelton covering property formerly owned by the Fletcher Oil Company in Nyssa, Oregon.

Agreement with G. E. McConnell covering rental of a house at Bonneville.

Permit authorizing the Bonneville Power Administration to construct a power line over and across the Lower Columbia River Highway at Westport, Clatsop County.

Agreement with Arch Cape Land Company disposing of the company's claim for damages resulting from a slide on the Oregon Coast Highway near Arch Cape Tunnel.

Agreement with U. S. Department of Interior, Bureau of Reclamation, granting to the State of Oregon the right to occupy portions of the Reclamation's Main Canal Right of Way near Klamath Falls.

Quitclaim deed conveying unto the U. S. of America 1.38 acres of land situate adjacent to The Dalles-California Highway, Jefferson County, formerly used as a stockpile site.

There being no further business to come before the Commission at this time, the meeting adjourned at 4:30 p.m.

HEADQUARTERS AND GENERAL OFFICE OF DEPARTMENT
LOCATED AT SALEM, OREGON

TABLE OF CONTENTS

Page	Date 1945	Subject
12397	Apr. 16	Real property. Resolution authorizing acquisition adopted.
12401		Quarries. Attorney advises Commission authorized to use its own discretion in permitting private use of state-owned quarries.
		Real property. Conveyance of tract of land situate at Davies overcrossing, Wolf Creek Hwy., to Mr. Lester Sell approved conditionally.
		Real property. Offer from Ernest Lyman to purchase state-owned land situate adjacent to Sams Valley Sec. Hwy. for sum of $50 approved.
12402		Washington County. Proposed connection between Tualatin Valley Hwy. and West Portland-Hubbard Hwy. Request of John C. Webb for location survey denied.
		Sale of borrow pit. Situate between Willamette & Calapooya Rivers near Albany. Sale authorized. Bids to be received.
		Sale of "down" timber. Salmon River Hwy., "VanDuzer Forest Corridor". Offer from Peter Murphy Co. accepted.
		Jackson County. Right of way. Tiller-Trail Hwy. One-half acre reservation by Assembly of God Church omitted in deed. Church now wants state deed. Decision deferred pending further investigation.
		Permit. Report of Attorney on application of Gold Beach
12403		Cooperative Utilities to maintain power pole line on Oregon Coast Hwy. between Eucher Creek and Ophir School. Overbuilding telephone line on east side of highway approved.
		Bids. Sale of McPherson service station buildings to Harry J. Lutz for $102.50 approved.
		Surveys. Surveys ordered by Engineer since last meeting approved.
12404		Extension of time. Winter Brothers granted extension to May 15, 1945, to complete milling of timber along Wolf Creek Hwy. in Tillamook County.
		Extension of time. Harry I. Hamilton Co. granted extension to April 15, 1945, for construction of bridge over Deer Creek on Roseburg Access Road Project, Douglas County. (Contract #2699)
		Acceptance of contract completed. Contract #2699 with Harry I. Hamilton Co., for construction of bridge over Deer Creek on Roseburg Access Road Project, Douglas County.
12405		Resolution adopted.
		Equipment. Purchase of following equipment authorized: 12 Dump Trucks, 5 Pick-up Trucks, 2 Asphalt Car Heaters, and 3 Large Type Patrol Graders with trade-in of five old pick-up trucks and three old solid tired patrol graders.
		Medford. Designation of Fourth Street as through highway for truck route authorized. Resolution adopted.

Page	Date 1945	Subject
12407	Apr. 16	Farmers-Workers Association, Clatskanie. Application for permission to fill in highway ditch along Lower Columbia River Hwy. denied. Use of "Buck rails" to be suggested to control traffic.
		Linn County. Pacific Hwy. South of "L" Street, Town of Halsey. Request of A. B. Caley for improvement of roadway approach
12408		to his service station denied.
		Benton County. Market Road designations by County Court approved.
		Traffic light. City of Silverton. Request of city for installation of flood light at R.R. crossing on Hillsboro-Silverton Sec. State Highway approved.
		Mailing list. Request of Bear Creek Orchards, Medford, to secure benefit of mailing list of Travel & Information Dept. denied.
12409		Unfinished business:
		Corvallis. Designation of one-way streets following war pending.
		National Association of Travel Officials. No replies received.
		Baker. Construction of new highway between Bates and Baker. Survey to be made.
		War Department resevoirs. Matter still pending.
		Eugene. Pacific Hwy. Acquisition of r/w. No report.
		Hood River C. of C. & Hood River Port Commission. Construction of retaining wall in Columbia River under investigation.
		Champoeg State Park. Under investigation.
12410		Swift Secondary Hwy. Request of Portland Union Stock Yards Co. and Swift & Co. for widening. Matter to be deleted from future agendas.
		Klamath Falls. Designation of one-way streets to be deleted in future agendas.
		Wheeler County. Town of Spray. Agreement re lease of property to R. E. Baxter, Spray, Ore. approved.
		Survey. Columbia River Hwy. at Troutdale. Survey approved. Resolution adopted.
12412		Douglas County. North Umpqua County Road. Discussion re designation as Forest Highway and Federal Aid Secondary Highway. No action taken.
		State Tax Street Funds. Street improvement plans for Arlington, Barlow, Boardman, Chiloquin, Donald, Freewater, Glendale, Halsey, Nehalem, Paisley, Sublimity and Sumpter approved. Resolution adopted.
12414		Lane County. Eugene. Request of city to install sewer pipe line approved conditionally.
12415		Wasco County. Lease of land at west end of The Dalles-Celilo Canal to U. S. War Department approved conditionally. Agreement to be revised.

Page	Date 1945	Subject
12415	Apr.16	Hood River County. Parks. Request from Mr. William H. Lichty, Hood River, to purchase 80 acres of state park property. Proposed use to be ascertained.
		Log Hauling. Violation committed by Mr. Walter DeBoer, Eugene.
12416		Permit to be cancelled.
		Employment Chinese Engineers. Engineer authorized to hire two engineers under certain conditions.
		Snow removal. Mt. Hood Highway south of Parkdale. $1,000 authorized if funds cannot be obtained from Federal Government.
		Speed limit. South Yamhill River Bridge. Salmon River Highway near Valley Junction. Speed limit of fifteen miles per hour approved.
		Curry County. Oregon Coast Highway. Town of Gold Beach. Resolution designating permanent route adopted.
12418		Medford. Riverside Street (US 99). Construction of concrete curb between 12th St. and Earhart St. authorized.
		Multnomah County. Portland. Request for widening pavement on Portland Boulevard between Union Avenue and Greeley Avenue denied.
		Marion County. North Santiam Highway between Gates and Detroit. Additional $300,000 state money for construction authorized.
		Minutes approved as follows: March 12 and 13, 1945.
		Meeting recessed at 12:00 m. for luncheon and reconvened at 2:00 p.m.
12419		Federal Aid Act of 1944. Following matters discussed:
		1. Adoption of a secondary federal aid highway system. Engin-
12420		eer presents plan. Plan adopted as basis of discussions
12421		with counties. Plan to be discussed with officials of Association of Oregon Counties.
		2. Determination of Urban Areas. Plan adopted.
12423		3. Adoption of Interstate System of Highways. Old Oregon Trail designated as connection with Idaho. Decision re north
12424		and south connection deferred until following day.
	Apr.17	Bids received as follows for sale of real property:
		Sale of land at Troutdale.
12425		Sale of land at Reedsport.
		Adoption of Interstate System of Highways. Klamath Falls Route and Pacific Highway route. Commissioner Schaupp presents ar-
12428		guments for selection of Klamath Falls Route. Decision deferred until a later meeting.
		Klamath Falls. Sale of residence buildings postponed for two months.
		Curry County. Eviction of Mrs. Anna Barclay from Harris State
12429		Park. Attorney's suggestion to purchase building for $400 and sell it for $200 approved. State hereafter not to buy property encumbered in any way.
		Log hauling. Gilchrist Timber Co. truck hauling across US 97 near town of Gilchrist. Attorney to join with company to secure declaratory judgment re licensing equipment.

Page	Date 1945	Subject
12429	Apr.17	Claim. Mrs. Maki, Astoria. Arising out of construction of Astoria Naval Hospital Job. Investigation ordered.
		Multnomah County. Maintenance quarters at Multnomah. Lease from Mrs. Grant M. Miles signed.
		Postwar funds. Utilization. Plan presented and approved.
		Postwar construction. Program tentatively approved. (See resolution adopted May 29, 1945.)
12448		Meeting recessed at 12:00 noon for luncheon and reconvened at 1:30 p.m.
		Postwar program. Publicizing program discussed. Engineer to prepare "Press Release" containing list of selected projects in each county.
		Meeting date. May 14 and 15 set for next regular meeting.
		Surveys. Request of Engineer to submit list of surveys to P.R.A. for approval deferred.
		Bids received at morning session discussed. Reedsport property sold to Svend Knudsen for $336.50. Offers for Troutdale property rejected.
		Salaries. No raises to be granted for the present.
		Josephine County. Gravel deposit. Settlement with C. J. Moser to lease property approved.
12449		Agreements, etc., signed as follows:
		City of Silverton. Maintenance of flood light over Hillsboro-Silverton Sec. Hwy.
		Spray. R. E. Baxter. Lease of property for highway construction and maintenance purposes.
		Ore. Coast Hwy. Alsea Hwy. Agreement with City of Waldport re installation and maintenance of a flashing beacon.
		Multnomah County. Agreement with Mrs. Grant M. Miles re lease of maintenance headquarters site at Multnomah.
		Josephine County. Agreement with C. J. Moser and wife re lease of gravel deposit.
		Columbia River Hwy. Troutdale-Dodson Sec. Agreement with Western Union Telegraph Co. disposing of company's claim for damages re construction.
		Eugene. Easement granting permission to install a sewer pipe line across state-owned property.
		Jackson County. Ernest Lyman. Bargain and sale deed conveying 0.18 acre of land situate adjacent to Sams Valley Sec. Highway.
		Meeting adjourned at 3:45 p.m.
12450	May 14	Real property. Resolution authorizing acquisition adopted.
12453		Condemnation. Recommended offers for ten parcels on Wolf Creek Hwy. and for two parcels on Steiwer Hill-Albany Section of Pacific Hwy. East approved. Resolution authorizing condemnation adopted.
12456		
12459		Survey Projects. Engineer requests authority to submit list to P.R.A. involving post-war construction. Action deferred. Resolution to be prepared covering entire post-war matters.

Page	Date 1945	Subject
12459	May 14	Sidewalk construction at Halsey. Easement agreement with Wm. Patapoff signed.
		U. S. War Dept. Agreement terminating lease of Pilot Butte State Park signed.
12460		Douglas County. Reedsport. Vacation of certain streets for school purposes approved.
		Josephine County. Leasing of state property to U. S. Weather Bureau approved. Agreement signed.
		Claims of Van Hausen and Larsen for injuries received as result of opening of movable draw on interstate bridge between Portland and Vancouver. Suggested settlement approved.
		Right of way. Columbia River Hwy. Case of U. S. Government vs. State of Oregon. Stipulation waiving state's claim to compensation approved.
12461		Clatsop County. Claim of Mrs. Gertrude Maki arising out of construction of Astoria Naval Hospital Section of Nehalem Sec. Hwy. Proposed settlement approved.
12462		Josephine County. Sale of buildings near Wolf Creek on Pacific Hwy. Approved.
		Troutdale. Sale of land adjacent to Col. Riv. Hwy. Offer of Troutdale Vegetable Growers Cooperative Association to purchase approved.
		Corvallis. Report on proposed establishment of one-way traffic streets. Decision deferred.
12463		Clackamas County. Secondary Highway designations requested by County Court. Request denied.
		County Court also requests painting of center stripe on Boones Ferry County road. Approved if county will pay costs.
		Salem Airport Committee inquires if state will maintain runways. Engineer authorized to do minimum amount of work at city expense.
		Sidewalk construction. Corvallis. Request from Corvallis Parent Teachers Association for sidewalk along R/W of Corvallis-Newport Hwy. Request denied.
12464		Surveys. List of surveys ordered since last meeting. Approved.
		Log-hauling. Engineer instructed to send each commissioner copies of letters sent to log haulers concerning improvements of loghaul routes.
		Extensions of time granted as follows:
12465		Charles Shannon & Son, Roseburg Timber Access Road Project Skelton & Wiecks, Newport Rock Production Project. Chester T. Lackey, Juntura-Hope Section
		Contracts completed and accepted, as follows:
		Judkins Point Section Project, McNutt Bros. Contract #2582. Hermiston Rock Production Project, F. R. Hewett Co. #2712.
12466		Jackson County. Casey State Park. Attorney's report on controversey with E. H. Lamport re refusal to vacate cottage.
		Equipment. Engineer requests authority to purchase four heavy duty power winches. Approved.

Page	Date 1945	Subject
12466	May 14	Traffic Signals. Request of Mrs. Grace Clay for installation of traffic signals at intersection of N. E. 82nd Ave. and Prescott Street. Request denied. Matter to be handled as selective enforcement measure.
		Klamath County. Sprague River Co. Road in Klamath Indian Reservation. Revision of agreement approved and signed.
12467		Klamath County. Klamath Falls-Malin Highway. Changing of one word in Easement Agreement with Bureau of Reclamation approved.
		Health & Accident Insurance. Extension of priveleges of payroll reduction plan to cover monthly paid employes approved.
		Log Hauling. Policy re transportation of long logs and piling over state highways adopted.
		Emergency Transportation Permits. Time limit extended to July 1, 1945. Attorney instructed to prepare resolution.
12468		Gift of engineering books by Mrs. Otto Schrader. Accepted with thanks.
		Traffic Study. F. B. Crandall and J. Al Head authorized to go to Seattle to discuss problems with Wash. highway officials.
		Ferry approach in Astoria. Construction of ramp to parking area approved as a measure to relieve traffic congestion.
		State Tax Street Funds. Resolution adopted approving plans for Ashland, Corvallis, Gold Hill, Troutdale, Wheeler.
12469		State Tax Street Funds. Resolution adopted approving plans for Barlow, Monroe, Ontario, Sandy, Sodaville, Troutdale, Wasco.
12471		State Tax Street Funds. Expenditures by cities to be checked
		Meeting date. Date of next meeting set for May 29, 1945.
		Minutes of meeting held on April 16 and 17, 1945 approved.
		Douglas County. Tiller-Trail Hwy. Right of way. Request of Assembly of God Church for return of ½ acre of land deeded to state by mistake approved.
12472		National Association of Travel Officials. Question of taking membership referred to Advisory Committee on Travel Matters for decision.
		Wasco County. Columbia River Hwy. at Celilo Canal. Agreement with U. S. War Dept. providing lease to U. S. A. of portion of R/W approved and signed.
		International Highway connection between Oregon and Idaho. Letter from Idaho Director of Highways re selection of route discussed. Engineer's recommendation approved.
		Lake County. Warner Secondary Hwy. Request of Archie Ede, Plush, to construct cattle guards across Warner Secondary Hwy. between Adel and Plush granted. Policy adopted.
12473		Secondary Federal Aid Hwy. system. Selection discussed. Outline presented by Engineer tentatively approved. County Courts to be consulted.
		Federal Aid Secondary Highway System. Delegation. Association of Oregon Counties re designation thereof. Committee to canvas County Courts to explain details of selections.

Page	Date 1945	Subject
12474	May 15	Bids received on following projects: Hoffman Bridge Rock Production Project Paint Coos Bay Bridge at North Bend Widening Myrtle Point-Elbow Point and Cape Sebastian Sections Coyote Creek-Grave Creek Section Paint Yaquina Bay Bridge Bridge over South Santiam River near Sweet Home (County Project)
12475		Inter-regional Highway. Delegation. Oregon Pacific Hwy. Association presents arguments for designation of Pacific Highway for connection between Oreg. and Calif. Brief filed. Decision deferred.
12476		Jackson County. Pacific Hwy. R/W, Plaza Sec. Ashland. C. L. Claycomb requests immediate settlement for remodeling garage necessitated by proposed improvement. Refers to previous agreement. Attorney instructed to report at next meeting. Clackamas County. Delegation. County Court et al. Request for designation as Seconnary Hwys. of certain county roads account log hauling. Group told to file application with P. R. A. for Timber Access Road Funds.
12477		Clackamas County. Delegation. County Court. Request for painting of center stripe on Boones Ferry County Road granted. County to pay costs. Ferry across Columbia River at The Dalles. Discussion with Mayor Geo. Stadelman. No action taken. Inter-regional Highway. Delegation from Klamath Falls and vicinity urge routing of north and south inter-regional hwy. through Klamath Falls. Matter taken under advisement.
12478		Linn, Polk, Lincoln Counties. Corvallis-Newport Hwy. (US 20). Delegation requests early completion from Summit to Newport. Consideration to be given in Forest Highway program. Log Hauling. Walter DeBoer, loghauler, Eugene, requests reinstatement of loghaul permit. Granted conditionally. Awards. Chairman announces award of contracts.
12479		Gilliam & Sherman Counties. Wasco-Condon Sec. Hwy. Delegation requests improvement of "Cottonwood Grade" Section. Advised project in Post War program. Agreements, etc., signed as follows: Easement Agreement with William Patapoff for construction of sidewalk at Halsey.
12480		Agreement with U. S. War Dept. terminating lease of Pilot Butte State Park. Lease agreement with U. S. Weather Bureau covering property heretofore leased to Civil Aeronautics Administration in Josephine County. Petition to secure vacation of certain city streets in Reedsport. Revised Agreement with U. S. Bureau of Indian Affairs covering improvement of Sprague River Road in Klamath County.

Page	Date 1945	Subject
12480	May 15	Revised Easement Agreement with U. S. Bureau of Reclamation for construction of Klamath Falls-Malin Hwy. in Klamath County.
		Lease granting U. S. War Dept. authority to use state-owned land at The Dalles-Celilo Canal.
		Agreements with Geo. B. Terhune, Howard J. Miller and Leona Miller recinding agreements dated 5/11/44, re sign restrictions in Marion County.
		Contract with Lebeck and Son covering moving buildings in Gold Beach.
		Agreement with H. T. Burns covering landscaping on Salmon River Highway.
		Modification of Agreement with Public Roads Administration covering snow removal on Mt. Hood Hwy. near Parkdale.
		Quitclaim Deed conveying 3.5 acres of land in Marion County to Arthur C. White.
		Permit authorizing A. F. Elkins to install tile drain across Pacific Hwy. West near Camp Adair.
		Agreement with Buzard-Burkhart Pine Co. covering truck hauling of logs across R/W of Fremont Highway at approximately M. P. 142.60.
		Meeting adjourned at 4:00 p.m.
12481	May 29	Bids received on the following projects:
		Youngs Ranch-Brothers Rock Production Project
		Crater Lake-Fort Klamath Timber Access Road Project
		Root Creek-Siletz Section Project
		Jefferson Junction Overcrossing
		Bridges on Steiwer Hill-Albany Section
		South Unit, Steiwer Hill-Albany Section
		North Unit, Steiwer Hill-Albany Section
12483		Columbia County. Delegation requests further improvement of Lower Columbia River Hwy. Request taken under advisement.
12484		Log Hauling. Charles McCormick, O.M. Bagley, E.G. Whipple, present regarding Commission's new regulations covering transportation of piling. Final action later. (See page 12504)
		Minutes of April 16 and 17, 1945, approved as corrected.
		State Parks Superintendent discussed following Park Matters:
		Champoeg State Park - proposed development.
		Reconveyance to Hood River County portion of property deeded to state for Park purposes. To be deeded back to County.
12485		Request of Arthur Schneider, Madras, to obtain cinders from Round Butte in the Cove State Park.
		Proposed Park adjacent to Pacific Hwy. East north of Oregon City.
		Proposed exchange of portion of Ben & Kay Doris State Park in Lane County. Denied.
		Gift of land at Bonneville. Accepted.
		Coos County. Progress report on Myrtle Tree Lane Development.
12486		Real Property. Resolution authorizing acquisition adopted.
12490		Condemnation. Resolution authorizing condemnation adopted.

Page	Date 1945	Subject
12494	May 29	Sale of real property. Offer of Cecil J. Burkhart to purchase property near Albany acquired from Mr. Quattlebaum approved.
		Lease of real property. Extension of lease time to Paul Mumpower covering use of State property adjacent to Columbia River Hwy. east of Troutdale approved.
		Rental of real property. Resolution adopted allowing Northwest Marine Iron Works to use additional state-city owned land along Front Avenue, Portland.
12495		Sale of real property situate adjacent to Pacific Hwy. north of Medford. Decision deferred pending study and recommendation by Engineer. Policy adopted.
		Sale of abandoned gravel pit adjacent to Columbia River Hwy. in Umatilla County. Approved, deed signed.
		Real Property. Agreement with H.A. Dryer extending lease of state-owned property adjacent to Upper Columbia River Hwy. between Tunnel Point and Bridal Veil approved and signed.
12496		Inter-regional hwy. connection between Oregon and Calif. discussed Statements by Commissioner Schaupp and Chairman Banfield.

		Canby, Molalla. Sutherlin. Request for improvement of streets damaged by log hauling discussed. Referred to Engineer.
		Klamath County. Klamath Falls. Revision of 6th Street and Washburn Way discussed. Engineer to report.
		Washington County. Forest Grove. Revision of two street intersections discussed. Engineer to report.
12662		Umatilla County. Pendleton. Widening of West Court Street requested. Engineer to make personal inspection.
		Klamath and Lane Counties. Designation of route from Goshen to Weed via Klamath Falls as US99 Alternate discussed. Action deferred. Delegation to appear.
		Log hauling. Permit of Harold Harry McGee. Cancellation authorized.
		Log hauling. Mt. Hood Hwy. Log hauling over this highway prohibited during winter season.
		Permits. Flagging requirements. Violations to be reported to State Police.
12663		Agreements, etc., signed as follows:
		Standard Oil Co. Agreement covering boring of test holes.
		U. S. Coast Guard and Waldport Telephone Co. covering pole line construction on Oregon Coast Hwy.
		Permit authorizing Federal Government to construct overpasses across Pacific Highway at Camp Adair.
		Acceptance of permit from U.S.A. authorizing use of public land at Naval Hospital site, Astoria.
		T. T. Crozer and S. M. Crozer. Easement granting right to use road across quarry site property.
		Bargain and sale deed to E. J. Wolfe. Property in Portland.
		Quitclaim deed to land in Umatilla County deeded to state by J. E. Berry et ux by mistake.
		Meeting adjourned at 5:00 p.m.

Portland, Oregon, April 16, 1945

The State Highway Commission convened in regular session at 9:00 a.m., in Room 615 of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner A. W. Schaupp arrived at 10:30 a.m.

The Assistant Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with the offer that he recommended in connection with each parcel. After careful consideration of each item, the Commission approved the request and the offers. The following resolution with regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed;

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

SILETZ RIVER-NEWPORT SECTION, OREGON COAST HIGHWAY

11735-Coast Properties Corporation Right of Way	3.5 acres at $172.00 less per acre	$600.00	Parker

APR 16 1945

MECANICUM JUNCTION-SEASIDE SECTION, WOLF CREEK HIGHWAY

11691-Lemke, Emil Right of Way	0.59 acre	$ 00.00	J.H. Scott

GARDNER RANCH-BERGER RANCH SECTION, WOLF CREEK HIGHWAY

6511-Stucki, Walter F. Right of Way Option expires Oct. 5, 1945	10.26 acres at $250.00	$2,565.00	
	Allowance-115 rods fencing at $2.00 per rod	230.00	
	Moving and rebuilding house and barn fences	400.00	
	Loss fruit and shade trees	900.00	
	Allowance-moving shrubs and flowers	200.00	
	Allowance-elimination certain concrete work when barn moved	1,076.00	
	Damages-to farm and inconvenience caused by moving all buildings	1,500.00	
	Moving buildings (estimated	8,000.00	
	2 wells	500.00	
	Allowance for putting in new lawn	50.00	
		$15,421.00	Collins

BARNES ROAD-MULTNOMAH COUNTY LINE SECTION, WOLF CREEK HIGHWAY

10503-Barney, Denver & Jessie Barney, & H.R. Barney & Elsie H. Barney Right of Way Option expires Oct. 9, 1945	2,788 sq.ft. at 5¢	$ 139.40	
	Cash allowance - moving or replanting laural hedge, 100 ft.	75.00	
	Loss maple and fir tree	50.00	
	General damages and loss of front yard and lawn	135.60	
		$ 400.00	Collins

ASTORIA-NAVAL HOSPITAL SECTION, NEHALEM HIGHWAY

11468-A-Bartoldus, Lola Belle Slope easement	0.12 acre - 40 foot slope easement	$ 00.00	Landon

FRONT STREET PROJECT-CITY OF PORTLAND, PACIFIC HIGHWAY WEST

11693-Multnomah County Right of Way	10,000 sq.ft. at 16¢ sq.ft.	$ 1,600.00	McCallister

INDEPENDENCE SECTION, INDEPENDENCE-MONMOUTH HIGHWAY

11740-Collins, Coral M. Right of Way	0.34 acre	$ 00.00	Benson

APR 16 1945

STEIWER HILL-ALBANY SECTION, PACIFIC HIGHWAY

11401-Malone, Mack Easement for channel change	1.64 acres LUMP SUM	$133.20	Benson

HALSEY-HARRISBURG SECTION, PACIFIC HIGHWAY

11717-Ackley, Maud Slope easement	5 foot slope easement - sidewalk	$ 00.00	Landon
11716-Waggener, James B. & Minnie M. Slope easement	5 foot slope easement - sidewalk	00.00	"
11714-Hill, A.J. & Effie B. Slope easement	5 foot slope easement - sidewalk	00.00	"
11709-Miller, E.C. & Deliah Slope easement	5 foot slope easement - sidewalk	00.00	"
11707-Robins, Elias H. & Muriel	8 foot slope easement - sidewalk	00.00	"
11712-Wildey Lodge #65 IOOF	Waiver in lieu of easement for damages for sidewalk embankment	00.00	

SPRINGFIELD-WALTERVILLE SECTION, MCKENZIE HIGHWAY

11594-Culver, Zora M. Scale Site	0.49 acre at $700.00 Moving and rebuilding approximately 32 rods fence at $1.00 per rod	$343.00 32.00 $375.00	Parker

EUGENE-MAPLETON SECTION, EUGENE-VENETA HIGHWAY

8155-Fisher, E.W. & Caroline Fisher Quarry site and hauling road CORRECTION	5.05 acres at $75.00 Damages-severance, inconvenience, etc. Plus fencing	$378.75 71.25 $450.00	Devers DeArmond

BROCKAWAY SECTION, COOS BAY-ROSEBURG HIGHWAY

4607-Nichols, Ada D. Stock Pile Site	Renewal of stock pile lease-3 years at $10 per year Plus fencing site	$ 30.00	McChesney

APR 16 1945

MEDFORD-TRAIL SECTION, CRATER LAKE HIGHWAY

11737-Segessenman, Ernest W. & Eva Segessenman Option expires Oct. 2, 1945 Right of Way	0.16 acre at $150.00	$ 24.00	McChesney
11736-Millard, Vivian & Dell E, & Louella M. & Harry G. Welch, & Clayton T. Bartlett Option expires Oct. 2, 1945 Right of Way	0.11 acre at $150.00	$ 16.50	"

CRESCENT SECTION, THE DALLES-CALIFORNIA HIGHWAY

7490-Klamath County Right of Way	481 sq.ft. LUMP SUM	$ 10.00	McChesney

MILLICAN-BEND SECTION, CENTRAL OREGON HIGHWAY

11697-Deschutes County Gravel pit	45.20 acres	$ 00.00	Cozad

HARPER SECTION, CENTRAL OREGON HIGHWAY

11733-Gacey, Steve R. Gravel Pit	34.68 acres at $10.00	$346.80	Benson
11734-Copeland, Robert B. Gravel pit and stockpile site	4.18 acres at $10.00 64 rods fence at $1.25	41.80 80.00 $121.80	"

CONDON SECTION, JOHN DAY RIVER HIGHWAY

11721-Gilliam County Material maintenance site	10 lots in Block 70, Condon	$ 00.00	Cozad
11722-Palmer, Lavena S. Stock pile site Option expires Sept. 8, 1945	10,000 sq.ft. at $0.005 sq.ft.	$ 50.00	"

MAUPIN-COW CANION SECTION, THE DALLES-CALIFORNIA HIGHWAY

11725-Connolly, Anthony J. Stock Pile site Option expires Sept. 27, 1945	2.0 acres at $10.00 30 rods fence at $1.50 rod 25 rods old fence to move and rebuild at $1.20 rod	$ 20.00 45.00 30.00 $ 95.00	McChesney

APR 16 1945

MAUPIN-COW CANYON SECTION, THE DALLES-CALIFORNIA HIGHWAY (Cont.)

11726-Hunt, Rojinia C., Clarence Hunt & Helen I., & Genevieve L. Schreiber Option expires Sept. 28, 1945 Stock pile site	1.368 acres at $10.00	$ 13.70	McChesney

CITY OF LAGRANDE SECTION, OLD OREGON TRAIL

11674-Union County Storage Site	6 lots at $62.50 each	$375.00	Benson

---

Chairman Banfield brought up for discussion the question whether or not the State Highway Commission has authority to permit the use of state-owned quarries and the taking of materials therefrom. He was informed by the Attorney that the Commission has such authority and can use its own judgment in passing on requests for such privileges.

The Assistant Attorney brought up for discussion the matter of conveying unto Mr. Lester Sell a small tract of land containing 3.59 acres situate at the Davies overcrossing on the Wolf Creek Highway in Washington County, as consideration for elimination of the state's obligation to construct a cattle pass under this highway. It appears that right of way for the highway at this point was acquired from Mr. Carl Peterson who owned the land on both sides of the highway location, and as partial consideration, the Commission agreed to construct a cattle pass under the highway for Mr. Peterson's use. However, he subsequently sold to Mr. Sell the property on one side of the highway so the cattle pass no longer is required, although the obligation to construct it still remains. It further appears that Mr. Sell is agreeable to the elimination of the cattle pass if the Highway Commission will deed to him the 3.59 acres of state-owned land. The Assistant Attorney advised that the property cost the state $538.50 and that it is not needed for highway purposes. He recommended that it be deeded to Mr. Sell on the condition that he will agree in writing to the elimination of the cattle pass, which is estimated to cost considerably more than the value of the land. The Engineer concurred in the recommendation. The Commission approved the recommendation unanimously.

The Assistant Attorney presented an offer from Mr. Ernest Lyman, Gold Hill, Oregon, to purchase for the sum of $50 a small parcel of state-owned land situate adjacent to the Sams Valley Secondary Highway in Section 11, Township 36 South, Range 3 West, W. M., Jackson County. He advised that this is a small triangular tract containing 0.18 acres and is not needed for highway purposes. He recommended that the property be sold to Mr. Lyman for the amount of his offer. The Engineer concurred in the recommendation. The Commission approved the recommendation by unanimous vote. (A bargain and sale deed conveying the property to Mr. Lyman was signed on the following day.)

The Attorney reported receipt of an inquiry from Mr. John C. Webb, Portland, concerning the exact location of a proposed highway connection between the West Portland-Hubbard Highway and the Tualatin Valley Highway, a short distance east of Beaverton. It appears that Mr. Webb controls considerable property through which the proposed highway is projected and has it in mind to subdivide this property into small tracts, but is precluded from laying out streets properly until he knows where the highway is to be located. The Attorney pointed out that a definite location for the road has not yet been decided and if the Commission were to tell Mr. Webb where the road is to be built, it would then be obligated to retain the location. The Engineer advised that the proposed highway has merit as a valuable connection between two existing highways and as a unit of a future connection with the Lower Columbia River Highway by-passing the City of Portland. Chairman Banfield expressed a reluctance to designate the highway now and to order a survey, in view of the fact that construction is not contemplated for a long time in the future. Commissioner Chessman expressed himself similarly, whereupon the Commission decided definitely not to designate the highway or to authorize the survey at this time and ordered that Mr. Webb be advised accordingly.

The Assistant Attorney reported an offer to purchase an old state-owned borrow pit containing about eleven acres of land situate between the Willamette and Calapooya Rivers a short distance west of the Albany city limits. He advised that this pit was originally acquired as a source of topping materials, but is no longer required. He recommended that it be advertised for sale. The Engineer concurred in the recommendation. The Commission approved the recommendation by unanimous vote.

The Commission confirmed the oral authority previously given the Engineer to sell to the Peter Murphy Company 77,200 board feet of "down" timber along the "VanDuzer Forest Corridor" section of the Salmon River Highway, at the rate of $3.00 per m.f.b.m.

The Engineer brought up for discussion the question of deeding to the Assembly of God Church, Trail, Oregon, a one-half acre of land adjacent to Tiller-Trail Highway in Jackson County. He advised that when the right of way for the Tiller-Trail Highway was acquired through the church property, the church reserved a one-half acre of land for church purposes, but the reservation was overlooked when the deed was prepared and the church now wants the matter corrected. During the discussion, the question arose as to the location of the one-half acre tract. The Commission deferred its decision pending an investigation to ascertain just what property the church wants. A survey of the tract was authorized so the property can be described properly in a deed of conveyance.

The Attorney reported on the application of the Gold Beach Cooperative Utilities for permission to maintain a power pole line along the ocean side of the Oregon Coast Highway between Eucher Creek and Ophir School in Curry County. He advised that only four or five poles are involved in this construction and that the company has already extended its line on the highway for this short distance as an emergency project in order to serve the school which otherwise would have had to close down. He further stated that the company has stated its willingness to relocate the poles in any position on the highway that the Commission desires when advised, but if it is required to place its poles off the highway

right of way, then it would have to place them on private property on the ocean side of the highway where the obstruction of the scenic view would be as great as if they were located on the highway. The Attorney pointed out that the company is authorized by law to place its poles on highway right of way and that the Commission's control is limited to the designation of the location. The Commission, he said, could designate the easterly side of the highway for the poles if it wanted to, notwithstanding that side of the highway is already occupied by a telephone circuit, but there might be objections on the part of the telephone company because of the interference that the power line might create. He further advised that he is now preparing a report on this subject, which will be of general nature for the use of the Commission in determining a policy to be followed hereafter in connection with pole line construction on the public roads under its control. In view of the report, the Commission instructed the Attorney to ask the Gold Beach Cooperative Utilities to place its poles on the easterly side of the highway above the telephone line.

The Engineer reported the results of the taking of bids in Salem for the sale of the McPherson service station buildings on the Pacific Highway East, a short distance north of Harrisburg. He advised that only two bids were received, the high one being that of Harry J. Lutz, Harrisburg, at $102.50, and the other being that of Edgar G. Cook, Harrisburg, at $50. He recommended the acceptance of the offer of the high bidder, Mr. Lutz. The Attorney concurred in the recommendation. The Commission thereupon voted unanimously to sell the buildings to Mr. Lutz at his bid price.

The Engineer submitted a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to approve the expenditures. After discussion the Commission by unanimous vote approved the following surveys and authorized the Engineer to make such surveys on various sections of the highways in this state, which said sections of highways, together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures, are as follows:

Type of Survey	Prefix No.	County	Section and Highway	Authorization
R/W	2-1437	Polk	Camp Adair	1st- $350.00
Prospecting	6-1439	Coos Douglas	Coquille-Coos Jct. Sec. Coos Bay-Roseburg Hwy.	1st- $800.00
Prospecting	6-1440	Coos	Douglas County Line-Curry County Line, Oregon Coast Hwy.	1st- $700.00
Prospecting	10-1446	Douglas	Lane County Line-Roseburg Sec., Pacific Hwy.	1st- $500.00
Plans	218-1475	Klamath	Forest Boundary-Fort Klamath Timber Access Road	1st-$2,000.00

Total Amount Previously Authorized	200.00
Total Amount of Surveys	$9,150.00

The Commission had under discussion a letter from Winter Brothers requesting an extension of time from April 1, 1945, until the fire season is declared, to complete its agreement with the Commission for the purchase and the milling of timber along the Wolf Creek Highway in Tillamook County. They advised that due to conditions beyond their control they were unable to start their operations as soon as expected, and as a result were unable to complete the work within the specified time limit. The Engineer recommended the granting of an extension of time until May 15, 1945, with the understanding that all work shall cease as soon as the fire season is declared, if such declaration takes effect before May 15. The Commission approved the recommendation unanimously.

The Commission also considered a request from Harry I. Hamilton Company for an additional extension of time from March 16 to April 15, 1945, within which to complete its Contract No. 2699 for the construction of a bridge over Deer Creek on the Roseburg Access Road Project, Douglas County. The company alleged that inclement weather interfered with logging operations in the vicinity, and as a result they were unable to secure special logs that were required early enough to complete construction of the bridge within the specified time limit. The Engineer confirmed the statements as to the reason for the delay. He recommended

in view thereof that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

The Engineer reported that Contract No. 2699 with Harry I. Hamilton Company for the construction of a bridge over Deer Creek on the Roseburg Access Road Project, Douglas County, was completed on April 7, 1945, according to the requirements of the contract or modifications thereof and that said job is now ready for acceptance. The following resolution accepting this project was offered and adopted by the unanimous vote of the Commission:

> WHEREAS, the Engineer has reported that Contract No. 2699 with Harry I. Hamilton Company for the construction of the Deer Creek Bridge on the Roseburg Access Road Project in Douglas County has been completed according to the terms and provisions of the contract and that said job is now ready for acceptance.
>
> THEREFORE, BE IT RESOLVED that the work covered by said state highway contract for the construction of said state highway project be declared completed according to the terms of the contract, and said job is hereby accepted and final payment in connection therewith is hereby authorized.

The Engineer requested authority to purchase the following equipment for use by the Maintenance Department:

12 Dump Trucks (Fords or Chevrolets) at $1,800 each	$21,600
5 Pick-up Trucks at $1,050 each	5,250
2 Asphalt Car Heaters at $2,300 each	4,600
3 Large Type Patrol Graders at $7,000 each	21,000
Total Cost	$52,450

The Commission approved the request by unanimous vote and also authorized the Engineer to trade in as part purchase price five old pick-up trucks and three old solid tired patrol graders, all of which equipment have outlived their usefulness for state highway purposes.

The Engineer asked the Commission to designate the newly established truck route in Medford a through highway so as to require traffic to stop before entering the same, and to authorize the erection and maintenance of appropriate signs along this route. The Commission approved the request and thereupon by unanimous vote adopted the following resolution with regard thereto:

> WHEREAS, by resolution duly approved and adopted and entered in the minutes and records of the Commission as of the twenty-seventh day of April, 1943, there were enumerated state highways which were then designated as through highways and said

resolution provided for the erection, and thereafter the maintenance, of standard stop signs at all roads and/or streets which connect with or intersect said through highways; and

WHEREAS, from time to time it is found necessary to designate other and additional highways or sections thereof as through highways and provide for the erection, and thereafter the maintenance, of approved stop signs at places where said highways are intersected or intercepted by other highways, roads or streets; and

WHEREAS, the Highway Commission has by resolution duly adopted and entered in the minutes and records of the Commission as of the nineteenth day of December, 1944, designated Fourth Street in the City of Medford from its connection with Central Avenue to a junction with Front Street, and Front Street from said junction point to a junction with Eleventh Street, and Eleventh Street from said junction point to a junction with Central Avenue as streets of the City of Medford over which to route state highway traffic; and

WHEREAS, it is the judgment and opinion of the Commission that said streets should be declared to be a through highway and traffic entering or passing over said streets from intersecting or intercepting streets should be required to come to a stop before entering said through highway with certain exception as set down hereinafter;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. That Fourth Street in the City of Medford from its connection with Central Avenue to a junction with Front Street, and Front Street from said junction point to a junction with Eleventh Street, and Eleventh Street from said junction point to a junction with Central Avenue in the City of Medford be and said streets hereby are declared to be a through highway and all traffic intersecting or intercepting said streets from other streets or highways shall be required to come to a stop before entering said streets except at the intersection of Front Street and Main Street at which intersection Main Street shall be declared the preference street and traffic entering from Front Street shall be required to stop before entering said intersection.

2. That there is attached hereto and by this reference made a part hereof a map, marked Exhibit A, on which is shown colored in red the said streets and there are also shown the points at which streets or highways intercept or intersect said streets. *

3. That the State Highway Engineer be and he hereby is instructed to place, or cause to be placed, and thereafter maintain along the said above designated route within the corporate limits of the City of Medford appropriate highway signs or markers notifying drivers of vehicles to stop before entering or crossing said highway or street.

4. That the said Engineer is further instructed to place such signs or markers as nearly as practicable at the place or places where said cross or intersecting roads or streets meet a prolongation of the nearest property line of such through highway, and such signs or markers so placed or installed shall indicate or designate to all drivers of motor vehicles entering said highway or street from said cross or intersecting roads or streets the place where the stop shall be made.

5. The said signs or markers shall conform in shape, design, size and other physical characteristics to the specifications and standards heretofore approved for such signs and markers and now hereby adopted.

6. That this resolution shall be entered in the minutes and records of the Commission as of the 16th day of April, 1945.

---

* The map referred to in the above resolution is attached to the original resolution in File No. 8 of "Resolutions adopting 'through' highways" and by this reference is made a part of this minute entry to the same extent as if contained herein.

The Commission had under consideration the application of the Farmers-Workers Association, Clatskanie, for permission to fill in the highway ditch for about 200 feet where it extends along the Lower Columbia River Highway in front of the Association's Community Hall near Clatskanie, so as to provide a more convenient means of entrance to the premises. The Engineer recommended denial of this request because traffic to and from the Community Hall could not be controlled, and accidents very likely would occur. He advised that there are now three entrances to this property and suggested, as a safety measure, the construction of "buck rails" along the entire highway frontage between each entrance, which would not only prevent traffic entering or leaving the highway at other points, but would also serve as a buttress for the parking of automobiles. The Commission approved the suggestion subject to the condition that the "buck rails" are constructed entirely off the highway right of way at Association expense.

The Commission discussed a letter from Mr. A. B. Caley, Portland, requesting improvement of a roadway approach to his service station, which is located on the east side of the Pacific Highway (old route) just south of "L" Street in the Town of Halsey, at which point the old and the new highways join. Mr. Caley advises that when the new highway was built, he understood that he would be provided with a convenient approach to his property from the highway, but such approach was not constructed, and as a result north bound highway traffic passes by his station and he is deprived of anticipated revenues; in fact, the present tenant has requested release from his lease obligation. The Engineer advised that the construction of an approach road such as Mr. Caley suggests would result in an extremely wide intersection at the junction of the

two highways, which is very undesirable from a traffic safety standpoint. Moreover, the expense involved would be considerable because it would require the extension of a double twenty-four-inch pipe culvert as well as grading and surfacing. He recommended that Mr. Caley's request be denied, but that he be permitted to round off the point at the intersection of the two highways, which he thought would serve the purpose. The Commission approved the recommendation unanimously.

The Commission had under consideration the record of the County Court of Benton County in which the County Court has designated and has programmed for improvement under the Market Road System Law of the state certain county roads or sections thereof. In this connection, the Engineer reported that the County Court has presented for the Highway Commission's consideration certified copies of the County Court's order dated March 7, 1945, designating additional market roads in Benton County and that the County Court also has presented for the Commission's consideration three copies of a map on which is shown and plainly marked the county roads so designated and defined in said order of designation, which said maps for identification purposes bear the signatures of Oscar Cutler, Engineer, County and City Relations, and of R. H. Baldock, State Highway Engineer, and the date, March 29, 1945, and have been furnished by the county to the Highway Commission pursuant to the provisions of Section 100-907, O. C. L. A.

After due consideration of said matters by the Commission, motion was made by Commissioner Schaupp that the said maps and the said certified copies of the County Court's order be received by the Commission and filed in the permanent records of the Commission at Salem, Oregon. The motion was duly seconded by Commissioner Chessman and was by Chairman T. H. Banfield submitted to vote and was declared carried by the unanimous vote of the Commission. The Chairman of the Commission then directed the Secretary to send to the County Court of Benton County, Oregon, a certified copy of the record of the Commission with respect to the above matter.

The Commission discussed a request from the City of Silverton for the installation of a flood light over the Hillsboro-Silverton Secondary State Highway at the point where said highway crosses at grade the tracks of the Southern Pacific Railroad Company in the Town of Silverton. After consideration, the Commission by unanimous vote approved such installation at state expense, subject to the understanding that the city shall provide the electrical power or energy to operate the light and shall maintain it in a workmanlike manner. (An agreement covering the matter was signed by the Commission on the following day.)

A letter was presented from Bear Creek Orchards, Medford, Oregon, inquiring as to the possibilities of securing the benefit of the mailing list of the Highway Commission's Travel and Information Department to secure new customers for its products. The Commission denied the request as a matter of policy and to avoid the establishment of an undesirable precedent.

The Engineer reported briefly on the following matters listed on the agenda as unfinished business from the prior meeting:

(1) Results of contact with the Corvallis City Council with respect to the designation of one-way streets in Corvallis following the war: - The Engineer advised that he has not yet had an opportunity to discuss this matter with the City Council.

(2) Advisability of taking membership in the National Association of Travel Officials: - The Engineer advised that he was instructed at the previous meeting to ascertain the present attitude of the members of the Travel Advisory Committee with respect to such matter, but he has not yet received replies to his inquiries.

(3) Request of citizens of Baker for construction of a new highway between Baker and Bates to facilitate the truck hauling of logs: - The Engineer advised that he has assigned a locating engineer to make the reconnaissance survey as ordered by the Commission at the previous meeting, but no report will be available until the survey is completed. In this connection Chairman Banfield explained briefly, for the benefit of Commissioner Chessman, the reasons that prompted the Commission to authorize the reconnaissance survey, Commissioner Chessman being absent when the matter was first discussed.

(4) Proposal by Army Officials for the development of recreational areas adjacent to War Department reservoirs: - The Engineer gave as his thought that consideration of the development of such areas is a matter that probably should wait until the dams creating the reservoirs have been built, and he so recommended. The Commission approved the recommendation.

(5) Suggestion of a delegation from Eugene that the state acquire right of way now for the proposed relocation of the Pacific Highway that will by-pass the City of Eugene on the west. The Engineer advised that he has nothing to report on this matter at the present time.

(6) Request of Hood River Chamber of Commerce and Hood River Port Commission for state assistance in the construction of a retaining wall in the Columbia River for the reclaiming of land that the city contemplates developing as an airport and as industrial sites: - The Engineer advised that the Hood River City Council has not yet formally expressed a preference in the matter of permanently routing the Columbia River Highway through Hood River, the relocation of which is involved in the retaining wall construction. He was advised that he is investigating the proposal made by the city but is not yet ready to report his findings.

(7) Proposed improvements in Champoeg State Park: - The Engineer advised that the State Parks Superintendent has not been able as yet to get any of the members of the Oregon Historical Society to visit the park and pass on the plans, although he anticipates that he will be able to in the not distant future. In the discussion of this matter, the question arose as to the practicability of making extensive improvements of the park, such as construction of a memorial

building and library or a museum, in view of the possibilities that the area will be inundated during periods of high water in the Willamette River. The Commission instructed the Engineer to check the records with respect to previous flood periods and to report back to the Commission the elevation in feet to which high water rose during each of those periods.

(8) Request of Portland Union Stock Yards Company and Swift & Company for the widening of Swift Secondary Highway for four lanes of traffic: - The Engineer advised there is nothing whatsoever to report in this matter and it appears to be a dead issue, whereupon the Commission ordered that it be deleted from future agendas.

(9) Designation of one-way streets in Klamath Falls: - Commissioner Schaupp advised that this matter also is not pressing and suggested that it be deleted from future agendas until revived. The Commission so ordered.

The Commission approved an agreement with R. E. Baxter, Spray, Oregon, covering the leasing of property described as Lot 8, Block 6, Original Town of Spray, Wheeler County, which is needed in connection with highway construction and maintenance, the consideration being $20 per month. (The agreement was signed on the following day.) In this connection, Chairman Banfield expressed a desire to eliminate such rental charges, if possible, whereupon the Engineer was instructed to check the proposed building program and to rearrange the order of construction of the several projects so as to eliminate the payment of rental charges.

The Commission had under discussion the formal adoption of a permanent route for the Columbia River Highway at Troutdale. Details of the plan were explained to Commissioner Chessman who was not present when this matter was discussed at the previous meeting, at which time the proposed location was tentatively approved by members then present. Commissioner Chessman indicated his approval of the proposed location, whereupon the Commission by unanimous vote adopted the following resolution designating the permanent location for this highway:

WHEREAS, this Commission has heretofore found and determined that a relocation of a portion of the Columbia River Highway on a water grade is required in order to provide a thoroughfare adequate in all respects to meet the needs and demands of the motoring public, including the needs and demands of transportation for hire of persons and property by motor vehicle, which said finding and decision has been made a matter of official record in the minutes and records of the Highway Commission; and

WHEREAS, record of the relocation of said highway as determined by the Commission is a record which fixes and determines the general route or location and the extreme termini of the proposed relocation of said Columbia River Highway, leaving for future consideration the specific locations of particular segments of said route; and

WHEREAS, the Commission has now determined the specific location of the relocated line of the Columbia River Highway, the westerly terminus of which relocated segment is near the point where the Arata County Road is intersected by the present highway and relocated line, which point is otherwise defined as Highway Engineer's Station 433 and is further identified as a point approximately one and one-half miles west of Troutdale; thence northeasterly to the crossing of the Union Pacific Railroad Company's freight line; thence easterly approximately parallel to the said railroad line to the easterly terminus which is at approximately Highway Engineer's Station 573+02 in Section 30, Township 1 North, Range 4 East, W.M., Multnomah County, Oregon; and

WHEREAS, the adopted location of said line between said termini passed through the town of Troutdale, but because of standards and requirements of the Federal Government the Highway Commission found it necessary to again relocate said segment or section of the said highway between said termini so as to by-pass said town; and

WHEREAS, it is now the purpose of this Commission to modify or amend the location and record with respect to said highway between said termini to the extent and in the manner hereinafter set out;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the route and location of the Columbia River Highway between the termini specified in paragraph 3 above shall be and the same hereby is amended so as to read as follows, to wit:

> Beginning near the Arata County Road, which point is at Highway Engineer's Station 433 and is further identified as a point approximately one and one-half miles west of Troutdale; thence northeasterly to the crossing of the Union Pacific Railroad Company's freight line; thence easterly approximately parallel to the said railroad line to the easterly terminus which is at approximately Highway Engineer's Station 573+02 in Section 30, Township 1 North, Range 4 East, Multnomah County, Oregon.

2. The route and location of said section of highway as above defined shall be and the same hereby is designated, approved and declared to be the relocated and permanent line and location of the Columbia River Highway between said termini.

3. There is attached hereto and made a part hereof a print on which is shown colored in blue the location of said route

above described.*

4. That the maps and other field data with respect to said location hereby are approved and adopted as the maps and field data of said line and it is hereby ordered that they be filed and preserved in the permanent records of the Highway Commission at Salem, Oregon.

5. That the Engineer be and he hereby is instructed to properly mark upon the ground by permanent monument or other markers the said location.

6. That when said Columbia River Highway is permanently constructed the portion thereof between the termini herein fixed shall be constructed along the route hereby approved and adopted.

7. That this resolution be entered in the minutes and records of the Commission as of the 16th day of April, 1945, and a duly certified copy thereof delivered to W. H. Lynch, District Engineer, Public Roads Administration, Portland, Oregon.

---

* The map referred to in the above resolution is attached to the original resolution in File No. 58 of "Resolutions Adopting State Highway Routes" and by this reference is made a part of this minute entry to the same extent as if contained herein.

The Engineer reported that in conformity with instructions given him by the Commission at the previous meeting, he discussed with representatives of the Public Roads Administration and U. S. Forest Service the proposed improvement of the North Umpqua County Road, and gathered that the U. S. Forest Service is particularly anxious to improve the upper section of this road as a postwar forest highway project, and wants to spend about $1,000,000 of postwar forest highway moneys for such purpose annually until completed. Moreover, the Public Roads Administration would like to have the road designated as a secondary federal aid highway so as to make it eligible for additional federal funds. He pointed out that Douglas County has previously requested that the Commission designate the lower twenty-four-mile section of this road, between Roseburg and Rock Creek, a state secondary highway in order to relieve the county of maintenance expense. The Commission discussed the matter briefly but took no action thereon, deferring the same until later when the program for postwar construction is arranged.

The Secretary presented resolutions from the following cities and towns outlining plans for the improvement of city streets that the cities propose to finance with funds allocated under the State Tax Street Fund Law, Chapter 371, Oregon Laws 1943, being moneys they received in 1944 from the 1943 revenues of the State Highway Department:

Arlington	Donald	Nehalem
Barlow	Freewater	Paisley
Boardman	Glendale	Sublimity
Chiloquin	Halsey	Sumpter

The Engineer advised that the resolutions are in order and that the plans for the several improvements have been inspected by Highway Department Engineers and approved by himself. He recommended approval of the plans by the Commission. After discussion, the following resolution with regard thereto was adopted by the Commission by unanimous vote upon motion of Commissioner Schaupp, which was seconded by Commissioner Chessman:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by this Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1944 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Arlington	$ 836.42
Barlow	71.42
Boardman	151.08
Chiloquin	1,017.71
Donald	225.24
Freewater	1,133.08
Glendale	765.00
Halsey	418.90
Nehalem	339.24
Paisley	325.50
Sublimity	384.56
Sumpter	576.84

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Arlington - Columbia Street, "C" Street, "D" Street, "E" Street

Barlow - Main Street

Boardman - Main Street

Chiloquin - 1st Avenue, 2nd Avenue, Schonchin Street

Donald - Mathieus Road, Williams Avenue, Feller Street, Crissell Street, Cone Street, Ehlen Street, Oak Street, Rees Street

Freewater - Robins Street, Washington Street

Glendale - Molly Street, Pacific Avenue

Halsey - East 1st Street, 3rd Street, 4th Street, 5th Street, "C" Street, "D" Street, "F" Street, "G" Street, "H" Street, "I" Street

Nehalem - Tohls Avenue, 9th Street, "I" Street

Paisley - Mill Street, Mill Street at intersection of Chewaucan Street, and Mill Street at intersection with Green Street (culverts)

Sublimity - Broadway Street

Sumpter - Mill Street, Granite Street, Bonanza Street, East Austin Street

2. That the type, plan and character of improvement proposed in the resolutions filed with this Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the same.

5. This resolution shall be entered in the minutes and records of this Commission as of the 16th day of April, 1945.

The Engineer reported a request from the City of Eugene for permission to install a sewer pipe line across certain state highway property in Eugene, described as a portion of Lots 7 and 8 of Block 9, Amended Addition of Fairmont to Eugene. The Engineer recommended approval of the city's request subject to the condition that the sewer at all times be maintained in a satisfactory and sanitary condition and that the city will relocate its sewer line at city expense if that is required in order that the state may make proper use of its property.

He further advised that the city authorities have stated their willingness to accept a form of easement subject to such conditions. He recommended approval of the city's request. The Commission approved the recommendation unanimously. (An agreement covering the matter was signed on the following day.)

There was presented to the Commission a proposed land lease agreement prepared by the U. S. War Department covering the lease by the United States of America of a small parcel of real property at the west end of The Dalles-Celilo Canal, Wasco County, said parcel being situate within the right of way of the Upper Columbia River Highway at such point. It appears that the property has been used by the Government for a number of years without lease or special permission, which fact has just been ascertained, and that the War Department now wants its occupancy formalized. The Engineer advised that the form of lease is satisfactory except as to the clause which provides for the cancellation or termination of the lease. According to this provision, he said, the lease cannot be cancelled without cause. He recommended approval and execution of the permit by the Commission when the cancellation clause has been revised so as to permit the termination of the lease without particular cause. The Commission approved the recommendation and referred the agreement to the Attorney for correction.

The Commission had under discussion a letter from Mr. William H. Lichty, Hood River, expressing a desire to purchase 80 acres of state park property situate in Section 32, Township 3 North, Range 10 East, W.M., Hood River County. The Engineer advised that the property was acquired from Hood River County as a gift along with another tract containing 160 acres in an adjacent section. The latter-mentioned tract, he said, was particularly desired by the Highway Commission for park purposes, but when the deed was prepared, the County Court included the 80 acres in Section 32, which has no park qualifications and does not fit into the park picture. He pointed out that a deed of conveyance to the state contains provision that the property must be used for public uses and public purposes forever, in view of which, if the Commission disposes of the property, conveyance would have to be made through the County Court of Hood River County. In the discussion of the matter, the question arose, for what purpose will Mr. Lichty use the property. The Commission ordered that such information be ascertained and reported back to the Commission when final action on Mr. Lichty's request will be taken.

The Engineer reported a violation committed by Mr. Walter DeBoer, log hauler of Eugene. It appears that Mr. DeBoer has been truck-hauling logs over the McKenzie Highway and recently was requested by Highway Department weighmasters to have his load weighed on the truck scales located three and one-half miles east of Springfield. It further appears that Mr. DeBoer permitted the front axle of his truck to be weighed but refused to consent to the weighing of the other axles. The Engineer advised that Mr. DeBoer has been in difficulties before, on one occasion having altered a "citation to the Justice Court", and on another occasion having attempted to run over weighmasters who were operating with loadometers on the Springfield-Creswell Secondary Highway. He gave as his thought that Mr. DeBoer should be severely dealt with and recommended cancellation of the special carrier permit issued to him by the Public Utilities Commission. The Commission approved the recommendation

unanimously and instructed the Secretary to ask the Public Utilities Commissioner to cancel the permit of this operator.

The Engineer brought up for discussion the matter of employing a number of Chinese highway engineers. He explained that under the joint sponsorship of the American and Chinese Governments a number of Chinese highway engineers are to be brought to this country for intensive on-the-job training, which will enable them to make the greatest possible contribution to the building of military roads on their return to China. All of these men, he said, are college graduates, and all have had good experience on China's road problems. He also said that the State of Oregon will not be asked to pay the men's salaries nor reimburse them for their expenses, because such items will be taken care of by the International Training Administration, which will have general supervision over the men. He advised that some of these men can be used to good advantage in Oregon at the present time and recommended that the Commission cooperate in the movement by taking two of the 100 men who are expected to arrive in this country soon. The Commission by unanimous vote authorized employment of two of these men on the conditions mentioned by the Engineer.

The Engineer also brought up for discussion the matter of continuing snow removal operations on the Mt. Hood Highway, south of Parkdale, to facilitate log hauling operations. He explained that up to the present time the Public Roads Administration has paid the expense of this work, having appropriated $3,000 for such purpose, but it now appears that the appropriation is about exhausted and an additional sum of about $1,000 will be required to maintain logging operations until the highway is open for general traffic. There is a possibility, he said, that additional federal funds can be obtained, but that is uncertain, in view of which he inquired whether or not the Commission would be willing to authorize payment of the extra expense with state money. Due to the fact that the logs are badly needed in connection with the Nation's war efforts, the Commission authorized an expenditure of state funds in the amount of $1,000 to continue the snow removal operations if an additional appropriation cannot be obtained from the Federal Government.

The Engineer requested authority to post the South Yamhill River Bridge on the Salmon River Highway near Valley Junction for a fifteen-mile per hour speed limit, such speed limit being a necessity, in his estimation, since the bridge recently was severely damaged by a logging truck. He explained that while the bridge has been repaired to such an extent that it will hold up under legal weight loads driven at reasonable speeds, it vibrates considerably under speeds in excess of fifteen miles per hour, and the posting of the bridge for such speed limit is simply a safety measure. The Commission approved the request by unanimous vote.

In conformity with instructions given by the Commission at the previous meeting, the Attorney presented a form of resolution for the designation of a permanent route for the Oregon Coast Highway (U.S. 101) through the Town of Gold Beach, Curry County. After due consideration, the Commission by unanimous vote adopted the resolution, as follows, upon motion of Commissioner Schaupp which was duly seconded by Commissioner Chessman:

WHEREAS, a permanent location of the Oregon Coast Highway through the town of Gold Beach, Curry County, Oregon, has never been made or official action taken thereon by the Commission; and

WHEREAS, it is the purpose of the Commission to improve said section of said highway which involves the town of Gold Beach, and therefore it is deemed appropriate at this time that a permanent route and location be adopted; and

WHEREAS, after due deliberation and consideration by the Commission it is the judgment of the Commission that the route hereinafter specifically described should be adopted as the route and location of the highway into and through the town of Gold Beach, Curry County, Oregon.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the route and location of the Oregon Coast Highway into and through the town of Gold Beach shall be as follows:

Beginning at Station 3+39.6, which station is the intersection of the existing Oregon Coast Highway and the relocated line through Gold Beach, said station also being opposite the Sunset Inn, located in the north portion of Gold Beach, thence South 44° 07' West to Station 2+40.6, thence on a 358.1 foot radius curve left to Station 1+02.4; thence South 22° 00' West to Station 0+00 north equals 0+00 south; thence South 22° 00' West to Station 5+40.5; thence on an 818.5 foot radius spiralled curve left to Station 12+75.2; thence South 2° 53' East to Station 21+41.1; thence on a 2864.8 foot radius spiralled curve right to Station 26+18.5, which station is the north end of the existing bridge over Riley Creek.

All the above described line is located in Section 36, Township 36 South, Range 15 West, W.M., the right of way to be a minimum of 80 feet, 40 feet on either side of center line.

2. That the foregoing route and location shall be and the same hereby is declared to be the official route and location of said highway in said town of Gold Beach, and when rights of way are procured therefor and when the highway through the town of Gold Beach is improved, such rights of way shall be procured and such improvement shall be made along said route and location.

3. That this resolution be entered in the minutes and records of the Commission as of April sixteenth, 1945.

APR 16 1945

A report was rendered by the Engineer on the necessity to construct a concrete curb along Riverside Street, Medford, route for north bound Pacific Highway traffic, particularly between 12th Street and Earhart Street, a distance of about 850 feet. He explained that the sidewalks along this section are from eight inches to twelve inches below the pavement grade and act as a gutter into which all of the water from the highway and adjacent property drains. He gave as his thought that the state is obligated to take care of the water that flows onto the sidewalks from the highway, which can be accomplished by construction of the curbs, and requested authority to proceed with the work, which he estimated would cost about $2,500. The Commission authorized the expenditure by unanimous vote.

A letter was presented from the Arbor Lodge Community Club, Portland, requesting the widening of the pavement on Portland Boulevard, Portland, between Union Avenue and Greeley Avenue, where only narrow strips of pavement now exist. The Engineer advised that Portland Boulevard is neither a state highway nor a state highway route, so its improvement is not an obligation of the state. He recommended that the request be denied. The Commission approved the recommendation and instructed the Secretary to convey such information to the Community Club.

Mr. Lynch of the Public Roads Administration asked the State Highway Commission if it would consent to using $300,000 of state funds to match with forest funds to build the North Santiam Highway between Gates and Detroit in Marion County. He explained that the cost of the project is now estimated to be $3,600,000, of which the War Department will pay $2,400,000 which represents the additional cost to move the road from the floor of the canyon to the canyon wall, which location is necessitated by the construction of a dam being erected by the War Department.

Forest highway funds are set up to repay the War Department at the rate of $300,000 per year during each of the three postwar years. This leaves $300,000 not provided for as the Federal Government cannot obligate forest funds for more than a three-year period. Mr. Lynch stated that the road may not cost $3,600,000, under which condition the repayment would be scaled down accordingly, and wanted to know if the Highway Commission would underwrite the payment of this project but not to exceed $300,000, the exact amount required being dependent upon the final cost of the project. It was moved by Commissioner Chessman and seconded by Commissioner Schaupp that the State obligate itself to pay not to exceed $300,000 for this work. The motion carried by the unanimous vote of the Commission.

The Commission by unanimous vote approved the minutes of the Highway Commission meeting held on March 12 and 13, 1945.

The Commission recessed at 12:00 m. for luncheon, and reconvened at 2:00 p.m., in the same room, with the same persons present and participating.

The Commission discussed matters pertaining to the Federal Highway Act of 1944 including the following:

(1) Adoption of a secondary Federal aid highway system.

(2) Determination of urban areas.

(3) Adoption of an interstate system of highways.

(4) Adoption of a program for postwar construction.

Each of these matters was considered separately as follows:

ADOPTION OF A SECONDARY FEDERAL AID HIGHWAY SYSTEM

The Engineer presented a plan for the allocation of Secondary Federal Aid Highway mileage to the several counties of the state, based on the regulations of the Public Roads Administration which provide, among other things, that the size of the system shall be controlled by the ability of the agencies concerned to improve, maintain, and perpetuate such a system. The plan as presented, he said, proposes a secondary system containing 5,000 miles of roads, which will require about fifteen years to complete if Federal appropriations for the secondary system following the war continue in the same yearly amounts as are contained in the Postwar Highway Act. He pointed out that according to the regulations, the roads in the Secondary System are to be the principal secondary and feeder roads, free delivery mail routes, and public school bus routes, either outside or inside municipalities of less than 5,000 population; however, state highways may be included. He suggested, in view thereof, that the greatest benefit would be realized if the mileage were allocated approximately 925 miles to primary state highways, 2,375 miles to secondary state highways, and 1,700 miles to county roads. He also suggested that the 1,700 miles of county roads should be distributed among the counties of the state on the same basis that the Federal funds are apportioned among the several states; that is, one third on the basis of rural population, one third area, and one third post road mileage. He explained that the plan submitted has been prepared on such basis, and recommended adoption of the plan subject to approval by the several counties and by the Public Roads Administration as is required by the Federal regulations. He exhibited a map showing a tentative system prepared on such basis and the location of the projects proposed for construction under this program.

Mr. W. H. Lynch, District Engineer, Public Roads Administration, was present and stated his approval of the plan as presented subject to a further study of the individual roads to be improved thereunder,

and subject further to approval of the plan by the several county courts. After full discussion of this matter, motion was made by Commissioner Chessman that the Highway Commission adopt the following plan for the establishment of a Secondary Federal Aid Highway System under the provisions of the Federal Highway Act of 1944 as the Commission's proposed plan for discussion with the several counties of the state. The motion was seconded by Commissioner Schaupp. Chairman Banfield declared the motion adopted by the unanimous vote of the Commission.

ALLOCATION OF FEDERAL SECONDARY MILEAGE TO COUNTIES

1. Assumes that total mileage of Federal Secondary Roads is to be 5,000, divided as follows:

Primary State Highways	925 miles
Secondary State Highways	2,375 miles
County Roads	1,719 miles
	5,019 miles

2. Apportionment of mileage in accordance with formula is applied only to county road mileage.

County	Miles on State Primary System	Miles on State Secondary System	Pro rata of 1,700 Miles Allotted to County Roads		Proposed Mileage of County Roads
			Ratio	Miles	
Baker	138.62	70.29	2.232	37.94	33.3
Benton	29.57	31.72	1.525	25.92	25.5
Clackamas	2.90	81.84	5.694	96.80	95.6
Clatsop	-	43.58	1.561	26.54	27.9
Columbia	-	42.04	2.004	34.07	41.7
Coos	-	55.28	2.347	39.90	44.8
Crook	38.41	81.45	1.928	32.78	32.8
Curry	-	6.33	0.927	15.76	16.8
Deschutes	24.14	53.41	2.617	44.49	43.8
Douglas	-	98.72	4.265	72.50	73.5
Gilliam	9.59	42.34	0.753	12.80	12.8
Grant	42.39	41.20	2.676	45.49	45.5
Harney	88.95	122.48	4.488	76.30	74.3
Hood River	41.90	21.65	1.022	17.37	16.9
Jackson	65.43	97.63	3.671	62.41	61.9

(Continued on next page)

ALLOCATION OF FEDERAL SECONDARY MILEAGE TO COUNTIES (Cont.)

County	Miles on State Primary System	Miles on State Secondary System	Pro rata of 1,700 Miles Allotted to County Roads		Proposed Mileage of County Roads
			Ratio	Miles

In this connection, the Commission considered it advisable to have a preliminary discussion of the matter with officials of the Association of Oregon Counties before presenting the plan to the individual county courts. The Secretary was thereupon instructed to invite the officers of this group to be present at the next regular meeting of the Commission for such purpose.

DETERMINATION OF URBAN AREAS

The Engineer advised that according to Federal regulations, a certain portion of the postwar moneys must be spent for construction on Primary Federal Aid highways in "Urban Areas", which are defined as areas included in and adjacent to municipalities or other urban places of 5,000 population or more, as determined by the latest census. He further stated that there are sixteen such places in the

State of Oregon; viz., Albany, Astoria, Baker, Bend, Coos Bay, Corvallis, Eugene, Grants Pass, Klamath Falls, LaGrande, Medford, Oregon City, Pendleton, Portland, Salem, and The Dalles. He exhibited a map of each on which was shown the corporate boundary line and his suggestions as to the extent to which the urban area should reach beyond the corporate limits.

As a result of lengthy discussion and very careful consideration, the following "urban areas" areas were designated by the Commission by unanimous vote upon motion of Commissioner Chessman, which was seconded by Commissioner Schaupp, it being understood that the Commission is not precluded from requesting the extension of the boundary of any area at a future time if it so desires:

Albany:	Urban area confined within city limits.
Astoria:	Urban area confined within city limits.
Baker:	Urban area confined within city limits.
Bend:	Urban area confined within city limits.
Coos Bay:	Urban area extended to include the City of North Bend.
Corvallis:	Urban area extended to include the proposed revision of U.S. 99W and the Albany-Corvallis Highway at the north city limits of Corvallis.
Eugene:	Urban area extended to include proposed improvement of Pacific Highway between Eugene and Springfield Junction.
Grants Pass:	Urban area confined within the city limits.
LaGrande:	Urban area confined within the city limits.
Medford:	Urban area confined within the city limits.
Oregon City:	Urban area confined within the city limits.
Pendleton:	Urban area confined within the city limits.
Portland:	Urban area extended to include proposed improvement in the Vanport district, North Portland.
Salem:	Urban area confined within the city limits.
The Dalles:	Urban area confined within the city limits.

APR 16 1945

ADOPTION OF INTERSTATE SYSTEM OF HIGHWAYS

The Engineer advised that the Federal Highway Act of 1944 requires the designation of a "National System of Interstate Highways" connecting, so far as is practicable, the principal metropolitan areas, cities, and industrial centers, to serve the national defense and to connect at suitable border points with routes of continental importance in the Dominion of Canada, and in the Republic of Mexico. Such routes, he said, are to be selected by joint action of each state and the adjoining state. He pointed out that Oregon under such an arrangement would have two interstate highways, one of which would extend across the state in an easterly and westerly direction, and would connect with the State of Idaho, and the other would be a north and south highway connecting with the State of Washington on the north and State of California on the south. The Old Oregon Trail, he said, meets the requirements with respect to the east and west highway route, but there is a question whether or not the State of Idaho will agree to the proposed connection at the state line. He pointed out that the people of Idaho want the highway located on the Idaho side of the Snake River through the towns of Payette and Weiser, whereas in his estimation, the proper permanent location is the short cut on the Oregon side south of the present highway between Huntington and Ontario; thence to the Idaho state line at a place known as Mortons Island. He advised that a survey of this proposed location has been made, which reveals that it is the shortest and fastest route available. He recommended the selection of such route as a basis of consultation with the Idaho Highway Department and that the matter be referred to the Public Roads Administration for a decision if an agreement with the State of Idaho cannot be reached.

W. H. Lynch, District Engineer, Public Roads Administration, was present and advised that he is satisfied with the Oregon location and will recommend it to his superiors.

Following discussion, motion was made by Commissioner Chessman that the Old Oregon Trail be recommended as a route for this interstate highway in the State of Oregon and that the proposed route on the Oregon side of the Snake River, as described by the Engineer, be recommended as the connecting link with the Idaho Highway System. The motion was seconded by Commissioner Schaupp and was declared by Chairman Banfield to have received the unanimous vote of the Commission.

The Engineer next mentioned the north and south connection with the States of Washington and California. He advised that the Pacific Highway meets the requirements and that the State of Washington is satisfied with the present connection via the Interstate Bridge in Portland. He recommended the selection of such connection with the State of Washington.

As to the interstate connection with the highway system of California, he advised that there are two routes available; viz.,

(1) Pacific Highway East from Portland to Junction City; thence via the Pacific Highway to the California state line.

(2) Pacific Highway East and the Pacific Highway from Portland to Eugene and Goshen; thence via the Willamette Highway and The Dalles-California Highway to Klamath Falls and the state line.

He read aloud excerpts from his report on this subject to show a comparison between the two routes covering such subjects as design standards, cost of construction, traffic volume, and economics. (See Engineer's Report dated April, 1945, for details.) He advised that either of the routes will satisfy the major requirements of the Federal Government, and that each has its advantages and disadvantages. He made no definite recommendation with respect to either route except to point out that the Inter-regional Highway Committee, which was appointed by the late President Roosevelt and which was composed of a group of men of national reputation, selected the Pacific Highway as a route of an inter-regional highway through the State of Oregon.

Commissioner Schaupp stated that he has studied the Engineer's Report on this subject and does not doubt the sincerity in which it was prepared, but he does not agree with the statistics contained therein. He expressed preference for the route through Klamath Falls, but due to the lateness of the hour, deferred until the following day the presentation of arguments in support thereof.

The meeting thereupon adjourned at 4:45 p.m., to reconvene at 9:00 a.m., on the next day.

Portland, Oregon, April 17, 1945.

The State Highway Commission reconvened at 9:00 a.m., in the Stock Exchange Room of the Imperial Hotel with all members, the State Highway Engineer, the Attorney, and the Secretary present.

Bids as follows for the sale of state-owned real property situate at Reedsport and at Troutdale were opened and read by the Secretary in conformity with previously published notices, following which Chairman Banfield announced that the awards would be made by the Commission at 3:00 p.m., in Room 615 of this hotel.

SALE OF LAND AT TROUTDALE

Everett Meads	$2,100.00
Troutdale Vegetable Growers	1,250.00
Erick Enquist	1,001.00
Albert Lane	400.00

SALE OF LAND AT REEDSPORT

Reedsport Cheese Factory	$336.50
Ida M. McGeorge	106.00

The meeting adjourned at 9:30 a.m., and reconvened immediately in Room 615 with the same persons present and participating.

Discussion of the proposed interstate highway connections between the states of Oregon and California was resumed at this time. Commissioner Schaupp spoke in favor of the Klamath Falls route. He stated that as a result of a study of the Engineer's report on this subject, he is inclined to believe that the material contained therein favors the Pacific Highway route south of Eugene and for that reason he is prompted to add to, supplement, and comment on the report, and also because the report does not contain certain factual information, and there is some information contained in the report that needs amplification. He mentioned first the definition of an "Inter-regional Highway", giving as his understanding that an inter-regional highway is one that has been selected as such because it is the fastest and most direct route between centers of population. He interposed the question--Which of the two highways under discussion south of Eugene meets these requirements. He made the following comparisons of the two routes:

(1) Cost of Construction: - He quoted from the Engineer's Report that the cost to construct the Pacific Highway route to interstate standards is $15,415,500, whereas to construct the Klamath Falls route to the same standards is estimated to cost only $10,351,300, or a difference of approximately $5,000,000 in favor of the route through Klamath Falls; also quoting from the Engineer's Report, he said that in all respects, except that of elevation, the Klamath Falls route is the more desirable of the two.

(2) Traffic: - Commissioner Schaupp pointed out that the Engineer's record of traffic flow is based on traffic counts made in 1940, which is only a year after the Willamette Highway was opened up for public use, so does not show a fair comparison of traffic volume. The Engineer interrupted to explain that it was necessary to use the 1940 traffic count because the only origin and destination survey available was made in 1940 and because counts taken now would not reflect true conditions in view of the abnormal traffic flow produced by wartime conditions. Commissioner Schaupp then gave figures showing traffic flow on The Dalles-California Highway during the years 1940 to 1944, inclusive, and similar information concerning the Pacific Highway, as follows:

Year		U.S. 97	U.S. 99
1940		86,592	96,737
1941		120,026	102,339
1942		65,707	58,380
1943		31,987	34,580
1944		33,894	32,880
	Total	338,206	324,916

APR 17 1945

He pointed out that according to these figures the traffic flow over The Dalles-California Highway exceeded that over the Pacific Highway by more than 13,000 vehicles. He also mentioned that a large volume of traffic enters the state over the Klamath Falls-Malin Highway from Reno, which is not included in the above figures, and which in his estimation is an important feature.

(3) Distances Via Alternate Routes: - Commissioner Schaupp quoted from the Commission's Sixteenth Biennial Report with respect to the distance between common points in Oregon and in California via the alternate routes. He pointed out that according to this report the distance from Eugene, Oregon, to Weed, California, via the Pacific Highway as presently constructed is 216 miles, compared with 196 miles via Klamath Falls, or a distance of 20 miles in favor of the Klamath Falls route. He pointed out that according to the Engineer's Report, the distance from Eugene to the California state line via the Pacific Highway, when reconstructed to interstate standards, will be 197.9 miles as compared with 190.1 miles via Klamath Falls. He raised the question, how can the 20 miles difference in the presently constructed highways be made up. He also pointed out that driving time between Eugene and Weed over existing highways is between three and four hours shorter by way of Klamath Falls than via the Pacific Highway, but admitted that this difference in time would be shortened when the highway has been reconstructed.

Referring again to the Engineer's Report, Commissioner Schaupp pointed out that the estimated cost to construct the Pacific Highway to interstate standards is $15,415,500, whereas the cost to construct the Klamath Falls route to the same standards is estimated at $10,351,300, a difference of nearly $5,000,000 in favor of the Klamath Falls route; also, that it would cost about $2,000,000 less to rebuild the Klamath Falls route to interstate standards than to rebuild the Pacific Highway to state standards. He questioned the reasonableness of this difference. Again referring to the Engineer's Report, Commissioner Schaupp pointed out that no mention is made of the fact that the Southern Pacific Company discontinued its main line railroad through Roseburg and is now routing its through trains over the Natron cut-off regardless of the fact that there is a much greater stand of timber along the Roseburg route than along the other. This change, he said, was made at enormous expense and in his estimation is a most significant argument in behalf of the route through Klamath Falls because it shows that the railroad recognized the advantage of such route. He declared that there is now a good highway available for traffic between Eugene and the California points via Roseburg and Medford, and questioned the advisability of spending $15,000,000 to reconstruct this highway to interstate standards simply in order to place this highway in the same speed class as the highway through Klamath Falls. He said that the driving time between Portland and Klamath Falls at present is only about six hours via the Willamette Highway, whereas it takes all day to make the trip via the Pacific Highway.

Commissioner Schaupp also mentioned the proposed revision of the Pacific Highway between Wolf Creek and Grave Creek in Josephine County,

APR 17 1945

pointing out that the estimated cost to construct this section, 4.4 miles in length, is $670,000, or at the rate of about $150,000 per mile, as compared with the cost to build the proposed revision of The Dalles-California Highway south of Chemult, a distance of about thirty miles, which is estimated at $1,500,000, or approximately $50,000 per mile. He also compared these estimated costs with the actual cost to construct the Pacific Highway south of Junction City, advising that according to the Commission's Sixteenth Biennial Report the total expenditure was about $17,510,000, or an average of $76,000 per mile. The cost of constructing The Dalles-California Highway, he said, was $6,456,000 according to this report, or an average of $21,000 per mile. He questioned the logic of spending $76,000 per mile for a road that still takes three hours longer to travel between common points than another.

Commissioner Schaupp next brought up the matter of alignment and elevation stating that in so far as curvature is concerned, the record speaks for itself, the curvature via the Willamette Highway and Klamath Falls being much less than that via the Pacific Highway. He quoted from the Engineer's Report that the rise and fall on the Pacific Highway totals 19,000 feet, being 6,000 feet more than that on the Klamath Falls route, which indicates that traffic can realize a tremendous saving of money in the course of years if the Klamath Falls route is used. He gave as his understanding that the gasoline consumption to operate a car on the five percent grade is twice as much as when operated on the level and declared that from that standpoint the saving to the general public over a number of years will finance the building of the Klamath Falls route to interstate highway standards. He also declared that the Klamath Falls route is the logical one for the interstate highway in all respects, except for elevation.

The matter of snow removal on the two routes was also mentioned by Commissioner Schaupp, who stated that such operations on the Pacific Highway amount to $5,000 annually as compared with $26,000 on the Willamette Highway route, including snow removal over Sun Mountain, which is to be eliminated. He also mentioned that a similar comparison can be made with respect to slide removals, which he thought would reflect to the credit of the Willamette Highway route.

Referring again to the flow of traffic between California and Oregon, Commissioner Schaupp mentioned that statistics show that almost as much traffic enters the State of Oregon over the Klamath Falls-Malin Highway from Alturas, California, as enters the state over the Pacific Highway, which reflects to the advantage of the Klamath Falls route in the selection of this interregional highway, particularly when one considers that the route

through Alturas is the fastest and most direct route of travel between Portland and Los Angeles. He also said that the Klamath Falls route affords the most direct and fastest highway for Eastern Oregon traffic destined to California points.

From the population standpoint, Commissioner Schaupp pointed out that the Engineer's Report is based on the 1940 census. He questioned the use of such census because of the great increase in population now obtaining in the various centers. He mentioned that Klamath Falls has doubled in population since the 1940 census was taken. He also questioned the logic of the argument that the Pacific Highway passes through the largest timber district, stating that movement of the timber products always introduces hazards to other traffic and such condition should be avoided whenever possible. This concluded Mr. Schaupp's presentation.

Chairman Banfield inquired as to what significance there is in the naming of an inter-regional highway. The Engineer replied that there is no significance except that highways on the system are built to slightly higher standards. In the further discussion of this matter, Commissioner Schaupp favored the designation of this inter-regional highway now so as to avoid controversies and the creation of ill feeling between the communities that are interested. Chairman Banfield and Commissioner Chessman wished more time for further study of the Engineer's Report before acting and to give the people of Southern Oregon an opportunity to express their feeling in the matter if so desired. Accordingly, the Commission's decision was deferred until a later meeting.

The Attorney brought up for discussion the matter of sale of residence buildings in Klamath Falls. He recalled that the Commission at the previous meeting authorized the sale of the buildings and ordered that the present tenants be given ninety days' notice to vacate. However, Mr. T. B. Watters, Realtor, Klamath Falls, who has charge of the buildings, advises that there is a housing shortage and the people have no place to move, so there is a question whether or not the buildings should be sold at this time. Commissioner Schaupp recommended that the sale of the buildings be postponed for a couple of months when the prospects that the housing situation in Klamath Falls will be improved by reason of construction of a new Federal Housing Project at that place. The Commission approved the suggestion by unanimous vote.

The Attorney also brought up for discussion the eviction of Mrs. Anna Barclay from Harris State Park in Curry County. He explained that Mrs. Barclay is a widow whose husband was a veteran of World War I, and that she conducted a restaurant business at this location prior to the time that the state acquired the property; further, that the former Highway Commission allowed her to main-

tain the building on the state premises for a reasonable length of time so as to give her time to sell it. However, she has not disposed of it, and the State Parks Superintendent is very desirous of having it removed from the state's property because it interferes with the park development. Mrs. Barclay, he said, is willing to sell the building for $500, which is more than it is worth, but the best offer made is $200, which she has refused. He suggested that it would be advisable for the state to buy this building if it can be purchased for $400, which could then be sold for $200 to some interested buyer. He pointed out that the state would be losing $200 by such transaction, but in his estimation it would be worth that much to get rid of the building. After discussion, Commissioner Schaupp moved the adoption of the Attorney's suggestion, the motion was seconded by Commissioner Chessman, and was declared by Chairman Banfield to have received the unanimous vote of the Commission.

In this connection, Chairman Banfield gave as his thought that the State Highway Commission should not buy any property that is encumbered in any way such as the property under discussion. He recommended adoption of such procedure as the Commission's policy to be followed hereafter. The recommendation was approved by Commissioners Schaupp and Chessman, thus receiving the unanimous vote of the Commission.

The Attorney reported a request from the Gilchrist Timber Company that the State Highway Commission join with the company in securing a declaratory judgment to ascertain whether or not the company must license its log hauling equipment if its operations are simply across a public road. He said that in conformity with a recent order of the Commission the Gilchrist Timber Company was informed that it would have to license its equipment before the Commission would grant the company permission to operate across The Dalles-California Highway near the Town of Gilchrist, and that the company tried to get the licenses but was unable to secure them because its equipment is wider than the law allows and because the company is transporting excess weight loads. The Commission considered it desirable to have such information and thereupon authorized the Attorney to join with the company in this undertaking.

The Commission discussed briefly a controversy with Mrs. Maki, Astoria, arising out of the construction of the Astoria Naval Hospital job. Commissioner Chessman stated that this matter has been hanging fire for a long time and Mrs. Maki is very anxious to secure settlement. It appeared from discussion that Mrs. Maki's claim is primarily against the state's contractor, but the state may be obligated to a certain extent. The Commission ordered an immediate investigation of the matter.

The Commission approved and signed an agreement with Mrs. Grant M. Miles for the lease of a maintenance headquarters site in the Town of Multnomah, Multnomah County, particularly described as all of Lots 4 and 5 of Block 3, Buckingham Heights Addition to Multnomah.

The Commission resumed discussion of Federal aid matters, particularly the adoption of a program for the utilization of $36,000,000 of postwar funds. The Engineer presented a plan as follows for the utilization of such funds:

PROPOSED UTILIZATION OF $36,000,000 OF POSTWAR FUNDS

TABLE I - SEGREGATED BY CLASSES OF PROJECTS

	Primary Fed. Aid Projects	Secondary Fed. Aid Projects	Urban Projects	Total
Planning Survey	$ 168,000	$ 115,000	$ 37,000	$ 320,000
Steiwer Hill-Albany Project	550,000	- -	- -	550,000
Contingency Reserve (construction and rights of way)	646,000	613,000	256,000	1,515,000
Subtotals	$ 1,364,000	$ 728,000	$ 293,000	$2,385,000
Rights of Way	709,000	477,000	150,000	1,336,000
Construction	16,872,000	11,725,000	3,682,000	32,279,000
Totals	$18,945,000	$12,930,000	$4,125,000	$36,000,000

TABLE II - SEGREGATED AS BETWEEN FEDERAL AND STATE FUNDS

	Federal Funds	State Funds	Total
Planning Survey	$ 320,000	$ - -	$ 320,000
Steiwer Hill-Albany Project	300,000	250,000	550,000
Contingency Reserve (Construction and Rights of Way)	800,000	715,000	1,515,000
Subtotals	$ 1,420,000	$ 965,000	$ 2,385,000
Rights of way	600,000	736,000	1,336,000
Construction	19,235,000	13,044,000	32,279,000
Totals	$ 21,255,000	$14,745,000	$36,000,000

APR 17 1945

After careful consideration, the Commission approved the plan by unanimous vote and then discussed the selection of the individual projects for construction with the $33,615,000 that are available for such purpose as disclosed therein.

The Engineer presented a list of eligible projects prepared from available information, including projects submitted by the county courts as a result of the Commission's canvass of the state in 1943. As a result of careful consideration, the Commission by unanimous vote approved the following as its tentative program of postwar construction, not including forest highway projects. It was understood that the amounts mentioned are only approximate and that the termini of each project is subject to change:

PART I - PRIMARY FEDERAL AID PROJECTS

County	Section and Description	Constr.	R. of W.	Total	Year
U.S. Route No. 99E (Pacific East):					
Clack. & Marion	Pudding River Bridge, Grad., Pav. & Bridge	$ 123,000	$ --	$ 123,000	1
U.S. Route No. 99W (Pacific West):					
Yamhill	Newberg-McMinnville, 6.0 Mi. Grad. & Paving	$ 427,000	$ 20,000	$ 447,000	3
Benton	Corvallis, South Approach, Sta. 887-904+50, 0.33 Mi. G.&P.	90,000	10,000	100,000	3
	Total - U.S. No. 99W.	$ 517,000	$ 30,000	$ 547,000	
U.S. Route No. 99 (Pacific):

APR 17 1945

The Commission recessed from 12:00 m. to 1:30 p.m., following which discussion of matters pertaining to the postwar program was resumed, all members of the Commission being present and participating.

The matter of publicizing the program was discussed by the Commission. The Engineer was instructed to prepare a "Press Release" containing a list of the selected projects for the Commission's approval. He also was instructed to furnish each member of the Commission a detailed outline of the work tentatively proposed in each county, including Forest Highway projects, for which a definite program is yet to be arranged.

The Commission discussed a date for its next regular meeting for the receiving of bids and decided to hold such meeting on Monday and Tuesday, May 14 and 15, 1945, in Portland, bids to be received on May 15. The Secretary was instructed to make the usual arrangements to hold this meeting in the Imperial Hotel.

The Engineer requested authority to submit to the Public Roads Administration for approval a list of surveys that are required in connection with the postwar highway program. He said that it is not contemplated to spend any money at the present time in connection with these surveys, but submission of the projects and approval by the Public Roads Administration is necessary if the state is to be reimbursed for expenditures made in connection with them. The Commission deferred a decision on the matter until the next meeting.

The Commission discussed the bids received at the morning session for the sale of state-owned property at Troutdale and at Reedsport. The Commission decided to accept the offer of Mr. Svend Knudsen to pay $336.50 for the Reedsport property, but rejected all bids received for the sale of the Troutdale property in view of the fact that it now appears that the property may be desirable for state park purposes, but that cannot be ascertained definitely until after the new highway has been constructed. The decision of the Commission with respect to both properties was unanimous upon motion by Commissioner Chessman which was seconded by Commissioner Schaupp. Public announcement of the Commission's decision was thereupon made by Chairman Banfield at 3:00 p.m.

The matter of adjustment of salaries paid to State Highway Department employees was discussed by the Commission. It was decided to make no general raise in salaries at this time, but the Commission would consider from time to time recommendations for individual raises.

The Attorney brought up for discussion a proposed settlement of the controversy with C. J. Moser concerning the acquisition of a gravel deposit in Josephine County. He advised that the original intention was to acquire fee title to the property and, because a satisfactory agreement could not be reached with Mr. Moser, it was necessary to condemn the property, which action is still pending in the circuit court. It now appears, he said, that Mr. Moser is willing to settle out of the court if the state will not take the property outright but will lease it from him, and he has agreed to the following method of settlement: The state is to pay to Mr. Moser the sum of $2,000 for the use of the property for a two-year period ending April 17, 1947, subject to renewal, extension, and/or cancellation. The state is not to sublet the premises or any portion

thereof without consent of the lessor. Improvements or other facilities placed upon the property by the state shall at all times remain the property of the state unless they are not disposed of within twelve months after termination of the lease, in which event they become the property of the lessor. He presented a form of lease agreement covering the matter, which includes a number of items in addition to the above (see agreement for detail) and recommended acceptance thereof by the Commission. After discussion, the Commission by unanimous vote approved and adopted the settlement provided by said agreement. The agreement was thereupon signed by the Commission.

The Commission considered and signed agreements, etc., as follows:

Agreement with the City of Silverton providing for the maintenance of a flood light over the Hillsboro-Silverton Secondary Highway where it crosses the Southern Pacific Company Railroad tracks in Silverton.

Agreement with R. E. Baxter providing for the lease of certain property in the Town of Spray for highway construction and maintenance purposes.

Agreement with the City of Waldport providing for the installation and maintenance of a flashing beacon over the Oregon Coast Highway at its intersection with the Alsea Highway in Waldport.

Agreement with Mrs. Grant M. Miles covering the lease of a maintenance headquarters site in the Town of Multnomah, Multnomah County.

Agreement with C. J. Moser and wife providing for the lease of a gravel deposit in Josephine County.

Agreement with Western Union Telegraph Company disposing of the company's claim for damages arising out of the construction of the Troutdale-Dodson Section of the Columbia River Highway, Contract No. 2320.

Easement granting to the City of Eugene permission to install a sewer pipe line across state-owned property in Eugene, described as a portion of Lot 8, Block 9, Paramount Addition.

Bargain and sale deed conveying unto Ernest Lyman 0.18 acre of land situate adjacent to the Sams Valley Secondary Highway in Jackson County.

There being no further business to come before the Commission at this time, the meeting adjourned at 3:45 p.m.

T. H. Banfield
Chairman

Arthur W. Schaupp
Commissioner

Commissioner

State Highway Engineer

Secretary

APR 17 1945

12150

Portland, Oregon, May 14, 1945

The State Highway Commission met in regular session at 9:00 a.m. in Room 615 of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
C. B. McCullough, Assistant State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Commissioner Arthur W. Schaupp arrived at 10:15 a.m.

The Assistant Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with the offer that he recommended in connection with each parcel. After careful consideration of each item, the Commission approved the request and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

BIGGS SECTION, COLUMBIA RIVER HIGHWAY

1934-Fulton, Lula B. and James G. Fulton, and Fahy Fulton, Stock Pile Site Option expires October 23, 1945	1.0 acre at $150.00 per acre	$ 150.00	McChesney

MAY 14 1945

CIRCLE BRIDGE-HUG POINT SECTION, OREGON COAST HIGHWAY

10819-Irish, Amelia Leibel Right of Way Option expires	0.09 acre	$ 00.00	Witt

GOLD BEACH SECTION, OREGON COAST HIGHWAY

11755-Anderson, Alena Stock Pile site Option expires November 2, 1945	1.11 acres at $10.00	$ 11.10	Cozad

MAY 14 1945

The Attorney requested authority to condemn certain parcels of real property that are needed as right of way for the Wolf Creek Highway in Washington County and for the Steiner Hill-Albany Section of the Pacific Highway East in Marion and Linn Counties. He submitted a list of the properties together with the offers that he recommended in condemnation as follows:

WOLF CREEK HIGHWAY

10256	Minnie Morgan	$ 2,000.00
5205	Lehman Heirs	2,000.00
5204	Ernest Lehman	8,500.00
9690	Nelse Johnson	50.00
6507	Bechen Estate	10,500.00
6506	Albert Croeni	5,000.00
6555A	Ernest and Fred Zurcher	15,500.00
6513	Dora L. Scoggin	2,250.00
6503	Arnold Berger	13,500.00
5202	German Congregational Church of Cedar Mill	1,500.00

STEIWER HILL-ALBANY SECTION OF PACIFIC HIGHWAY EAST

11405	G. L. Stowe	$ 3,000.00
11074	A. H. Thompson	3,100.00

After careful consideration of each item, the Commission, by unanimous vote, approved the recommended offers and authorized the Attorney to proceed with condemnation of the properties if that appears necessary after further negotiations. The following resolutions with regard thereto were adopted by the Commission by unanimous vote.

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or

resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, puolic highways or for any other purpose designated by the United States; and

WHEREAS, by official act of the State Highway Commission there has been located and established a state highway which is known as the Wolf Creek Highway and otherwise designated as State Highway No. 47; and

WHEREAS, said highway between the Davies Overcrossing in Washington County and the westerly terminus of said highway in Clatsop County has been constructed, but the easterly section of said highway which begins at the said Davies Overcrossing and terminates at the Multnomah County line is not yet completely constructed; and

WHEREAS, in connection with and for the completion of said highway it is necessary that real properties be acquired for right of way and other purposes; and

WHEREAS, on the third day of April, 1941, the Highway Commission adopted a resolution by which, among other things, the Commission found, declared and therefore authorized that for the purpose of making possible a highway adequate for the needs of the traveling public there should be acquired in addition to the necessary rights of way all right of access to said highway except at such places as might be agreed upon by the Highway Commission and the property owners; and

WHEREAS, the Commission does now find and declare that the real properties hereinafter described are required and are necessary for use in connection with the permanent construction, improvement and maintenance of said highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare that the parcels of real property hereinafter described are each and all necessary and needed for and in connection with the construction of the said Wolf Creek Highway between Davies Overcrossing and the Multnomah County line. The properties, the acquisition of which hereby is authorized and ordered, and the names of the owners thereof are shown on the sheets attached hereto and by this reference made a part of this resolution. *

2. The Commission does further find and declare that in addition to the acquisition of the real properties described on the attached sheets it is necessary in order to make possible the proper construction and maintenance of a highway thereover that there be acquired all rights of access from abutting properties to the said parcels of real property and the highway which is to be constructed thereover, except

at such points or places as may be agreed upon by the respective owner or owners and the State Highway Commission.*

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested, authorized, and directed to attempt to agree with the owner or owners or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and is authorized and directed to acquire in addition to title to the said described parcels of land, all rights of access thereto except at such points or places as may be agreed upon by the respective owner or owners and the State Highway Commission, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further ordered that the said J. M. Devers, as Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions as may be necessary and appropriate to acquire title to the said parcels of real property, and all rights of access thereto except at such points or places as may be agreed upon by the respective owner or owners and the State Highway Commission.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any of them, or any interest therein the said J. M. Devers, as Chief Counsel to the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. This resolution shall be entered in full in the minutes and records of the Commission.

MAY 14 1945

*(The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 51, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of road-building materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways or for any other purpose designated by the United States; and

WHEREAS, by official act of the legislature there has been designated a state highway which is known as the Pacific Highway East and otherwise designated as State Highway No. 1E; and

WHEREAS, the transportation of persons and property over public highways by private and for-hire motor vehicles has developed to a point where such means of transportation has become an integral and essential part of the transportation systems and agencies of the State and of the nation; and

WHEREAS, the volume and type of motor vehicles now using the public highways of the State and the nation have become such that early highway standards and highway designs are inadequate with respect to factors of safety, time element, weight of load, dimensions of vehicle and all other factors entering into the problem of transportation over public highways; and

WHEREAS, highway construction, maintenance, and improvement are now and have been for some time financed in large measure by taxes and other charges imposed upon and paid by the road user, and therefore the convenience, safety, and economy of time and cost of operation are of prime significance to the road user; and

WHEREAS , highways which in design possess a minimum curvature, easy grade, two or more same-direction lanes, freedom from access or intersecting roads, streets or lanes, and into, to, or from which abutting property owners have no, or at least a limited, right of access constitute and are thoroughfares which, in the opinion of the Commission, afford and offer to the highway user economy of time, cost and safety of operation to public officials charged with upkeep, economy of maintenance costs, and for all interested parties a reduction in the toll of life and health and a reduction in property damage; and

WHEREAS, for the purpose of making possible the construction of a more adequate and safe thoroughfare, the Commission has relocated the section of the Pacific Highway East between Salem and Albany, and for like purpose the Commission has declared the necessity for widening, straightening, and otherwise improving the alignment and design of the section of said highway from Albany to Junction City; and

WHEREAS, to the end that public safety, convenience, and public economy may be best served, it is deemed by the Highway Commission advisable and necessary that in connection with the acquisition of real properties for rights of way for said highway there shall be acquired all right or easement of access to said highway from real properties abutting thereon, and all right or easement of access from said highway to real properties abutting thereon, except at such places as may be designated and approved by the Highway Commission;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, that:

1. The Highway Commission does hereby find and declare that the relocation of the Pacific Highway East between Salem and Albany and the construction of a highway over said new location and widening and straightening of the Albany to Junction City Section of said highway are necessary and essential for the convenience, safety, and accommodation of the motoring public so that there may

be made possible the construction, improvement, and maintenance of a highway between said termini adequate in all particulars for existing and potential volume, type, and character of traffic now using or which for long will use said highway;

2. That the said proposed highway projects, consisting of new highway construction, highway location, widening, and straightening between said termini are each and all planned and located in a manner which in the judgment of the Commission will be most compatible with the greatest public good and will do a minimum of damage to private property;

3. That the real properties described on the attached sheets are each and both needed in connection with and for said proposed project, and the acquisition of the same hereby is declared necessary;*

4. That for the purpose of providing convenience, safety, economy of time, operation and cost, and for the purpose of providing and making possible the movement of the maximum volume of traffic over said highway and otherwise protecting and bringing greater returns to public investment in said highway, it is deemed and declared to be necessary that, in addition to the acquisition of real properties for rights of way, there shall be acquired from the owners of all real property abutting upon said highway or highway right of way all right or easement of access from abutting lands to, over, and into said highway and all right or easement of access from said highway to said abutting real property, except at specific places to be designated in the deeds or other evidences of title;

5. That J. M. Devers, as Chief Counsel of the Oregon State Highway Commission, be and he hereby is authorized and directed personally, or through a member or members of the Legal or Right of Way staffs, to attempt to agree with the owner or owners of properties described on the attached sheets with respect to the compensation to be paid for said property or properties together with the damage, if there be damage, to the remainder of the said properties as a result of the taking of properties to be appropriated for said projects, and is authorized and directed to attempt to agree with such owner or owners with respect to the compensation and damage, if there be damage, to be paid for a waiver, sale, and transfer of all right or easement of access from the abutting property or properties to, into, or over said highway and all right and easement of access from said highway to said abutting property or properties, except at specific places to be designated in the deeds or other evidences of title;*

6. That in the event said property or properties, or either of the same, or the right or easement of access with respect to any ownership cannot be acquired by agreement, then said

* For names of property owners and descriptions of property mentioned herein, see "Real Property Condemnation Resolution No. 52.

J. M. Devers, as Chief Counsel, is hereby authorized to institute and prosecute to final determination any necessary or appropriate suit or action for the State in the name of the State, by and through its State Highway Commission, for the condemnation of such interest or interests as such owner or owners may have in said real property or properties, including any and all right of access except at places specified therein, and for determining the compensation to be paid not only for such real properties needed for right of way purposes and the damage, if any there be, but the compensation to be paid for such right or easement of access and the damage if any there be.

7. That in the event said properties, or either of them or such right of easement or access are acquired through condemnation proceedings, then said J. M. Devers, as Chief Counsel, hereby is authorized in the conduct and prosecution of said proceedings to make such offer, offers, commitment, or commitments as in his opinion will best serve the interests of the State of Oregon, this Commission, and the general public, as well as the interests and welfare of the owner or owners who may be defendants in any such proceeding; and

8. That this resolution be entered in full in the minutes and records of this Commission.

The Engineer requested authority to submit to the Public Roads Administration for approval a list of survey projects which will be required in connection with the Commission's postwar construction program. He explained that such approval is required in order to secure Federal participation in survey and right of way costs and gave as his thought that Federal approval should be obtained now in order to avoid unnecessary delays later on. It was the feeling of the Commission that the adoption of the postwar program should carry with it authority for the making of the surveys and for the taking of right of way options covering the whole program, so as to avoid piece-meal action on the things that are required. The Engineer and the Attorney were thereupon instructed to review the matter from such standpoint and to submit to the Commission for adoption a form of resolution embodying the things discussed, and including all projects concerning which there is no question.

The Commission approved and signed an easement agreement with a Mr. William Patapoff and wife, required in connection with the construction of a sidewalk along the Pacific Highway East in the town of Halsey, said sidewalk construction being included in the contract for the improvement of the Halsey-Harrisburg section of this highway.

The Commission also signed an agreement with the United States War Department terminating its lease of a portion of Pilot Butte State Park at Bend which has been used for some time past by Army personnel for radar purposes.

The Commission's action was taken upon recommendation of the Engineer who advised that inspection of the property reveals that the Army has fulfilled its obligation satisfactorily.

The Commission had under discussion the advisability of consenting to the vacations of certain streets in the town of Reedsport as an accommodation to the local school district, particularly portions of Sixth Street and 'H' Street and a portion of the alley between 'H' Street and 'L' Street, where they connect with the Oregon Coast Highway. The Engineer explained that the Highway Commission owns some of the land that fronts on the streets to be vacated and must join with the other property owners in the request for such vacation if it is to be effected. He recommended approval of the school board's request not only as an accommodation to the school district, but also because it would eliminate access to the highway at these points. The Commission's Attorney concurred in the recommendation. The Commission approved the recommendation by unanimous vote and thereupon signed a petition with respect thereto.

The Commission also approved and signed a lease granting to the United States Weather Bureau use of certain state owned property in Josephine County heretofore leased to the Civil Aeronautics Administration which no longer has use for the same, and wishes its rights transferred to the Weather Bureau.

The Attorney brought up for discussion the claims of Messrs. Van Hausen and Larsen who suffered personal injuries and damage to their car as a result of the opening of the movable draw on the interstate bridge between Portland and Vancouver at a time when they were crossing this structure. The Attorney advised that both men have agreed to settle their claims for the sum of $300.00 each. He gave us his thought that such settlement is reasonable and should be accepted; however, pointed out that the State of Washington which is liable for one-half of the expense cannot pay its share until the claims have been approved by the Washington legislature. The Washington Highway Department acknowledges its obligation and will endeavor to get the legislature to approve payment when it convenes again in about two years. He suggested, if the Commission approves the settlement, that Oregon advance the payment of Washington's share with the understanding that reimbursement by the State of Washington will be forthcoming at later date. The Commission approved the suggestion and authorized settlement with Messrs. Van Hausen and Larsen on such basis.

The Commission had under consideration the case of United States vs. State of Oregon, et al, in which case the State was made a party defendant because of the fact that a part of the real property sought to be appropriated by the Government was originally within the right of way of the Columbia River Highway, but since the filing of said proceeding the highway had been relocated and therefore the property in which the State had an interest was eliminated from the right of way.

The Attorney advised the Commission that the State no longer has any interest in the litigation and recommended that the Commission join in a stipulation by which the State will waive any claim to compensation. The Commission ordered that the stipulation be signed and directed the Attorney

to make the proper filing of the same in the Court.

The Engineer and the Attorney reported on the claim of Mrs. Gertrude Maki, Astoria, arising out of the J. A. Terteling and Son Contract No. 2692 for the construction of the Astoria Naval Hospital Section of the Nehalem Secondary Highway. It appears from the claim that Mrs. Maki has five causes of complaint; viz., that the highway grade line as constructed in front of her property is considerably higher than was originally contemplated; that the Maki's domestic water supply line which crosses this highway was not properly replaced when the highway was rebuilt; that the State Highway Department did not rebuild an existing sidewalk in front of the Maki premises as agreed when the right of way option was obtained; that sewer facilities, consisting of an excavation for the benefit of the Maki's next door neighbor, was left in an unsanitary condition; and that there was damage to the Maki residence by reason of the operation of the contractor's equipment in the near vicinity. The Engineer advised that the Maki's property lies outside of the corporate limits of the City of Astoria; therefore, does not come within the purview of the law which prohibits a change of an established grade line of a roadway without payment of damages to the affected property owners, in view of which the State is not liable for damages on that account. As to the Maki's water supply line, the Engineer advised that this claim has merit because the existing pipe line was damaged and the Maki's were put to some inconvenience and expense thereby. He estimated the cost of installing the new pipe line at $69.00, and recommended payment of such amount to the Makis on this account. As to the sidewalk construction, the Engineer advised that because of the raising of the grade line of the highway, an existing sidewalk had to be destroyed. He recommended replacement of this sidewalk, which he estimated would cost about $35.00, provision for which is contained in the right of way option secured from the Maki's. As to the sewer ditch, the Engineer advised that the ditch was constructed to provide for future sewer disposal into the bay, but carries no sewage at the present time although it does act as a drain for surface water. He advised further that if and when the ditch is used for sewage purposes, a pipe line will be installed therein by the users and owners, and the ditch will then be backfilled. Regarding Mrs. Maki's complaint that her residence building was damaged by the operation of the contractor's equipment, the Engineer advised that there may have been some damage on this account as evidenced by plaster cracks, the repairing of which is estimated to cost about $300.00. This is properly a claim against the contractor who should be required to make satisfactory settlement with the Makis before he receives final payment under his contract with the state. Following discussion of this matter, the Commission approved the Engineer's report and authorized settlement with the Makis in accordance with his recommendation. The Attorney inquired as to the payment of the contractor's final estimate amounting to $9,897.92. He recommended that the sum of $9,000.00 be released now and that the remaining sum, $897.92, be retained until the Maki's claims against the contractor have been satisfied, provided the contractor's surety consents to such settlement. The Commission approved the recommendation by unanimous vote.

The Engineer reviewed the results of the taking of bids in Salem on May 1, 1945, for the sale of the Mountain View Inn buildings near Wolf Creek

on the Pacific Highway in Josephine County. He advised that seven bids were received, the two high ones being identical in the amount of $200.00 each. It was decided, he said, after consulting with individual members of the Commission over the telephone, to ask these two bidders to submit new bids, which was done with the result that on May 2, 1945, one of the bidders, Mr. Milo S. Cline, offered to pay $251.00 for the buildings, and the other, Redwing Auto Court, Grants Pass, offered to pay $226.00 for them. Both bids were satisfactory, and that of Milo S. Cline was accepted, being the greater of the two. The Commission approved the sale of the buildings to Mr. Cline. The Engineer also advised that bids were taken in Salem on May 1, 1945, for the sale of a tract of land at Albany, three bids having been received, that of L. L. Swan, Albany, being high in the amount of $1,035.00. All bids, he said, were rejected because they were considerably under the estimated value of the property. The Commission, by unanimous vote, approved the report.

The Engineer brought up for discussion the offer of the Troutdale Vegetable Growers Cooperative Association to purchase certain state owned property situate adjacent to the Columbia River Highway at Troutdale. He advised that the matter has been investigated by the Maintenance Engineer, E. A. Collier, and Mr. C. W. Parker of the Right of Way Department who ascertained that the association would be satisfied if it could obtain a tract either 50 feet wide by 150 feet long, with a 50 foot frontage on the O.W.R. & N. railroad or a tract 100 feet by 100 feet in dimension fronting on the railroad, together with an easement 10 feet wide along the railroad right of way line for a pipe line extending from the tract to the Sandy River. The association is willing to pay $1,000.00 for either tract, but prefers the tract with the 100 foot frontage on the railroad. The sale of this tract to the association, he said, will not impair the use of the remainder of the state's property, and he recommended acceptance of the company's offer to pay one thousand dollars for the 100 feet by 100 feet tract with the pipe line easement. The Attorney concurred in the recommendation. The Commission approved the recommendation unanimously.

The Engineer reported on the proposed establishment of one-way traffic streets in the City of Corvallis, particularly Van Buren Street, present route of the Pacific Highway West, between 9th Street and 4th Street, and Harrison Street between 9th Street and 3rd Street. He advised that the city officials are willing to designate the Harrison Street Section as a one way traffic street for north bound traffic if the abutting owners will agree to pay 50% of the cost of necessary street repairs in conformity of city charter requirements; and the city would also be willing then to designate the Van Buren Street section a one way traffic street for south bound travel. During the discussion, he said, the city officials raised the question whether or not the state would contribute toward the cost of improving the Harrison Street section in view of the fact that it would be used for a number of years as a state highway route, pending construction of the proposed new connection with the Pacific Highway West some distance north of the city limits. The Commission appeared favorably inclined but deferred a definite decision with regard thereto pending a report by the Engineer on the costs involved.

A letter was presented from the County Court of Clackamas County requesting the designation of the following county roads as state secondary highways in order to relieve the county from maintenance expense:

Market Road No. 7 between Barton and Carver
Market Road No. 39 between Carver and the intersection with Market Road No. 16 at Deep Creek.
Market Road No. 16 from Deep Creek to the Town of Clackamas.

It was contended by the county court that these roads carry an enormous amount of log hauling traffic, and the cost to maintain them is more than the county can afford. The Engineer estimated that it would cost about $400,000.00 to put the roads in a condition to withstand continuous log hauling traffic, although, for about $76,000.00 the roads could be put in a fair condition to last about twelve months. The Commission decided not to place any more roads on the secondary highway system at the present time.

The County Court also asked the Commission to authorize the painting of a center stripe along the lower Boones Ferry Road, Market Road No. 13 in the northwestern corner of Clackamas County. The Commission approved the request subject to the condition that the county will pay the costs involved, it being the desire of the Commission to help out the counties in this way as much as is possible. The matter is to be covered by a written agreement between the state and the county in which the county shall agree to assign to the State Highway Department out of its share of the next apportionment to the counties of state highway funds, a sufficient amount to pay the expense of the striping.

Commissioner A. W. Schaupp arrived at this juncture and participated in further discussions.

A letter was presented from Mr. Lawrence N. Brown, City Attorney, Salem, in behalf of the Salem Airport Committee, in which inquiry was made whether or not the State Highway Commission would be willing to enter into an agreement with the City of Salem for the maintenance of runways at the Salem Municipal Airport if the Airport is released by the Army to the city. The Commission authorized the Engineer to perform such service for the city in so far as he is able with the men and materials available, and subject to the condition that the city will pay all of the costs involved and is willing to wait its turn to secure the improvements. The Commission made it clear that it is unwilling to assume full charge of the maintenance of this Airport, but that the help to be rendered is to consist of repair work from time to time as may be required for the proper use of runways.

A letter was presented from the Roosevelt Parent Teachers Association, Corvallis, requesting the construction of a sidewalk along the right of way of the Corvallis-Newport Highway for the benefit of children who attend Roosevelt School, Corvallis, and other pedestrians. The Commission denied the request as

a matter of policy, it appearing from the discussion that this district has built up since the highway was constructed. The Commission considered that the state is not obligated in cases of this kind, but the state might be obligated if a new highway were to be built through a built-up section.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them for the records. After discussion the Commission by unanimous vote approved the following surveys and authorized the Engineer to make such surveys on various sections of the highways in this state, which said sections of highways together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures are as follows:

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Cost	105-1430	Columbia	Preparation of cost estimates for widening Mist-Clatskanie Highway to accommodate 64ft. log loads	$250.00
Reconnaisance	113-1431	Harney	Survey of cinder pit for maintenance materials on Princeton-Rome Secondary Highway	$ 50.00
R/W descriptions	21-1477	Lincoln	Locating of property corners, etc., for preparation of r/w descriptions-vicinity of Tidewater on Alsea Highway	$1,000.00
Reconnaisance	21-1478	Lincoln	Survey of quarry site near Ekman Slough on Alsea Highway	$ 250.00

In this connection the Commission instructed the Engineer to send to each Commissioner a copy of the letter that he sent to logging operators who are operating over the Mist-Clatskanie Highway, concerning the improvement of this road to accommodate the truck hauling of logs 64 feet long. The Engineer was also instructed to send to each Commissioner a copy of similar letters in the future.

The Commission had under consideration the following requests for extension of time within which to complete certain highway contracts:

Charles Shannon & Son, Contract No. 2700, for grading and paving the Roseburg Timber Access Road on the Pacific Highway and North Umpqua County Road in Douglas County, requested an extension of time of sixty days, from April 30 to June 29, 1945, within which to complete this job. They attributed their failure to complete the project within the specified time limit to excessive rainfall which caused high water in the river from which they obtained backfill

materials, and also because of additional work that they were required to do. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct and recommended that the extension of time be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

Skelton & Wiecks, Contract No. 2710, for the furnishing of crushed rock for the Newport Rock Production Project on the Corvallis-Newport and Siletz Highways in Lincoln County, requested an extension of time of forty-four days, from May 31 to July 14, 1945, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions which prevented them from starting the production of materials that would comply with the specifications. The Engineer advised that if the contractor completes the contract by July 15 no loss will accrue to the state as the material will not be needed until August. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Chester T. Lackey, Contract No. 2670, for the furnishing of crushed rock in stockpiles for the Juntura-Hope Section of the Central Oregon Highway in Malheur County, requested additional extension of time from June 1 to October 31, 1945, within which to complete this job. He gave the following reasons for failure to complete the project within the specified time limit: Inability to secure labor; damage to his plant by the breaking loose of an ice jam; difficulties in securing repair parts for his equipment, and high water during the spring of 1945. The Engineer advised that while progress of the contractor has been rather slow, it is quite likely that he will be able to furnish sufficient rock for the use of the state oiling crew in July, in view of which the crew should not be handicapped. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

The Engineer reported that Contracts Nos. 2582 and 2712 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission.

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2582, with McNutt Bros., for grading and paving on the Judkins Point Section of the Pacific Highway in Lane County; completed on July 31, 1944.

Contract No. 2712, with F. R. Hewett Company, for furnishing crushed materials in stockpiles on the Hermiston Rock Production Project in Umatilla County; completed on April 19, 1945.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Attorney reported briefly on the controversey with Mr. E.H. Lamport who is maintaining a cottage in Casey State Park on the Crater Lake Highway in Jackson County, and who refuses to vacate the premises. The Commission deferred action in the matter pending a written report from the Attorney at a later date.

The Engineer requested authority to purchase four heavy duty power winches to be attached to trucks that are used in connection with bridge repair work. He estimated the cost of the winches at $300.00 each, or a total of $1,200.00. The Commission approved the request.

A letter was presented from Mrs. Grace Clay, Portland, requesting the installation of traffic signals at the intersection of Northeast 82nd Avenue and Prescott Street, Portland, so as to eliminate what Mrs. Clay alleges is a dangerous traffic hazard. The Engineer advised that this matter was thoroughly investigated by the Acting Traffic Engineer who gives as his considered opinion that neither the replacement of stop signs, the installation of time signals, nor the placement of a flashing beacon would improve the conditions at this point, and who recommends, rather, that some measure of selective enforcement be carried on with respect to traffic at this intersection. The Engineer advised that he concurs in the recommendation. The report of the Acting Traffic Engineer was thereupon approved by the Commission by unanimous vote.

The Commission had under discussion a revision of the proposed agreement with the Klamath Indian Agency with respect to the construction of the Sprague River Road. The Engineer recalled that the Commission at its meeting on January 23, 1945, signed an agreement covering this project, but it was not completed by the Agency which is now requesting three revisions. Two of the proposed revisions, he said, are minor, but the third concerns the date of completion of the project, being a request made that a date be inserted on or before which the work to be done by the State shall be performed. Commissioner Banfield expressed himself in favor of proceeding with the work as soon as possible after wartime restrictions have been removed. Commissioners Schaupp and Chessman expressed themselves similarly,

making the decision unanimous. The Commission thereupon authorized such revision in the agreement form and instructed the Engineer to inform the Indian Agency of the action taken. The revised agreement was thereupon signed by the Commission.

The Commission discussed and approved the changing of one word in its agreement with the Bureau of Reclamation covering easement for the construction of the Klamath Falls-Malin Highway across certain government owned lands in Klamath County, particularly the changing of the word "provisions" to the word "purposes " in paragraph three on page six of the original agreement. The revised agreement was thereupon signed by the Commission.

The Engineer brought up for discussion the question of extending to monthly paid employees the priveleges of the payroll reduction plan for Health and Accident Insurance coverage now in effect covering hourly paid employees. He gave his thought that the monthly paid employees should be given the same privileges as the others and so recommended. The Commission approved the recommendation and so ordered.

The adoption of a policy with respect to the granting of permits for the transportation over state highways of long logs and piling had the attention of the Commission.

The Engineer advised that many of the loads of long logs that are carried over state highways are delivered to paper mills, shingle mills and the like where they are ground up into paper pulp or made into shingles. In his estimation, there is no good reason why the logs could not be cut into shorter lengths before they leave the woods. He recommended that requests received hereafter for permits to transport extra long logs over state highways be denied in the interest of public safety unless the logs are to be used for long structural timber or for some other purpose that requires extra long logs. The Commission approved the recommendation unanimously and so ordered.

With respect to the transportation of piling over state highways the Engineer advised that investigation reveals that it is common practice among operators in this service to haul the piling long distances to certain railroad loading points notwithstanding that a number of suitable loading points may be passed by enroute; further, that the investigation also reveals that there is considerable cross hauling of piling on the highway which results in the traveling public being subjected to the hazard of piling being transported in both directions over the same section of highway. He recommended as a public safety measure that piling haulers should not be permitted to transport their loads over the highway for a greater distance than to the nearest railroad loading point from the point where the loads enter the highway and that such loads be piloted throughout the length of the haul if more than one half the traveled roadway is utilized in the movement. The Commission approved the recommendation by unanimous vote, it being the Commission's belief that everything possible should be done to protect public travel.

The Commission also discussed the adoption of a resolution extending the time limit for the granting of Emergency Transportation Permits as

authorized by the 1945 Legislature. The Commission voted unanimously to extend the time limit on such permits, and instructed the Attorney to prepare an appropriate resolution for adoption by the Commission at its next regular meeting.

The Engineer reported the gift of some engineering books from Mrs. Otto Schrader, Taft Heights, Oregon, widow of an Engineer who was formerly in the employ of the State Highway Department. The Commission accepted the gift and instructed the Secretary to formally thank Mrs. Schrader for her courtesy and generosity.

The Engineer requested authority for Acting Traffic Engineer, Mr. F. B. Crandall, and his Assistant, Mr. J. Al Head, to go to Seattle at state expense for discussion of traffic problems with officials of the Washington Highway Department. He estimated that the total expense involved, other than automobile expense, would not exceed $80.00. The Commission approved the request by unanimous vote subject to the condition that the trip is absolutely necessary in order to discuss specific problems.

The Commission discussed the matter of relieving traffic congestion at the Columbia River ferry approach in Astoria. The Engineer advised that the Astoria City Council requested the Highway Commission to construct a ramp leading down to a vacant lot nearby which is suitable as a parking area, thereby relieving traffic congestion on the street leading to the ferry. He estimated the cost to construct the ramp at $1500.00 and pointed out that the expenditure would not be lost because the ramp will become a component part of a permanent highway improvement that is planned for construction at this location in the post war period, the sum of $65,000.00 having been tentatively approved by the Commission for such purpose. He recommended approval of the project. The Commission approved the expenditure by unanimous vote.

The Engineer reported that the following cities and towns, Ashland, Corvallis, Gold Hill, Troutdale and Wheeler, have fulfilled the legal requirements with respect to the expenditure of the state tax street funds paid to them in 1944, and that the plans for the projects that are proposed for construction with such funds have been examined and found satisfactory. He recommended approval of the projects by the Commission so the work can proceed. The Commission adopted the following resolution with regard thereto by unanimous vote:

> WHEREAS, pursuant to the provisions of Chapter 317, Oregon Laws 1943, there have been by this Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1944 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Ashland	$ 6,515.58
Corvallis	11,525.87
Gold Hill	736.16
Troutdale	289.79
Wheeler	355.72

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Ashland - Bridge construction on Mountain Avenue and over Ashland Creek, also pavement repair throughout city

Corvallis - Harrison Street, also bridge construction on 15th Street

Gold Hill - 1st Street West, 7th Street West, 5th Avenue, 6th Avenue, 4th Avenue

Troutdale - Harlow Street, Celestia Street

Wheeler - Street intersection between Gregory and Norvick Streets

2. That the type, plan and character of improvement proposed in the resolutions filed with this Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the same.

5. This resolution shall be entered in the minutes and records of this Commission as of the 14th day of May, 1945.

The Commission upon recommendation of the Engineer also approved the expenditure of the state tax street funds that were paid to the following

cities and towns in 1945:

Barlow	Ontario	Troutdale
Monroe	Sandy	Wasco
	Sodaville	

The following resolution with regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by this Commission apportioned to the cites and/or towns hereinafter named for disbursement during the calendar year 1945 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Barlow	$ 72.68
Monroe	434.70
Ontario	4,963.40
Sandy	661.13
Sodaville	138.38
Troutdale	294.92
Wasco	423.52

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Barlow - Main Street, Second Street, Maple Street, First Street

Monroe - Railroad Street, Main Street, Howard Street, Commercial Street

Ontario - Oiling unoiled street in city

Sandy - Center Street

Sodaville - Main Street, Washington Street, Maple Street

Troutdale - Harlow Street, Celestia Street

Wasco - Fulton Street

2. That the type, plan and character of improvement proposed in the resolutions filed with this Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the same.

5. This resolution shall be entered in the minutes and records of this Commission as of the 14th day of May, 1945.

In the discussion of this matter the question arose whose responsibility it is to check the expenditures by the cities to see that the money is spent legally.

The Attorney advised that after the money reaches the City Treasurer only a tax payer can start action against the expenditure of the same; also that with respect to the highway funds that the counties receive from the state, the Highway Commission has the privilege of inquiring as to expenditures if it so desires.

Chairman Banfield gave as his thought that when counties request additional state funds for certain county purposes and give as a reason that no county funds are available, inquiry should be made as to how the money they received from the state has been spent. Commissioners Schaupp and Chessman concurred and it was so ordered. The Secretary was instructed to make such inquiry as the cases arise.

The Commission discussed a date for its next regular meeting and decided to hold such meeting in Portland on Tuesday, May 29, 1945. The Secretary was instructed to reserve the Stock Exchange Room in the Imperial Hotel for such purpose.

The Commission by unanimous vote approved the minutes of the meeting held on April 16 and 17, 1945, subject to certain changes requested by Commissioner Schaupp in the record of his remarks concerning the selection of an interregional highway connection between the states of Oregon and California.

The Assistant Attorney reported on the request of the Assembly of God Church, Trail, Oregon, for the return to the church of a one half acre of land that was deeded to the state by mistake in connection with [illegible]

way transaction. He advised that investigation reveals that the property in question, which contains slightly more than one half acre, lies on the opposite side of Trail Creek from the highway and is of no value for state highway purposes. He recommended that it be deeded back to the church, particularly because it was mistakenly conveyed to the state in the first instance. The Commission approved the recommendation unanimously.

The question of taking membership in the National Association of Travel Officials again had the attention of the Commission which referred it to the Advisory Committee on Travel matters for a decision.

The Commission approved and signed an agreement with the U. S. War Department providing the lease to the United States of America of a portion of the right of way of the Upper Columbia River Highway at the Celilo Canal, Wasco County, which has been occupied by certain government buildings for many years. The agreement provides for cancellation of the lease when the property is needed for state highway purposes.

The Engineer reported receipt of a communication from Mr. T. Matt Hally, Director of Highways, State of Idaho, regarding the selection of an interregional highway connection between the states of Oregon and Idaho. He advised that, according to Mr. Hally, Idaho will recommend to the federal authorities the adoption of a route on the Oregon side of the Snake River beginning at a point on the present Old Oregon Trail about six miles north of Weiser Spur junction and extending southerly to the Idaho state line at Morton's Island, about two miles southeast of the City of Ontario, which route coincides with the route recommended by himself as the result of surveys in 1941; however, the Idaho recommendation is conditioned on the designation as a Federal Secondary Highway of the present road which extends from the Old Oregon Trail to Payette, Idaho, and the consideration of an entirely new road extending due west from the City of Weiser, Idaho, to a connection with the present Old Oregon Trail, and that agreement can be reached between the two states as to participation on the cost of interstate bridge structures on a 50/50 basis.

The Engineer recommended adoption of the location described above as the interregional highway route and that the Payette and Weiser connections mentioned by Mr. Hally be recommended to the Public Roads Administration for designation as Federal Secondary Highways, subject to the condition that bridges across the Snake River on the two said connecting roads shall not be constructed until there is apparent necessity for the same and there are Federal Secondary funds available to finance them. The Commission affirmed the recommendation by unanimous vote except that no commitment was made with respect to the new connection west of Weiser which was taken under advisement by the Commission for future consideration. The Engineer was instructed to inform Mr. Hally of the action taken.

A letter was presented from Mr. Archie Ede, Plush, Oregon, requesting permission to construct two cattle guards across the Warner Secondary Highway between Adel and Plush, Lake County. The Engineer advised that this road is in an isolated section of the state and carries very little travel, and

it is not likely that the guards would cause anyone much inconvenience.

Commissioner Schaupp stated that he favored the granting of such privileges on roads in out of way places where the traffic volume is small. After discussion the Commission voted unanimously to grant Mr. Ede's request and also declared such action as its policy to be followed hereafter in cases where the highway is in an isolated district and carries very little travel.

The Commission recessed for luncheon at 12:00 o'clock noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

The Commission discussed matters pertaining to the selection of a Secondary Federal Aid Highway System concerning which a delegation representing the Association of Oregon Counties was scheduled to appear before the Commission at this meeting. In this connection the Engineer presented, for the Commission's consideration, a proposed post war construction plan arranged by counties and including the following: Primary Federal Aid Projects; Urban Federal Aid Projects; Secondary Federal Aid Projects; and a tentative Forest Highway Program, together with war time construction projects and projects heretofore recommended by the County Courts, arranged in order of desired priority. (See details of outline in the general files under "Construction Program Information Arranged by Counties, May 10, 1945.")

The Commission indicated approval of this outline, but took no definite action thereon. Mr. T. M. Davis, Senior Highway Engineer, Public Roads Administration, who was present, advised that the plan, in general, meets with the approval of the Public Roads Administration, but the details thereof are subject to change or modification if justified by facts after the plan has been analyzed. Considerable discussion was had on the selection of the roads that are to be recommended for the Secondary Federal Aid Highway System, and it was decided that the County Courts of the state should be contacted relative thereto, and if agreement can be reached with respect to the projects, then the program would be submitted to the Public Roads Administration for approval. In the event the Public Roads Administration will not approve the program as recommended, then an Engineer representing that department will go to the counties affected and explain why approval cannot be given.

At 3:00 p.m. representatives of the Association of Oregon Counties appeared before the Commission regarding the designation of the Secondary Federal Aid Highways. The group was headed by Mr. F. L. Phipps, The Dalles, Executive Secretary of the Association, and included the following: H. D. Kerkman, County Judge, Washington County and President of the Association; James Lewis, County Commissioner, Washington County; County Judge C. L. Allen, Deschutes County; County Judge J. H. Allen, Grant County; County Judge A. H. Boice, Curry County; County Judge Grant Murphy, Marion County; Frank L. Shull, Member Board of County Commissioners, Multnomah County; County Judge J. B. Kirk, Wasco County; County Judge V. E. Keeder, Klamath County; County Commissioner Fred Gibson, Polk County; County Judge Nelson B. Higgs, Harney County; and County Engineer, Paul B. Wynning, of Jackson County.

Mr. Phipps advised that the members of the County Courts who are present understand how the selection of the highways and county roads was made for the Secondary Federal Aid Highway System , and that the Executive Committee of the Association is satisfied, in general, with the selection as proposed. There followed a general discussion of this matter during which numerous questions were asked by members of the delegation, and definite answers returned by the Commission insofar as was possible, for the benefit of the members of the Association Committee which plans to contact all of the county courts during the next few days regarding this matter.

Chairman Banfield suggested that during the committee's canvas of the state, inquiry should be made of the County Courts concerning wages that are paid in the several communities. Mr. Phipps agreed to bring the matter up in the discussions and to advise the Commission relative thereto. The conference was concluded and the meeting adjourned at 4:00 p.m. to reconvene on the following morning.

Portland, Oregon, May 15, 1945

The State Highway Commission reconvened in regular session at 9:00 a.m. in the Stock Exchange Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
C. B. McCullough, Assistant State Highway Engineer
J. M. Devers, Attorney
H. B. Glaisyer, Secretary

Bids as follows for highway construction work were opened and read in conformity with previously published notice, following which Chairman Banfield announced that the awards of contracts would be made at 3:00 p.m. in the same room.

COOS BAY-ROSEBURG AND POWERS HIGHWAYS IN COOS COUNTY
HOFFMAN BRIDGE ROCK PRODUCTION PROJECT

Oscar E. Joelson, Eugene	$23,974.00
Vernie Jarl, Gresham	25,700.00
E. C. Hall Company, Portland	26,000.00
J. N. & M. J. Conley, Portland	27,200.00
Newport, Kern & Kibbe, Portland	28,900.00
T. W. Thomas, Portland	29,000.00

OREGON COAST HIGHWAY IN COOS COUNTY
PAINT COOS BAY BRIDGE AT NORTH BEND

Watson & Morris, Oakland, California	$27,500.00
A. H. Barbour & Son, Portland	42,750.00
George C. Clark, Portland	47,500.00

COOS BAY-ROSEBURG AND OREGON COAST HIGHWAYS IN COOS AND CURRY COUNTIES
WIDENING MYRTLE POINT-ELBOW POINT AND CAPE SEBASTIAN SECTIONS

John A. Logan, Portland	$32,982.00
Oscar E. Joelson, Eugene	33,784.00
T. W. Thomas, Portland	34,837.00
E. C. Hall Company, Portland	36,671.00
J. N. & M. J. Conley, Portland	52,681.00

PACIFIC HIGHWAY IN JOSEPHINE COUNTY
COYOTE CREEK-GRAVE CREEK SECTION

McNutt Brothers, Eugene	$601,501.00
Guy F. Atkinson, San Francisco, California	662,230.00
K. L. Goulter, Seattle, Washington	664,865.00
Larsen Brothers & Harris Brothers, Sacramento, California	678,246.00
E. C. Hall Company, Portland	692,403.50
Kuckenberg Construction Company, Portland	728,657.00
E. B. Bishop, Orland, California	771,784.00
Leonard & Slate Oregon, Ltd., Portland	772,185.00
Guerin Brothers, San Francisco, California	805,489.00
Peter Kiewit Sons Company, Omaha, Nebraska	820,064.50
Morrison Knudsen Company, Boise, Idaho	887,516.30
C. J. Eldon, Portland	984,636.50

OREGON COAST HIGHWAY IN LINCOLN COUNTY
PAINT YAQUINA BAY BRIDGE

Watson & Morris, Oakland, California	$22,500.00
A. H. Barbour & Son, Portland	22,750.00
George C. Clark, Portland	27,000.00

COUNTY ROAD NO. 1240 IN LINN COUNTY
BRIDGE OVER SOUTH SANTIAM RIVER NEAR SWEET HOME (COUNTY PROJECT)

Birkemeier & Saremal	$20,104.00
Lindstrom Brothers, Portland	27,251.60
McNutt Brothers, Eugene	31,977.75
Marine Contractors, Inc., Portland	35,018.00

A delegation representing the Oregon Pacific Highway Association and consisting of the following persons was present in regard to the designation of an interregional highway connection between Oregon and California: Mr. Ralph Koozer, President, Ashland; Paul B. Rynning, County Engineer, Jackson County, and Secretary of the Association; Hon. Franklin Van Dyke, State Representative, Ashland; D. N. Busenbark, County Judge, Douglas County; J. Ross Hutchinson and H. B. Roadman, County Commissioners, Douglas County; County Judge W. A. Johnson, Josephine County; A E. Powell, County Commissioner, Jackson County; J. W. Hildebrand, County Commissioner, Coos County and Member of the Coos County Chamber of Commerce; County Judge A. H. Boice, Curry County; Herbert Gray, Medford, President Jackson County Chamber of Commerce; C. A. Coates, Grants Pass, representing Chamber of Commerce; A. W. Helliwell, Cottage Grove Chamber of Commerce; Hon. C. A. Meeker, Mayor, City of Medford; Cy Eakin, representing the City of Cottage Grove; C. H. Demaray, representing City of Grants Pass and Redwood Empire Association; Percy Croft, representing Roseburg City Council; Hon. T. S. Wiley,

Mayor, Ashland; William M. Briggs, City Attorney, Ashland; Hon. E. T. Newbry, State Senator and President Ashland Chamber of Commerce; H. Claycomb, Ashland Chamber of Commerce; C. C. Thompson, Field Representative, System Freight Service, Los Angeles; Archie Pierce, President, Pierce Auto Freight Lines Portland. Speaking in behalf of the Pacific Highway Route were Mr. Rynning, Judge Busenbark, Mr. Meeker, C. H. Demaray, Mr. Hildebrand, Senator Newbry, Mr. Eakin, Mr. Thompson, Mr. Briggs, Judge Boice, Mr. Pierce, Mr. Croft, Representative Van Dyke and Mr. Koozer.

Mr. Koozer presented a typewritten brief in support of the oral arguments submitted in behalf of the Pacific Highway Route. (See brief in general files for details). Petitions and letters favoring the adoption of the Pacific Highway connection with the California Highways system were also presented to the Commission. Chairman Banfield concluded the conference by stating that the Commission would give serious consideration to all factors before making its decision.

Mr. C. L. Claycomb, Ashland, came before the Commission in regard to the remodeling of his garage building which is required in connection with the proposed improvement of the Pacific Highway in Ashland. He was accompanied by Mayor T. S. Wiley and Mr. William Briggs, City Attorney. Mr. Claycomb advised that he had an agreement with the former Highway Commission with respect to the remodeling of his building, and he would like very much to proceed with certain development work that he has in mind which would require immediate settlement with the State. The Commission's Attorney advised that all of the right of way for the proposed highway improvement has been acquired except that needed from Mr. Claycomb, and settlement for this particular parcel was deferred until the Commission was ready to proceed with construction due to the fact that the remodeling of Mr. Claycomb's garage building is a rather expensive proposition. The Commission desired full information before passing on the matter, and thereupon instructed the Attorney to render a complete report at the next meeting.

The County Court of Clackamas County, represented by County Judge E. L. Pope, County Commissioners George Randall and C. W. Kruse and County Engineer D. T. Meldrum, came before the Commission regarding its written request for the designation as State Secondary Highways of certain county roads over which extensive log hauling operations are being carried on. Judge Pope advised that Clackamas County is not financially able to keep these roads in a good state of repair, so is asking the State Highway Commission to assume such obligation. He advised that Clackamas County is getting nothing out of the logs that are hauled over the roads, in view of which the County Court feels that it is not fair that the county should be required to maintain them, but rather, that it is the State's obligation to do so. The State Highway Engineer suggested the County might be able to obtain Federal Timber Access Road monies to finance a road improvement that would stand up under such class of traffic. Mr. John R. Sargent, District Planning Engineer of the Public Roads Administration, who was present, suggested that the county file an application for such funds with Mr. F. H. Brundage, Western Log and Lbr. Administrator. He said that if Mr. Brundage approves the project, the Public Roads Administration will proceed with the improvement. The Court indicated that it would act on this suggestion.

Judge Pope also asked the Commission to paint a center stripe on the Boones Ferry County Road. The Commission authorized the Engineer to proceed with such work if men and materials are available, subject to the condition that the county will pay the costs involved.

Hon. George Stadelman, Mayor, The Dalles, Oregon, conferred briefly with the Commission concerning the operation of the Columbia River ferry at The Dalles, but no action was taken thereon.

The Commission recessed at 12:00 o'clock noon for luncheon and reconvened at 1:30 p.m. with the same persons present and participating.

A delegation from Klamath Falls and vicinity appeared before the Commission at this time regarding the routing of the north and south interregional highway through Oregon via the Willamette Highway and The Dalles-California Highway to Klamath Falls, thence to a connection with the California Highway System, rather than via the Pacific Highway throughout. This delegation was headed by Mr. Malcolm Epley, President of the Klamath County Chamber of Commerce, and included the following: Tom Watters, Chairman Roads and Highways Committee; Alfred D. Collier, Charles Stark, Executive Secretary; Hon. William Niskanen, State Representative, Bend; Hon. Marshall E. Cornett, State Senator; County Judge U. E. Reeder, Klamath County; County Judge J. H. Allen, Grant County; and C. S. Robertson, President, First Federal Savings and Loan Bank.

Speaking in behalf of the Klamath Falls route were Mr. Epley, Mr. Collier, Representative Niskanon and Judge Allen. Mr. Epley filed with the Commission a typewritten statement in support of the oral arguments presented. He gave as his thought that both highways under consideration should be built to high standards regardless of which one is selected by the Commission for the interregional highway connection between the two states. He further stated that while they are sincere in their belief that the Klamath Falls Route is the proper one to be designated as an interregional highway, they will be satisfied with whatever decision the Commission reaches. The conference was concluded by Chairman Banfield who stated that the presentation will be taken under advisement along with that made by the Pacific Highway group, and the Commission will make its decision after careful consideration of the arguments presented by both factions, and the engineering facts involved.

A delegation from Linn, Polk and Lincoln Counties, consisting of the following members, came before the Commission and requested the early completion of U. S. Highway No. 20 from the top of the Cascade Range to Newport: A. K. McMahon, County Judge E. S. Arnold and County Engineer Walter W. Larsen of Linn County, and P. M. Robinson, all of Albany; C. A. Mockmore, Corvallis; Andrew J. Naterlin, Mayor of Newport; R. H. Reeves and K. P. Sims of Lebanon; Hon. Max Landon and Archie Hessman of Sweet Home; John L. Graham and Theo. Stansbie of Toledo.

Mr. McMahon headed the group. He pointed out that the Commission's Post War Program, as published in the paper, does not include an appropriation for this road in view of which they are urging changes to insure entire completion at an early date and immediate improvements so as to make the road usable. Other speakers in behalf of the project were Dean Mockmore,

Representative Landon and Mr. Graham.

Chairman Banfield pointed out the large sum of money that is being spent for the improvement of the Pacific Highway East between Halsey and Harrisburg which indicates that Linn County is not being neglected in the matter of fund allocations. He also advised that while the Post War Program, as published, may not mention the Santiam Highway, nevertheless, the Commission is making provision for it in the Forest Highway Program and hopes to be able to set up sufficient funds to oil the entire unoiled section, some fifteen miles in length. The work will be done, he said, when the Forest Highway Funds are released, and it is anticipated that as rapid progress will be made as on any other job.

Mr. Walter DeBoer, log hauler, Eugene, was present and asked the Commission to reinstate his logging permit which was cancelled some time ago for several offences including the by-passing of state weighmaster scales on the McKenzie Highway east of Springfield. Mr. DeBoer acknowledged his mistake and promised not to again violate the rules and regulations if permitted to continue operations. Following discussion Commissioner Schaupp stated his willingness to reinstate Mr. DeBoer's permit. Commissioner Chessman concurred subject to placing Mr. DeBoer on probation. Chairman Banfield also approved reinstatement on the basis that Mr. DeBoer hereafter will recognize and respect the rules, and that his permit will again be revoked if the violations are repeated. The Secretary was instructed to ask the Public Utilities Commissioner to reinstate the permit at once.

At 3:00 p.m. Chairman Banfield announced the following awards of contracts for highway construction work, bids for which were received at the morning session, such awards having previously been approved by the Commission by unanimous vote:

"Hoffman Bridge Rock Production Project on the Coos Bay-Roseburg and Powers Highways in Coos County. The low bidder for this work was Oscar E. Joelson, Eugene, at $23,974.00. The next low bidder was Vernie Jarl, Gresham, at $25,700.00. There were four higher bidders. The Commission has awarded the contract to Oscar E. Joelson at his bid price of $23,974.00."

"Painting the Coos Bay Bridge on the Oregon Coast Highway at North Bend, Coos County. Watson & Morris, Oakland, California, submitted the lowest bid at $27,500.00. A. H. Barbour & Son, Portland, submitted the next low bid in the sum of $42,750.00. The third low and only other bid was that submitted by George C. Clark, Portland, at $47,500.00. The Commission has awarded the contract to Watson and Morris at their bid price of $27,500.00."

" Grade widening on the Myrtle Point-Elbow Point and Cape Sebastian Sections of the Coos Bay-Roseburg and Oregon Coast Highways in Coos and Curry Counties. The bid submitted by John A. Logan, Portland, in the sum of $32,982.00 was the low bid received by the Commission for this work. The second low bidder was Oscar E. Joelson, Eugene, in the amount of $33,784.00. There

were three higher bidders. The Commission has awarded the contract to John A. Logan at his bid price of $32,982.00."

"Coyote Creek-Grave Creek Section of the Pacific Highway in Josephine County; 4.36 miles of grading and bituminous macadam surfacing; bridge construction and furnishing crushed gravel in stock piles. The low bid submitted for this work was that of McNutt Brothers, Eugene, in the sum of $601,501.00. The next low bidder was Guy F. Atkinson, San Francisco, in the amount of $662,230.00. There were ten higher bidders. The Commission has awarded the contract to the McNutt Brothers at their bid price of $601,501.00."

"Painting the Yaquina Bay Bridge on the Oregon Coast Highway at Newport, Lincoln County. The low bid was submitted by Watson & Morris, Oakland, California, in the sum of $22,500.00. The next low bidder was A. H. Barbour & Son, Portland, in the amount of $22,750.00. The only other bidder was George C. Clark, Portland, in the amount of $27,000.00. The Commission has awarded the contract to Watson & Morris at their bid price of $22,500.00."

"Construct a deck truss span bridge over South Santiam River near Sweet Home on County Road No. 1240, Linn County. Birkemeier & Saremal, Portland, submitted the lowest bid for this work in the amount of $20,104.00. Lindstrom Brothers, Portland, were the second low bidders at $27,251.60. There were two higher bidders. This is a county project in which the State is not particularly concerned. The bids were received by the State in behalf of the County Court of Linn County to whom they are being referred for the award of contract and payment for the work."

Messrs. A. K. York, Portland, George Kaseburg, The Dalles and Jess Burres, Condon, were present in the interests of the improvement of the "Cottonwood Grade" section of the Wasco-Condon State Secondary Highway in Gilliam and Sherman Counties.

They were informed by Chairman Banfield that the Commission has already tentatively approved a seven miles section of the Cottonwood Grade for construction in its three year post war program, an amount of $102,000 having been allotted to the work, and it is the intention of the Commission to get as extensive an improvement as is possible with the money.

The Engineer requested authority to conduct a location survey of the Scholls-Newberg section of the Hillsboro-Silverton Secondary Highway which is scheduled for improvement in the Commission's post war program. He estimated the cost of the survey at $4,000.00. The Commission approved the request unanimously.

The Commission approved and signed the following agreements, etc.:

Easement Agreement with William Patapoff covering slope easement for construction of sidewalk at Halsey.

Agreement with U. S. War Department terminating lease of Pilot Butte State Park.

Lease Agreement with U. S. Weather Bureau covering property heretofore leased to the Civil Aeronautics Administration in Josephine County.

Petition to secure vacation of certain city streets in the Town of Reedsport.

Revised Agreement with U. S. Bureau of Indian Affairs covering improvement of Sprague River Road in Klamath County.

Revised Easement Agreement with the U. S. Bureau of Reclamation covering construction of the Klamath Falls-Malin Highway across certain Government land, in Klamath County.

Lease granting to U. S. War Department authority to use certain state-owned land adjacent to the Columbia River Highway at The Dalles-Celilo Canal.

Agreements with George B. Terhune, Howard J. Miller and Leona Miller et al rescinding previous agreements dated May 11, 1944, concerning sign restrictions on property acquired in Marion County for highway purposes.

Contract with Lebeck and Son, Portland, covering moving of bank building and a small frame structure in the Town of Gold Beach.

Agreement with H. T. Burns covering landscaping on Salmon River Highway in front of Burns' premises near Rose Lodge.

Modification of Agreement with Public Roads Administration covering snow removal on Mt. Hood Highway near Parkdale.

Quitclaim Deed conveying 3.5 acres of land in Marion County to Arthur C. White, in order to quiet title.

Permit authorizing A. F. Elkins et al to install a tile drain across the Pacific Highway West near Camp Adair.

Agreement with Buzard-Burkhart Pine Company covering the truck hauling of logs across the right of way of the Fremont Highway at approximately M.P. 142.60.

The meeting adjourned at 4:00 p.m.

T. H. Banfield
Chairman

State Highway Engineer

Arthur H. Schaupp
Commissioner

MAY 15

Secretary

W. L. Thurman
Commissioner

Portland, Oregon, May 29, 1945

The State Highway Commission met in regular session at 9:00 a.m. in the Stock Exchange Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Commissioner A. W. Schaupp arrived at 10:30 a.m.

Bids, as follows, for highway construction work were opened and read in conformity with previously published notice, following which Chairman Banfield announced that awards of contracts would be made at 3:00 p.m. in the same room.

CENTRAL OREGON HIGHWAY IN DESCHUTES COUNTY
YOUNGS RANCH-BROTHERS ROCK PRODUCTION PROJECT

T. W. Thomas, Portland	$19,810.00
J. N. & M. J. Conley, Portland	20,970.00

Commissioner Schaupp arrived at this juncture.

A delegation from Columbia County consisting of the following came before the Commission in the interests of the further improvement of the Lower Columbia River Highway: Fred Herman, Rainier, principal spokesman; County Judge Roy Tarbell and County Commissioners William Pringle, Sr. and J. N. Miller; Dr. Kent Magruder and Mrs. Grace Magruder, Clatskanie; E. H. Condit, Clatskanie; V. L. Shepard, Clatskanie, representing Clatskanie Kiwanis Club; E. A. Britts, Rainier, William Reid, Fred McKinley and V. D. Walker, representing the Rainier Commercial Club.

Mr. Herman stated that according to reports, the Post War Program as adopted by the Highway Commission does not contain work in Columbia County and their object in appearing before the Commission at this time is to urge reconsideration by the Commission and the allocation of a substantial portion of the funds available to this county. He particularly urged the further improvement of the lower Columbia River Highway from the end of the present improved section to Astoria. He presented a letter from the Astoria Chamber of Commerce endorsing the request.

Others speaking in behalf of such improvement were Mr. Condit, Mrs. Magruder, Mr. Walker and Mr. Miller.

Commissioner Chessman inquired whether or not the group has a preference of improvements that should be undertaken first in the event that the Commission could not approve the entire project. The following were suggested by the group:

1. Reconstruction of the Prescott Hill Section at Little Jack Falls.

2. Improvements of approaches to Rainier.

3. Elimination of "bottle-neck" condition in Clatskanie.

Chairman Banfield concluded the conference by stating that the

Commission is not in position to act today, but will take the request under advisement.

Messers. Charles McCormick, O. M. Bagley and E. G. Whipple, piling operators, came before the Commission with regard to the Commission's new regulations covering the granting of permits to transport piling over State Highways, particularly the ruling that prohibits such movements for a greater distance along a highway than from the point where the loads enter the highway to the nearest railroad loading point.

Following discussion Chairman Banfield stated that the Commission is not trying to work a hardship on the piling industry, but simply is endeavoring to control the operations so as to eliminate some of the hazards that the transportation of such long loads create. The Commission, he said, wants to help the industry in every way that it can, but it also has a duty to protect the general public that it cannot overlook, and is asking the cooperation of the industry in that respect. He suggested discussion of the matter with the Engineer and the Secretary with a view of arriving at a solution that would be satisfactory to all concerned. The group agreed to such a meeting which was thereupon scheduled during the luncheon recess. (Final action on this matter was taken by the Commission during the afternoon session when revised rules were adopted. See ahead for details.)

The Commission by unanimous vote approved the minutes of the meeting held on April 16 and 17, 1945, as corrected.

The State Parks Superintendent was present and discussed with the Commission the following Park Matters:

1. Report on Champoeg State Park: The Park Superintendent advised receipt of a letter from Mr. Lancaster Pollard, Superintendent of the Oregon Historical Society, expressing his views and ideas with respect to the development of this park, and in particular, giving as his opinion that all historical activities should be centered in Portland. (See letter dated May 7, 1945, in General Files for details.) The letter was read aloud by the Secretary, and the findings therein were approved by the Commission unanimously, following discussion.

2. Report on proposal to reconvey to Hood River County a portion of certain property that the county deeded to the State for Park purposes: The Park Superintendent advised that the tract in question, which contains 80 acres, is of no value for State Park purposes. He recommended that it be deeded back to the county for sale to an adjacent property owner who wishes to use it for farming purposes. He explained that the Commission could not deed the property to the farmer direct because the deed from the county restricts the use of the property for State Park purposes only. The

recommendation was approved by the Commission by unanimous vote. The Chief Counsel was instructed to prepare a deed of conveyance and to include therein, subject to the County Court's approval, provision that the property shall not be used for certain purposes such as road houses, beer parlors, dance halls, etc.

3. Request of Arthur Schneider, Madras, to obtain a supply of cinders from Round Butte, located in The Cove State Park, Jefferson County: The Park Superintendent advised that this park is under lease from the United States Government for recreational purposes, and in his estimation, it is not within the province of the Highway Commission to grant Mr. Schnieder's request. Moreover, the place where Mr. Schneider wishes to remove the cinders is a view point, and excavation thereon would detract from the scenic view. He recommended that Mr. Schneider's request be denied. The Commission approved the recommendation unanimously.

4. Proposed Park adjacent to the Pacific Highway East two miles north of Oregon City: The Park Superintendent presented an offer from the D. P. Thompson Company, Portland, in behalf of the owners, to sell to the State 26 acres of land bordering this highway, for the sum of $20,000.00. The Commission refused the offer by unanimous vote, however, indicated that it might accept the property as a gift to the State if the conditions of such gift are not too severe.

5. Proposed exchange of a portion of Ben & Kay Dorris State Park in Lane County: The Park Superintendent reported that a Mr. W. S. Hook, California, owns land adjoining this park and would like to obtain some frontage on the McKenzie River that is owned by the State in exchange for which he is willing to deed to the State a portion of his property. The Commission considered such exchange of property inadvisable, particularly in view of the fact that the Park was presented to the State as a gift for park purposes only, and accordingly disapproved the exchange.

6. Gift of land at Bonneville: The Park Superintendent advised that in connection with Bonneville operations the Federal Government acquired certain acreage that formerly belonged to the late Sam Hill and it now appears that the land no longer is needed for governmental purposes, so the Government has deeded it to the State as a gift. He recommended acceptance of the deed because of the value of the property from the State Park's standpoint. The Commission approved the recommendation unanimously.

7. Progress report on Myrtle Tree Lane development, Coos County: The Park Superintendent advised that not much progress has been made on the project due to labor shortage. As a matter of fact there is only one man working at the present time, and his operations are confined to certain clearing work on the highway right of way.

The Assistant Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements. He submitted a list of such properties together with the offer that he recommended in connection with each parcel. After careful consideration of each item, the Commission approved the request and by unanimous vote adopted the following resolution with regard thereto.

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

GARDNER RANCH-BERGER RANCH SECTION-WOLF CREEK HIGHWAY

Plus fencing, if disturbed		
	$ 27.50	Cozad

Foot Note: (*)

In connection with settlement #9682 with H. L. Claycomb for right of way in Ashland, the Commission approved payment of $25,000.00 cash to complete this transaction as the result of a careful inspection of the premises by Department Engineers and members of the Right of Way Department. According to a joint report such settlement is advisable because the state would then be relieved of the necessity to secure governmental priorities and could avoid the difficulties and inconveniences of obtaining critical materials that are needed in connection with the work. It was thought best to let Mr. Claycomb handle his own project. The Commission ordered that a sufficient amount of the purchase price be withheld from Mr. Claycomb until such time as he has completed his operations and cleaned up the premises to the satisfaction of the Engineer.

The Assistant Attorney also requested authority to condemn certain parcels of real property that he has been unable to acquire by negotiation. He presented a list of such properties together with the offers that he recommended in condemnation, as follows:

STEIWER HILL-ALBANY SECTION OF PACIFIC HIGHWAY EAST

File Number	Name of Owner	Recommended Offer
11764	Ben T. Sudtell	$2,000.00

BERGER RANCH-BARNES ROAD SECTION OF WOLF CREEK HIGHWAY

5203	Adele E. Guerber	$7,000.00

After discussion the Commission approved the request and the offers. The following resolution with regard thereto was adopted by the Commission by unanimous vote.

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accomodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways or for any other purpose designated by the United States; and

WHEREAS, by official act of the State Highway Commission there has been located and established a state highway which is known as the Wolf Creek Highway and otherwise designated as State Highway No. 47; and

WHEREAS, said highway between the Davies Overcrossing in Washington County and the westerly terminus of said highway in Clatsop County has been constructed, but the easterly section of said highway, which begins at the said Davies Overcrossing and terminates at the Multnomah County line, is not yet completely constructed; and

WHEREAS, in connection with and for the completion of said highway it is necessary that real properties be acquired for right of way and other purposes; and

WHEREAS, on the third day of April, 1941, the Highway Commission adopted a resolution by which, among other things, the Commission found, declared and therefore authorized that for the purpose of making possible a highway adequate for the needs of the traveling public there should be acquired in addition to the necessary rights of way all right of access to said highway except at such places as might be agreed upon by the Highway Commission and the property owners; and

WHEREAS, The Commission does now find and declare that the real properties hereinafter described on the attached sheet are required and are necessary for use in connection with the permanent construction, improvement, and maintenance of said highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare that the parcels of real property described on the attached sheet are each and both necessary and needed for and in connection with the construction of the said Wolf Creek Highway between Davies Overcrossing and the Multnomah County Line. The properties the acquisition of which hereby is authorized and ordered and the names of the owners thereof are shown on the sheet attached hereto and by this reference made a part of this resolution. (*)

2. The Commission does further find and declare that in addition to the acquisition of the real properties described on the attached sheet it is necessary, in order to make possible the proper construction and maintenance of a highway thereover, and that there be acquired all rights of access from abutting properties to the said parcels of real property and the highway which is to be constructed thereover, except at such points or places as may be agreed upon by the respective owner or owners and the State Highway Commission. (*)

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested, authorized, and directed to attempt to agree with the owner or owners or with the tenants or persons in possession, if there be any, of s id parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and is authorized and directed to acquire, in addition to title to the said described parcels of land, all rights of access thereto except at such points or places as may be agreed upon by the respective owner or owners and the State Highway Commission, and in the event that no satisfactory agreement or agreements can be reached, then it is hereby further ordered that the said J. M. Devers, as Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property, and all rights of access thereto except at such points or places as may be agreed upon by the respective owner or owners and the State Highway Commission.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said described real properties, or either of them, or any interest therein, the said J. M. Devers, as Chief Counsel to the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. This resolution shall be entered in full in the minutes and records of this Commission.

(*) Foot Note:

The detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 53, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to be the same extent as if copied in full herein.

MAY 29 1945

The Assistant Attorney presented an offer from Cecil J. Burkhart to pay the sum of $1,200.00 for property that the Commission acquired from a Mr. Quattlebaum near Albany, and from which property topsoil material was obtained for the Albany overcrossing project. He recalled that the Commission advertised this property for sale in Salem on May 1, 1945, but the bids received were rejected because they were considerably under the estimated value of the property. The offer submitted by Mr. Burkhart, he said, is only $150.00 under the appraised value of the property, and is, therefore, not too much out of line. He recommended acceptance of the offer in view of the fact that the property is of no value for State Highway purposes. The Commission approved the recommendation by unanimous vote.

The question of continuing the lease rights given to Mr. Paul Mumpower in 1944 covering the use of State property adjacent to the Columbia River Highway just east of the Troutdale bridge had the attention of the Commission. The Engineer advised that the property will not be needed for highway purposes for about two or three years, so from that standpoint, it would be satisfactory to extend Mr. Mumpower's lease; however, he pointed out that a traffic hazard is created when automobiles park at Mr. Mumpower's building, which condition should be given consideration in deciding the question. After discussion motion was made by Commissioner Chessman that the lease time be extended for one year subject to the condition that Mr. Mumpower will pay rental at the rate of $25.00 per month. The motion was seconded by Commissioner Schaupp and carried by the unamious vote of the Commission.

The Commission discussed the request of the Northwest Marine Iron Works for permission to use additional state-city owned land along Front Avenue, Portland, in connection with the servicing of ships. The request was approved by the Commission subject to the condition that the Company will pay for the privilege at the same rate that it is now renting adjacent property. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

> WHEREAS, The City of Portland, with the consent of the Oregon State Highway Commission, granted to the Northwest Marine Iron Works permission to moor vessels in a specified area along the seawall in the City of Portland; and
>
> WHEREAS, said Northwest Marine Iron Works has applied to the City for permission to use an additional area adjacent to the area over which applicant now holds a permit, such use to be for the mooring of vessels; and
>
> WHEREAS, the City by Ordinance No. 81026 has granted such application subject to the consent of and approval by the Oregon State Highway Commission; and

WHEREAS, the State Highway Commission desires to continue and if need be supplement its cooperation with the City of Portland in all matters which tend to promote public welfare or contribute to the war effort;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present, as follows:

1. That the State Highway Commission does hereby consent that the City of Portland, subject to the approval of the Commissioner of Public Docks, may grant to the Northwest Marine Iron Works, sometimes referred to in Ordinance No. 81026 as the grantee, a revocable permit to utilize for the purpose of servicing vessels, in addition to the area previously granted for such purpose to the grantee by Section 22-4501 of Article 45 of the War Code of the City of Portland, the area described in said ordinance.

2. This consent and approval is given subject to the conditions set out in said ordinance and is given on the further condition that the schedule of rentals fixed in the original grant or ordinance shall prevail and apply with respect to the additional area, and that rentals paid and collected for such additional use shall be paid and applied as are other rentals under the agreement between the State and the City concerning the Front Avenue Project.

Consideration was given by the Commission to the sale of certain property situate adjacent to the Pacific Highway just north of the City of Medford, described as portions of Lots 1 and 2, Block 5, Berryvale Addition to Medford. The Assistant Attorney advised that the property is worth only about $140.00 and there are possibilities that the prospective purchaser will maintain a service station thereon. The Commission deferred a decision in the matter pending study and recommendation by the Engineer. The Commission adopted such procedure as its policy to be followed hereafter in matters of this kind.

The Assistant Attorney requested instructions regarding the sale of an abandoned gravel pit containing 1.48 acres of land situate adjacent to the Columbia River Highway in Umatilla County. He advised that the property is of no value for highway purposes and that its appraised value is only $10.00. He recommended sale of the property at such a figure. The Engineer concurred in the recommendation. The Commission approved the recommendation unamiously and thereupon signed a deed conveying the tract to the adjacent property owner, Mr. Stephen A. Moore.

The Commission also approved and signed an agreement with a Mr. H. A. Dryer extending for a period of one year Mr. Dryer's lease of certain state owned property situate adjacent to the Upper Columbia River Highway between Tunnel Point and Bridal Veil, Multnomah County, which property was acquired by the State from the Union Central Life Insurance Company and Mr. J. R. Gilbaugh. The Commission's action was by unanimous vote upon motion by Commissioner Schaupp which was seconded by Commissioner Chessman.

The Commission recessed for luncheon at 12:00 o'clock, noon, and reconvened at 2:00 o'clock p.m. in the same room with the same persons present and participating.

The Commission discussed the adoption of an inter-regional highway connection between the states of Oregon and California, which matter was deferred from the previous meeting. Commissioner Chessman stated that it is realized that each route under consideration, Pacific Highway route and the route through Klamath Falls, has advantages over the other but in his estimation the Pacific Highway route has the better of the argument in view of the fact that the Commission is going to recognize the Klamath Falls route as an alternate route and plans to reconstruct it to modern standards. He stated his preference for the Pacific Highway as the inter-regional highway connection without any prejudice or detriment to the other route. The Klamath Falls route, he said, has advantages too, and in his opinion the Highway Commission is obligated to make this highway a good, fast highway regardless of whether or not it is designated as an inter-regional highway.

Chairman Banfield stated that he has analyzed the arguments presented at the previous meeting by the proponents of both routes, and has also studied the report of the inter-regional highway committee appointed by the President, with the result that, in his opinion, U. S. Highway No. 99 (Pacific Highway) meets the requirements better than the other route. It was his thought that the selection of the Pacific Highway route as the inter-regional highway connection between the two states will not handicap the other route in any way because the Commission is obligated to improve the route that passes through Klamath Falls to high standards of construction. He pointed out that the States of California and Washington have both gone on record favoring the selection of the Pacific Highway as the route of this inter-regional highway, moreover the Presidential Committee also recommends it, so in his estimation the State of Oregon should concur.

Commissioner Schaupp made the following statement:

"I am favoring the Klamath Falls Route rather than the route down the Pacific Highway. I do this because I think it would benefit the State of Oregon as a whole. It is a faster route, less expensive route, and regardless of designation by the State Highway Commission or the highway public, it ultimately will become the inter-regional highway by usage. I am still of the opinion that this route is the logical route for the state inter-regional highway and that it would be of benefit to the state and would be a benefit especially to Eastern Oregon and the state as a whole. I also realize the importance of the Pacific Highway and its military value and access to the ocean. I don't want to detract, but still think that the Klamath Falls route is the logical route for the inter-regional highway, however, in view of the attitude of the other members of the Commission, I am yielding to their ideas if the state would benefit and I make the selection unanimous."

Replying to Commissioner Schaupp's remarks Chairman Banfield gave as his thought that it is not only the state's highway program but also the program of the Federal Government that must be given consideration in the settlement of this question because of the Federal monies that Oregon is to receive.

He also said that he did not believe that the State of Oregon would make a mistake in selecting the Pacific Highway route in view of the fact that the State of California has selected such route and the Federal Committee has done likewise.

Commissioner Schaupp then gave as his thought that, if the Pacific Highway route is adopted by this Commission, the Klamath Falls route should be designated as an alternate inter-regional highway, at least it should be so carried on highway maps. Action on this feature was deferred.

Chairman Banfield made the following statement with respect to his position on the selection of the inter-regional highway:

"The completion to high standard road construction of both highways 99 and 97 are necessary for the proper development of the highway system in the State of Oregon, and the naming of either one of these highways as the inter-regional highway does not give its completion advancement over the other.

"The Federal Government has made no funds available for an inter-regional highway system. So far it is merely in the talk stage. If and when tney do make funds available, the only difference between the inter-regional highway and other primary state highways will be the additional two feet in width of pavement and five feet of additional shoulders on each side. In other words, a primary state highway in the State of Oregon will have a 22' pavement and 5' shoulders on each side. Whichever highway is designated as the inter-regional highway will have a 24' pavement and 10' shoulders on each side.

"It is our opinion that the name inter-regional highway will not advance nor detract from either highway going north or south, and inasmuch as the Committee for inter-regional highways, as set up by the Government, and the State Highway Commission of California have chosen Highway No. 99 as the inter-regional highway, we concur in their choice."

Commissioner Chessman stated that he subscribes to the statement of Chairman Banfield.

The following motion was thereupon offered by Commissioner Chessman who moved its adoption:

"I move that the Oregon State Highway Commission recommend the adoption of U. S. Highway No. 99 (Pacific Highway) as the interstate highway route with full recognition of certain advantages of the Klamath Falls route and without any prejudice against its ultimate development to interstate standards." Chairman Banfield seconded the motion. Commissioner Schaupp stated that in view of the attitude of the other Commissioners, he, too, casts his vote in favor of the motion in order to make the decision unanimous, notwithstanding that for reasons previously stated (see statement on preceding page) he still is of the belief that the Klamath Falls route is the logical route for this inter-regional highway. Chairman Banfield thereupon declared the motion carried by unanimous vote by the Commission.

Consideration was given by the Commission to the adoption of a post war program and matters pertaining thereto, in conformity with ideas expressed at the previous meeting. The Engineer advised that as a result of a meeting held with the County Courts subsequent to the Commission's meeting on May 14, 1945, it has been necessary to make a few changes in the tentative Secondary Federal Aid Highway program that the Commission approved at such meeting, and there is likelihood that additional changes will have to be made later. He described the changes already requested by County Courts. The Chief Counsel presented a standard form of resolution that the Counties are adopting to formally assert their approval of the Secondary Highway System as presently prepared.

After discussion during which the Commission approved the changes mentioned by the Engineer, and the form of County resolution presented by the Chief Counsel, the following resolution with respect to the entire proposed 3 year post war program was adopted by the Commission by unanimous vote upon motion by Commissioner Chessman which was seconded by Commissioner Schaupp, it being understood that changes can be made later on if found necessary and desirable, and that surveys shall not be undertaken nor right of way options secured until all matters pertaining to a particular project have been cleared:

WHEREAS, the Congress of the United States by the enactment of Public Law 521, 78th Congress, Second Session, which act is known as the Federal Aid Highway Act, has made available for postwar highway construction and improvement under the provisions and pursuant to the conditions therein specified a definite sum or definite sums of money, a portion of which has been allocated and appropriated to the State of Oregon; and

WHEREAS, by the provisions of said act funds have been made available for necessary surveys, preparation of plans, and the acquisition of necessary rights of way; and

WHEREAS, pursuant to said act there has been apportioned to the State of Oregon for the first postwar year Oregon's share or apportionment of the funds provided by the Congress of the United States; and

WHEREAS, it is provided further that "As soon as the funds for each of the post-war fiscal years have been apportioned, the Commissioner of Public Roads is authorized to enter into agreements with the State Highway Departments for the making of surveys and plans, the acquisition of rights-of-way, and the post-war construction of projects. His approval of any such agreement shall be a contractual obligation of the Federal Government for the payment of its pro rata share of the cost of construction"; and

WHEREAS, pursuant to regulations promulgated by the Public Roads Administration within the meaning of said act, it is provided that the approval by the Public Roads Administration of survey projects shall constitute a contractual obligation on the part of the Government to reimburse the State for the costs of right of way if and when the project involved is placed under construction; and

WHEREAS, it is further provided that said federal funds shall be available for (a) projects on the Federal Aid highway system; and (b) projects consisting of principal secondary and feeder roads, including farm-to-market roads, rural free delivery mail and public-school bus routes, either outside of municipalities or inside of municipalities of less than five thousand population; and

WHEREAS, it is further provided that the system of secondary and feeder roads must be the result of selections made by the State Highway Department in cooperation with the county courts of the several counties of the State; and

WHEREAS, for the purpose of ascertaining the needs of the State as a whole and of the counties in particular, the Commission visited each county and conferred with the county and municipal officials and made a record of their respective recommendations; and

WHEREAS, after careful study and consideration the Commission has prepared a program for postwar construction and has submitted the same to the Commissioner of Public Roads with the recommendation that said program be adopted; said program consists of projects on primary Federal Aid highways, proposed secondary Federal Aid highways, and projects on the primary Federal Aid system in municipalities of more than five thousand population, which said program is later in this resolution properly identified; and

WHEREAS, in conformance with said act, the Commission has in cooperation with the said counties of the State prepared a system of secondary and feeder roads, including farm-to-market roads, rural free delivery mail and public-school bus routes within and without municipalities of less than five thousand population, which said system is later in this resolution properly identified; and

WHEREAS, likewise in conformance with said act, the Commission has fixed and determined the boundaries of urban areas, as said term is defined in the act, the record of which said determined boundaries is hereinafter identified and made a part hereof; and

WHEREAS, it is the purpose of the Commission at this time to dispose of and impress upon the record the Commission's action and purpose with respect to:

(a) the preparation of a postwar program and the submission of the same to the Commissioner of Public Roads for approval;

(b) the preparation of a proposed system of secondary and feeder roads and the submission of the same to the Commissioner of Public Roads for approval;

(c) authorization and direction to the State Highway Engineer with respect to the preparation of necessary surveys and plans and the writing of descriptions for required real properties necessary for rights of way and other highway purposes;

(d) instructions and directions to the Chief Counsel with respect to the acquisition of real properties required for rights of way and other highway purposes;

(e) authorization for the payment of the cost incident to the making of new surveys and the completion of uncompleted surveys;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. That the highways and highway projects listed on Exhibit A, which is attached hereto and by this reference made a definite and explicit part of this resolution, shall constitute the postwar highway program for the State of Oregon, and its submission to the Commissioner of Public Roads for approval and adoption is hereby authorized.*

2. That the state highways, county roads, and city streets listed on Exhibit B attached hereto and by this reference made an express and explicit part of this resolution shall constitute the state highways, county roads, and streets proposed for incorporation in a system of principal secondary and feeder roads as required by said act, and the submission of the same to the Commissioner of Public Roads for his approval and adoption hereby is authorized.*

3. That the Engineer be and he hereby is authorized to submit to the Commissioner of Public Roads for approval as to surveys and plans the highways, sections of highways, or projects listed on Exhibit C, which is hereto attached and by this reference is made a part hereof.*

4. That within the meaning and scope of said act the boundaries of the following cities of the State of Oregon, to wit: Portland, Corvallis, Eugene, and Coos Bay, have been extended beyond the corporate limits of said cities, which extension of boundary lines and the area included therein are correctly disclosed on maps of said cities,

which maps are on file in the permanent records of the Highway Commission at Salem, Oregon, and copies of which, in a group of four, marked Exhibit D, are attached hereto and made a part hereof.*

5. That additional state funds hereby are appropriated for the payment of the additional cost of surveys, as shown on said Exhibit C, in the respective amounts therein set out and in a total amount of $105,050.00, which total amount is in addition to the sum of $196,725.00 of state funds heretofore authorized.

6. That upon approval by the Commissioner of Public Roads of the said surveys, or upon the approval of the survey for any project which is a part of the State's postwar program, the Engineer is authorized and directed to make such survey or surveys or complete any uncompleted survey and to complete final plans and specifications, and is further authorized to prepare correct descriptions covering all real properties required for use in connection with said projects, or any one thereof, and deliver to the Commission's Chief Counsel correct copies of such real property descriptions.

7. The several counties of the State have approved the highways, roads, and streets set forth in Exhibit B as the highways, roads, and streets to be incorporated in and to constitute the system of secondary and feeder roads contemplated in said act, and have recommended that said system be submitted to the Commissioner of Public Roads for approval. In this connection it is ordered that the official action of each county evidenced by resolution, originals of which have been filed with the Commission, be preserved in the files and records of the Commission at Salem, Oregon.

8. Upon approval by the Commissioner of Public Roads of said surveys as provided in said act and the preparation of proper right of way descriptions and the delivery of correct copies thereof to the Commission's Counsel, then said Counsel shall proceed in the regular manner to procure options covering all real properties the acquisition of which is necessary and required for each and all of said projects and submit said options to the Commission for acceptance, rejection, or other appropriate action. In instances where real properties cannot be acquired by agreement such fact and condition shall be reported to the Commission for consideration and appropriate disposition.

9. That whenever the survey of any one or more of said projects has been completed an accurate account of the cost shall be prepared and a copy thereof presented to the Commissioner of Public Roads, with a request for appropriate and proper reimbursement if the project involved is one in connection with which the State is entitled to reimbursement.

10. That when real properties needed for said program, or any part thereof, have been procured a statement of the cost incident thereto, with necessary supporting and explanatory data, shall be sub-

mitted to the Commissioner of Public Roads and reimbursement requested, if such expenditure is one in which, under the provisions of said act, the Government is authorized to participate.

11. This resolution and official action may be modified and/or amended by the Commission when in its discretion such action is in the public interest; provided, however, that any modification or amendment before becoming effective shall be submitted to the Public Roads Administration for approval within the meaning of said Federal act.

12. This resolution shall be entered in the minutes and records of the Commission as of the twenty-ninth day of May, 1945, and a duly certified copy thereof delivered to the Public Roads Administration.

---

*(The exhibits mentioned in the above resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Item No. 5, under the heading "Special Matters" and said exhibits by this reference are made a part of this minute entry to the same extent as if copied in full herein.)

The Chief Counsel reported receipt of a request for certain concessions from attorneys employed by Contractor Homer G. Johnson in connection with Mr. Johnson's claim for extra compensation arising out of his contract No. 2390 for construction of the Siletz-Toledo Section of the Siletz Secondary Highway in Lincoln County. He explained that one of the things requested is that the case be tried by the court rather than before a jury, and the other is the stipulation of certain facts. He said that he has no objection to the waiver of the jury but he could not consent to the stipulation procedure. He recommended that both requests be denied. The Commission approved the recommendation unanimously upon motion of Commissioner Chessman, which was seconded by Commissioner Schaupp.

The Commission approved and signed a "Release of Claim" acknowledging receipt of payment in full of its claim against a Mr. J. S. Maden for damaging a bridge on the Pacific Highway East near Albany.

The Engineer reported on the cost to improve the Santiam Highway at Crabtree Corner so as to eliminate the need for traffic to stop before entering the highway at this point. He advised that the Crabtree Road (Albany-Lyons Secondary State Highway) carries a large volume of log-hauling traffic destined for Albany, which should be permitted to move through the intersection without stopping but for the fact that it would create a hazardous condition due to the restricted horizontal clearance obtaining on a small bridge located on the Albany "leg" of the "wye" junction. He recommended an expenditure of about $6,000.00 to correct the situation by widening the bridge and the roadway connection used by Albany-bound traffic. An arrangement of this nature, he said, will relieve all west-bound traffic from

stopping at this intersection and will offset the installation of a flashing beacon which could not be installed, in any event, until after the war because of the shortage of men and material; moreover, the traffic light would not solve the problem. It was the opinion of the Commission that the expenditure is justified if it will eliminate a traffic hazard, which apparently is the case in this instance, and in view thereof the Commission approved the project by unanimous vote.

The Engineer reported the results of test runs made with a passenger-carrying vehicle, consisting of truck-tractor and semi-trailer, over certain highways. He advised that the overall length of the combination is fifty-five feet three inches and that the vehicle had difficulty in traversing some of the turns without taking up more than one-half the traveled roadway, especially in cities and towns, and at such locations constituted a hazard to other traffic. He further advised that the equipment does not meet the Oregon statutory requirements as to size and recommended in the interests of public safety that its use on Oregon highways be denied. The Commission approved the recommendation unanimously and ordered that the Oregon Motor Stages, which owns the equipment, be informed of the action taken.

A request from the Klamath Falls City Planning Commission that the Engineer be authorized to make certain investigations of future highway and street projects in Klamath Falls that would affect the city's plans for the development of a Veterans' Park and its plans for a new city-county jail had the attention of the Commission. The Engineer reported on preliminary discussions of this matter with the city officials and recommended that he be authorized to make a reconnaissance survey of the project, which he estimated would cost about $1,000.00. The Commission approved the request by unanimous vote upon motion by Commissioner Chessman, which was seconded by Chairman Banfield.

The Commission approved an expenditure of $300.00 to rebuild a footbridge over Prairie Creek in the town of Enterprise, it appearing to the Commission that it is the State's obligation to provide such facility in view of the fact that the State demolished the old structure as unsafe when the street on which the bridge is located was designated a state highway route.

The Commission discussed with the Engineer the bids received at the morning session for performance of highway construction work, and as a result thereof the following action was taken by unanimous vote of the Commission:

> The contract for the Young's Ranch-Brothers Rock Production Project was awarded to the low bidder, T. W. Thomas, Portland; the contract for the Crater Lake-Fort Klamath Timber Access Road Project was awarded to the Babler Bros., Portland, the low bidder; bids received for the Root Creek-Siletz surfacing project were referred to the Engineer with authority to award the contract to the low bidder, E. C. Hall Co., Portland, when approved by the Public Roads Administration; Jefferson Junction Overcrossing contract was awarded to Linstrom Bros., Portland, the low bidder; contract for the construction of bridges on the Steiwer Hill-Albany Section of the Pacific

Highway East was awarded to the low bidder, C. J. Montag & Sons, Portland; Contracts for construction of both north unit and south unit of the Steiwer Hill-Albany project were awarded to the low combination bidder, Warren Northwest, Inc., Portland, based on the use of tar.

At 3:00 p.m. Chairman Banfield publicly announced the awards in conformity with the above action.

The Engineer reported the result of a conference held during the luncheon period with representatives of the piling industry regarding rules and regulations to control the truck hauling of long logs and/or piling over State highways. He recommended adoption by the Commission of the following regulations covering the transportation of logs, poles and/or piling over the highways under the Commission's jurisdiction, advising that representatives of the industry are in accord therewith:

LOGGING REGULATIONS

1. That for the duration of the war permits will be granted for the movement of logging vehicles and loads of the maximum length that may be driven at all times on the right hand side of the center line of the traveled way, regardless of the intended use of the logs. Test runs are to be made to determine said maximum lengths.

2. That flagging at point of entry and point of exit be eliminated except when right turns cannot be made without encroaching in the opposing traffic lane and except where the character and amount of traffic or the impairment of sight distance makes flagging necessary in the protection of the general public (including left turns).

3. That permit extensions be granted or new permits be given for the movement of long logs from the woods to the mills, for such logs as were cut before June 1, 1945, provided that the Engineer will determine the amount and character of flagging required to provide reasonable protection to the public.

That such permits be granted or extended to October 1, 1945. If any operator cannot move the logs during such specified period he will be required to furnish written evidence to the Secretary of the Highway Commission as to why he cannot move the logs now cut during such period, and to request such additional time as he considers necessary to move them. In no case will such permits be given for a longer period than to January 1st, 1946.

4. Requests for permission to haul long logs when the vehicle and load cannot stay on the right hand side of the center of the pavement or traveled way without flagging highway traffic will be denied as being inimical to the public interest

and public safety.

PILING REGULATIONS

1. Test runs shall be made to determine whether the vehicle and load can stay on the right hand side of the center line of the pavement or traveled way at all times. When this can be done, flagging will not be required except at point of entry or exit to the highway when conditions of traffic or limited sight distance make it necessary for public safety. When the vehicle and load cannot stay on the right hand side of the center line of the pavement or traveled way, flagging will be required.

2. The hauling of piling will be permitted to the most feasible dumping site in river or bay.

3. The hauling of piling will be permitted to specific sites for use in dock or bridge construction and the like.

4. When the piling is to be shipped by rail, permits will be granted for the movement along the highway for not to exceed 15 miles beyond the nearest railroad siding except in specific cases of real emergency.

Following discussion the Commission adopted the regulations by unanimous vote and ordered that hereafter permits covering movements of such commodities shall be prepared in conformity with such regulations.

The Commission discussed briefly a request from the City of Monmouth for the widening of U. S. Highway No. 99W (present route) for a distance of three blocks, East Street and Broad Street, in Monmouth where it is alleged a "bottleneck" and serious hazardous condition exists because of the narrowness of the present roadway. The Engineer was instructed to render a written report on this matter for discussion by the Commission at its next meeting.

The Secretary presented a request from the City of West Linn for the oiling of the shoulders along the Oswego Highway through this town. The Engineer advised that this is a meritorious project which is estimated to cost about $5000. He suggested, in view of the shortage of labor and the restrictions on asphalt, that the request for immediate undertaking be denied and that the City be informed that the prospects of securing the improvement before the war is over are not encouraging. The Commission approved the suggestion and so ordered.

A letter was presented from Mr. Roy A. Gage, Portland, requesting the improvement of the Slaven Road intersection with S.W. Barbur Blvd., Portland, where, he alleges, a serious traffic hazard exists. The Engineer estimated the cost of the project at $1200. Action on this matter was deferred by the Commission until the next meeting. The Engineer was instructed to make a written re-

port to the members of the Commission in the meantime.

Similar action was taken by the Commission on a request from Mr. S. C. Burto . Gold Beach, Oregon, publisher of the Curry County Reporter, for an extension f the proposed improvement of the Oregon Coast Highway through Gold Beach so as to pass the Gold Beach High School.

A request was presented from the City of Newberg for the widening of certain city streets, viz., River Street from First Street to Fourth Street, and Fourth Street from River Street to Wynooski Street, route of the Hillsboro-Silverton Secondary Highway, so as to relieve prevailing traffic congestion. The Commission ordered a written report on the matter from the Engineer for discussion at the next meeting.

The Engineer presented a list of surveys that he has ordered since the last meeting of the Commission and asked the Commission to confirm them for the records. After discussion the Commission by unanimous vote approved the following surveys and authorized the Engineer to make such surveys on various sections of the highways in this state, which said sections of highways together with their identifying survey numbers and the amounts authorized and allocated for such survey expenditures are as follows:

Type of Survey	Prefix No.	County	Section and Highway	Authorization
Special	6-1441	Coos	Determine practicability of an overflow channel from Hall Lake on the Oregon Coast Hwy., to prevent damage to roadbed	$400.00
Special	20-1465	Lane	Locate drain ditches on McKenzie Hwy. near Springfield	$500.00
Plans	20-1466	Lane	Connection to county road adjacent for overcrossing of Coos Bay Branch S.P. R.R. immediately north of Eugene on Pacific Hwy.	$250.00
R/W Markers	127-1431	Polk	Right of way stakes, Monmouth-Pedee Section of Fern Creek-Monmouth and Dallas-Kings Valley hwys.	$500.00
Topographical	24-1456	Marion	Oregon Fairview grounds, requested by Board of Control	$1500.00
Topographical	24-1457	Marion	Hillcrest School grounds, requested by Board of Control	$600.00
Topographical	24-1458	Marion	Training School grounds at Woodburn, requested by Board of Control	$800.00

In this connection the Commission ordered that hereafter the costs incurred for resetting center line stakes and right of way stakes upon completion of a construction project shall be charged to engineering or construction rather than to surveys.

The Engineer brought up for discussion the matter of securing options for right of way required for the proposed reconstruction of the Oregon Coast Highway between Siletz Bay and Newport. He pointed out that the former Highway Commission at a meeting held on July 28, 1937 formally adopted the location survey for this section and ordered the right of way acquired. However, the order was rescinded when the war came on, and as a result about 25% of the right of way still remains to be purchased. He gave as his thought that acquisition of the remainder should be resumed now because of developments that are taking place in this district which might prove costly to the State if rights of way purchases were delayed. He recalled that the Commission by adoption of its post war program resolution today authorized the taking of right of way options between Newport and Miner Creek, but the section between Otter Crest and Siletz Bay was not included because provision for construction was not contained in the program. He urged favorable consideration by the Commission on this matter. During the discussion that followed Commissioner Chessman expressed himself in favor of carrying on negotiations for the right of way at once and made a motion to that effect. The motion was seconded by Commissioner Schaupp and carried by the unanimous vote of the Commission.

The Commission had under discussion a request from Frank Watt Construction Co. for an additional extension of time to June 30, 1945, within which to complete its contract No. 2687 for the construction of bridges on the Halsey-Harrisburg Section of the Pacific Highway East in Linn County. The contractor alleged that delays in obtaining materials and the fact that the construction of the approach embankments were not completed were the principal reasons for overrunning the specified time limit. The Engineer advised that the contractor completed all work on the structures, except the placing of the dividing curb between the roadway and sidewalks, prior to April 30, 1945, when the previously extended time limit expired, and at that time was ordered to discontinue further work until the paving of the bridge approaches was completed. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

The Engineer reported that Contract No. 2725 with Edlefsen-Weygandt Company for the construction of curbs along the Taft Section of the Oregon Coast Highway in Lincoln Co. was completed May 19, 1945 according to the requirements of the contract and modifications thereof, and that said job is now ready for acceptance. The following resolution accepting the above project was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that State Highway Contract No. 2725 with Edlefsen-Weygandt Company for the construction of curbs

along the Taft Section of the Oregon Coast Highway in Lincoln County has been completed according to the terms and provisions of the contract, and that said job is now ready for acceptance:

THEREFORE, BE IT RESOLVED that the work covered by said State Highway Contract for the construction of said State Highway project be declared completed according to the terms of the contract, and said job is hereby accepted and final payment in connection therewith is hereby authorized.

The Engineer reported a request from Mr. D. C. Littlepage, Cottage Grove, for permission to construct a logging road approach to the Pacific Highway in Pass Creek Canyon, particularly at a point where the State owns a small park between Mile Posts 152 and 153. He said that the roadway would be constructed across this park and would be used by Mr. Littlepage in the transportation of piling from property that he owns nearby and later for general purposes in connection with the operation of a stock ranch. The matter has been investigated, he said, by Division Engineer K. D. Lytle, who recommends the granting of the permit with certain provisions for public safety. (See Lytle's report in general files for details) The Engineer stated his concurrence in Mr. Lytle's recommendation. The Commission approved the recommendation unanimously and ordered the matter of maintaining the roadway across the park covered by a revocable agreement, in writing.

A request was presented from the Seaside Chamber of Commerce for the installation of a flashing beacon over the Oregon Coast Highway at the Newanna Creek bridge north of Seaside, where a number of serious accidents have occurred. The Engineer advised that the Acting Traffic Engineer has investigated this case and gives as his opinion that the flashing beacon would not solve the problem, and who suggests rather that the intersection be channelized. He estimated cost of such channelization project at $3000. He recommended that the request for the flashing beacon be denied and that the channelizing of the intersection be considered by the Commission when the 1946 budget is prepared, inasmuch as men are not now available to do the work. The Commission approved the recommendation unanimously.

The question of terminating the permit issued to the Portland Traction Company authorizing the Company to operate its electric trolley busses on certain streets in Portland with an overall width of 104 inches, and the question of cancelling the bond furnished by the Company in connection with such permit, had the attention of the Commission. The Commission's Chief Counsel gave as his opinion that it would be satisfactory to cancel the permit and bond in view of the fact that the operations are now legalized by statute, and he so recommended. The Commission approved the recommendation unanimously.

The Commission discussed the matter of extending the period for the granting of Emergency Transportation Permits, in view of the authority

granted by the 1945 legislature covering such movements, and decided to extend such period to July 1, 1947, subject to approval by Governor Earl Snell. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, under the provisions of Chapter 266, Oregon Laws, 1943, the Highway Commission, with the approval of the Governor, "is authorized to permit the movement over state highways of vehicles or combination of vehicles having a length and combined and gross weight in excess of all statutory limitations"; and

WHEREAS, it is provided in said law that "in no event shall any permit issued pursuant to this act be valid after July 1, 1945"; and

WHEREAS, under the authority of said law, and with the approval of the Governor, permits have been issued by the Commission in which the expiration date is fixed as of July 1, 1945; and

WHEREAS, by the enactment of Chapter 88, Oregon Laws, 1945, the life of the law as written in Chapter 266, Oregon Laws, 1943, has been extended to July 1, 1947; and

WHEREAS, it is the purpose of the Commission, with the approval of the Governor, to extend the life of the permits heretofore issued under said Chapter 266, Oregon Laws 1943, so that said permits, subject to the conditions therein specified, shall not expire until July 1, 1947;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission as follows:

1. That within the meaning and purpose of Chapter 266, Oregon Laws, 1943, as amended by Chapter 88, Oregon Laws 1945, all permits heretofore issued by the Commission within the authority of said act hereby are extended so that the same shall be in full force and effect until July 1, 1947.

2. Nothing in this extension of time shall in any way relieve the permittee of any obligation or undertaking assumed by or imposed on the permittee by virtue of the specific permit issued to such permittee, but all permittees shall be strictly held accountable for any violation of the terms and provisions of said permit whether committed under the original period or under the period as extended by this resolution.

3. Each permittee shall furnish to the Highway Commission by certificate or other satisfactory evidence proof that any bond, insurance policy, or other protection required and/or furnished in connection with said permit shall remain in full force and effect as

fully with respect to any extensions provided for under this resolution as were in effect under the permit issued within the meaning of said original act.

4. The Commission hereby expressly reserves the right to cancel or terminate any permit heretofore issued for violation of any part thereof or for other just cause.

5. That the Secretary be and he hereby is instructed to deliver to the Superintendent of State Police a duly certified copy of this resolution and mail to each permittee a like certified copy.

Dated this 29th day of May, 1945.

OREGON STATE HIGHWAY COMMISSION

By T. H. Banfield (signed)
As Chairman

By Arthur W. Schaupp (signed)
As Commissioner

By M. R. Chessman (signed)
As Commissioner

Attest:

H. B. Glaisyer (signed)
Secretary

Approved as to Form
and Legality:

J. M. Devers (signed)
Chief Counsel

Within the meaning of Chapter 266, Oregon Laws, 1943, as amended by Chapter 88, Oregon Laws, 1945, and for the purpose of making it possible for the Highway Commission to issue permits as authorized by said act and its amendment and to extend permits already issued, I hereby give my approval to the action of the Commission as expressed in the foregoing resolution.

Dated this 20th day of June, 1945.

Earl Snell (signed)
Governor of Oregon

Requests were presented from the East Side Plating Works and The Peters Company, Portland, for permission to remove two sections of the hand-rail along the north approach to the Union Avenue viaduct in Southeast Portland. The requests were approved by the Commission unanimously upon recommendation of the Engineer, provided the work is done in conformity with specifications that meet with the Engineer's approval and subject to his general supervision. (See letter from G. S. Paxson, Bridge Engineer, to R. H. Baldock, State Highway Engineer, dated May 26, 1945, in general files, for details)

The Engineer requested instructions relative to the activities of highway department weighmasters under the new law that was enacted by the 1945 legislature (S. B. 337) which requires the removal of a portion of the load on an overloaded vehicle to such an extent that the gross weights specified in the act are not exceeded. The Commission deferred action on this matter pending a report from the Chief Counsel who was instructed to discuss the matter with Chas. P. Pray, Superintendent of State Police, and ascertain his attitude with respect thereto.

The Chief Counsel reported an apparent lack of support from certain attorneys in Coos County in the handling of overweight violations. It appears that the Justices of Peace wish to cooperate in such matters, but are prevented from so doing by action of these attorneys who secure postponement of the cases which are then dismissed by the District Attorney. He was instructed by the Commission to ascertain definitely just what is going on, and report his findings to the Commission.

The Commission approved and signed the following agreements, etc.:

Bargain and sale deed conveying unto F. T. Wrightman property situate adjacent to the Steiwer Hill-Albany section of the Pacific Highway East.

Bargain and sale deed conveying unto Stephen A. Moore an abandoned gravel pit containing 1.48 acres situate adjacent to the Columbia River Highway in Umatilla County.

Agreement with H. A. Dryer extending for one year lease of state-owned property adjacent to upper Columbia River Highway.

Release of claim against J. B. Maden for damaging bridge on Pacific Highway East north of Albany.

The Commission set Monday, July 9, 1945, as the date for its next regular meeting, and instructed the secretary to make the usual arrangements to hold this meeting in the Imperial Hotel, Portland.

There being no further business to come before the Commission at this time, the meeting adjourned at 4:15 p.m.

T. H. Banfield
Chairman

State Highway Engineer

Arthur W. Schaupp
Commissioner

H. B. Glaisyer
Secretary

M. R. Chessman
Commissioner

Portland, Oregon, July 9, 1945

The State Highway Commission met in regular session at 9:00 a.m. in the Stock Exchange Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
C. B. McCullough, Assistant State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Commissioner A. W. Schaupp arrived at 10:30 a.m.

Bids, as follows, for highway construction work were opened and read in conformity with previously published notice, following which Chairman Banfield announced that the award of contracts would be made at 2:30 p.m. in the same room.

NORTH POWDER RIVER COUNTY ROAD IN UNION COUNTY
NORTH POWDER-DAVIS RANCH SECTION

Lloyd Babler, Portland	$ 7,550.00

FEDERAL TIMBER ACCESS ROAD PROJECT NO. DA-RM 95 (1)

Vernie Jarl, Gresham	76,530.00
Newport, Kern & Kibbe, Portland	81,343.00

The Assistant Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He presented a list of such properties together with the offer that he recommended in connection with each parcel. Mr. T. M. Davis, District Engineer, Public Roads Administration, was present and passed on the purchases on behalf of the Federal Government. After careful discussion of the individual items, the Commission approved the request and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

ASTORIA AIRPORT SECTION, OREGON COAST HIGHWAY

10964-A-	Haggren, Mike and Hilja K. Haggren Right of Way Option expires December 10, 1945	0.28 acre at $120.00	$ 33.60	McChesney

Josephine County, Redwood Highway 70.0 acres $ 6.88 Boardman

Marion County, Silver Creek Falls Park-200.0 acres $35.00 Boardman

---

A delegation from Redmond consisting of Mr. M. A. Lynch, former member of the Highway Commission; Theodore J. Wells, Mayor; Fred Hodecker, Councilman; and John H. Berning, Water Superintendent, came before the Commission with regard to the re-routing of truck traffic along Seventh Street through Redmond in order to relieve traffic congestion along Sixth Street, which is the city's main business street and the route of U. S. Highway 97. Mr. Lynch headed the group. He said that the traffic congestion on Sixth Street, caused mostly by logging trucks, is serious, and the city wants to route the logging trucks along Seventh Street, an unpaved

street, but needs the state's help because it cannot finance a paving project on its own account. He urged the Commission to include such project in its Post War Program if the Commission cannot see its way clear to have the work done right away. He also suggested the construction of diagonal connections from Seventh Street to the present highway near the north and the south entrances to the city, particularly at the north city limits, so as to provide for the routing of all south-bound truck traffic along Seventh Street. Following discussion, the Commission referred the matter to the Engineer for investigation and report.

Mr. R. A. Bennett, Attorney, Portland, and his client, Mr. John Jordan, came before the Commission in regard to the changing of the zone classification of a small triangular shaped tract of land situate adjacent to McLaughlin Boulevard(Pacific Highway East) at its junction with S. E. 8th Avenue in S. E. Portland. Mr. Bennett advised that the property is now in Zone I, which restricts it for residential purposes, also that Mr. Jordan wants the zone changed to No. III so as to permit the use of the property for service station purposes, since it is valueless as residential property. He exhibited a map showing the location of the property and adjacent surroundings and advised that the Highway Commission is being asked to join in the request for the changing of the zone because it is the owner of adjoining property on the south. He went on to say that all but three of the other property owners affected by the zone change have signified their willingness to join in the petition, but Mr. Jordon doesn't want to present the petition to the City authorities until the State Highway Commission has had opportunity to pass on it and join with the others if it felt so inclined. Chairman Banfield gave as his thought that the State Highway Commission should not join with the owners in requesting this change or any other change; also, that he personally would interpose no objections to the change desired by Mr. Jordan. Commissioner Chessman expressed himself similarly whereupon Chairman Banfield declared that to be the order of the Commission.

A group representing the Brooks-Scanlon Lumber Company, Bend, and consisting of Messrs. H. H. DeArmond, Attorney; A. J. Glasson, General Manager; and Gayle Blakely, Logging Superintendent, came before the Commission regarding the construction of a logging railroad across the McKenzie Highway at grade, about one mile west of the town of Sisters. Mr. DeArmond advised that they are familiar with the requirements of the State Highway Commission with respect to railroad grade crossings but gave as his feeling that the present case desires special consideration in view of the fact that train movements will be infrequent and because the State Highway carries very little traffic. It was his thought that the crossing could be made perfectly safe to the public if it was properly regulated and appropriate signals were maintained at the crossing. Moreover, he said, the crossing would be much safer from the public's standpoint than the operation of some 100 logging trucks daily over the highway, which would be the case in the event the railroad were not constructed. The Engineer estimated the cost of a grade elimination structure at this point between $25,000 and $30,000. Chairman Banfield questioned the justification of the grade crossing when considering the fact that the Federal Government is spending so much public money to eliminate existing crossings.

Commissioner Schaupp arrived at this time.

In the further discussion of this matter, it was brought out by Mr. Blakely that the Company owns sufficient timber in this district to keep in operation for about ten years, and in addition thereto anticipates purchasing additional timber from the Federal Government. The operations, he said, are on the sustained-yield basis so their operations will be practically permanent. He urged an early decision by the Commission because they want to start construction of their railroad in the not distant future. He mentioned letters from the U. S. Forest Service and the County Court of Deschutes County indorsing the construction of grade crossing from an aesthetic standpoint. Chairman Banfield concluded the discussion by stating that the Commission is not in a position today to make a decision but will refer the matter to the Engineer for a report which is to include consideration of all the facts involved from the highway and park standpoint. The Engineer was thereupon instructed to prepare such a report in consultation with the State Park Superintendent.

Mr. A. C. Kirtsis and his attorney, Mr. Herbert Gordon, both of Ocean Lake, were present in regard to the re-alignment of the Oregon Coast Highway between the place known as "Dorchester House" and Ocean Lake, in Lincoln County, where Mr. Kirtsis is developing his privately owned land. It appears that Mr. Kirtsis' operations, which consist of leveling work and re-grading of the land fronting on the highway, has made it possible to eliminate a curve in the highway alignment at minimum expense and that Mr. Kirtsis would like to have the highway straightened at this point before he perfects his sub-division. Mr. Kirtsis offered to give the state a right of way 100 feet wide on the proposed alignment if the Commission will agree to the straightening of the section. It also appears that if the Highway Commission elects to improve the highway on the present alignment, Mr. Kirtsis will donate the land necessary to provide a right of way 100 feet wide, but he wants the Commission to make its decision immediately so that he can proceed with his development project. He also asked, if the Commission approves the straightening of the road, that the work be done in the immediate future. During the discussion that followed, the Engineer recommended retention and improvement of the highway on the existing alignment because the curve referred to is not sharp and there are possibilities that the highway will at some future date be re-aligned so as to bypass the town of Ocean Lake. The Commission approved the Engineer's recommendation by unanimous vote; however, refused to make a commitment as to when the improvement work would be done. The Commission referred the matter to the Engineer and the Chief Counsel to work up an agreement with Mr. Kirtsis relative to the right of way feature and other details.

Messrs. Wesley Andrews and G. S. Chance, Nelscott, were present and discussed with the Commission the matter of constructing curbs and sidewalks along the Oregon Coast Highway through the Nelscott community. Chairman Banfield advised that the Commission is ready and willing to proceed with the construction of concrete curbs, as was done in the town of Taft, when assurance is received from the owners of the property fronting on the Highway that they

will construct concrete sidewalks when the curb construction is completed. Mr. Andrews presented a petition signed by all of the property owners concerned except one agreeing to furnish right of way free of cost to the State and to construct concrete sidewalks in front of their respective premises within 90 days following completion of the curb construction. Mr. Chance advised that if Mr. Mitchell, the property owner who has refused to date to sign the petition, could not be prevailed upon to change his attitude the other property owners will guarantee the construction of the sidewalk in front of his premises. Mr. Andrews indorsed this statement. Chairman Banfield advised that such procedure would satisfy the Highway Commission's requirements and that the Commission would proceed with the construction of the curbs just as soon as this feature has been disposed of satisfactorily. The Engineer and the Chief Counsel were instructed to consult with Mr. Mitchell in an endeavor to iron out this difficulty. The Engineer was also instructed to advertise for bids to be received at the next meeting for the curb construction if the Commission's requirements had been satisfied in the meantime.

The Commission by unanimous vote approved the minutes of the meetings held on May 14 and 15 and on May 29, 1945, subject to a slight correction requested by Commissioner Schaupp.

The Chief Counsel presented an offer from Mr. R. A. Schaad, Master of Fernwood Grange No. 770, Newberg, to pay the sum of $100 for a small parcel of land which the Commission acquired from Willis K. Clark in connection with a right of way transaction near Newberg. He advised that the property is not needed for highway purposes and recommended acceptance of the offer. The Commission approved the recommendation by unanimous vote on motion of Commissioner Chessman, which was seconded by Commissioner Schaupp.

The Assistant Attorney brought up for discussion a settlement with Mr. H. L. Claycomb for right of way needed for the proposed improvement of the Pacific Highway in the City of Ashland. He advised that he notified Mr. Claycomb that the Commission at its last meeting approved immediate settlement with him for $25,000 cash with the understanding that the Commission would be relieved of further responsibility with respect to his property, but it seems that Mr. Claycomb has had a change of mind regarding the matter and now wishes to proceed on a basis of his original agreement with the former Highway Commission. A question arises, he said, as to when the State Highway Commission intends to construct the Ashland project, and in addition thereto Mr. Claycomb considers that the Engineer underestimated the cost to reconstruct his garage building. The Engineer advised that the project is included in the Commission's first year program following the war, but nothing definite can be said as to when construction will start as that depends on when the Congress authorizes the expenditure of the Federal funds with which the work is to be financed. He suggested that Mr. Claycomb be given 120 days to vacate the right of way after the Commission is authorized to proceed with the construction work, and if he will not accept the cash settlement offered by the Commission, that the entire matter revert back to the original agreement. The Commission approved the

recommendation unanimously.

The Assistant Attorney requested instructions regarding the disposal of a building situate on property that the Commission acquired from S. W. Baker in connection with the acquisition of right of way for the Wolf Creek Highway in Washington County. He advised that when the land was purchased, an understanding was had that Mr. Baker, who was a ward of the County, would be allowed the use of the building until it was necessary to move it to accomodate highway construction. Mr. Baker, he said, has since passed away and the District Attorney of Washington County, who is handling the Estate, now wishes to move the building to adjacent privately-owned property. He recommended approval of the request. The Commission approved the recommendation unanimously.

A letter was presented from Mr. Paul E. Wallace, Salem, calling attention to the fact that considerable development is taking place along the Salem-Dayton Secondary Highway through West Salem, and suggesting, in view thereof, that it would be advisable for the State Highway Commission to acquire at once land that is needed for the widening of the right of way of this road, before additional wholesale houses and factories are erected on the property. The Engineer advised that the right of way should be widened before the highway is reconstructed, but the reconstruction job is not very high up on the list of priority projects, so there is a question whether or not the Commission should spend its funds for the right of way at this time. He suggested, because of the circumstances, that the acquisition of the extra right of way be deferred, except that attention of the City of West Salem be called to the need of retaining such property that the City owns along this highway. The Commission approved the suggestion unanimously and so ordered.

The Commission confirmed oral authority heretofore given the Baseball Committee of Klamath Post No. 8, American Legion, to use certain State-owned property in Klamath Falls, described as Lots 13 to 18, inclusive, Blk. 19, Hillside Addition, as a practice field for baseball teams sponsored by the Legion.

The Commission's Chief Counsel brought up for discussion a claim against Mr. Maurice R. Wootan, Portland, for damaging a retaining wall on the Lower Columbia River Highway at M. P. 7.64. He advised that Mr. Wootan drove his car into the retaining wall necessitating repairs which cost $134.07; further, that Mr. Wootan has tendered his check in such amount but alleges that he has been overcharged because, he states, the wall previously had been struck by other vehicles on numerous occasions, and he feels that he should not be charged the full cost of the repairs. The Chief Counsel advised that investigation revealed that there is merit in Mr. Wootan's contention and suggested, in view thereof, that the charge against Mr. Wootan be reduced to $100.00 and that the $34.07 difference be refunded to him. Following discussion, the Commission approved the suggestion by unanimous vote on motion of Commissioner Chessman, which was duly seconded by Commissioner Schaupp.

The question of securing reimbursement from the State Board of Control for losses covered by the State Restoration Fund was also brought

up for discussion by the Chief Counsel. He explained that, according to the Board of Control's construction of the Restoration Fund Act, some losses are reimbursable and others not, and he gave as his thought, on account of such dual construction, that the matter should be brought to the attention of the Commission and the Commission should take such action which it considers advisable in order to clarify the situation. The Commission referred the matter back to the Chief Counsel with instructions to work out a solution to the best of his ability. He was also instructed to discuss the matter with the Board of Control in an effort to secure a clarification of the Act.

The Commission discussed the written report of the Chief Counsel dated June 14, 1945, concerning the maintenance of the privately-owned cabin of Mr. E. H. Lamport in Casey State Park on the Crater Lake Highway, in Jackson County. (See copy of the report in General Files for details). The Chief Counsel gave as his thought that the Highway Commission should either force Mr. Lamport to remove the building from the State's property or should purchase the building, and that definite action by the Commission should be taken soon in order to avoid more troublesome and embarrassing issues that undoubtedly will arise if action is longer delayed. He was instructed by the Commission to ascertain if there is not some amiable way in which this matter can be settled and also to ascertain whether or not the building can be used to advantage for highway purposes. It was understood that in the event the matter cannot be settled amiably, the Commission will consider taking more drastic action.

The Commission discussed briefly but took no action on a written report rendered by the Chief Counsel on his conference with Mr. Charles P. Pray, Superintendent of the Department of State Police, relative to the application of the law enacted by the 1945 Legislature by which the Superintendent of State Police is permitted to grant leniency with respect to requiring log haulers to remove a portion of their loads so as not to exceed the statutory weight limit. (See copy of report dated June 26, 1945, in General Files).

The Commission had under consideration the stipulation required by the United States Land Office in connection with the State's application for the appropriation of Government land located in Sec. 11, T 31 S, R 43 E, W. M., adjacent to the I.O.N. highway, Malheur County, so that the land might be made available for use by the State Highway Commission as a source from which to procure materials for the construction and maintenance of Oregon Federal Aid Secondary Project No. SN-U-FAS 32-C (1). The Chief Counsel explained that this is rather a perfunctory matter and at his request the stipulation was executed by the Commission's secretary due to the fact that the time limit fixed by the Government for the return of the stipulation would have expired long before the July 9th meeting of the Commission. He recommended confirmation of the Secretary's execution of the same. The Commission approved the recommendation unanimously. (See signed copy of stipulation in Legal Department File No. 11692).

For similar reasons the Commission also confirmed the Secretary's execution of a like stipulation in connection with the State's application

for the appropriation of Government land located along the Central Oregon Highway at the following points:

E½ SE¼ SE¼, Sec. 7, T 23 S, R 23 E, W. M., Lake County
S½ NW¼ SE¼, Sec. 8, T 23 S, R 22 E, W. M., Lake County
E½ SE¼ NW¼, Sec. 27, T 22 S, R 21 E, W. M., Deschutes County

(See file copy of stipulation in Legal Department File No. 11689).

The Commission discussed a report from the Engineer on the request of the City of Bay City, Oregon, for the establishment of a "no parking" zone on the Oregon Coast Highway in front of the Post Office in this town. The Engineer advised that the matter has been investigated by the Traffic Engineer who recommends approval of the request, in which recommendation he concurs. The Commission approved the recommendation. The following resolution with regard thereto was adopted by the Commission by unanimous vote upon motion of Commissioner Schaupp, which was seconded by Commissioner Chessman.

WHEREAS, the Oregon Coast Highway, otherwise designated as U. S. Highway 101, as routed through the town of Bay City in Tillamook County, passes in front of the United States post office; and

WHEREAS, it has been represented to the Highway Commission by Frank E. Smith, the United States mail carrier between Tillamook and points north, one of which delivery points is the United States post office at Bay City, that the parking of motor vehicles in front of said post office seriously interferes with the movement of United States mails, and the Commission has therefore been requested to designate and establish the highway frontage in front of said post office as a "No Parking" area, and

WHEREAS, it is the judgment of the Commission that every reasonable and legitimate action should be taken having for its objective the speeding of the movement of United States mails; and

WHEREAS, it appears that Bay City is an incorporated city and therefore possesses some regulatory powers not possessed by an unincorporated town, among which powers is authority to regulate to some extent traffic movement within its corporate boundaries; and

WHEREAS, it is the opinion of the Commission that any action taken by the Commission for the regulation of traffic in front of the post office should be supplemented by appropriate action on the part of the municipal authorities;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively, as follows:

1. That the highway area in front of the post office in Bay City, Oregon, be and said area hereby is declared to be a "No Parking" area, and from and after the passage and adoption of this resolution the parking of motor vehicles within said area shall be prohibited; provided that this prohibition and regulation shall not apply to motor vehicles operated by the carriers of the United States mails.

2. That the Engineer be and he hereby is instructed to erect and thereafter maintain at appropriate places in front of said post office the approved "No Parking" signs, and said Engineer is further instructed to paint or cause to be painted in the conventional manner and conventional color the curb line within the limits of said "No Parking" area.

3. That the municipal authorities of the City of Bay City be and they hereby are requested, by ordinance, resolution, or other approved charter method, to supplement the action of the Commission with respect to the designation and establishment of said "No Parking" area.

4. That this resolution be entered in the minutes and records of the Commission as of the ninth day of July, 1945, and a correct copy thereof mailed to the Auditor of the City of Bay City, a like copy to the Superintendent of State Police, a like copy to Frank E. Smith, United States Mail Carrier, Tillamook, Oregon, and a like copy to Fred H. Twohy, Chief Clerk, Railway Mail Service, Portland, Oregon

---

The Commission also approved the establishment of a "No Parking" zone on the Oregon Coast Highway in front of the Post Office in the Town of Garibaldi, as requested by the Railway Mail Service. The following resolution with regard thereto was adopted by the Commission by unanimous vote on motion of Commissioner Schaupp, which was duly seconded by Commissioner Chessman.

WHEREAS, it has been represented to the Commission by Fred. H. Twohy, Chief Clerk of the Railway Mail Service, Portland, Oregon, that the parking of cars in the highway in front of the entrance to the post office at Garibaldi, Oregon, causes inconvenience to and interference with the movement of United States mails, and to remedy such situation the Commission has been requested to designate the highway in front of said post office as a "No Parking" area; and

WHEREAS, it is the opinion of the Commission that every reasonable and legitimate action should be taken which has for its purpose a speeding of the movement of United States mails, and the Commission is therefore of the opinion that parking in front of the post office entrance at said place should be prohibited;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively, as follows:

1. That the entire area immediately in front of the post office at Garibaldi, Oregon, be and said area hereby is declared closed to the parking of vehicles.

2. That the Engineer be and he hereby is instructed to install and thereafter maintain at points in front of said post office entrance where they will best serve the purpose of this resolution appropriate signs designating said area as a "No Parking"area and that in addition to such signs the curb line in front of said building be appropriately painted.

3. That this resolution be entered in the minutes and records of the Commission as of July 9, 1945, and a correct copy thereof mailed to Mr. Fred H. Twohy, Chief Clerk, Railway Mail Service, Portland, Oregon, and a like copy to the Superintendent of State Police.

The Engineer presented a report showing the amounts heretofore contributed by the several counties during the period 1917 to 1944, inclusive, for State Highway construction as compared with the total cost of State Highway work performed in the respective counties during the same period. He was instructed to continue this report and to include figures to show the amounts expended by the State Highway Department in each county during the same period.

The Engineer requested instructions in regard to the removal of some oil debris that was deposited on certain private property in the City of Bend because of a faulty valve in the railroad tank car from which the oil was being removed by Highway Department forces. He advised that the responsibility for the damage rests entirely with the railroad company because of the faulty valve; but the railroad company will not admit the responsibility, and as a result, the property has not been cleaned up to the satisfaction of the property owner who is very anxious that his property be restored to its original condition. He estimated the cost to clean up the property at approximately $250.00 and suggested, inasmuch as the railroad company refuses to act, that the Highway Commission join with the City of Bend in assuming this expense on a 50-50 basis. Following discussion, the Commission approved the recommendation unanimously and ordered that the matter be covered by appropriate agreement and that a release be obtained from the property owner when the job is completed.

A letter was presented from the Oregon and Northwestern Railroad Company requesting permission to construct and operate an overhead conveyor over the John Day-Burns Highway at M. P. 50.1. It appears that the Company intends to operate a rock crushing plant on the east side of the highway and convey crushed rock on the conveyor over the highway to its ballast cars on the railroad. The Engineer recommended approval of the request subject to certain restrictions including safeguards for the protection of the highway and highway users. The Commission approved the recommendation unanimously

subject to the condition that the privilege shall be limited to a period of five years. The matter is to be covered by an appropriate agreement between the Company and the State.

The Engineer reported the results of the taking of bids in Salem on June 20, 1945, for the sale of hay in Cape Arago State Park, and on June 27, 1945, for the sale of a small parcel of land in the Town of Cottage Grove, and for the sale of a service station building on the right of way of the Pacific Highway East north of Harrisburg, as follows:

SALE OF WILD HAY IN SHORE ACRES PARK

	Item 1	Item 2	Total
L. H. Cornell, Charleston			$205.00
A. H. Eggers, North Bend	$125.00	$25.00	150.00
H. H. Willman, Coos Bay	105.00	20.00	125.00

SALE OF TRACT OF LAND IN COTTAGE GROVE

Mr. & Mrs. L. J. McLoughlin	$551.00
Al Rosenthal	375.00

SALE OF BUILDINGS NORTH OF HARRISBURG

Sale of service station building formerly owned by Chester Curtis on the Pacific Highway 3½ miles north of Harrisburg.

No bids received.

He further advised that the hay was sold to the high bidder, Mr. L. H. Cornell, at his bid price of $205, and the tract of land in Cottage Grove was sold to Mr. and Mrs. L. J. McLoughlin at their bid price of $551, after consultation with the members of the Commission over the telephone. The Commission confirmed the sales by unanimous vote and also authorized the private sale of the building north of Harrisburg in view of the fact that no bids were received for purchase of the same.

The Engineer also reported on the request of the City of Monmouth for the widening of U. S. 99W for a distance of three blocks in this town, particularly between East Street and Broad Street where the existing pavement is only 20 feet wide. He estimated the cost of the improvement at approximately $10,000.00, and suggested that the project be given consideration by the Commission this fall in connection with the formulation of its betterment budget for 1946, inasmuch as it is a desirable improvement. The Commission approved the suggestion and so ordered.

The Engineer reported on his investigation of the high water record of the Willamette River at Champoeg State Park, as previously instructed by the Commission. He advised that the records reveal that practically the entire park is covered during periods of extreme high water which occurs at approximately 15-year intervals, but it is anticipated by the Army Engineers that the

flood elevation will be lowered as much as eleven feet when the proposed dams in the Willamette River tributaries are constructed. Notwithstanding the reductions in the flood line by reason of the dam construction, he said, it is quite likely that a considerable portion of the park will be inundated during flood periods, so there is a question in his mind if it would be advisable to construct buildings in the park. He gave as his thought that the Commission should, before too long, make definite plans for landscaping the park area and a decision with respect to the further development of this park. As a result of further discussion, the Commission instructed the Engineer and the State Parks Superintendent to consult with the members of the Oregon Historical Society with respect thereto and report back the attitude of this group.

The Engineer presented a written report on the request of the City of Hood River and the Hood River Port Commission for State aid in the construction of an aircraft landing field and an industrial area between the proposed new location on the Columbia River Highway and the Columbia River, in this city, which involves the construction of a retaining wall in the Columbia River. The present plan for the highway construction, he said, includes the riprapping of the highway embankment slopes, which work would be eliminated were the Commission to join with the city in the construction of its project, and suggested that there is no apparent reason why both jobs cannot be done jointly if construction can be synchronized. The state, he said, would not be put to any extra expense, but it would result in a considerable saving to the city in the construction of its airport. He suggested approval of the cooperative project and that he be given authority to discuss the matter with the city officials. The Commission indicated that it would cooperate with the city in a joint project if satisfactory arrangements can be made, however, refused to make any definite commitment or promise with respect thereto because of uncertainty of funds and of the time when both projects could be carried on simultaneously. Moreover, the city has not as yet advised the Commission officially as to the location which the city wishes adopted for the permanent highway. The Engineer was authorized to advise the city of the action taken at this meeting.

The Commission recessed for luncheon at twelve o'clock noon and reconvened at 2:00 p.m., the same persons being present and participating.

The Engineer presented a request from the U. S. War Department for State assistance in the construction of a revetment in the South Santiam River near Sanderson Bridge on the Albany-Lyons Secondary Highway, Linn County. He advised that an examination of this stream discloses that it is cutting into the bank just above the bridge and unless protective measures are taken, eventually will form a new channel around the end of the existing bridge structure. An attempt was made several years ago to correct the condition, he said, but the elevation of the revetment then constructed was not high enough so desired results were not obtained, and the dangers still exist. He estimated the cost of the improvement now proposed at $80,000 and advised that $50,000 of such sum will be provided by the U. S. War Department from emergency flood control funds made available by the Congress for the repair of the existing flood control facilities, but not for the additional work, so the War Department is asking the State to contribute the difference of $30,000 in order to secure a satisfactory improvement. He gave as his opinion that the benefits that the State

will receive fully justify the expenditure of such sum, and recommended that the Commission join with the War Department in this undertaking so as to insure that a satisfactory improvement will result. If the State does not cooperate, he said, the War Department will limit its expenditure to the $50,000 that it has available, and in that event it probably will cost the State considerably more than $30,000 to protect the bridge. Chairman Banfield gave as his thought that the Commission should join in this undertaking. Commissioners Chessman and Schaupp expressed themselves similarly. Motion was thereupon made by Commissioner Chessman that the Highway Commission join with the U. S. War Department to the extent outlined by the Engineer. The motion was duly seconded by Commissioner Schaupp and carried by the unanimous vote of the Commission. The Commission thereupon signed an agreement with the War Department covering the matter.

A petition was presented from citizens of Lebanon and vicinity urging the immediate oiling of the unoiled section of the Albany-Lyons Secondary State Highway. The Engineer advised that the Commission has already approved the construction of a portion of this section as a post war project. He was instructed to convey such information to the petitioners and to advise them that the balance of the work would be done when the Commission is able to finance it.

The Commission discussed a request from contractors McEwen and Wilson for permission to assign their interest in Contract No. 2707 covering the Elsie-Sunset Camp-Vernonia Rock Production Project, to a contracting firm consisting of T. F. Skelton and H. H. Wiecks. The Engineer said that Skelton and Wiecks will take over the job only on the condition that they are granted a 50 day extension of time within which to complete it. He recommended approval of the assignment on such basis so as to make certain that the materials will be available for State forces when they are ready to use them, it appearing that McEwen and Wilson are unable to handle the job. The Chief Counsel advised that he has examined the form of assignment which, in his estimation, is satisfactory, so the Commission can approve it if it sees fit to do so. He also advised that the American Surety Company of New York, surety on the bond furnished by McEwen and Wilson in connection with this job, has given its consent to the assignment. The Commission approved the recommendation and thereupon by unanimous vote adopted the following resolution with regard thereto:

> WHEREAS, the State heretofore awarded to McEwen and Wilson a contract for the production of roadbuilding materials, which contract is identified in the Highway Commission's records as Contract No. 2707; and
>
> WHEREAS, it now appears that for reasons satisfactory to the Commission the said McEwen and Wilson have assigned their said contract to Skelton and Wiecks, which assignment is likewise satisfactory to the Commission; and

WHEREAS, it appears that the assignment of said contract has been accepted by Skelton and Wiecks on the express condition that the time for the completion of said contract shall be extended for a period equal to fifty full working days from and after the approval of said assignment by the Highway Commission; and

WHEREAS, it appears to the Commission that the interests and welfare of the State with respect to its highway program will be served by the proposed assignment of contract and the assumption of the contract obligations by the assignees;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and affirmatively voting, as follows:

1. That the assignment of State Highway Contract No. 2707 by McEwen and Wilson to Skelton and Wiecks hereby is approved on the condition that the assignees fully perform the work specified in said contract and fully and completely meet all of the obligations therein imposed on the said assignors.

2. The assignees hereby are given fifty days' additional time within which to complete said contract, said additional time to consist of fifty full working days from and after July 14, 1945.

3. That this resolution be entered in full in the minutes and records of the Commission as of July 9, 1945.

The Engineer brought up for discussion a request from the Borden Milk Company for permission to use water from one of the State Highway Department' artificial lakes near Eugene, for cooling some of the condensing machines which they contemplate using in connection with a plant that they propose to install at this location. It appears that the Company will use about 250 gallons of water per minute each 24-hour day, and it is alleged that the used water which will be turned back into the lake, will in no way be contaminated although it will be heated to about 115 degrees temperature. The Engineer advised that he discussed this matter recently with some of the citizens of Eugene who gave as their thought that such use of the State's property would be contrary to the public interest and would detract from some of the recreational features of the lake, which is now used by the younger generation as a swimming hole. Moreover, there is a question whether or not the water that is returned to the lake would have an ill effect on the fish that had been stocked there. Mr. William Tugman, Manager of the Eugene Register-Guard, who was present, gave as his opinion that the granting of the request would establish an undesirable precedent which would be difficult to avoid in passing on similar requests for like privileges in other lakes in this vicinity, and while the granting of the privilege might be desirable from the State-wide standpoint and an inducement for the Company to establish its business at this location, in his estimation it seems unnecessary to let them take the water at this time. He added that the Eugene Chamber

of Commerce is now having the matter checked by the State Sanitary authorities and suggested that the Commission defer action at least until the report from such authority has been received. As a result of the discussion, the Commission voted unanimously to hold the matter in abeyance, such action being taken upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chessman.

The Engineer discussed with the Commission the bids received at the morning session for State Highway construction. The Commission voted unanimously to reject the one bid that was received for the construction of the North Powder-Davis Ranch Federal Timber Access Road Project on the North Powder River County Road in Union County; however, authorized the Engineer to perform the work with State forces if the Public Roads Administration will give its consent to the handling of the job in that manner. In this connection, the Engineer was instructed to report back to the Commission the actual cost of performing the work as compared to the estimated cost. The Commission referred to the Engineer the bids received for the construction of the Carlton Timber Access Road Project in Yamhill County and authorized the Engineer to award the contract to the low bidder, E. R. Hitchman, Mill City, if and when the Public Roads Administration concurs in the award. At 2:30 p.m. Chairman Benfield announced publicly the action taken by the Commission on this matter.

A committee representing the Travel Advisory Board and consisting of William Tugman, Eugene; Dr. E. D. McDaniels, and Mr. John Sterling, Portland; conferred with the Commission regarding the Travel and Information Budget for 1945. Mr. Tugman headed the group. He advised that the budget as presently approved contains an item of $10,000 for magazine advertising which they consider insufficient to do the most good for the state, so they are asking the Highway Commission to authorize an increase of $45,000 for this item, making a total of $55,000. The Advisory Committee, he said, is also recommending an increase of $2,000 for maps and miscellaneous supplies, but to offset that, a decrease of $4,000 is recommended for several of the other items. These changes, he said, will provide an increase of $43,000 in the 1945 budget, which will then total $80,050. In support of the Committee's request, Mr. Tugman pointed out that travel conditions have improved since the ending of the war in Europe and people generally are looking forward to taking their vacations by automobile, many of whom would include Oregon as one of their objectives if properly approached. Tourist travel, he added, is bound to increase as Government restrictions are lifted, and Oregon should do everything possible to attract them to this state. He complimented the Commission on its wisdom in keeping the Travel Budget low during the wartime years but declared that conditions have changed and are still changing, and in the minds of the Advisory Committee a larger budget should be authorized from now on. He urged an immediate decision by the Commission because of difficulties in securing paper and other materials that are needed and to enable the state to secure the advantages of advertising during the coming winter and early spring months.

The Chief Counsel advised that the Commission has legal authority to use its own discretion in expending state money for promotional purposes;

in fact, can spend state money for any purpose that will bring tourists to the state. The thing that the Committee has in mind, he said, is within the reach of the statute. Commissioner Chessman expressed his approval of the request stating that, in his estimation, now is the time to start advertising for the tourist trade. Commissioner Schaupp expressed himself similarly and moved that the following budget as revised and recommended by the Travel Advisory Committee be approved:

1945
PROPOSED REVISED BUDGET
TRAVEL AND INFORMATION DEPARTMENT
Recommended by Advisory Committee
2:00 p.m., July 9, 1945

		Approved Budget 1945	Revised Budget 1945	
601	Supervision and General Expense			
	Salaries.....	$ 9,000	$ 8,500	($500 decrease)
	Travel, Supplies & Miscel....	1,000	1,500	($500 increase)
610	Magazine Advertising.....	10,000	55,000	($45,000 increase)
613	Motion Pictures.....	1,800	800	($1,000 decrease)
614	Specialty Advertising.....	1,000	1,000	
616	Literature Distribution.....	500	500	
617	Maps.....	3,500	5,000	($1,500 increase)
618	Booklets.....	5,000	2,500	($2,500 decrease)
619	Cuts and Mats.....	500	500	
620	Photographs.....	250	250	
621	Postage and Express.....	1,500	1,500	
622	Photographic Laboratory Charges.	3,000	3,000	
		$37,050	$80,050	
			37,050	
			$43,000	Net Increase

The motion was seconded by Commissioner Chessman and carried by the unanimous vote of the Commission.

Mr. Gus Carlson, Traffic Consultant, The Dalles, Oregon, came before the Commission in behalf of The Dalles Chamber of Commerce regarding the proposed bridge across the Columbia River near The Dalles. He advised that the Chamber of Commerce approves the Columbia River Bridge report that was prepared some time ago by the Engineers of the Highway Departments.

of the States of Oregon and Washington, particularly insofar as it pertains to the proposed bridge at The Dalles, but it seems now there is likelihood that one of the sites that the War Department is considering for a dam across the Columbia River will interfere with the bridge location, and while the location for this particular dam has not as yet been decided, it is the opinion of The Dalles Chamber of Commerce that the following things should be accomplished before the decision is reached:

(1) A bridge permit should be secured through the Congress to construct a bridge across the Columbia River near The Dalles.

(2) Request should be made of the War Department, or Congress if necessary, for Federal funds to finance the additional expense of constructing the bridge in such close proximity to the dam.

(3) Preparation of the plans and specifications for the bridge project should be authorized now and the project should be approved for construction in the post war program.

The State Highway Engineer advised that the Commission's post war program had already been prepared and this project could not be included without deleting therefrom some of the other projects because there is not enough money available to finance all of them. He mentioned the possibility that Congress will make a special appropriation for projects of this kind, particularly if they are inter-state projects, and suggested that it would be advisable to have the Oregon and Washington delegation in Congress secure legislation that would make it possible to build a bridge with a minimum expenditure of state funds. Mr. Carlson stated that the local group will endeavor to secure such Congressional legislation, but they would like to have the State Highway Commission indorse their petition. Chairman Benfield stated that the Highway Commission has approved the Engineer's report on the Columbia River bridges and is sympathetic to the construction of the bridge at The Dalles. Further, that the Commission does not wish to tie the hands of the local people in their efforts to secure the bridge, but the Commission does not want to go on record as a co-sponsor of the project at this time, but will cooperate to the extent possible. He also said that while the Commission is sympathetic toward the bridge construction, such feeling is not strong enough to justify the setting of a time for the construction of the bridge because there are no funds available in the present program to finance it. Commissioners Schaupp and Chessman confirmed and endorsed the remarks of Chairman Benfield.

The Commission discussed a letter from the Buzard-Burkhart Pine Company, Lakeview, requesting permission to operate their logging trucks directly across the Fremont Highway a short distance north of the city limits of Lakeview, and also requesting reimbursement in the sum of $1,000 for expenditures made by the Company in the repair of the Warner Valley Secondary Highway so their logging trucks could operate thereover. The Engineer recommended approval of the Company's request to operate its trucks across the Fremont Highway subject to the condition that the trucks are properly licensed in Oregon and that the Company will guarantee

to maintain the highway at the point of crossing in a satisfactory condition. The Commission approved the recommendation. As to reimbursing the Company for the expense of repairing the Warner Valley Secondary Highway, the Engineer recommended that the request be denied because the work accomplished was not of any permanent benefit to the road. Moreover, the Company had no authority to enter upon the highway and do the work which would have been performed by state forces had the Company waited a little while. The Chief Counsel advised that, inasmuch as the Company had no authority to perform the construction work on the highway right of way, its operations were legally irregular, and in view thereof, in his estimation, it would be unwise to reimburse the Company for its expenditure. Commissioner Chessman moved rejection of the claim on the basis of the statements of the Engineer and the Chief Counsel. The motion was seconded by Commissioner Schaupp and carried by the unanimous vote of the Commission.

The Commission discussed a letter from the Southern Pacific Company regarding the construction of a ramp and steps for the protection of pedestrians on the Pacific Highway at the Albany overcrossing. It appears that school children and other pedestrians persist in using a short cut across the Company's main line railroad tracks at the point where some of the old abandoned street crossings have been eliminated by the highway improvement, in order to avoid a longer but safe route, and the Company is fearful that eventually someone will be killed or seriously injured unless this practice is stopped. The Company suggests the construction of a ramp and steps up to the viaduct and a woven iron fence across its property as a means to force the people to stay off its premises, and offers to pay for the fence construction if the State Highway Department will install the ramp and the steps. The Engineer advised that this matter was at one time considered by the former Highway Commission, which offered to cooperate with the Company and agreed to pay one-half of the cost of the total construction involved, but the Company refused to proceed on such basis, so the matter was dropped. He estimated the cost of the project as about $3,000 and recommended that the offer of the former Highway Commission be renewed. After considerable discussion, the Commission approved the recommendation by unanimous vote subject to the condition that the steps shall be of permanent construction.

A letter was presented from the Pendleton Fish and Game Club requesting that the Camas Gorge Park area along the Pendleton-John Day Highway be closed to hunting in order to protect deer in their fall migration to the winter feeding grounds. The Club pointed out that a bottleneck condition exists along the highway where the deer cross, which makes it very easy for hunters to shoot them in large numbers, and declared that the only way to protect the deer from unprincipaled sportsmen is to close the area entirely for hunting purposes. The Commission considered jurisdiction in this matter rests with the State Game Commission. The Secretary was instructed to refer the letter to that Commission with advice that the Highway Commission will offer no objections to the closing of the area for hunting if the Game Commission considers that the proper thing to do.

The Commission had under discussion a resolution from the Malheur County Court agreeing to the abandonment as a state highway of portions of

the old right of way of the I. O. N. Highway where the highway has been reconstructed on new alignment, and the designation of such portions as a part of the county road system. The Engineer recommended approval of the request and that it be turned back to the county to maintain or be allowed to revert to the owners of abutting property. The Commission approved the recommendation and thereupon by unanimous vote adopted the following resolution with regard thereto upon motion of Commissioner Chessman, which was duly seconded by Commissioner Schaupp:

WHEREAS, in order to afford a better alignment and a more satisfactory, safe, and convenient highway for the traveling public, the Commission found it necessary to and did relocate a portion of the I. O. N. Highway, which is a part of the secondary state highway system and is otherwise identified as Highway No. 456; and

WHEREAS, by reason of the relocation and reconstruction of the segment of said highway, the termini of which are Highway Engineer's Station 5605 and Highway Engineer's Station 6175, there have been eliminated and made unnecessary as a part of the permanent highway between the said termini the areas or sections of rights of way shown colored in red and green on the attached print; and*

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission its purpose and plan to abandon as a part of said highway the fragment, fragments, portion, or portions of right of way shown and designated on said print which are no longer required for right of way purposes or other public uses;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively voting, as follows:

1. The fragments or parcels of the right of way of said highway as formerly located shown colored in red on the print attached hereto are hereby abandoned as parts of the right of way of said highway and ownership and possession thereof hereby are permitted to revert to the owners of the real property which abuts on said old right of way.*

2. The fragments or parcels of the right of way of said highway as formerly located shown colored in green on the print attached hereto are permitted to revert to and pass under the jurisdiction of the County of Malheur.*

3. The location of said abandoned right of way may be more definitely and particularly ascertained and determined by reference to a map or print marked Exhibit A attached hereto

and by this reference made a part hereof, which said exhibit for identification purposes bears the signatures of Paul Van Scoy, Division Engineer, H. G. Smith, Construction Engineer, and C. B. McCullough, Assistant Highway Engineer, and is dated April 7, 1945.*

4. In the event there remains any physical connection between any portion of said abandoned right of way of the highway and the present or relocated highway, and by reason of such physical connection traffic from the existing highway may enter or use the said abandoned right of way or highway, or any part thereof, to the possible injury or damage of such traffic by reason of any unsafe condition existing with respect to said old or abandoned road, then the State Highway Engineer hereby is authorized and directed to erect and thereafter maintain such barricade or barricades or other safeguards as may be necessary to protect traffic using and/or employing said newly located, constructed, and designated section of highway.

5. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof delivered to the County Court of Malheur County, together with a copy of said exhibit or map, for such purpose as the same may serve, and a further like complete and certified copy filed with the Clerk of Malheur County, and that the County Court of said County be and said Court hereby is required to take and record official action with respect to the sections of said old right of way which by this resolution are permitted to revert to Malheur County.*

---

*(For maps mentioned herein, see "Abandonment and Retention" File No. 125.)

The Commission also discussed the disposition of the old right of way of the Pacific Highway East between Steiwer Hill and Albany where the highway is being reconstructed on new alignment. The Engineer recommended that the old highway through the town of Jefferson should be retained by the State Highway Commission as a State Secondary Highway up to the point where it intersects the new highway about two miles southwest of the Town of Jefferson. Also, that the old highway from that point on into Albany be abandoned as a State Highway and turned over to Linn County to maintain as a County Road, as such section is no longer of any value for State Highway purposes. As a result of discussion, the Commission approved the recommendation and thereupon adopted the following resolution with regard thereto upon motion of Commissioner Chessman, which was duly seconded by Commissioner Schaupp.

WHEREAS, for the purpose of affording a better alignment and a more satisfactory, safe and convenient highway for the traveling public the Highway Commission after due investigation determined to relocate a section of the Pacific Highway East in Linn and Marion Counties, which highway is otherwise identified

as Federal Highway 99E; and

WHEREAS, by reason of said relocation and reconstruction of said section of said highway there have been eliminated therefore certain sections or parts which will no longer be incorporated in said Highway No. 99E; and

WHEREAS, a portion of said eliminated highway will continue to serve inhabitants living thereon and communities served thereby, and, therefore, it is necessary that said section which is more particularly described hereinafter shall be maintained by the State or County for public use as provided in Chapter 272, Oregon Laws, 1943; and

WHEREAS, it is the judgment and opinion of the Commission that there should be recorded in the minutes and records of the Commission the Commission's purpose and plan to retain and maintain for public use a section of the existing or old highway route and its purpose and plan to abandon a section of said existing or old highway route;

NOW, THEREFORE, the premises being in general as above stated, it hereby is resolved by this Commission, all members being present and affirmatively voting, as follows:

1. That the section of the existing or old highway route of the Pacific Highway East, otherwise known as Highway No. 99E, which said section is defined as:

> Beginning at Station 503 of the old existing Pacific Highway, which station equals station 496 of the proposed relocation of said highway; said station being further identified as being in the Northeast quarter of the Northeast quarter of Section 15, Township 9 South, Range 3 West, W. M.; thence southeasterly to the Town of Jefferson; thence southwesterly to Station 21/81, which station is the south connection of the approach ramp with existing highway.

be and said section of said highway shall continue to be recognized and identified as a public highway under the jurisdiction and control of the State Highway Commission and shall be classified in the records of the Commission as a secondary state highway, and said secondary state highway shall be maintained by the Commission with state highway funds to the same extent and in the same manner as are other secondary state highways.

2. That the Section of said existing or old Pacific Highway East, otherwise identified as Highway No. 99E, which section or unit is described as follows, to wit:

Beginning at Station 21/81 of the existing Pacific Highway, said station also being the intersection of the existing and the south approach ramp of the relocated highway in the Southeast quarter of the Northeast quarter of Section 16, Township 10 South, Range 3 West, W. M.; thence in a southerly direction to Station 330, which station equals Station 303 of the relocated highway, said station being in the Northeast quarter of the Northwest quarter of Section 4, Township 11 South, Range 3 West, W. M., and being approximately 2.0 miles northeasterly from the east city limits of Albany, said section being 3.74 miles in length,

shall be and said section of said highway and the right of way involved therein hereby is abandoned and eliminated from and as a part of the Pacific Highway East, otherwise known as Highway No. 99E, and said section above described and jurisdiction thereover shall revert to and vest in Linn County to be maintained by Linn County for public highway purposes.

3. That there is attached hereto and by this reference made a part hereof a blueprint, which for identification purposes bears the date of May 11, 1945, and the signatures of G. B. McCullough, Assistant State Highway Engineer, H. G. Smith, Construction Engineer, and F. D. Eason, Division Engineer, and on which print there is shown colored in red the section of said Pacific Highway East which is retained by the State and by this resolution is made a secondary state highway, and there is likewise shown on said print colored in yellow the section of said old Pacific Highway East which is by this resolution transferred to the jurisdiction of Linn County for county road purposes. *

4. That this resolution be entered in the minutes and records of the Commission and a certified copy thereof delivered to the County Court of Linn County, a certified copy to the County Court of Marion County and a certified copy to the Public Roads Administration.

---

*(For maps mentioned herein, see "Abandonment and Retention" file No. 126.)

In this connection, the Secretary presented resolutions from the County Courts of Marion and Linn Counties in which the State Highway Commission is requested to select and designate as a State Secondary Highway that portion of the old right of way of the Pacific Highway East which extends from Steiwer Hill to the Town of Jefferson, thence southwesterly about two miles to a junction with the new highway. The Commission approved the request and adopted the following resolutions with regard thereto by unanimous vote upon motion of Commissioner Chessman, which was seconded by Commissioner Schaupp.

12539

WHEREAS, under the provisions of Sec. 100-115 O.C.L.A., the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Marion County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Marion County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Jefferson Secondary Highway No. 16A

Beginning at the intersection of the relocated Pacific Highway East with the former route of the Pacific Highway East on Steiwer Hill; thence southerly to the Linn-Marion County Line at Jefferson; a distance of approximately 6.0 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Sec. 100-115 O.C.L.A.

WHEREAS, under the provisions of Sec. 100-115 O.C.L.A., the State Highway Commission, by mutual agreement with the respective county courts of the several counties of the State, is authorized and empowered to select, locate, and designate a system of secondary state highways, which highways shall be selected from the market roads or other county roads, or available locations or routes of the several counties; and

WHEREAS, the State Highway Commission, by mutual agreement with the Linn County Court of the State of Oregon, has selected the road or highway hereinafter named, and it is the purpose of the Commission to officially and regularly designate and adopt said highway

as a highway to constitute, together with other highways heretofore adopted and/or which may hereafter from time to time be added, the system of secondary state highways under the provisions of said acts;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission, all members being present and affirmatively voting and participating, as follows:

1. That the following described market road, county road, highway, route, or location of a highway in Marion County be and the said market road, county road, highway, location, or route, hereby is selected, designated, established, adopted and approved as a secondary state highway and shall be and hereby is designated as a part of the secondary state highway system, to wit:

Jefferson Secondary Highway No. 16A

Beginning at the Linn-Marion County Line at Jefferson, thence southwesterly to a junction of the former route of the Pacific Highway East with the relocated line of the Pacific Highway East at the overcrossing of the Southern Pacific railroad; a distance of approximately 2.6 miles.

2. That the said highway shall be and hereby is qualified for improvement under the provisions of said Sec. 100-115 O.C.L.A.

The Commission discussed the advisability of authorizing additional field employees to sign emergency transportation permits. The Engineer and the Secretary recommended that such authority be granted the following employees in order to expedite movements of an emergency nature:

Frances L. Hamilton, Office Woman for Paul Van Scoy, Division Engineer, La Grande
John Isham, Office Man for J. G. Bromley, District Maintenance Superintendent, Grants Pass
Lloyd W. Yeck, Office Man for C. H. Armstrong, District Maintenance Superintendent, Pendleton
Walter Herberger, Office Man for L. V. Koons, District Maintenance Superintendent, Astoria
Forrest Cooper, District Maintenance Superintendent, Redmond
Charles E. Campbell, Office Man for Tom Edwards, District Maintenance Superintendent, Klamath Falls.

The Commission approved the recommendation subject to the condition that the members of the Commission are fully protected against liability for damages, etc., should accidents occur in connection with movements that are undertaken on authority of permits issued by such employees. The following resolution in regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, the Commission heretofore, to wit: on the twenty-fourth day of October, 1944, approved and adopted a resolution by which the Commission approved and adopted certain forms of permits as the forms to be used when permits are issued under the provisions of Section 115-393, O. C. L. A.; and*

WHEREAS, in and by said resolution the Commission named certain state highway employes, to each of whom the Commission gave authority to sign permits issued on either of the forms identified and approved in said resolution; and

WHEREAS, it now appears that by the naming of additional employes and by vesting in them authority to sign such permits the business of the Commission can be more expeditiously disposed of and the public interests better served;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively, as follows:

1. That the following state highways employes:

Frances L. Hamilton, Office Woman for Paul Van Scoy, Division Engineer, La Grande;
John Isham, Office Man for J. G. Bromley, District Maintenance Superintendent, Grants Pass;
Lloyd W. Yeck, Office Man for C. H. Armstrong, District Maintenance Superintendent, Pendleton;
Walter Herberger, Office Man for L. V. Koons, District Maintenance Superintendent, Astoria; and
Forrest Cooper, District Maintenance Superintendent, Redmond
Charles E. Campbell, Office Man for Tom Edwards, District Maintenance Superintendent, Klamath Falls.

hereby are authorized to sign permits for the movement over state highways of motor vehicles, articles or things when such movements and such vehicles come within the purview, purpose and meaning of Section 115-393, O. C. L. A., and within the purpose and meaning of the Commission as disclosed and declared in said resolution adopted October 24, 1944.*

2. That all of the instructions, requirements and provisions set out in said resolution of October 24, 1944, shall apply to and control the action of the employes herein named.*

3. No permit shall be issued by any of said employes unless and until all of the facts have been communicated to the State Highway Engineer and to the Secretary of the Commission, and the issuance of such permit has been approved by them.

4. No permit shall be issued by any of the persons named herein or by any of the persons named in said resolution of October 24, 1944, unless and until adequate insurance has been exacted

from the applicant for the protection of the members of the Commission and the members of the general public.*

5. None of the persons named herein and none of the persons named in the said resolution of October 24, 1944, may issue a permit on any form other than one of the forms heretofore approved.*

6. This resolution shall modify and supplement the resolution of October 24, 1944, to the extent and in the manner herein set out and not otherwise.*

7. This resolution shall be entered in the minutes and records of the Commission as of July 9, 1945.

---

*(The resolution of October 24, 1944, mentioned in this resolution, is to be found on Pages 12217-12219 of the Minutes on file in the office of the State Highway Commission, Salem, Oregon.)

The Engineer reported a request from Mr. George French, President of the Siuslaw Forest Products Company, Mapleton, Oregon, for permission to transport over a short section of the Siuslaw Highway loads of logs having a combined or gross weight of from 70,000 to 80,000 pounds. Mr. French alleged that loads of lesser weight must be operated at excessive speed in order to keep the mill at Mapleton supplied with logs, which is damaging to the equipment and particularly to truck tires, whereas, if the Company were granted permission to haul the heavier loads, the speed could be reduced correspondingly and excess wear and tear of equipment could be avoided. If such privilege is granted by the Commission, the Company will reimburse the state for the extra cost of maintaining the road for such weight loads and will furnish the state a bond guarantying repairs at the cost of the Company. The Engineer recommended against the granting of this privilege, because it would establish an undesireble precedent; moreover, the gross weight of loads now authorized is the maximum that the highways will stand, and in addition thereto, it is very doubtful that the Commission could recover on the bond. The Commission concurred in the viewpoint of the Engineer and thereupon adopted his recommendation by unanimous vote.

The Commission confirmed the telephonic authority given the Engineer on July 2, 1945, to reinstate the log hauling permit of George H. Brown, Eugene, which was cancelled on June 18, 1945, because of gross violation of the laws, rules, and regulations covering the transportation of logs over state highways. Such action was taken by the Commission upon recommendation of the Engineer, who advised that Mr. Brown has admitted his mistake and has agreed, in writing, not to repeat the offense. The Secretary was instructed by the Commission to ask the Public Utilities Commissioner to reinstate Mr. Brown's permit at once.

The Commission had under discussion the advisability of contributing funds toward the establishment of a "Highway Research Correlation Service" as a function of the National Highway Research Board but deferred action on the matter pending a written report and recommendation from the Engineer, which is be submitted prior to the next regular meeting of the Commission.

The Engineer reported that in conformity with authority previously granted him by the Commission, he awarded to E. C. Hall Company on June 4, 1945, the contract for the construction of the Root Creek-Siletz Section of the Siletz Secondary Highway in Lincoln County, bids for which work were received by the Commission on May 29, 1945, this company being the low bidder and the conditions of the award having been satisfied. The Commission by unanimous vote confirmed the Engineer's award of this contract.

The Engineer reported on the request of Mr. S. L. Burton, Gold Beach, that the proposed improvement of the Oregon Coast Highway in Gold Beach be extended to pass their high school. The Engineer advised that recent inspection reveals that there has been no development in Gold Beach that would necessitate such extension of the project, which would cost approximately $50,000 more than the Commission has set up for the Gold Beach improvement. He recommended that the request be denied for the time being; however, that the Chief Counsel be authorized to secure options for extra right of way along this section that may be needed when the project gets to the construction stage. The Commission approved the recommendation unanimously.

The following matters were considered briefly by the Commission, but action thereon was deferred pending reports from the Engineer as previously ordered:

(1) Report on cost to improve certain city streets in Corvallis as requested by the Corvallis City Council in connection with the proposed establishment of one-way traffic along U. S. 99W through Corvallis.

(2) Request of the City of Newberg for the widening of certain city streets along the route of the Hillsboro-Silverton Secondary Highway in Newberg.

(3) Request of citizens of Baker for the designation of a new state highway between Bates and Baker to accommodate log hauling traffic. The Engineer anticipated that his report on this matter would be presented at the next meeting of the Commission.

(4) Request of Mr. Roy A. Gage, Portland, for the improvement of the Slaven Road intersection with S. W. Barbur Boulevard (U. S. 99W), Portland. The Engineer was instructed to make a written report on this subject.

(5) Request of a delegation from Columbia County for the reconstruction of the Lower Columbia River Highway between the end of the completed section and Astoria, as a post-war project. The Engineer was instructed to render a report on the projects mentioned by the delegation as being of first importance.

The Engineer reported that the following location surveys have been completed and are ready for the Commission's consideration and approval:

COUNTY	HIGHWAY	SECTION	LENGTH IN MILES	ESTMD. CONSTR. COST	YEAR SCHLD. FOR CONSTR.
Klamath	The Dalles-California Hwy.	Chemult-Chiloquin	42.6	$607,000	First post-war
Tillamook	Oregon Coast	Tillamook-Pleasant Valley	6.1	$750,000	Third post-war
Polk	Dallas-Coast Secondary	Salt Creek-Dolph Corner	3.3	$120,000	First post-war
Sherman	Fulton Canyon Secondary	Fulton Canyon	1.5	$ 54,000	First post-war
Douglas	Tiller-Trail Secondary	Milo-Tiller	5.8	$150,000	First post-war

The Engineer submitted maps showing the recommended locations and explained the various features of each survey in detail. In the discussion that followed, the question arose whether or not the located lines pass through important buildings, etc., which would be costly to remove from the highway right of way, and if so, would it be possible to adjust the alignment so as to avoid them. The Commission expressed a reluctance to approve a location that would necessitate the extra expense unless absolutely necessary. Careful consideration was given by the Commission to this feature in the examination of the surveys reported by the Engineer, and as a result thereof, the Engineer was instructed to make a special report covering such feature with respect to the surveys for the Tillamook-Pleasant Valley Section of the Oregon Coast Highway and with respect to the Salt Creek-Dolph Corner Section of the Dallas-Coast Secondary Highway. The Commission approved and adopted the surveys for the remaining projects as reported. The following resolution with regard thereto was adopted by the Commission by unanimous vote upon motion of Commissioner Chessman, which was duly seconded by Commissioner Schaupp.

WHEREAS, the State Highway Commission heretofore has authorized and instructed the State Highway Engineer to make surveys on sections or portions of the highways of the State of Oregon as follows, to-wit:

Chemult-Chiloquin Section of The Dalles-California Highway in Klamath County;

Fulton Canyon Section of the Fulton Canyon Secondary Highway in Sherman County;

Milo-Tiller Section of the Tiller-Trail Secondary Highway in Douglas County;

and

WHEREAS, pursuant to said authorization the State Highway

Engineer has made and completed the said surveys and has filed the maps and plans of the said surveys in the files of the State Highway Commission in Salem, Oregon; and

WHEREAS, the maps and plans of the said surveys have been examined by the State Highway Commission and have been found suitable in all respects for approval and adoption by the State Highway Commission;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED, all members being present and voting affirmatively, as follows:

1. That the surveys hereinafter designated and described, together with their identifying location map file numbers, as shown in the map filing records of the Highway Commission in the Salem office of the Commission, be and they are hereby adopted and approved as the location surveys of the various portions or sections of highway involved:

File No.	Type of Survey	Highway and Section
18-1466	Location	Chemult-Chiloquin Section of The Dalles-California Highway in Klamath County. Map File Nos. 6B-14-3, 6B-14-4, 6B-14-5, 6B-14-6, 6B-14-7, 6B-14-8, 6B-14-9.
128-1411	Location	Fulton Canyon Section of the Fulton Canyon Secondary State Highway in Sherman County. Map File No. 6B-15-14.
110-1433	Location	Milo-Tiller Section of the Tiller-Trail Secondary State Highway in Douglas County. Map File No. 5B-22-13.

2. That the State Highway Engineer be and he hereby is authorized to make such minor changes in the said locations as may improve the standards of alignment and grades not inconsistent with the general location of the section of highway involved.

3. That this resolution be entered in the minutes and records of the State Highway Commission as of the ninth day of July, 1945.

JUL 9 1945

The Commission had under consideration the following requests for extensions of time within which to complete highway contracts:

McEwen and Wilson, Contract No. 2707, Elsie-Sunset Camp-Vernonia Rock Production Project, requested an extension of time of 60 days, from June 30 to August 30, 1945, within which to complete this job. They attributed their failure to complete the project within the specified time limit to breakdown of their equipment and delays encountered in securing a new rock crusher. The Engineer recommended that the time limit on this contract be extended to July 31, 1945, without penalty, on the condition that McEwen and Wilson will definitely start their construction operations by June 10, 1945, or will sublet the work to some other contractor who can commence operations by that date. The Commission approved the recommendation unanimously. (See also resolution adopted by the Commission at this meeting approving the assignment of this contract to Skelton and Weicks and further extending the time limit without penalty for 50 full working days from July 14, 1945, to September 12, 1945.)

Rogers Construction Company, Contract No. 2714, for the Oregon City-Molalla-Eagle Creek Rock Production Project on the Cascade and Woodburn-Sandy Secondary Highways, Clackamas County, requested an extension of time of 60 days, from July 15 to September 16, 1945, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions and labor difficulties. The Engineer recommended that the request be granted without penalty on the condition that the contractor will have materials stockpiled at M. P. 26.45 on the Cascade Highway and at M. P. 20.8 on the Woodburn-Sandy Highway by August 1, 1945. The Commission approved the recommendation by unanimous vote.

J. S. Risley, Contract No. 2666, for the construction of the Kernville-Euchre Mountain Section of the Siletz Secondary Highway in Lincoln County, requested an extension of time from August 31, 1944, to May 28, 1945, within which to complete this job. The contractor alleged that all construction work on this project was completed in July of 1944 and that the only thing remaining to be done subsequent thereto was the burning of debris and cleaning up the site, which had to be deferred because of fire restrictions. The Engineer advised that the reason given by the contractor for overrunning the specified time limit is correct. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Newport, Kern & Kibbe, Contract No. 2696, for furnishing materials for the Nimrod-Alder Springs Rock Production Project on the McKenzie Highway in Lane County, requested an extension of time of 30 days from May 31 to June 30, 1945, within which to complete this job. They attributed their failure to complete the project within the specified

time limit to adverse weather conditions. The Engineer advised that the contractor was required to furnish considerable more materials for this project than were originally contemplated, so should be allowed extra time on this account. He recommended the granting of the extension of time requested without penalty. The Commission approved the recommendation unanimously.

Porter W. Yett, Contract No. 2686, for grading and paving the Halsey-Harrisburg Section of the Pacific Hig way East requested an extension of time of 258 days from November 30, 1944, to August 15, 1945, within which to complete this job. The following reasons were given for overrunning the specified time limit:

"Due to the delay in the construction of the four bridges within the limits of this contract, under separate contract to Frank W. Watts, and weather conditions, we were unable to operate during the months of December 1944, January, February, March, and April, 1945. The character of our work being standard, high-type surface arterial highway construction, our program is necessarily affected by weather conditions at this season of the year."

The Engineer advised that noncompletion of the bridges and the winter weather caused delay in the completion of this project, but under favorable conditions and by following the present schedule of work, the project should be completed by August 1, 1945. He recommended that the extension of time requested be granted without penalty. A letter presented from the Public Roads Administration concurred therein. The Commission approved the recommendation by unanimous vote.

Vern E. Jarl, Contract No. 2706, for rock production on the Sandy-Government Camp Section of the Mt. Hood Highway, Clackamas County, requested an extension of time of 35 days, from June 15, to July 20, 1945, within which to complete this job. He attributed his failure to complete the project within the specified time limit to difficulties in securing sufficient labor to operate two shifts. The Engineer advised that the contractor's operations were delayed due to plant breakdown and the contractor's inability to purchase promptly the repair parts that he needed. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

Rogers Construction Company, Contract No. 2716, for rock production on the Silverton-Silver Creek Falls Section of the Silver Creek Falls Secondary Highway in Marion County, requested an extension of time of 60 days, from May 31 to July 31, 1945, within which to complete this job. They gave adverse weather conditions as the reason for their failure to complete the project within the specified time limit. The Engineer advised that the reason given

by the contractor for overrunning the time limit is substantially correct. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

The Engineer reported that Contracts Nos. 2666, 2700, 2702, 2705, 2713, and 2728 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2666, with J. S. Risley, for re-grading, surfacing and rock production on the Kernville-Euchre Mountain Section of the Siletz Secondary Highway in Lincoln County; completed on May 28, 1945.

Contract No. 2700, with Chas. Shannon & Son, for grading and paving on the Roseburg Access Road Project in Douglas County; completed on June 25, 1945.

Contract No. 2702, with Rogers Construction Co., for surfacing and oiling on the Clatskanie Army Works Access Road in Columbia County; completed on June 7, 1945.

Contract No. 2705, with M. C. Lininger & Sons, for rock production and resurfacing on the Union Section of the Old Oregon Trail, Medical Springs and Cove Highways in Baker and Union Counties; completed on June 21, 1945.

Contract No. 2713, with Clifford A. Dunn, for grading and bituminous macadam surfacing on the Alameda-City Limits (Klamath Falls) Section of the Marine Barracks Access Road in Klamath County; completed on June 23, 1945.

Contract No. 2728, with Fisher Bros., for furnishing crushed rock in stockpiles on the Maupin-Criterion Section of The Dalles-California Highway in Wasco County; completed on June 5, 1945.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

JUL 9 1945

Commissioner Chessman reported a request from certain residents of Astoria for the installation of traffic control lights near the Lewis and Clark Bridge at Miles Crossing, where a sidewalk project was recently constructed by the state. It is alleged, he said, that the traffic control signs that are being maintained by the state at this location do not properly protect pedestrians, particularly children, one of whom recently was fatally injured. The Engineer was instructed by the Commission to investigate the conditions at this point.

Commissioner Chessman also reported a request from Mr. A. E. Voorhies of the Grants Pass Chamber of Commerce for permission to illuminate a certain sign opposite the Grants Pass City Park, which has been in darkness for some time due to war-time lighting restrictions. The Engineer was instructed to investigate the matter.

Senator Dean H. Walker and his brother, Mr. R. M. Walker, both of Independence, came before the Commission regarding the construction of a bridge across the Willamette River at Independence. Senator Walker made an urgent plea for the construction of this bridge and advised that both Marion County and Polk County will contribute county funds to help defray the cost involved. He suggested that both counties are willing to enter into an agreement with the State Highway Commission relative to the payment of the county shares whereby, if the state will pay the costs in the first instance, the counties will reimburse the state for their respective shares of the expenditures by assigning a portion of the state funds that they receive annually. The question arose whether or not, if the Commission approved the bridge construction, the Commission would then be obligated to construct the road approaches to the bridge, particularly on the Marion County side of the river. In this connection Chairman Banfield stated that if the counties are willing to pay a portion of the cost, the Highway Commission would give the matter a thorough study before approving or disapproving the project, but the Highway Commission would not want to be obligated to build the road after the bridge is constructed. As a result of further discussion, the Commission instructed the Engineer to render a detailed report on the subject, it being understood that when the report is rendered a meeting with both county courts would be arranged.

The Commission considered and signed the following agreements, etc.:

Project agreement with Public Roads Administration re Fourth Partial Program, Post War Survey Projects.

Stipulation with U. S. Department of Interior re lease of public lands.

Agreement with Vernon Turner, Gold Beach, re grazing of sheep in Cape Sebastian State Park, Curry County.

Agreement with Buzard-Burkhart Pine Company re truck hauling of logs across Fremont Highway north of Lakeview.

Agreement with Paul Mumpower for rental of state-owned property at Troutdale.

Agreement with Yamhill County re the financing of the Carlton Timber Access Road.

Agreement with Yamhill County re the maintenance of the Carlton Timber Access Road.

Rental agreement with H. V. Solbeck for the lease of certain state-owned property north of the Eugene overcrossing.

Agreement with the U. S. War Department re construction of a revetment in the South Santiam River at Sanderson Bridge, Linn County.

The Commission discussed the date for its next regular meeting for the receiving of bids and decided to hold such meeting on Monday, August 13, 1945. The Secretary was instructed to make the usual arrangements to hold this meeting in the Stock Exchange Room of the Imperial Hotel, Portland. (The date of this meeting was later changed).

There being no further business to come before the Commission at this time, the meeting adjourned at 4:45 p.m.

State Highway Engineer

Chairman

Secretary

Commissioner

Commissioner

JUL 9 1945

Portland, Oregon, August 30, 1945

The State Highway Commission met in regular session at 9:00 a.m. in the Stock Exchange Room of the Imperial Hotel. Present were:

Mr. T. H. Banfield, Chairman
Mr. A. W. Schaupp, Commissioner
Mr. M. R. Chessman, Commissioner
Mr. R. H . Baldock, Chief Highway Engineer
Mr. C. B. McCullough, Asst. State Highway Engineer
Mr. J. M. Devers, Chief Counsel
Mr. H. B. Glaisyer, Secretary

Bids as follows for highway construction work were opened and read, in conformity with previous published notice, following which Chairman Banfield announced that the awards of contracts would be made at 2:30 p.m. in the same room:

OREGON COAST HIGHWAY IN COOS COUNTY
HALL LAKE DRAINAGE CHANGE PROJECT

Coos Bay Dredging Co., Coos Bay	$7,117.50
John Logan, Portland	7,878.75
Brunsell Bros., Coos Bay	9,700.00
J.N. & M.J.Conley, Portland	9,900.00

PACIFIC HIGHWAY IN JACKSON COUNTY-
BEAR CANYON-STATE LINE SECTION

M. C. Lininger & Sons, Medford	$21,425.00
John Logan, Portland	29,485.00
E. C. Hall Co., Portland	43,325.00
E. R. Hitchman, Mill City	43,785.00

KLAMATH LAKE SECONDARY HIGHWAY AND
LAKE OF THE WOOD COUNTY ROAD IN KLAMATH COUNTY
WEST SIDE KLAMATH LAKE TIMBER ACCESS ROAD PROJECT

Slate Construction Co., Albany	$28,370.00
Lloyd Babler, Portland	29,090.00
Cliff A. Dunn, Klamath Falls	29,240.00
Vernie Jarl, Gresham	31,495.00
Leonard & Slate, Portland	39,345.00

OREGON COAST HIGHWAY IN LINCOLN COUNTY
NELSCOTT SECTION

O. C. Yocom, McMinnville	$13,191.00
C. J. Eldon, Portland	16,446.00
Vernie Jarl, Gresham	18,692.50
E. R. Hitchman, Mill City	25,259.50

AUG 30 1945

SANTIAM HIGHWAY IN LINN COUNTY
TOLL CREEK-SNOW CREEK SECTION

Slate Construction Co., Albany	$ 76,445.00
Strong & MacDonald, Inc., Tacoma, Washington	125,754.00
McNutt Bros., Eugene	169,212.00

Mr. W. H. Lynch, Division Engineer, Public Roads Administration, was present and discussed with the Commission forest highway projects proposed for the first post-war fiscal year. He advised that the apportionment of forest highway funds to the State of Oregon for the first post-war year is $3,421,661 and that after deducting a reserve to pay administration and major equipment expense there is available for allocation to projects the sum of $3,170,000. He presented a list of projects to take up this amount, which list, he said, was prepared as a result of agreement among representatives of the State Highway Department, U. S. Forest Service, and Public Roads Administration at a conference held in his office on August 17, 1945. The State Highway Engineer recommended approval of the projects as listed. After careful consideration, the Commission, by unanimous vote, approved the list of projects presented by Mr. Lynch and thereupon signed a joint letter, as follows, with Mr. Lynch and Mr. James Frankland, Acting Regional Forester, directed to the Chief, Forest Service and the Commissioner of Public Roads, Washington, D. C., recommending approval of such projects for such program:

August 28, 1945

Chief, Forest Service,
Commissioner of Public Roads,
Washington, D. C.

On July 7, 1945, in accordance with the Rules and Regulations for Administering Forest Highways, the State of Oregon submitted a map and list of Forest Highway projects proposed for the First Postwar Fiscal Year, and on August 17, 1945, at the office of the Division Engineer of the Public Roads Administration, a joint conference between representatives of the Oregon State Highway Department, U. S. Forest Service and Public Roads Administration was held for consideration of and agreement upon projects to be included for construction in that Fiscal Year.

The following is the agreement of that conference with statement of funds available and list of projects as agreed upon for recommendation for approval:

Funds Available:

Apportionment Forest Highway Funds for First Postwar Year		$3,421,661.00
Less Reserve for Administration by Public Roads Administration and Forest Service	$100,000.00	
Major Equipment & State Contingent...	207,661.00	307,661.00

AUG 30 1945

Balance for Allocation to Projects	$3,114,000.00
Cooperation by Forest Service 10% Funds, Proj. 47-C...	20,000.00
Cooperation by State on Proj. 21-N	36,000.00
Total All Funds Available for Allocation to Projects	$3,170,000.00

Projects Recommended

Project Number	Route Name, Type of Work and Mileage	Estimated Cost	Coop Funds	F.H. Funds	Remarks
6-A1,E8	Alsea Highway Gr., Surf. & Bit. Surf. Length: 3.0 miles	250,000	-	250,000	Tidewater vic.
21-E5,F5, G3,H4,14, J5,K5,L2	Willamette Highway Surf. & Bit. Surf. Length: 21.0 miles	630,000	-	630,000	Oakridge-Salt Creek Falls
21-N	Willamette Highway Surf. & Bit. Surf. Length: 2.3 miles	70,000	36,000 (State)	34,000	Odell Lake vicinity
24-A2	North Santiam Highway Grading & Viaduct Length: 4.6 miles	300,000	-	300,000	Niagara-Detroit Portion of 4.6 miles to be financed by Corps of Engineers
27-A2,B2	Ochoco Highway Grading Length: 9.9 miles	300,000	-	300,000	Summit west
28-D	Columbia River Highway Gr., Bridge & Railroad Overpass Length: 3.40 miles	1,000,000	-	1,000,000	Wahkeena-Dodson
33-A2,B3, D4	Pendleton-John Day Hwy. Gr., Surf. & Bit. Surf. Length: 14.0 miles	250,000	-	250,000	Albee south
46-C2,D1	Cascade Lakes Highway Grading Length: 4.7 miles	50,000	-	50,000	Devils Lake Section
47-C	North Umpqua Highway Bridge & Appr. Grading Length: 0.42 miles	90,000	20,000 (F.S. 10%)	70,000	Steamboat Bridge

AUG 30 1945

50-A2,B1	Timberline Highway Grading Length: 3.0 miles	180,000	-	180,000	South end
	Total Construction	3,120,000	56,000	3,064,000	
	Location surveys	50,000	-	50,000	
	Total Program	3,170,000	56,000	3,114,000	

ALSEA HIGHWAY

Grading, Surfacing and Bituminous Surfacing. Project 6-A1,B3
Length: 3.0 miles

This project comprises the reconstruction grading, surfacing and bituminous surfacing of a low standard section easterly from the Alsea River Bridge, Project 6-E7.

WILLAMETTE HIGHWAY

Surfacing and Bituminous Surfacing. Project 21-E5,F5,G3,E4,I4,J5,K5,L2
Length: 21.0 miles

This project contemplates improvement from Oakridge easterly to Salt Creek Falls for a distance of 21 miles and consists principally of uniform widening of the westerly 4.5 miles and intermittent widening on the remainder to accommodate a 30-ft. roadbed width at profile grade, crushed rock surfacing as required over the entire 21 miles, and placing of a 3" by 22' bituminous mat. Since the 30-ft. width with 22-ft. pavement and 4-ft. shoulders more nearly corresponded with other sections through heavy construction, is agreeable to the State, and can be obtained with a minimum of widening, it was adopted. The existing surface on this project has shown rapid breakdown the past season, due primarily to the heavy log haul resulting from the war effort. The section was never adequately surfaced to withstand such traffic. Extensive breakup was experienced the past spring.

WILLAMETTE HIGHWAY

Surfacing and Bituminous Surfacing, Project 21-N
Length: 2.8 miles

This project consists of the reconstruction surfacing and bituminous surfacing of an additional 2.8 miles westerly from Project 21-M now programmed for financing with 1942-1943 fiscal year funds. Since programming Project 21-M considerable damage has resulted from frost boils which extended westerly over this 2.8 miles. In order to avoid leaving an isolated short section it was agreed that funds should be provided to resurface the entire 7.4 miles under one contract. This is the initial forest highway operation on the section. Previous improvements were accomplished by the State.

NORTH SANTIAM HIGHWAY

Grading and Viaduct, Project 24-A2
Length: 4.6 miles

AUG 30 1945

The $300,000 of Forest Highway funds is to finance a portion of the reconstruction grading and structures on 4.6 miles of this highway from Niagara easterly, which is necessitated by construction of the Detroit-Big Cliff flood control dam by the U.S. Corps of Engineers. Total cost of the contemplated initial contract is $907,000, the balance of which ($607,000) is to be financed from funds to be made available to Public Roads Administration by the U.S. Corps of Engineers under a Cooperative Agreement between that agency, the Forest Service, the State of Oregon and the Public Roads Administration. Reconstruction of the westerly approach to this project is to be accomplished by the State. Construction immediately easterly is to be accomplished by the Public Roads Administration with funds to be provided by the Corps of Engineers.

OCHOCO HIGHWAY

Grading, Project 27-A2,B2
Length: 9.9 miles

This project is the second one in the reconstruction, following a new location, of a total of approximately 18 miles of very low standard road and contemplates the grading to a 26-ft. roadbed width at profile grade from the Summit west. A 6.5 mile section westerly from this project has been programmed from 1942-1943 funds. The balance is to be completed in the second and third postwar years.

COLUMBIA RIVER HIGHWAY

Grading, Bridge and Railroad Overpass, Project 28-D
Length: 3.46 miles

This project contemplates the grading and structures, including a bridge and railroad overcrossing. A considerable portion of the Columbia River Highway, chiefly outside the forest between Corbett and Cascade Locks, has been graded by the State with Federal Aid and they have requested maximum assistance on the Forest Highway section in financing the balance and thus make usable completed sections which involved heavy expenditures of Federal Aid and State funds. The project will extend from the westerly end of the Forest Highway route easterly to and including the Dodson railroad overpass. Completion of the relocated highway is sorely needed to ease the traffic congestion on the existing low standard highway.

PENDLETON-JOHN DAY HIGHWAY

Grading, Surfacing and Bituminous Surfacing, Project 33-A2,B3,D4
Length: 14 miles

The project consists of reconstruction surfacing and bituminous surfacing of approximately 14 miles from the north end of the route. Approximately 7 miles will require widening to accommodate a 20-ft. pavement and provide 3-ft. shoulders. This section has shown progressive failure under logging traffic and additional stabilization is necessary. The southerly 7 miles constructed in 1930-32 is too narrow to accommodate the additional surfacing and width required and the alignment is such that a narrower width would be hazardous.

CASCADE LAKES HIGHWAY

Grading, Project 46-C2,D1
Length: 4.7 miles

This construction was initiated in 1941 under Project 46-C1,D, but was cancelled, because of the war emergency, before grading operations were started. The improvement contemplates the completion of the grading. The project is essential to the administration of National Forests and is of importance as an access to recreational and timber areas.

AUG 30 1945

NORTH UMPQUA HIGHWAY

Bridge and Approach Grading, Project 47-C
Length: 0.42 miles

The project contemplates the construction of a bridge and approaches across Steamboat Creek and, besides being a necessary link in the future improvement of the route as a whole, it serves immediately to make accessible the development now accomplished and proposed by the Forest Service in that area. The present structure is obsolete. The North Umpqua Highway is to be considered for extensive improvement with postwar Forest Highway funds and the construction of the bridge at this time will be a distinct advantage. The route leads into and will serve one of the most extensive and valuable timber areas left in the Northwest and is planned to serve the perpetual yield policy of the U. S. Forest Service. Cooperation of $20,000 of 10% funds is offered by the Forest Service.

TIMBERLINE HIGHWAY

Grading, Project 50-A2,B1
Length: 3.0 miles

This project contemplates the completion of the grading, 0.549 miles, initiated under Project 50-A1,B, which project was cancelled because of the war emergency, and the grading of an additional 2.476 miles southerly to the south end of the route. The latter portion was partially cleared under Project 50-A1,B. This project is of importance as an access to Timberline Lodge and the adjacent Mt. Hood recreational area. Surfacing and bituminous treatment is contemplated in the following postwar year.

SURVEYS

In order to complete P. S. & E. for future postwar projects, it will be necessary to provide an additional $50,000 for Lump Fund Surveys. P.S. & E. are contemplated on routes shown on the attached "Tentative List of Surveys on Approved Forest Highway Routes Upon Which it is Proposed to Make Expenditures from Lump Fund Survey Account".

Very truly yours,

(Sg.) W. H. Lynch

NOTE: Current available balance Lump Fund Surveys, approximately $50,000, plus $50,000 recommended this program is anticipated to finance above surveys and $27,700 required to complete P. S. & E. on projects programmed from fiscal year 1942-43 funds and First Postwar Year program.

AUG 30 1945

12558

Mr. H. L. Claycomb, Ashland, appeared before the Commission regarding the settlement for right of way acquired from him in connection with the proposed improvement of the Pacific Highway in the City of Ashland. Mr. Claycomb referred to his original agreement with the Highway Commission regarding this matter and a proposed modification thereof whereby the Highway Commission offered to make a cash settlement of his claim for $25,000. Mr. Claycomb alleged that the Engineer's estimate of $25,000 to restore his premises is low and asked the Commission to either raise the amount or return to the original arrangemen, which provides for the replacement of his premises to a condition equal to that now obtaining and that bids be secured by the Commission for the performance of the work. He explained that he is not asking the State to do any more than to replace his premises in kind, which was the basis of the original agreement. Following discussion, the Commission agreed unanimously to complete the transaction on the basis of the original agreement, which includes the taking of bids for reconditioning Mr. Claycomb's premises; however, no commitments or promises were made as to when the work would be done.

Following departure of Mr. Claycomb the Engineer discussed with the Commission a partial schedule of contract lettings proposed for Federal post war projects. He pointed out that the Ashland project is scheduled for the first year's performance and that, according to the present outline, bids for the work are to be received December 3, 1945. He suggested that it would be advisable to defer the taking of bids for this project until next spring rather than in December, depending, of course, on release of the Federal monies with which the work is to be financed. The Commission approved the recommendation unanimously and also approved by unanimous vote the following schedule of contract lettings:

PARTIAL SCHEDULE OF CONTRACT LETTINGS

FEDERAL POSTWAR PROJECTS

Section and Description	Class of Project	Estimated Cost	Date for P. S. & E. to P.R.A.
October 29, 1945			
1. Madras-Juniper Butte, Bit. Mac. Surf.	Prim.	$ 323,000	8-28-45

9.	Mill Creek Bridge (Warm Springs), Bridge	Prim.	175,000	12-15-45
			$2,151,000	

* Contracting of this project deferred until spring of 1946.

The Engineer was authorized by the Commission to make slight changes in the schedule as may become necessary.

Messrs. M. E. Kelley and F. A. Shaw, President and Secretary, respectively, of the Port Orford Chamber of Commerce came before the Commission regarding the construction of curbs and sidewalks along the Oregon Coast Highway in the town of Port Orford. They advised that the city is formulating plans for post war improvements and in connection

therewith it is essential that curbs and sidewalks be installed, particularly to facilitate the installation of a modern street lighting system. They asked the Commission to construct curbs and sidewalks along the highway through their town. Inquiry was made whether or not the city would construct concrete sidewalks if the State would construct concrete curbs. Mr. Kelly replied that some of the people will build the sidewalks voluntarily, but others probably not, although he thought that the city could force them to do so by appropriate ordinance. The immediate problem, he said, is the installation of a lighting system, which cannot be accomplished until curbs and sidewalks have been constructed. He also said that both Mr. Shaw and he are members of the City Council, which has indorsed the project.

Chairman Banfield advised that the State would construct concrete curbs as requested if the city will guarantee the construction of sidewalks, but not otherwise; also, that the Commission would instruct the Engineer to conduct a survey to establish the line and grade of the highway through the town so as to facilitate the other improvements. Messrs. Kelly and Shaw expressed their approval of the action taken whereupon the Engineer was instructed by the Commission to make such survey immediately.

Messrs. Herbert Gordon, Attorney, and his client, Mr. A. C. Kirtsis, Ocean Lake, appeared before the Commission with regard to the construction of curbs and sidewalks along the Oregon Coast Highway between Ocean Lake and Dorchester House in Lincoln County. Mr. Gordon stated that Mr. Kirtsis is donating land to provide a highway right of way 100 feet wide in front of his property and that he is desirous of further improving his holdings by constructing, among other things, sidewalks along the highway right of way. He pointed out that the Commission is now considering the construction of curbs and sidewalks through the Town of Ocean Lake and urged that the improvement be extended about 1/4 mile northerly past the holdings of Mr. Kirtsis. During the discussion the question arose as to how much it would cost to construct such an improvement. The Engineer estimated that the work could be done for approximately $35,000. Mr. Kirtsis guaranteed construction of the sidewalks if the Highway Commission would construct the curbs, which is the plan that is being followed through the Ocean Lake community. Commissioner Chessman gave as his thought that the Highway Commission should not hold back an improvement of this kind that is properly planned, and expressed his approval of Mr. Kirtsis' request. Commissioner Schaupp expressed himself similarly, subject to the condition, however, that it will not establish an undesirable precedent that would react adversely to the State's interest in the future. The State Highway Commission, he said, must not stand in the way of a definite good improvement. Chairman Banfield gave as his thought that the improvement in front of Mr. Kirtsis' property should be tied in definitely with the proposed Ocean Lake improvement rather than as a project by itself and that both improvements should be undertaken on the same basis. As a result of further discussion the Commission voted unanimously in favor of the project on the basis of the suggestion offered by Chairman Banfield. The Engineer was thereupon authorized to make a survey of the project and to prepare plans so that the work can be

AUG 30 1945

advertised for bids in the spring if the right-of-way situation has been clarified in the meantime.

A delegation from Oswego, representing the City Council and including Messrs. Fred C. Inkster, President; Colin Livingston, and T.H. Hepheardt, came before the Commission in regard to the proposed improvement of the Oswego Highway through the Town of Oswego. Mr. Livingston was principal spokesman. He recalled that the former Highway Commission authorized such an improvement but the work was called off when the United States became involved in the war with Japan. He asked the Commission to revive this project now because of new developments that have taken place in Oswego and the necessity to solve a drainage problem that exists. He pointed out that the project is included in the Commission's post war program but is scheduled for construction during the third-year period. He urged the Commission to advance the project for immediate construction in view of the importance of the drainage problem. Mr. Inkster also urged favorable consideration of the project by the Commission. Chairman Banfield advised that Congress has not as yet released the Federal monies that are to be used to finance the post war projects so the Commission is not in position today to make any promises in regard to advancing the construction date of this project, although it might be possible to do so later on. Mr. Inkster then urged the Commission to do something about their drainage problem and the control of flood waters, which, he said, is the main part of their project. The Commission agreed to look into that feature and thereupon instructed the Engineer to investigate the conditions in company with members of the delegation, and report his findings at the next meeting of the Commission.

The Assistant Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the State. He presented a list of such properties, together with the offer that he recommended in connection with each parcel. After careful consideration the Commission approved the request and offers and thereupon by unanimous vote adopted the following resolution with regard thereto:

> WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and
>
> WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Foot Notes:

* Item No. 12237, purchase of juniper wayside strips along the Redmond-Bend Section of The Dalles-California Highway. This property is being purchased from the State Land Board, which has acquired it from the U. S. Government through exchange of other State-owned land.

** Item No. 11408, purchase of right of way and wayside strips along the Canyonville-Wolf Creek Section (Stage Road Pass) of the Pacific Highway in Josephine County. The Assistant Attorney advised that this property is covered with a stand of timber and suggested the immediate sale of the timber growing on the right of way on account of the high prices that are obtainable at the present time. The Commission approved the acquisition of the tract at the price quoted but deferred a decision with respect to the sale of the timber pending a report from the Engineer. It was decided to apportion the cost of this property partly to right of way and partly to park acquisition.

*** The items under the heading Salt Creek-Rickreall Section, Dallas-Coast Highway were approved by the Commission after adoption of the location survey which was reported by the Engineer at this time. The resolution adopting the survey is included with others in a single resolution entered in the minutes later in the session.

The Assistant Attorney requested authority to condemn certain parcels of real property which he had been unable to acquire at reasonable cost by negotiation. He presented a list of such properties together with the offers that he recommended in condemnation for each parcel, as follows:

File Number	Name of Owner	Recommended Offer
TAFT-SILETZ RIVER SECTION OF THE OREGON COAST HIGHWAY		
11681 (Right of Way)	Harry Green	$ 100.00
NEWPORT-WALDPORT SECTION OF THE OREGON COAST HIGHWAY		
11111 (Park)	Edna Patchin	$2,500.00
OCEAN LAKE-DELAKE SECTION OF THE OREGON COAST HIGHWAY		
11620 (Right of Way)	L.L. Arnold and Louisa N. Arnold	$ 750.00
11629 (Right of Way)	W. A. Alexander	500.00
11632 (Right of Way)	Fred Ritner	00.00
11635 (Right of Way)	Henry Schlickenmeier	3,500.00
11638) (Right of Way) 11639)	McCready Lumber Co.	3,250.00
11640 (Right of Way)	John L. Andrews	135.50
11649 (Right of Way)	G. G. Sittser	1,500.00
11665 (Right of Way)	Gailord Loomis and Ella B. Loomis	5,060.25
11777 (Right of Way)	Walter Saftenberg and Lydia Saftenberg	231.50

After careful consideration the Commission approved the request and the offers and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture

of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Harry F. Green, et ux., which property is located in Lot 6 (NE¼ of the SE¼) of Section 34, Township 7 South, Range 11 West, W.M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as file R 11681, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; (*)

Real property owned by Edna Patchin, which property is located in Section 7, Township 12 South, Range 11 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 2 and 3, and is further identified in the records of the Highway Commission as file R 11111, which property is being acquired for park and recreational purposes in connection with the Oregon Coast Highway; (*)

12583

Real property owned by Lloyd L. Arnold, et ux, which property is located in Lots 1 and 2, Block 18, Devil's Lake Park, in Section 10, Township 7 South, Range 11 West, W.M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 4, and is further identified in the records of the Highway Commission as file R 11620, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; (*)

Real property owned by W. S. Alexander, et al., which property is located in Lots 6 and 7, Block 17, Devil's Lake Park, in Section 10, Township 7 South, Range 11 West, W.M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 5, and is further identified in the records of the Highway Commission as file R 11629, which property is being acquired for right of way pruposes in connection with the Oregon Coast Highway; (*)

Real property owned by Fred Ritner, which property is located in Lot 4, Block 2, Devil's Lake Park, in Section 10, Township 7 South, Range 11 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 6, and is further identified in the records of the Highway Commission as file R 11632, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; (*)

Real property owned by Henry Schlichenmayer, et al., which property is located in Lots 1 and 2, Block 11, Raymond Townsite, situated in Section 10, Township 7 South, Range 11 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 7, and is further identified in the records of the Highway Commission as file R 11635, which property is being acquired for right of way pruposes in connection with the Oregon Coast Highway; (*)

Real property owned by John L. Andrews, et al., which property is located in Lot 1, Block 18, Raymond Townsite, in Section 10, Township 7 South, Range 11 West., W. M., Lincoln County, Oregon and is more particularly described on the attached sheets and designated as Parcel No. 8, and is further identified in the records of the Highway Commission as file R 11640, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; (*)

AUG 30 1945

Real property owned by Esther N. Sittser, et al., which property is located in Lot 4, Block 20, Raymond Townsite, situated in Section 10, Township 7 South, Range 11 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 9, and is further identified in the records of the Highway Commission as file R 11649, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; (*)

Real property owned by Ella E. Loomis, et vir., which property is located in Lot 5, Block 38, Raymond Townsite, situated in Section 10, Township 7 South, Range 11 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 10, and is further identified in the records of the Highway Commission as file R 11665, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; (*)

Real property owned by Walter Saftenberg, et al., which property is located in Lot 3, Block 6, Devil's Lake Park, in Section 10, Township 7 South, Range 11 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 11, and is further identified in the records of the Highway Commission as file R 11777, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; (*)

Real property owned by W. J. McCready, et al., which property is located in Section 10, Township 7 South, Range 11 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 12, 13, and 14, and is further identified in the records of the Highway Commission as files R 11638 and 11639, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; (*)

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

AUG 30 1945

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there by any, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any of them, or any interest therein the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admistion in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission.

(*) Foot Note:

The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 54, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

The Commission, by unanimous vote, confirmed the action taken in Salem on August 3, 1945, with respect to the following matters:

1. The Commission approved the purchase of two parcels of land situate adjacent to the Upper Columbia River Highway from Juanita Starr for the sum of $13,125.

2. The Commission confirmed the signing of a deed conveying 3.89 acres of land in Umatilla County to George A. Kendler and wife.

The Assistant Attorney brought up for discussion the question of fencing certain property that was acquired by Mr. J. O'Niel along the Klamath Falls-Lakeview Highway in Klamath County. It appears that Mr. O'Niel purchased this property subsequent to the time that the County obtained the right of way and the highway was constructed, in view of which the Commission considered that it is not under any obligation to construct the fence, notwithstanding that the State might have paid for the fence as part consideration for the right of way had the right of way been purchased from Mr. O'Niel. The request was thereupon denied.

The Assistant Attorney requested instructions with regard to the sale of a parcel of land situate in Block 1, Central Addition to Albany. He advised that he has received two offers for this property in the amounts of $260 and $300, respectively, and both prospective purchasers have agreed to relinquish right of access to the highway. He advised that the $300 offer is fair and reasonable. The Engineer advised that the property is not needed for State Highway purposes. The Chief Counsel suggested the possibilities of securing a better price if the property were advertised for sale. The Commission authorized the taking of bids in Salem prior to the next regular meeting of the Commission. (The date for the taking of bids was later set as Monday, September 17.)

The Commission discussed its agreement with Paul Mumpower covering the use of State-owned property at the east end of the Sandy River Bridge at Troutdale. The Engineer recited the history of this case, pointing out that the privileges granted Mr. Mumpower were simply an accommodation and a temporary arrangement in order to save him from losses; however, Mr. Mumpower has taken advantage of the circumstances and is now erecting a new building on the premises, which is contrary to the provisions of his agreement with the Commission for the use of the property. Moreover, reports are to the effect that he is making a charge for fishing privileges in the Sandy River along the frontage of the State's property. He recommended, in view of the circumstances, cancellation of the agreement and that Mr. Mumpower be evicted from the premises, as he has not acted in good faith. The Commission approved the recommendation by unanimous vote and instructed the Chief Counsel to serve notice on Mr. Mumpower to vacate the premises.

Commissioner Schaupp brought up for discussion the sale of some houses on State Highway right of way in Klamath Falls. He recommended that bids be received in Portland for the purchase of these houses and that prospective purchasers be given the opportunity of bidding for all or any number of the buildings desired. The Commission approved the recommendation unanimously and so ordered.

Mr. Cachot Therkelsen, Chairman of the Trails Committee of the Portland Hunt Club, came before the Commission in regard to the construction of bridal paths and trails adjacent to state highways in the vicinity of Garden Home. He explained the need for the trails and paths and requested State aid in the solution of their problem. The matter was referred to the Engineer to inspect the premises in company with Mr. Therkelsen and to ascertain just what he has in mind.

Dr. James A. McNish, Portland, came before the Commission on behalf of the National Exchange Club of Portland, regarding the establishment of a memorial to Veterans of World War II at an appropriate location along Harbor Drive in Portland. He advised that the Club has in mind the development of a beauty spot, such as a bird sanctuary, if the Highway Commission will authorize use of the highway property for such purpose. He further advised that the National Exchange Club will pay all development costs and will maintain the memorial at its own expense. The Commission considered this a matter that comes under the jurisdiction of the Portland City Park Department and accordingly referred Dr. McNish to City Commissioner Kenneth L. Cooper, who has charge of the city parks.

The Commission's Chief Counsel brought up for discussion the proposed purchase of six acres of land adjacent to the Tiller-Trail Secondary Highway at Tiller, which property, he said, is needed as a maintenance site. He advised that the owner is unwilling to sell three acres, which is all that the State needs, but will sell his entire holdings, consisting of six acres, for $1,200. He recommended purchase of the entire tract if the Engineer, after investigation, considers that it is essential to have a maintenance site at this location. The Commission approved the recommendation.

The Engineer brought up for discussion the matter of limiting access to certain state highways in connection with the acquisition of right of way. He suggested that the Right of Way Department be authorized to acquire rights of access hereafter in connection with purchases involving new line changes and in connection with entire new locations. He particularly requested such authority along the following highways:

Pacific Highway East
Pacific Highway West
Salmon River Highway
Wolf Creek Highway from Portland to Davies
West Portland-Hubbard Highway

Columbia River Highway and Old Oregon Trail from Portland to the Idaho State Line at Ontario
Willamette Highway from its junction with the Pacific Highway to its junction with The Dalles-California Highway
The Dalles-California Highway from its junction with the Willamette Highway to Klamath Falls

He explained that this would apply only to future negotiations and not to existing highways except in cases where alignment is being revised. The request was approved by the unanimous vote of the Commission.

The Commission recessed at twelve o'clock, noon, and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

Messrs. Fred Inkster, President, and Herman Kehrli, Executive Secretary of the League of Oregon Cities, came before the Commission in regard to the improvement and maintenance of city streets that are not state highway routes but which are being severely damaged by log hauling and other heavy traffic. Mr. Inkster stated that the cities and towns of Oregon are appreciative of the city street tax monies that they are now receiving from the State, but in many cases the amounts received are not sufficient to pay the costs to properly maintain the streets that are being damaged by the heavy traffic, and other city funds are not available to finance such maintenance work. He mentioned a number of the smaller cities where this condition obtains and suggested that the State might help them in securing necessary improvements. He particularly requested an investigation by the Engineer to determine facts upon which to base a policy concerning such matters if the Commission's decision is favorable. Mr. Kehrli pointed out that the larger cities are able to take care of their own problems, but it is the small ones that are in need of assistance.

In the discussion that followed Chairman Banfield pointed out that it would be necessary to reach a definite agreement with each city and town as to the streets to be improved under such an arrangement; otherwise, if there were no limitation, the State might be asked to improve more streets than could be financed. He suggested that the Commission might authorize the Engineer to make an investigation of conditions in the towns mentioned by Mr. Inkster so as to get an idea of the extent of the work required and the probable cost involved. Commissioners Schaupp and Chessman approved the suggestion whereupon the Engineer was instructed to report on the matter at the next meeting of the Commission. The matter was reconsidered by the Commission later in the session at which time the Commission confirmed its action and instructed the Engineer and the Chief Counsel to discuss the matter further with representatives of the League of Oregon Cities before reporting their findings. The Engineer's report on the matter is to

include a statement of the amounts spent by the State for improvement of city streets prior to the enactment of the State Tax Street Fund law in 1943, as compared with the amounts that the cities and towns now receive annually from the State under the provisions of that law.

The Commission discussed with the Engineer the bids received at the morning session for construction of several highway projects. It was decided unanimously to award the contract to the low bidder in each instance, except that in the case of the West Side Klamath Lake Timber Access Road project in Klamath County, in connection with which there was a question whether or not sufficient Federal funds would be available to finance the work, the bids were referred to the Engineer with authority to award the contract to the low bidder when the uncertainty as to the financing of the project has been satisfied.

At 2:30 p.m. Chairman Banfield publicly announced the awards of contracts as follows:

"Hall Lake Drainage Change Project on the Oregon Coast Highway in Coos County. The low bid for this project was submitted by Coos Bay Dredging Company at $7,117.50. The next low bidder was John Logan, Portland, at $7,878.75. There were two higher bidders. The Commission has awarded this contract to the low bidder, Coos Bay Dredging Company at its bid price of $7,117.50.

"The low bid for the Bear Canyon-State Line Section project on the Pacific Highway in Jackson County was submitted by M. C. Lininger & Sons of Medford at $21,425. The next low bid was submitted by John Logan, Portland, at $29,485. There were two higher bidders. The Commission has awarded this contract to the low bidder, M. C. Lininger & Sons, at the bid price of $21,425.

"West Side Klamath Lake Timber Access Road project on the Klamath Lake Secondary Highway and Lake of the Woods County Road in Klamath County. Slate Construction Company, Albany, submitted the low bid for this work in the amount of $28,370. The next low bidder was Lloyd Babler, Portland, at $29,090. There were three higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Slate Construction Company, when certain conditions have been satisfied.

"The contract for construction work on the Nelscott Section of the Oregon Coast Highway in Lincoln County has been awarded to O. C. Yocom, McMinnville, the low bidder, at his bid price of $13,191. The next low bidder was C. J. Eldon, Portland, at $16,446. There were two higher bidders.

"Toll Creek-Snow Creek Section of the Santiam Highway in Linn County. The low bid for this project was submitted by Slate Construction Company, Albany, at $76,445. The next low bidder was Strong & MacDonald, Inc., Tacoma, Washington, at $125,754. The Commission has awarded this contract to the low bidder, Slate Construction Company, at the bid price of $76,445."

A delegation from Salem representing the Chamber of Commerce and the City Planning Commission was present and conferred with the Commission regarding the Commission's plans for the improvement of state highways in and adjacent to Salem as they affect Salem's long range planning program. The delegation was headed by ex-Governor Charles A. Sprague and included the following: Mayor I. M. Doughton; Paul B. Wallace; J. N. Chambers; Roy Rice, County Commissioner; C. A. McClure, Planning Engineer; and Clay Cochran, Manager, Chamber of Commerce.

Mr. Sprague stated that one of the big problems facing the city in the formulation of its improvement program is the handling of traffic, concerning which not a great deal can be done locally until the State's plans for arterial highways in the vicinity are known. He asked the Commission to advance as much as possible its study of improvements that are contemplated for construction within the next few years so the city may have the benefit thereof in the formulation of its plans, and suggested the following: Investigations with respect to the construction of a new bridge over the Willamette River between Salem and West Salem to relieve the overcrowded condition of the existing bridge, which will increase as new industries develop; and studies as may be deemed necessary to lay out major access roads for these two community centers. He said that the City of Salem is not attempting to dictate where the highways shall be located, as that is the Highway Commission's problem, but their purpose in coming before the Commission at this time is simply to ask the Commission to authorize the Engineering investigations at an early date so that the city can proceed with the formulation of its plans.

Mr. McClure stated that the location of arterial highways is the "back bone" of planning for the City of Salem and that a skeleton outline of such highways is essential for the proper development of the local plan.

The following brief was presented by the group in support of their oral request:

August 30, 1945

Oregon State Highway Commission
Salem, Oregon

Gentlemen:

In support of our request that the Highway Commission authorize their engineer to undertake a survey, study and preliminary report relative to the future program of highway

development in, through and adjacent to Salem and West Salem, we herewith present a brief of the most important facts.

1. The Salem Chamber of Commerce, realizing the need of a basic plan of the Salem area in order that future growth and industrial expansion may be directed along orderly and economical lines, has sponsored and financed a Long Range Planning Commission.

2. The immediate endeavor of the Planning Commission is to formulate a comprehensive land use plan covering a considerable area around Salem to determine the most logical location for industry, residential property, parks and recreational areas, etc.

3. The basis for any worthwhile long range plan for any community is its highway and arterial street system.

4. In order to accomplish this objective as a coordinated project, it is necessary to have the basic information regarding future highway locations, and a general idea as to their character, such as all-purpose highways, industrial highways, freeways, by-pass routes, etc., also the probable location of grade separation, both from other highways and railroads.

5. The Planning Commission is of the opinion that the work they are about to undertake will be of great value in directing the growth and prosperity of this area.

Respectfully submitted,

Salem Chamber of Commerce
Long Range Planning Commission

Salem Chamber of Commerce
Highway Committee

_____ Chairman Committee on Territorial Expansion

County Court, Marion County

Mayor, City of Salem

Mayor, City of West Salem

Chairman Banfield gave as his understanding that the City of Salem is simply asking the Commission to join with the city in anticipating the future developments of highways through the Salem area without any commitment whatsoever as to when construction will be undertaken. Mr. Sprague verified the understanding whereupon Chairman Banfield advised that the Highway Commission would be pleased to cooperate. Commissioners Schoupp and Chessman concurred. The Engineer was thereupon authorized by the Commission to proceed with the making of such investigations and studies as may be necessary and report the results thereof to the Commission.

AUG 30 1945

Mr. F. V. Stewart, Executive Secretary of the Oregon State Employees Association, was present and urged the Commission to authorize an adjustment of wages that are paid State Highway employees to more reasonably correspond to the increased living cost. The Commission deferred its decision in the matter until its next regular meeting; however, Mr. Stewart was informed that any action that is taken will be retroactive to September 1, 1945. The Engineer was instructed to furnish the members of the Commission full information for study in the meantime.

The Engineer brought up for discussion the minimum wage rates to be paid labor in connection with contract work. He explained that the rates now in effect are $1.20 per hour for skilled labor; 90¢ per hour for intermediate grade labor, Group I; 75¢ per hour for intermediate grade labor, Group II; and 62½¢ per hour for unskilled labor, as compared with union rates of approximately $1.25 to $2 per hour for skilled labor, $1.20 to $1.40 per hour for Group I intermediate labor, $1.20 to $1.25 for Group II intermediate labor, and 95¢ to $1.10 per hour for unskilled labor. He recommended the adoption of the following minimum rate schedule:

$1.25 per hour, skilled labor
$1.15 per hour, intermediate grade labor, Group I
$1.00 per hour, intermediate grade labor, Group II
$ .85 per hour, unskilled labor

The Commission approved the recommendation unanimously and authorized immediate change-over to the new rates.

The Chief Counsel requested a blanket increase of $25 per month for all right of way buyers and two office men in the Right of Way Department to offset the increased cost of living. He advised that the men who will be affected have been offered higher salaries to go elsewhere and very likely he will lose their services unless the increases are approved. The Commission deferred action on the matter until its next regular meeting with the understanding that if the increases are approved they will be effective as of September 1, 1945.

Like action was taken by the Commission on the Enginder's request for approval of salary increases for State Highway Department employees who now receive less than $300 per month, including an $18 per month increase for Mr. Loran L. Spaulding, Chief Weighmaster; a $25 per month increase for Mr. W. W. Stiffler, Assistant Maintenance Engineer; and a salary of $400 per month for Mr. Harold B. Say, Manager of the Travel and Information Department, effective immediately upon his return from his present leave of absence with the Navy.

Messrs. Alfred A. Loeb, Chairman, and E. B. Birkenbeuel, member, Recreational Resources Committee of the Portland Chamber of Commerce, were present and invited the members of the Highway Commission to accompany their committee on a park inspection trip through Coos and Curry Counties starting Thursday, September 13, 1945. The members of the Commission ex-

pressed regrets that previous engagements prevented them from accepting this invitation; however, it was decided that the State Park Superintendent, Mr. S. H. Boardman, should represent the Commission on this trip.

The State Park Superintendent, Mr. S. H. Boardman, was present and reported on the following park matters:

1. Acquisition of 635.16 acres of juniper waysides along The Dalles-California Highway between Bend and Redmond: The Park Superintendent advised that he has completed negotiations for the acquisition of this property through the State Land Board whereby the State Land Board is to acquire the property from the Federal Government through exchange of other State lands and is to deed the property to the State Highway Commission at the rate of $2.50 per acre, or for the total sum of $1,587.90. The Commission approved this transaction by unanimous vote.

2. Acquisition of a proposed park at the junction of the Williamson River and Spring Creek on the new location of The Dalles-California Highway between Sand Mountain and Chiloquin: The Park Superintendent advised that this property is located about three miles north of Chiloquin and is one of the tracts that was considered by the Commission in the adoption of the 1945 Park Budget. He requested authority for the Legal Department to negotiate the purchase of the tract. The Commission approved the request by unanimous vote. In this connection Chairman Banfield gave as his understanding that adoption of the 1945 Park Budget by the Commission automatically carried with it authority to negotiate the acquisition of the properties listed therein, so with that understanding it would not be necessary for the Park Superintendent to request further authority to negotiate for the purchase of such tracts. Commissioners Schaupp and Chessman concurred. Commissioner Schaupp suggested that the Park Superintendent contact Mr. A. D. Collier, Klamath Falls, relative to this tract because there are possibilities that he might acquire it and deed it to the State as a gift in memory of his father. The Park Superintendent was instructed to contact Mr. Collier with reference thereto.

3. Acquisition of cut-over wayside strips along the Bly Mountain Section of the Klamath Falls-Lakeview Highway: The Park Superintendent requested authority for the Legal Department to negotiate for the purchase of such areas. The request was approved by the Commission unanimously.

4. Sale of down timber situate in Ecola State Park: The Park Superintendent advised that there is considerable footage of fallen timber in this park which might be sold at a good figure, and suggested the taking of bids for the purchase of the same. The Commission approved the suggestion whereupon it was decided to advertise for bids to be received in Salem on September 17, 1945, the results thereof to be reported to the Commission at its next regular meeting for action.

5. Sale of concession privileges in Silver Creek Falls State Park: The Park Superintendent requested authority to advertise for bids for the concession privileges at this plade on an annual basis starting January 1, 1946. He suggested that the bids should be based on the minimum amount that the bidder will pay for the privilege plus a percentage of gross receipts. The Commission approved the request and referred the matter to the Park Superintendent and the Chief Counsel to work up the details.

The Chief Counsel requested authority to negotiate with Mrs. B. L. Beal, Silverton, for right of way that is needed in connection with the proposed improvement of the Salem-Silverton Secondary Highway. He advised that Mrs. Beal is leaving Oregon shortly and is anxious to dispose of her property but prospective purchasers are hesitant to make her an offer until they know just how much land the highway is going to take. He pointed out that the highway improvement is not scheduled for construction for some little time but suggested, nevertheless, in view of the circumstances, that the right of way across Mrs. Beal's property be acquired now. The Commission approved the suggestion unanimously.

The Engineer reported that the expansion joints on the Interstate Bridge between Portland and Vancouver are badly in need of repair. He estimated the cost of the repair work at not to exceed $1,000 and requested authority to advertise the project for bids to be received in Salem on September 17, 1945. The Commission approved the request.

The Commission discussed a letter from the Chief Counsel regarding its authority with respect to the shore of the ocean. (See letter directed to the Commission, dated July 10, 1945, in general file). It appears from the letter that the Commission's authority is not well defined by law and that the authority exercised by former Highway Commissions is implied rather than express authority. The Commission referred the matter back to the Chief Counsel for a complete report on the subject before taking action.

The Chief Counsel was also instructed to submit a similar report on a request from the Rockaway City Council that all equestrian and vehicular traffic be prohibited the use of the beach area abutting on the City's westerly boundary line.

The Commission discussed a letter from the Chief Counsel dated July 19, 1945, with respect to the granting of permits for pole line construction on state highway rights of way with particular reference to the application of the Salem Electric Company for the designation of a location on the right of way of the Salem-Dayton Secondary Highway near West Salem, and for the designation of a location on the right of way of the Pacific Highway north of the Salem Underpass. (See letter in general files for details.) The Chief Counsel pointed out that in each of the above instances both sides of the highway are already occupied by pole line

facilities and that the Salem Electric Company has been unable to effect an arrangement for joint use of the poles so is asking help from the Highway Commission. TheChief Counsel pointed out that the law gives pole line companies the right to occupy the right of way of a public highway, but, as to state highways, reserves to the Highway Commission the authority to designate the part of the right of way which may be occupied by the pole line of the applicant. He stated his belief that the Highway Commission would not have authority to deny a pole line company the right to occupy the right of way of a state highway unless circumstances are such that the presence of the pole line would seriously interfere with or jeopardize public travel, and he gave as his opinion that, since the Highway Commission cannot deny an applicant the right to occupy the highway, permits should contain provision for a joint use of poles if a joint arrangement under reasonable conditions can be effected. He further suggested a conference among the parties concerned to work out a joint use agreement and that if no satisfactory agreement can be accomplished then that the controversy be submitted to the Public Utilities Commissioner for determination. The Commission approved the suggestion by unanimous vote and so ordered.

County Judge Guy Boyington, Clatsop County, came before the Commission at this time regarding the condition of a tide box on the Oregon Coast Highway at a point near Seaside where local interests are constructing an airplane landing field. He advised that the tide box is not in good working condition and suggested that the Highway Commission have it repaired; otherwise, he said, it would seriously interfere with the operation of the airfield. The matter was referred by the Commission to the Engineer for investigation.

Judge Boyington also requested the loan of the services of the Commission's Chief Counsel to advise the trustees in charge of the Astoria-Columbia River Bridge matter on legal matters that arise in connection with their appointment. He advised that the trustees, who were appointed by a special act of Congress, want to perform their duties correctly, and are requesting the services of the Commission's Chief Counsel because he is familiar with the situation, having performed a similar service a few years ago under authority of the former Highway Commission. The Commission approved the request unanimously.

The Commission discussed briefly the Engineer's report dated July 16, 1945, with reference to the request of the Brooks-Scanlon Lumber Company, Bend, that the State Highway Commission do not oppose a grade crossing of their proposed logging railroad and the McKenzie Highway at a point about one mile west of the town of Sisters in Deschutes County. (See typewritten report in general files for details.) The Engineer gave as his opinion that it would be a mistake to allow the company to construct its railroad across the highway at grade because of the hazard to highway traffic that would be created by the crossing of train loads of logs. He recommended that the Commission resist the granting of the grade crossing when the hearing on the subject is conducted by the Public Utilities Commission of Oregon, and that the Commission's Chief Counsel and himself be authorized to oppose the granting of such grade crossing at the hearing before the

Public Utilities Commissioner. The Commission approved the report by unanimous vote and authorized the Engineer and the Chief Counsel to interpose objections to the construction of the crossing when the hearing is held.

The Engineer reported on the inquiry received from the Hon. Clares C. Powell, Mayor of Monmouth, as to the status of the proposed extension of the Pacific Highway West (U. S. 99W) north from Monmouth to Rickreall. He advised that the project is estimated to cost $375,000, and that no provision has been made for construction in the postwar program. The Commission ordered that such information be given to Mayor Powell and that he be further informed that the Commission will give the project consideration when the program for the following three-year period is discussed.

The Engineer reported the cost to improve the intersection of S. W. Barbur Boulevard (U. S. 99W) and Slavin Road (Oregon 10) in the city of Portland as requested by Mr. Roy A. Gage, Portland, in order to permit south-bound traffic on Barbur Boulevard to make a right hand turn into Slavin Road without stopping for the green traffic signal, thus relieving congestion at this point. He said that about 1,600 vehicles make this turn daily, which delays through south-bound traffic appreciably. He estimated the cost to correct the situation at about $1,500, and recommended approval of the project for accomplishment in 1946. The Commission approved the recommendation unanimously.

The question whether or not to extend the present contract with Brunnell Brothers for the operation of the Enegren Ferry across Coos River in Coos County was brought up for discussion by the Engineer, who advised that the present contract, which expires October 1, 1945, contains provision for such extension if the Commission desires. The Engineer gave as his thought that a material reduction of expense of this operation could be secured if the Commission would advertise for bids rather than take full advantage of the extension clause in the present contract. He recommended the extension of the present contract with Brunnell Brothers for a period of six months and the receiving of bids in the meantime for the furnishing of 24-hour ferry service after such six-month period has expired, which would allow the successful bidder sufficient time to build a new ferryboat if he so desired. (See the Engineer's written report on this subject, dated August 7, 1945, in the general files for details). After considerable discussion, during which numerous details were explained by the Engineer, the Commission approved the recommendation by unanimous vote. The Engineer was thereupon authorized to advertise for bids to be received at the next regular meeting for the furnishing of 24-hour ferry service at this location.

The Engineer brought up for discussion the matter of repairing the Southern Pacific Company's railway track which serves the plant of Baker Brothers, Contractors, at a place known as Chelsea near Klamath Falls, and which also serves the State Highway Department's 100,000 gallon asphalt storage tank at this place. He advised that the Highway Department

acquired the site for the storage tank from Mr. James M. Baker and that the deed of conveyance contains a clause granting to the State the full right and privilege of using the spur track jointly with the grantor. A recent inspection of the spur track by the railroad company, he said, reveals that it must be rehabilitated if the company is to continue running its trains on this siding. The company, he said, estimates the cost of rehabilitation at $6,000, but Baker Brothers refuse to assume this expense and declare that they will abandon the siding before spending such sum for repairs. He pointed out that the demand for the siding is about equally divided between Baker Brothers and the State and suggested in view thereof that the Highway Department might pay one-half of the expense of rehabilitation, which he estimated would not exceed $3,250 if the trestle were back filled rather than reconstructed, which was the basis of the railroad company's estimate. An Agreement has been reached with Baker Brothers for a division of the costs whereby the State will pay them the sum of $1,500 and they will pay the difference and do the work; moreover, the State is to receive the benefits of material salvaged from the trestles, which is valued at $200. He gave as his thought that this is a very good settlement and recommended approval of the same by the Commission in order to make certain that there will be no interruptions in the delivery of asphaltic materials to the State storage tank. The Commission approved the arrangement by unanimous vote subject to the condition that the matter shall be fully covered by appropriate agreement between the State and Baker Brothers.

The Commission discussed a complaint from the McDonald Candy Company, Eugene, that the present routing of truck traffic along Front Avenue in Medford is damaging to the Company's building located at the 11th Street intersection where the trucks turn back to Central Avenue, route of south-bound Pacific Highway travel. It appears that log trucks scrape the side of the building in making the turn and there is danger that the entire corner of their store building will be wrecked unless preventive measures are taken. The Engineer advised that this matter has been investigated and in his estimation the situation could be corrected by rerouting truck traffic along 10th Street rather than 11th Street. He pointed out that such change would necessitate the paving of the 10th St. connection, which he estimated would cost about $1,500, but on the other hand the cost to ease off the corners at 11th Street would cost equally as much. He recommended adoption of the 10th Street route which, he said, the city will approve by appropriate ordinance. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with respect thereto:

> WHEREAS, Central Avenue in the City of Medford has heretofore been selected and designated by the Highway Commission as one of the streets of said City over which to route Pacific Highway traffic; and
>
> WHEREAS, because of the increased volume of traffic which flows into and through said City over the Pacific Highway, it has become necessary to provide an additional traffic artery for a portion of said traffic; and

WHEREAS, it is the judgment of the Commission that Fourth Street from its junction with Central Avenue to its junction with Front Street, and Front Street from Fourth Avenue to Tenth Street, and Tenth Street from Front Street to Central Avenue should be selected and designated as streets or parts of streets of the City of Medford over which to route south-bound Pacific Highway truck traffic; and

WHEREAS, it is the opinion and judgment of the Commission that the traffic needs of the general public using the Pacific Highway into and through the City of Medford and the conveniences of the people locally will be best served if said additional traffic artery is made available; and

WHEREAS, it is the purpose of the Commission to rescind and declare void the resolution adopted by this Commission on December 19, 1944, by which Front Avenue between Fourth and Eleventh Streets was designated as the route of and for said truck traffic;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Highway Commission, all members being present and voting affirmatively, as follows:

1. That the resolution adopted by the Highway Commission on December 19, 1944, by which the Commission designated parts of certain streets as a route over which to route south-bound truck traffic entering and leaving the City of Medford over the Pacific Highway be and said resolution hereby is rescinded and declared void.

2. That Fourth Street in the City of Medford from its junction with Central Avenue thence to its junction with Front Avenue, and Front Avenue from Fourth Street to Tenth Street, and Tenth Street from Front Avenue to Central Avenue be and said sections of said streets hereby are selected and designated as sections of streets in the City of Medford over which there shall be routed Pacific Highway south-bound truck traffic.

3. That there is attached hereto and by this reference made a part hereof a blueprint on which are shown the sections of streets of said City which by this resolution are declared an alternate route for Pacific Highway truck traffic through said City, and there are also shown on said exhibit the locations of through street traffic signs provided for in the resolution adopted by the Highway Commission April 16, 1945. (*)

4. That the resolution adopted by this Commission on the sixteenth day of April, 1945, by which resolution the Commission declared Fourth Street from its junction with Central Avenue to its junction with Front Street, and Front Street from Fourth Street to

Eleventh Street and Eleventh Street from Front Avenue to Central Avenue to be a through highway, be and said resolution hereby is amended by eliminating therefrom Eleventh Street between Front Street and Central Avenue and Front Street between Tenth Street and Eleventh Street, and substituting therefor Tenth Street from Front Street to Central Avenue.

5. That the streets or sections of streets hereby selected and designated shall constitute and be an alternate route of said Pacific Highway in said City of Medford. All truck traffic entering, passing through and leaving the City of Medford over the Pacific Highway south bound shall be routed over said alternate route.

6. The municipal authorities of said City are hereby requested to supplement by ordinance, or other proper procedure, the acts of this Commission with respect to the routing of truck traffic over said alternate route.

7. That the Engineer be and he hereby is instructed to properly post and sign said streets or sections of said streets herein designated so that traffic will be properly advised and directed thereover.

8. The action of the Commission as disclosed in and recorded by this resolution is taken under the authority of Section 100-122, O. C. L. A., and under the authority of Section 115-309, O. C. L. A.

9. This resolution shall be entered in the minutes and records of the Commission as of August 30, 1945, and a duly certified copy thereof delivered to the city authorities of Medford, the Superintendent of State Police, the County Court of Jackson County, and the Public Roads Administration.

(*) Footnote:

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 56, under the heading "Resolutions Adopting State Highway Routes," and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

The Engineer presented a report showing the cost to construct the North Powder-Davis Ranch Access Road Project with State forces as compared with the amount that it would have cost if the Commission had accepted the low bid received as the result of competitive bidding by contractors on July 9, 1945. The report revealed the work was performed by State forces at a cost of $4,049, whereas it would have cost $6,676 if the contractor's bid had been accepted, a saving of $2,627. The Commission approved the report and ordered it filed.

The matter of repairing certain city streets in the town of Canby that are being damaged by log hauling traffic was brought up for discussion by the Engineer. He advised that it would cost about $6,000 to improve the section within the city limits and an additional sum of $8,000 for a suitable improvement extending from the city limits to the junction with the private road that leads to the log dumping point--a total of $14,000. Inquiry reveals, he said, that Federal access road funds with which it was intended to finance the improvement are exhausted, so if the project goes forward, State funds will have to be used to pay the expense. The Commission deferred a decision in the matter pending receipt of the Engineer's report on other cities that are in the same category.

The Engineer reported on a change in the plans for the improvement of the intersection at South Sixth Street and Washburn Way in Klamath Falls as proposed by Mr. Alfred D. Collier of that city. It appears that the right of way for the highway improvement as originally planned has been acquired and that the sum of $1,075 has been paid to Mr. Badorek of the Klamath Auto Wrecking Company for cutting off the front of his building located nearby; also, that Mr. Collier is of the belief that the intersection could be further improved if the front of the Wrecking Company's building were further cut back. The Engineer advised that Mr. Collier has tendered his check in the amount of $1,075 to reimburse the Highway Commission for the work already done, which amount, it is thought, would pay the cost of the additional remodeling if the project were approved. He also said that Mr. Collier has agreed to donate property lying east of the Wrecking Company's establishment so the State would be put to no extra expense for right of way. He recommended approval of the plan. In the discussion the question arose whether or not the Auto Wrecking Company would object to the further remodeling of its building. The Chief Counsel was instructed by the Commission to ascertain the attitude of the company with respect thereto and report back to the Commission, when a decision will be reached.

The Commission discussed the complaint of Mr. C. Randall, Tillamook, filed through the Hon. Robert S. Farrell, Jr., Secretary of State, regarding a dangerous condition which Mr. Randall alleges exists on the Wilson River Highway in front of his premises a short distance east of the City of Tillamook where the Wilson River Highway makes a sharp turn. Mr. Randall states that many traffic accidents occur at this point and that his property is being damaged severely by logs that fall from logging trucks when negotiating the turn. The Engineer advised that the condition mentioned

by Mr. Randall automatically will be corrected when the highway is permanently re-aligned, but such project is not included in the postwar construction program and probably will not be built for five years or more. He estimated the cost to provide a temporary improvement that would help the situation at $7,445, and recommended the expenditure as a safety measure notwithstanding that the improvement will be of no value from the highway standpoint when the highway at this location has been constructed on permanent alignment. The Commission voted unanimously to include the project in the 1946 Minor Betterment Budget and instructed the Engineer to inform the Secretary of State that that probably will be done.

The Commission discussed a report from the Engineer on the cost to improve two street intersections in the City of Forest Grove, viz: 3rd Avenue and Main Street and Pacific Avenue and 5th Street, by cutting off the corners so as to permit loads of logs 80 feet overall in length to turn at these intersections without creating a hazard to other traffic or damaging privately-owned property. The Engineer estimated that the improvement at 3rd Avenue and Main Street would cost about $1,300 and that at 5th Street and Pacific Avenue would cost about $1,600, or a total of $2,900 for construction. Added to this cost, he said, would be the expense of acquiring additional right of way, which is estimated to cost about $150, making the total cost of improving both intersections $3,050. He recommended approval of the expenditure and that the work be done during the season of 1946. In the discussion of this matter the question arose whether or not the improvement is desired by the City of Forest Grove. The Engineer was instructed to ascertain the attitude of the City Council and report his findings, at which time the Commission will take action.

The Commission discussed the question of securing the advantages of the "Highway Research Correlation Service" established by the American Association of State Highway Officials as a function of the Highway Research Board. The Engineer advised that the cost to the State of Oregon would amount to $1,275, of which $792 is reimbursable from the Federal Government under authority of Section 8 of the Federal Aid Highway Act of 1944. He recommended approval of the expenditure because it would place the Oregon Highway Department in touch with research activities of the highway departments of all of the states and colleges, and the information received from such sources would be invaluable in the preparation of plans and specifications for highway construction in this state. The Commission approved the recommendation by unanimous vote, as a trial proposition.

The Engineer reported on the request of Mr. A. E. Voorhies, Grants Pass, for permission to install a neon sign over and across the Pacific Highway near the Southern Pacific Railroad crossing in Grants Pass. He advised that the sign would bear the reading matter "It's the Climate," and is to take the place of a similar sign that was maintained in the same location a number of years ago but which was removed during the wartime period. The Commission's Chief Counsel advised that jurisdiction of the State Highway Commission in such matters terminates at city boundary lines, so the Commission really has no legal grounds to object to the placement of the sign as requested. The members of the Commission

expressed themselves as being adverse to the maintenance of such signs over state highway routes but decided not to offer objections because of its limited authority. The Commission ordered that Mr. Voorhies be informed of the Commission's attitude with respect to the matter and that the Commission will not object to the installation of the sign if he will assume full liability for damages that may result therefrom.

The Engineer reported the results of a conference with representatives of the State Fish Commission and the State Game Commission relative to a proposed arrangement for the patrolling of the Wilson River and its tributaries to ascertain the presence of drift or debris which would be prejudicial to the interests of the State. He advised that two matters were considered at the conference, one being the matter of cooperative patrol whereby each of the agencies would patrol all of the streams to the maximum degree possible and notify each of the other agencies of the presence of drift or debris or any other condition which would be prejudicial to the State's interest. The other matter pertained to a cooperative arrangement covering the cost to remove the debris, which is of considerable importance because it involves outlay of monies. It is possible, he said, to have the cleaning up work done by local logging interests at an estimated cost of about $3,000, which expense would be paid one-third by each agency. He recommended approval of the project because of the benefits that the Highway Department would receive in the safeguarding of highway bridge structures in this vicinity, and that the Commission enter into a cooperative agreement with the other two agencies covering the entire matter. The Commission approved the recommendation unanimously subject to the condition that the State Highway Department's share of the cost shall not exceed one-third of the total expense and in no event more than $1,000.

The Commission had under consideration the question of advertising signs which extend out over the highway within the corporate limits of the City of Drain. It was represented to the Highway Commission that the signs in their present location and condition create a hazard to traffic. The Commission was advised by its Counsel that it has lawful authority to require the removal of the signs, or at least the portion thereof which extends out over the highway. After due consideration the Commission instructed its Counsel to take such steps as may be necessary to correct the situation.

The Engineer reported the results of the taking of bids in Salem on August 20, 1945, for the purchase of two tracts of land situate in Blocks 1 and 43, Kenton, near the intersection of North Interstate and Denver Avenues, Portland, and for the sale of a triangular tract of land situate in Lots 1 and 2 of Block 5, Berryvale Addition to Medford, and for the sale of used equipment and scrap materials located at the Highway Department Shops in Salem, Klamath Falls, and La Grande. He presented a tabulation of the bids and advised that the property was sold to the high bidder in each instance as authorized by the Commission over the telephone. The Commission by unanimous vote confirmed the sale of this property as reported. (See tabulation of bids in general files for details.)

The Engineer presented a list of Rock Production Projects, totaling $750,000, as follows, and requested authority to contract them as rapidly as possible for 1946 performance so as to avoid delays when the material is needed for maintenance purposes.

ROCK PRODUCTION PROJECTS FOR 1946

Division I			
None			
Division II			
Neskowin	10,000 C.Y.	$ 30,000.	
Waldport	10,000 C.Y.	30,000.	
Eddyville	10,000 C.Y.	30,000.	
Halsey-Sweet Home	10,000 C.Y.	30,000.	$ 120,000.
Division III			
Greenleaf-Long Tom	11,500 C.Y.	$ 38,000.	
Alsea-Deadwood	3,000 C.Y.	10,000.	
Mystic Creek	10,000 C.Y.	33,000.	
Mystic Cr.-Coos Jct.	11,000 C.Y.	33,000.	
Mussel Cr.-Myers Cr.	13,800 C.Y.	39,000.	153,000.
Division IV			
Parkdale-Hood River Meadows	12,000 C.Y.	$ 24,500.	
The Dalles-Maupin	13.600 C.Y.	38,190.	
Mitchel-Antone	10,000 C.Y.	29,150.	
Redmond	10,000 C.Y.	28,600.	
Olene-Bly Mountain	12,600 C.Y.	35,860.	
Bly-Forest Boundary	12,200 C.Y.	35,700.	
Klamath Falls	7,200 C.Y.	22,600.	
Suntex	10,000 C.Y.	23,200.	
Alkali-Lake Abert	10,000 C.Y.	23,200.	261,000.
Division V			
Fossil-Service Cr.	8,000 C.Y.	$ 26,000.	
La Grande	10,900 C.Y.	31,000.	
Vale	11,910 C.Y.	33,900.	
Flight Strip McDermit	12,420 C.Y.	36,500.	
Mission-Meacham	3,000 C.Y.	10,000.	
Adrain-Cairo	7,840 C.Y.	21,600.	159,000.
			$ 693,000.
Contingencies			57,000.
		Total	$ 750,000.

AUG 30 1945

The Commission approved the request by unanimous vote.

The Commission had under discussion the rejection of all bids received on July 9, 1945, for construction of the Carlton Timber Access Road in Yamhill County and confirmed its decision reached subsequent thereto, and conveyed to the Engineer by telephone, to reject the bids and return the deposits of the respective bidders. This action was taken in view of information received from the Public Roads Administration that the Federal funds with which the work was to be financed are exhausted and for the further reason that the low bidder had withdrawn his offer on account of expiration of the time limit for the award of the contract.

A resolution was presented from the City Council of the City of Molalla requesting the improvement of Hart Avenue between 4th Street and Section Street, Molalla, by oiling, in order to alleviate the dust hazard during the summer months and the mud problem in the winter season caused by the truck hauling of logs and piling over such street. The Commission deferred a decision in the matter pending a report from the Engineer, as previously ordered at this meeting, concerning a state-wide investigation of cities and towns that have similar problems.

The Commission discussed a report from Mr. Charles McBee, Safety Engineer for the State Industrial Accident Commission, in which he points out a hazard to workmen which exists at the Jefferson Junction Overcrossing project where the S. P. railroad tracks are on a curve and sight distance in each direction from the point that the men are working is only about 650 feet. The Engineer advised that Mr. McBee has ordered the State's contractor to install a visual and audible signal to warn workmen of approaching trains, of which there are a large number, but the contractor is reluctant to assume the cost of the signal, which is estimated at about $700, inasmuch as it is a departure from past practice and was not included in his calculations when he prepared his bid. The Engineer states his belief that the order of the Accident Commission is sound and that the contention of the contractor is reasonable, in view of which he recommended that the State assume the expense as a matter of equity and justice. The Commission approved the recommendation by unanimous vote and authorized the Engineer to proceed with the installation of the signal at State expense.

The Commission considered and denied a request from the City of Hood River for sidewalk construction along the Hood River Secondary Highway between 12th Street and 13th Street in Hood River, it being the thought of the Commission that the expense is properly chargeable to the adjacent property owners.

The Commission also discussed a resolution from Crow Grange No. 450, Lane County, requesting the early improvement of the Territorial Secondary Highway between Monroe and Anlauf. The resolution was ordered filed in the records without action in view of the fact that this highway is now being improved as rapidly as conditions will permit.

A request from Arthur A. Muller and other taxpayers of Sherman, Wasco and Gilliam Counties for the further improvement of Shearar's Bridge Secondary Highway was presented to the Commission. The Secretary was instructed to inform the petitioners that the postwar program adopted by the Commission contains an item of $122,000 for improvement of this highway between Tygh Valley and the Sherman County line and that the work is scheduled for performance during the second year following the war.

The Engineer reported on surveys completed as follows:

1. Relocation of Sams Valley Secondary Highway between Ramsey Canyon Road and Crater Lake Highway junction in Jackson County.

2. Relocation of the Dallas-Coast Secondary Highway between Salt Creek and Dolph Corner in Polk County.

3. Relocation of the North Santiam Secondary Highway between Gates and Niagara in Marion County.

4. Relocation of the Tumalo-Deschutes Secondary Highway between Tumalo and The Dalles-California Highway junction in Deschutes County.

5. Relocation of the Willamette Highway between Pleasant Hill and Lowell in Lane County.

The Engineer explained the details of the surveys and exhibited maps showing the several locations and certain topographic features. He recommended formal adoption of the surveys at this time and the granting of authority to the Legal Department to negotiate needed rights of way, the projects represented by the surveys being included in the Postwar Construction Program. After careful consideration of each survey the Commission approved the surveys as reported and thereupon by unanimous vote adopted the following resolution with respect thereto:

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and location of the following State highways, to wit:

Sams Valley Secondary Highway from Ramsey Canyon Road to Crater Lake Highway junction, in Jackson County;

Dallas-Coast Secondary Highway from Salt Creek to Dolph Corner, in Polk County;

North Santiam Secondary Highway from Gates to Niagara, in Marion County;

Tumalo-Deschutes Secondary Highway from Tumalo to The Dalles-California Highway junction, in Deschutes County;

Willamette Primary Highway from Pleasant Hill to Lowell, in Lane County,

and in connection therewith to prepare maps showing the route and location of said sections of highway and to file with the Commission a report and record of each of said surveys for the Commission's consideration; and

WHEREAS, the Engineer has completed the said surveys and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said surveys, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That the surveys of the above mentioned Sections of State Highways, together with the maps, which for identification purposes bear the File Nos. 6B-17-11, 4B-26-3, 6B-16-3, 6B-16-16, and 6B-8-4 and 6B-8-6, respectively, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

Map 6B-17-11 is in three sections. One referred to is No. B.

2. That when said sections of said highways or any portion thereof are permanently constructed the same shall be done in accordance with said surveys and locations unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the 30th day of August, 1945.

The Commission discussed the following requests for extensions of time within which to complete State highway contracts:

Rogers Construction Company, Contract No. 2715, for furnishing of crushed rock for the Oregon City-Molalla-Eagle Creek Rock Production Project on the Cascade and Woodburn-Sandy Secondary Highways in Clackamas County, requested an additional extension of time of 30 days, from September 16 to October 15, 1945, within which to complete this job. They attributed their failure to complete the project within the previously extended time limit to inability to obtain sufficient help to operate more than one shift daily. The Engineer advised that the reasons given by the contractor for over-running the specified time limit are correct and recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Guerin Brothers, Contract No. 2717, for the Prospect-Antelope Creek Rock Production Project on the Crater Lake Highway in Jackson County, requested an extension of time of 90 days, from July 31 to November 1, 1945, within which to complete this job. They gave as their reasons for failure to complete the project within the specified time limit inclement weather and delays in securing repair parts for their rock crushing equipment. The Engineer advised that the over-running of the time limit has not increased the State's expense for engineering supervision, neither has it unduly hampered highway maintenance work, in view of which he recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

T. W. Thomas, Contract No. 2734, for furnishing crushed gravel in stockpiles for the Youngs Rench-Brothers Section of the Central Oregon Highway, Deschutes County, requested an extension of time of 30 days, from August 31 to September 30, 1945, within which to complete this job. The contractor advised that the stripping of the overburden in the quarry required considerable more work than was anticipated when he figured this job, and as a result, his plant operation was handicapped to the extent that they were unable to complete the job within the specified time limit. The Engineer advised that the amount of overburden and the amount of the screen rejects on this job were quite uncertain and, as stated by the contractor, delays were encountered on that account. Moreover, the contractor experienced difficulty in securing sufficient labor, which further delayed his operations. The State, he said, has not been inconvenienced by the delay and for that reason he recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Norris and Philpott, Contract No. 2719, for widening Trail Creek Bridge over the Rogue River on the Crater Lake Highway in Jackson County, requested an extension of time of 30 days, from August 15 to September 14, 1945, within which to complete this job. They attributed their failure to complete the project within the specified time limit to difficulties in securing materials and labor. The Engineer advised that the reason given by the contractors for over-running the specified time limit is substantially correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Warren Northwest, Inc., Contract No. 2726, for resurfacing the Albany-Crabtree Corner Section of the Santiam Highway in Linn County, requested an extension of time of 17 days, from July 31 to August 17, 1945, within which to complete this job. They stated that they were delayed in commencing work because of high water in the South Santiam River, which inundated the State-owned gravel bar that was specified for use in connection with this contract. The Engineer

advised that the reason given by the contractor for failure to complete the project within the specified time limit is correct. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

The Engineer reported that Contracts Nos. 2686, 2694, 2701, 2703, 2706, 2708, 2716, and 2727 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2686, with Porter W. Yett, for grading and paving on the Halsey-Harrisburg Section of the Pacific Highway East in Linn County; completed on August 4, 1945.

Contract No. 2694, with E. C. Hall Co., for grade widening, surfacing and oiling on the Foster-Canyon Creek Section of the Santiam Highway in Linn County; completed on June 11, 1945.

Contract No. 2701, with Rogers Construction Co., for furnishing crushed rock in stockpiles on the Clatskanie Section of the Columbia River and Mist-Clatskanie Highways in Clatsop and Columbia Counties; completed on June 30, 1945.

Contract No. 2703, with Dolan Construction Company, for construction of the Rockaway Culvert on Nehalem Avenue in the City of Rockaway in Tillamook County; completed December 7, 1944.

Contract No. 2706, with Vernie Jarl, for furnishing crushed rock in stockpiles on the Sandy-Government Camp Section of the Mt. Hood Highway in Clackamas County; completed on July 19, 1945.

Contract No. 2708, with Oscar Joelson, for furnishing crushed material in stockpiles on the Shutler-Condon Section of the John Day and Wasco-Heppner Highways in Gilliam County; completed on July 31, 1945.

Contract No. 2716, with Rogers Construction Co., for furnishing crushed rock in stockpiles on the Silverton-Silver Creek Section of the Silver Creek Falls Secondary Highway in Marion County; completed on July 23, 1945.

Contract No. 2727, with Parker-Schram Company, for grading and paving on the Schmeer Road Junction Section of the Pacific Highway West in Multnomah County; completed on July 25, 1945.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The meeting adjourned at 5:00 p.m. to reconvene at 9:00 a.m. the following day for disposal of additional routine matters.

Portland, Oregon
August 31, 1945

The State Highway Commission reconvened at 9:00 a.m. in Room 615 of the Imperial Hotel. Present were:

Mr. T. H. Banfield, Chairman
Mr. A. W. Schaupp, Commissioner
Mr. M. R. Chessman, Commissioner
Mr. R. H. Baldock, State Highway Engineer
Mr. C. B. McCullough, Assistant State Highway Engineer
Mr. J. M. Devers, Chief Counsel
Mr. H. B. Glaisyer, Secretary

The Engineer brought up for discussion the question of continuing the arrangement with the American Road Builders' Association for the training of young men from the South and Central American Republics under the "Inter-American Highway Training Program." He advised that the previous arrangement has worked out very satisfactorily and recommended that the Commission approve the appointment of two such trainees when the new program period commences in June, 1946. The Commission approved the recommendation.

The Engineer reported that the Little Butte Secondary State Highway is in very bad condition between McCallister Soda Springs and the junction with the Butte Falls Road and requested authority to post appropriate signs at each end thereof warning the general public of the condition and directing them to available detours. The Commission granted the request and thereupon by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, a certain highway extending from Eagle Point to the Jackson-Klamath county line has been heretofore duly and regularly adopted as a secondary state highway and is identified in the state highway records as the Little Butte Secondary Highway No. 270; and

AUG 30 1945
AUG 31 1945

WHEREAS, the section of said secondary highway between McCallister Soda Springs and the junction with the Butte Falls Road is in disrepair to such an extent that said section of said highway is practically impassible; and

WHEREAS, under conditions which prevail because of war emergencies the reconstruction or repair of said road must at this time be deferred; and

WHEREAS, it is the judgment of the Highway Commission, which judgment is concurred in by the Forest Service, that in the interests of the motoring public adequate road signs should be installed advising and warning the public of the impassible condition of said section of said highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. That the Commission does find and declare that the section of the Little Butte Secondary Highway No. 270 between McCallister Soda Springs and the junction with the Butte Falls Road is impassible and unsafe for travel and should therefore be so posted.

2. That the Engineer be and he hereby is instructed to erect and thereafter maintain, until otherwise instructed by this Commission, adequate road signs warning the public of the unsafe condition of said highway.

3. That one such sign be erected on said highway at mile point 21.5 and an appropriate road sign erected at mile point 26.0, and at such other places as in the judgment of the State Highway Engineer and the Forest Supervisor are deemed necessary for the protection of the motoring public.

4. That this resolution be entered in the minutes and records of the Commission as of the thirty-first day of August, 1945, and a duly certified copy thereof sent to Karl L. Janouch, Forest Supervisor, Rogue River National Forest.

The Engineer reported that a number of cities and towns have fulfilled the legal requirements with respect to the expenditure of the 1944 State Tax Street Funds which they received in 1945, and that additional cities and towns likewise have fulfilled legal requirements with respect to the expenditure of the 1943 State Tax Street Funds which were paid to them in 1944. He presented resolutions from each outlining plans for the expenditure of the fund available, which plans, he said, have been checked and meet with his approval. The following resolutions with respect thereto were adopted by the Commission, by unanimous vote, upon motion of Commissioner Chessman, which was duly seconded by Commissioner Schaupp:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by this Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1945 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Adams	$ 236.22
Aurora	318.69
Bandon	1,403.34
Bay City	529.75
Canyon City	436.10
Dayton	707.26
Dufur	547.92
Falls City	999.39
Gold Hill	749.19
Halfway	581.46
Hubbard	540.93
Jefferson	669.52
Lonerock	64.30
Maupin	373.20
Pilot Rock	500.39
Port Orford	1,055.30
Rogue River	535.34
Weston	696.08
Willamina	946.28
Yamhill	584.26

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Adams - Preston Street, Center Street

Aurora - 2nd Street, 3rd Street, Bobs Avenue, Main Street, Liberty Street

Bandon - June Avenue, 1st Street North, Harlem Avenue, Caroline Avenue, 3rd Street East, Elmira Avenue, Fillmore Avenue, Oregon Avenue, Ogden Avenue, 7th Street West, Cliff Street, 4th Street West

(continued on next page)

Bay City - Ocean Street, Pacific Street, Main Street, Trade Street, "A" Street, 9th Street, McCoy Avenue, Salmon Street, Warren Street, Tillamook Avenue, 15th Street, 4th Street, 6th Street, "B" Street, "C" Street, "D" Street, Seattle Avenue, Union Avenue, 2nd Street, Hare Street, Portland Avenue, Spruce Street, "E" Street

Canyon City - Bridge Street, Park Street, Main Street, Izee Street, Clay Street, Washington Street

Dayton - Church Street, 5th Street

Dufur - North 4th Street, Court Street, Klinger Street, North 2nd Street, North 1st Street

Falls City - Fairview Street, Terrace Street, West Boulevard, Lewis Street, Chamberlain Street, Lombard Street, East Avenue, 5th Street, Alder Street, Wood Street, Bryant Street, Prospect Avenue

Gold Hill - 5th Avenue, 1st Street West, 4th Avenue North, 7th Street West, 6th Avenue North

Halfway - Bell Street, Dawson Street, Church Street, Center Street

Hubbard - "D" Street, "A" Street, "C" Street, Third Street

Jefferson - Third Street, Union Street

Lonerock - "C" Street (repair wagon bridge), 4th Street (repair foot bridge)

Maupin - Grant Avenue, Dufur Avenue, 4th Street, 5th Street, 6th Street

Pilot Rock - Winthrop Street, Birch Street, New South Sumac Street and alley from New South Sumac Street to Highway 395, Union Avenue, Bud Parks Avenue, West Willow Street, Alder Street

Port Orford - Washington Street, 11th Street, Idaho Street, 16th Street, Jackson Street

(continued on next page)

AUG 31 1945

Rogue River - Broadway, Oak Street, Cedar Street, First Street, Second Street, Laurel Street, School Street, Park Street, Gilmore Street, Arbor Street

Weston - Purchase of crushed rock for Bruce, Broad, Wallace and Franklin Streets; Wallace Street (Bridge reconstruction); maintenance of all streets

Willamina - West Main Street

Yamhill - First Street, Elm Street, Laurel Street, 3rd Street

2. That the type, plan and character of improvement proposed in the resolutions filed with this Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the same.

5. This resolution shall be entered in the minutes and records of this Commission as of the 31st day of August, 1945.

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by this Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1945 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Boardman	$ 153.75
Cove	448.68
Drain	834.46
Eastside	891.76
Echo	391.37
Estacada	735.22
Fairview	426.31
Freewater	1,153.14
Gervais	464.05

(continued on next page)

AUG 31 1945

Hammond	$ 589.85
Hermiston	1,122.39
Jacksonville	1,063.69
Lafayette	571.68
Lakeview	3,446.85
Long Creek	332.66
Lostine	285.14
Molalla	1,267.76
Moro	431.90
North Powder	525.55
Oakridge	726.83
Phoenix	603.83
Salem	43,201.58
St. Paul	255.79
Stanfield	336.86
Sublimity	391.37
Yoncalla	387.17

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approved for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Boardman - Main Street

Cove - Ash Street, Elm Street, Poplar Street, Caddie Street, Foster Street, Bryan Street, Church Street, Orchard Street, French Street, Hill Street, 2nd Street, 1st Street, Water Street, Hibbler Street, Main Street, Conklin Lane

Drain - Construction or repair of bridge over Pass Creek at "B" Street

Eastside - First Avenue

Echo - Dupont Street, Bridge Street, Bonanza Street

Estacada - Zobrist Street, Broadway Street, Wade Street, Sixth Street, Seventh Street, Eighth Street, Loop at Community Center on Lakeshore Drive

(continued on next page)

12615

Fairview - All city streets

Freewater - Robbins Street, Washington Street

Gervais - "E" Street, "F" Street, Fourth Street

Hammond - E. 1st Street, W. 1st Street, Kinney Street, Ford Street, Boone Avenue, W. 2nd Avenue, Alder Street, Myler Avenue

Hermiston - Hurlburt Avenue, Gladys Avenue, Second Street, Fifth Street, Locust Street, First Street

Jacksonville - 3rd Street, also bridge on "E" Street

Lafayette - Bridge Street, Adams Street, Jefferson Street, Market Street, Madison Street

Lakeview - "E" Street, South Street, Fourth Street, Third Street, "H" Street, First Street, Second Street

Long Creek - 2nd Street

Lostine - Resort Street, Elizabeth Street, College Street, Cole Street, Roswell Street, Wallowa Street

Molalla - Cole Street, Heintz Street, Toliver Road

Moro - 1st Street, Scott Street, Bidwell Street

North Powder - "G" Street

Oakridge - First Street, Commercial Street, High Street, Second Street, Oak Street, Yew Street, Hills Street, "Y" Drive, Pine Street

Phoenix - Church Street

Salem - South River Road, bridge construction, and maintenance of city streets

St. Paul - Repair all city streets

Stanfield - Furnish Avenue, Sherman Street

Sublimity - Broadway Street

Yoncalla - 1st Street, 2nd Street, Applegate Avenue, 4th Street, 5th Street, "A" Street, "B" Street, "C" Street, "D" Street

AUG 31 1945

2. That the type, plan and character of improvement proposed in the resolutions filed with this Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the same.

5. This resolution shall be entered in the minutes and records of this Commission as of the 31st day of August, 1945.

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by this Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1944 for street purposes as provided in said law the several sums or amounts set apposite the names of the respective cities or towns:

Banks - - - - - - - - - - - - - - -	$ 339.24
Elgin - - - - - - - - - - - - - - -	1,369.31
Lonerock - - - - - - - - - - - - -	63.18

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Banks - Depot Street, Woodman Street, Wilkes Avenue, Parmley Street

Elgin - "D" Street, Elgin Street, Wallowa Street

Lonerock - "C" Street (repair of wagon bridge), 4th Street (repair of foot bridge)

AUG 31 1945

2. That the type, plan and character of improvement proposed in the resolutions filed with this Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the same.

5. This resolution shall be entered in the minutes and records of this Commission as of the 31st day of August, 1945.

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by this Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1944 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Jacksonville - - - - - - - - - - - - -	$1,045.17
Rainier - - - - - - - - - - - - - - -	1,624.77

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Jacksonville - 3rd Street, also construction of bridge on "E" Street

Rainier - "D" Street, "B" Street, "C" Street, 1st Street, 4th Street East, 3rd Street East, "E" Street, 2nd Street East, 6th Street East.

AUG 31 1945

2. That the type, plan and character of improvement proposed in the resolutions filed with this Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the same.

5. This resolution shall be entered in the minutes and records of this Commission as of the 31st day of August, 1945.

The Secretary presented a petition signed by the County Court of Klamath County, Klamath County Chamber of Commerce, Merrill Grange, Midland Grange No. 781, Merrill Service Club, City of Chiloquin and Klamath County Dairymen's Association, in which the State Highway Commission was asked to "place its support behind securing the designation of the highway between Goshen Junction, Oregon, and Weed, California, via Oregon 58 and U. S. 97, as Alternate U. S. 99, without interfering with the existing designation of The Dalles-California as U. S. 97." A like request was also presented from the City Council of Malin.

The Engineer advised that the American Association of State Highway Officials has jurisdiction over such matters and the requests for such designations must bear the approval of the states concerned, acting jointly. The matter was discussed briefly but action thereon was deferred until a future meeting of the Commission.

In this connection the Engineer brought up for discussion the present plan to include in the Secondary Federal Aid Highway System the highway which extends southeasterly from Klamath Falls, Oregon, to Alturas, California, known in Oregon as State Route No. 39. He explained that the original plan was to place this road in the Primary Federal Aid System and that the California Highway Department was so informed and requested to endorse the designation, but the plan was changed later when the Congress made available more secondary money than was anticipated, which revealed that the improvement of the road could be expedited if it were placed in the secondary highway system. He recommended approval of the change and that he be given authority to ask the Public Roads Administration to classify the road as a secondary highway, and to notify the California

Highway Department thereof. The Commission approved the Engineer's recommendation unanimously.

The Engineer requested authority to purchase 13,000 gallons of yellow traffic line lacquer at an estimated cost of $28,600. The Commission approved the request.

The Commission also approved the purchase of one set of Black & Decker Loadometers, Highway Model, costing about $550, for use by weighmaster crews.

The Commission discussed a request from citizens of Rockaway for the establishment of a "bus stop" area on the Oregon Coast Highway in that town. The Engineer advised that the matter has been investigated by the Traffic Engineer who recommends the establishment of such "bus stop" area on the west side of the highway just north of Owens Street, and that he concurs in the recommendation. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

> WHEREAS, as a part of and in connection with the transportation of persons by bus over the Oregon Coast Highway the needs and conveniences of both passengers and carrier require that regular stops be made in the Town of Rockaway; and
>
> WHEREAS, the Oregon Coast Highway constitutes and is the main thoroughfare in and through said town; and
>
> WHEREAS, said town is unincorporated and therefore all jurisdiction over said highway is vested in the State Highway Commission; and
>
> WHEREAS, local residents of said town have requested, and said request has been endorsed by the Oregon Motor Stages, that a definite area be defined and set aside for the stopping and parking of buses in said town to load and unload passengers; and
>
> WHEREAS, it is the judgment of the Commission that the interests and welfare of all parties concerned, including the general public, justify special provisions with respect to bus traffic, and to that end that there be set aside a special and defined area as a bus stop area, and that such place be definitely and appropriately marked and signed;
>
> NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively as follows:
>
> 1. That the area extending from Owens Street in the Town of Rockaway, thence north for a distance of 150 feet on the westerly

side of the Oregon Coast Highway, be and said area hereby is designated as an area within which buses may stop and park to load and unload passengers, express and mail.

2. Nothing in this resolution shall be deemed or in any way construed to authorize the use of any part of the traveled portion of the highway for the parking and stopping of buses, and no vehicle shall, while parked, occupy any portion of the traveled section of said highway.

3. The area between the traveled portion of the highway and the right of way boundary has a width of ten feet only. In this connection the Highway Commission does not represent, guarantee, or insure that said space is adequate for the parking of buses to unload or load passengers and at the same time afford ample and necessary protection and safety for such passengers.

4. Any carrier using said area as a place to stop and park while loading or unloading passengers shall be responsible to such passengers and other members of the public for any injury growing out of or connected therewith.

5. The State Highway Engineer is hereby authorized and instructed to erect and thereafter maintain appropriate signs defining the limits of said area and carrying information as to the purpose of the same.

6. If during parts of the day or night when buses cross traffic for the purpose of reaching and/or leaving said parking spot traffic on the highway is unusually heavy, a flagman shall be assigned by the carrier to direct or otherwise control traffic during such bus movement.

7. This authorized use of the right of way of the highway may be terminated by the Commission if and when in the judgment of the Commission public welfare demands such termination.

8. There is attached hereto and made a part hereof a blueprint, marked Exhibit A , on which is shown in solid color the area set aside by this resolution for a bus stop. (*)

9. This resolution shall be entered in the minutes and records of the Commission as of the thirty-first day of August, 1945, and a duly certified copy thereof delivered to the proper official of the Oregon Motor Stages and a like copy to a representative of the Town of Rockaway.

(*) Footnote:

The map mentioned in this resolution is attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 3, under the heading "Resolutions Designating 'No Parking' and 'Bus Stop' Areas," and said map by this reference is made a part of this minute entry to the same extent as if copied in full herein.

The Commission also discussed a request from the City of Silverton for the establishment of a short "no parking" zone on the east side of Water Street (Silver Creek Falls Secondary State Highway) south of Main Street so that loaded logging trucks may make a left hand turn in this intersection without fear of damaging parked automobiles. The Engineer recommended approval of the request as a safety measure. The Commission approved the recommendation and instructed the Chief Counsel to prepare a form of resolution covering the matter for adoption at the next meeting.

A letter was presented from the City of Portland requesting approval of a change in the classification of certain property situate at the southwest corner of N. E. Lombard Street and N. E. 10th Avenue, Portland, from Zone I (Residential) to Zone III (Business). The Commission deferred action on this matter pending inspection of the premises immediately following adjournment. (The Commission inspected this property and also the property affected by a proposed change in zone at the intersection of S. E. 8th Avenue with McLoughlin Boulevard at 11:00 a.m., all Commissioners, the State Highway Engineer, the Construction Engineer, and the Secretary being present. With respect to the property at the intersection of N. E. Lombard and N. E. 10th Avenue, the Commission decided that to change the classification would be detrimental to the State's interests and that the use of the property for business purposes would result in the creation of a material hazard to the traveling public. The Engineer was instructed to convey such information to the city authorities for their information without any recommendation with respect to changing of the zone classification. He was also instructed to advise such authorities that the Commission feels that full responsibility and authority for the making of zone changes rests entirely with the City Council and the City Planning Commission. In regard to the other tract, the Commission decided on inspection that no particular hazard would be created if the zone classification were changed and instructed the Engineer to so inform the city authorities and to advise them further that the Commission is making no recommendation with respect to the proposed change because it considers that the responsibility and authority to make such changes rests solely with the City Council and the City Planning Commission.

In this connection, the Commission unanimously adopted the procedure outlined above as its established policy to be followed hereafter in passing on matters of this kind.)

AUG 31 1945

The Commission had under discussion a request from Mr. Martin Petersen, Florence, for permission to purchase overburden material from the Cape (Berry Creek) Quarry located on the Oregon Coast Highway about nine miles north of Florence, Lane County, for use in connection with the construction and maintenance of logging roads, mill yards, etc. The Engineer advised that Mr. Petersen simply wants the rock overburden that was wasted a number of years ago in connection with the State's operation of this quarry, which is unsuitable material for highway purposes. He recommended approval of Mr. Petersen's request subject to the condition that he will pay three cents per cubic yard for it and will leave the premises in a condition that will not interfere with the future use of the quarry by the State. The Commission approved the recommendation unanimously and ordered that the matter be covered by appropriate agreement.

The Secretary presented a resolution from Malheur County Court accepting jurisdiction over a portion of the right of way of the I.O.N. Highway (old route) heretofore abandoned by the State Highway Commission as a state highway and allowing the balance of such abandoned sections to revert to the abutting property owners. The Commission approved the resolution and ordered it filed.

The Commission confirmed its telephonic authority to reinstate the log hauling permit of Mr. Art Johnston, Portland, which was previously cancelled for refusal of Mr. Johnston to let his loads be weighed by Highway Weighmasters, Mr. Johnston having filed with the Commission a letter to the effect that he will not repeat the offense. Mr. Johnston was placed on probation.

The Commission also confirmed its telephonic order to cancel the log hauling permit of Mr. Don Baldridge, Reedsport, for consistently overloading his logging equipment.

The Engineer reported on the log hauling operations of E. K. Wood Lumber Co., Scottsburg, whose records for overloading since being warned to desist is entirely unreasonable. He advised that weighmasters' reports covering the eighteen day period from August 6 to August 24 show 44 loads weighed, of which 16 loads, 36% of the total, were in violation of the weight requirements. The Commission considered this record entirely out of proportion and accordingly ordered the immediate cancellation of the log hauling permit of this operator.

The Commission discussed the advisibility of continuing the practice of granting permits for oversized movements over state highways during week ends, holidays, and during the hours of darkness and ordered restoration of the rules and regulations that were in effect before the war covering such movements, in view of the heavy increase in highway travel that has resulted from the lifting of gasoline rationing.

The Commission confirmed the telephonic authority heretofore given the Engineer to permit Richard Rosecrans, Engineer Specialist, to go to Seattle at State expense on August 26-28, 1945, in connection with research

work on suspension bridges; also to permit Bruce Crandall, Acting Traffic Engineer to attend, at State expense, a meeting of the National Committee on Revision of the Manual of Uniform Traffic Control Devices, in Chicago on August 2-4, 1945.

The following matters of unfinished business from previous meetings were considered by the Commission:

1. Request of City of Redmond for improvement of 7th Street, Redmond, as a truck route in order to relieve congestion on 6th Street (route of U. S. 97) through the business district: The Engineer advised that a report on this matter would be rendered at the next meeting.

2. Request of the City of Newberg for the improvement of certain city streets along the route of the Hillsboro-Silverton Secondary State Highway, in Newberg: The Engineer advised that the present route of this highway through Newberg is not permanent, therefore it would be unwise in his estimation to spend any considerable amount for widening purposes as the city has requested; moreover, the Commission has already formulated a program for the funds that are available so the work could not be financed. The Secretary was instructed to so inform the City Council.

3. Request of Corvallis City Council for improvement of certain city streets in Corvallis in connection with proposed establishment of one-way traffic routes for U. S. 99W through this place: The Engineer advised that he conveyed to the city officials the Commission's attitude with respect to this matter and now is simply awaiting the city's reply.

4. Request of Columbia County delegation for the further improvement of the Lower Columbia River Highway between St. Helens and Astoria: The Engineer advised the project of most importance is the proposed revision at Little Jack Falls, which is estimated to cost about $750,000; however, he cannot make a recommendation until he has personally inspected the highway, which he will do as soon as he can find the time. Chairman Banfield recalled that the Commission gave the delegation to understand that something within reason would be done for this district but he did not have in mind at the time a project costing $750,000.

5. Proposed development of Champoeg State Park: The Engineer advised that he inspected this park in company with the State Parks Superintendent and found it to be in fine condition and being cared for in an excellent manner under prevailing conditions. The Parks Superintendent, he said, has in mind certain developments such as construction of new lunch tables, benches, water system, etc. for which funds have been budgeted, but is experiencing difficulties in securing necessary materials so wants authority from the Commission to spend the balance of this year's budgeted amount next year. He recommended approval of the request. The Commission approved the recommendation.

6. Removal of privately-owned cabin from Casey State Park on Crater Lake Highway in Jackson County: The Chief Counsel advised that he is still corresponding with the owner of the cabin but has nothing definite to report at this time.

7. Request of citizens of Baker for construction of a new state highway between Bates, Grant County, and Baker, Baker County, to facilitate the truck hauling of logs: The Engineer advised that his report on this subject will be ready to render in about two months and that in the meantime he will advise the local people of the status of the investigation. Report approved.

8. Request for construction of a bridge across the Willamette River at Independence: The Engineer advised that according to Senator Dean Walker the two counties concerned, Marion and Polk, will pay fifty per cent of the cost of this structure, which is estimated at $600,000; also, there is a question where the bridge should be located, which cannot be decided until a survey has been made. Chairman Banfield expressed his approval of the project if the counties will enter into a written agreement to pay one half of the costs involved, and provided the total cost does not exceed $600,000. Commissioners Schaupp and Chessman concurred. The Chief Counsel was thereupon instructed to prepare a form of agreement covering the matter for submission to the two counties for acceptance.

The Engineer reported on the motorcycle accident that occurred recently on the Oregon Coast Highway near Miles Crossing wherein a 5½ year old boy was killed. He advised that the basic cause of the accident was the surprise element confronting the operator of the motorcycle when the boy suddenly dashed across the highway, apparently without watching for traffic, and that the solution of the problem really lies in educating the public of the dangers rather than by installing traffic signals or more strict law enforcement. The Commission approved the report and also the suggestion of Commissioner Chessman that additional warning signs be posted at a greater distance from the crossing than now exist.

Commissioner Chessman brought up for discussion a request from the City of Pendleton for the widening of West Court Street in that city, route of the Old Oregon Trail. It appears that the city wants this street widened and that all but two or three of the property owners affected have agreed in writing to allow the removal of trees along their property frontage as may be necessary to accommodate the improvement, which includes provision for a diagonal highway connection. The Engineer was instructed to ascertain what the city has in mind and report his findings at the next meeting of the Commission.

The Commission had under discussion a date for its next regular meeting and decided to hold such meeting in Portland on Monday, September 24, 1945. The Secretary was instructed to arrange for the use of the Stock Exchange Room in the Imperial Hotel.

The Commission approved and signed agreements, etc., as follows:

Agreement with Robert Fromm covering the pasturing of sheep in Humbug Mountain State Park.

Agreement with Melissa Purkerson, Junction City, covering rental of four acres of State-owned property at $5 per year.

Agreement with Sam Roberts covering rental of State-owned property along Wolf Creek Highway at North Plains, consideration, $20 per month.

Project agreement with Public Roads Administration covering the Steiwer Hill-Albany Project.

Project agreement with Public Roads Administration re North Powder-Davis Ranch Access Road Project.

Bargain and sale deed conveying unto Fortner-Walter Realty Company parcel of land in Block 1, Kenton.

Bargain and sale deed conveying unto Clarence A. Dutcher and wife 5.92 acres of land in Yamhill County.

Bargain and sale deed conveying unto Edith M. Eschle and husband Lot 2, Block 32, Hot Springs Addition to Klamath Falls.

Application for right of way for Cape Arago Secondary Highway across Government property in Coos County. Consideration, $1,500, State and County.

Rental agreement with H. L. Kuhl covering rental of store and residence at Spencer Creek, Lincoln County.

Agreement with Joseph A. Bucher and wife re cattle pass at railroad crossing on property acquired from Juanita Starr.

The meeting adjourned at 10:45 a.m. following which the Commission inspected the proposed zone classification changes at S. E. 8th Avenue and McLoughlin Boulevard and at N. E. 10th Avenue and Lombard, the results of which are entered earlier in this record.

Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

Portland, Oregon
September 24, 1945

The State Highway Commission met in regular session at 9:00 a.m. in the Stock Exchange Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
Arthur W. Schaupp, Commissioner (Arrived at 10:30 a.m.)
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
C. B. McCullough, Asst. State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Bids, as follows, for construction work and ferry operation were opened and read by the Secretary in conformity with previously published notices, following which Chairman Banfield announced that the award of contracts would be made at 3:00 p.m. in the same room:

SEP 24 1945

CENTRAL OREGON HIGHWAY IN HARNEY COUNTY
MAINTENANCE BUILDING AT SUNTEX JUNCTION

No bids received

SIUSLAW HIGHWAY IN LANE COUNTY
GREENLEAF CREEK-LONG TOM RIVER
ROCK PRODUCTION PROJECT

Rogers Construction Co., Portland	$ 46,000.00

CENTRAL OREGON AND JOHN DAY HIGHWAYS
IN MALHEUR COUNTY
VALE ROCK PRODUCTION PROJECT

M. C. Lininger & Son, Medford	$ 36,105.00

OLD OREGON TRAIL, WALLOWA LAKE AND COVE HIGHWAYS
IN UNION COUNTY
LA GRANDE ROCK PRODUCTION PROJECT

Newport, Kern & Kibbe, Portland	$ 25,125.00
Arthur Gentemann, Portland	26,415.00
D. C. & A. L. Williams, Oregon City	26,425.00
Rogers Construction Co., Portland	26,764.00
R. O. Dail, Portland	30,575.00

JOHN DAY HIGHWAY IN WHEELER COUNTY
FOSSIL-SERVICE CREEK ROCK PRODUCTION PROJECT

Vernie Jarl, Gresham	$ 22,100.00
R. O. Dail, Portland	24,300.00
Arthur Gentemann, Portland	27,200.00

COOS RIVER SECONDARY HIGHWAY IN COOS COUNTY
FERRY SERVICE ACROSS COOS RIVER AT ENEGREN CROSSING

	24-hour Cont. Service	20-hour Daily Service
Geo. F. Gunnell, Coos Bay	$ 1,599.25 per mo.	$ 1,406.75 per mo.
Portland Tug & Barge Co., Portland	1,945.00 " "	1,690.00 " "
Brunell Bros., Coos Bay	2,025.00 " "	1,715.00 " "

The State Park Superintendent, Mr. S. H. Boardman, was present and reported on the following state park matters:

SEP 24 1945

1. Purchase of Tillamook Head, Clatsop County, as an addition to Ecola State Park: The Parks Superintendent recommended the purchase of this area in order to complete this park. He advised that the tract contains in excess of 1200 acres of land which is covered with a fine stand of old growth timber that is valued at $180,000. He further stated that the property is owned largely by the Crown-Zellerbach Co., which he believed would be willing to sell the land after the timber has been removed for $5 per acre. He requested authority for the right of way department to negotiate the purchase of the land on the basis that the Company be allowed 25 years within which to remove the timber. In the consideration of this matter it developed that additional privately-owned land lying north of the Crown-Zellerbach property would be needed to completely fill out this park and provide access thereto from the north. It was the concensus of opinion that this tract, too, should be acquired if the Crown-Zellerbach property were acquired. After discussion the Commission authorized the Chief Counsel to negotiate the purchase of both areas and report the results thereof. (A delegation appeared before the Commission later in the session regarding this matter. See ahead for the minute entry.)

2. Proposed purchase of an addition to Short Sand Beach State Park: The Parks Superintendent reviewed briefly the history of this park which, he said, was the gift of the late Mr. E. S. Collins, Portland. He advised that Mr. Collins retained for his own use a timbered tract, containing 42.22 acres, at the mouth of Short Sand Beach Creek, which the Collins' heirs are willing to sell to the State for $12,000. He further advised that, in his estimation, the property is worth only about $8,000, which is the amount that was set up in the budget for this purpose. He requested authority for the right of way department to negotiate the purchase of this tract, which is needed to fill out this park. The Commission approved the request by unanimous vote.

3. Proposed park at Wallowa Lake: The Parks Superintendent requested authority to negotiate purchase of a park at the south end of this lake. In the discussion of this matter it was pointed out that the Commission considered the matter last year after inspecting the site and decided not to establish a public park at this point in view of the fact that there are privately-owned parks in the same vicinity and the establishment of a State park did not appear to the Commission to be justified. In this connection the Secretary presented a resolution from the Joseph Commercial Club urging the establishment and maintenance of a State park at this place. A letter was also presented from the Enterprise Lions Club endorsing the request. The Parks Superintendent suggested that it might be well to ascertain just how much it would cost to acquire the area before the matter is dismissed entirely from further consideration. The Commission thereupon authorized such investigation.

4. Report on fire loss at the Cove State Park: The Parks Superintendent reported briefly that a fire recently destroyed a residence building in this park valued at $3,000. He suggested that the State Board of Control should be requested to pay to the State Highway Commission a sufficient amount from the Restoration Fund to pay the cost of building storage sheds that are needed at this place in lieu of restoring the residence building. The question arose whether or not such a building project is eligible for such funds under the Restoration Act. The matter was referred by the Commission to the Chief Counsel to contact the State Board of Control relative thereto.

5. Offer from Multnomah County to deed to the State as a gift certain property situate adjacent to Columbia River Highway and Sandy River near Baseline Road Bridge, known as Dabby Park, for State park purposes. The Parks Superintendent recommended acceptance of this offer. He pointed out, however, that in order to complete the park area it would be necessary to acquire three privately-owned lots that are within the area and a building which is valued at about $2,000 that is located on one of them. The Commission appeared favorably inclined to adopt the recommendation provided the three privately-owned lots can be obtained at reasonable cost. Definite action on the matter was deferred until such information is obtained. The Parks Superintendent was authorized to negotiate the purchase of the three lots in question. 4733

6. Rental of farm land in Champoeg State Park: The Parks Superintendent advised that Mr. H. Zorn, who has been leasing about 70 acres of this park for the past few years at a yearly rental of $3 per acre, has requested the renewal of his lease for another year. He recommended approval of the request. The Commission approved the recommendation.

Mr. Roy A. Perry, ex-President of Oregon Council, American Pioneer Trails Association, and Chairman of the Council's "Story Spot Committee," appeared before the Commission relative to the establishment of an historical monument on the public school grounds at St. Helens, adjacent to the Lower Columbia River Highway. Mr. Perry advised that the Association has in mind to establish this monument in memory of Oregon pioneers, particularly his grandmother who came to Oregon and settled in the St. Helens district in 1845. He further advised that the proposed monument has the approval of the Oregon Council of the American Pioneer Trails Association as being in conformity with the Association's policy concerning the maintenance of historical monuments along the Old Oregon Trail throughout its entire length; also, that Multnomah County has agreed to furnish a native stone for the purpose and that the Pioneer Trails Association will furnish a bronze plaque containing appropriate wording. The Association is particularly anxious, he said, to dedicate the monument with appropriate centennial exercises in November, at which function the Hon. Earl Snell, Governor of Oregon, will make the dedicatory speech. He pointed out that, while Multnomah County is furnishing the boulder for the monument, no means have been provided to transport it from its present location near the St.

Johns Bridge to the monument site. He asked the Highway Commission to authorize the use of a State truck for this purpose and to prepare a small parking area around the monument for the accommodation of those who wish to read the inscription. The Engineer advised that it would cost about $80 to move the stone and about $120 additional to rock the area as requested. He recommended approval of the expenditure as being in line with the Commission's policy regarding such matters, subject, however, to approval of the project by the Memorial Committee of the Oregon Historical Society. The Commission approved the recommendation unanimously.

A letter was presented from the City of Springfield advising that the rapid industrial growth of their city has greatly increased pedestrian and auto traffic on East Main Street (McKenzie Highway), and in order to avoid accidents it is going to be necessary for the city to construct sidewalks for the safety of pedestrians; however, the sidewalks cannot be built unless and until the drainage ditches on each side of the highway are filled in. The Highway Commission is asked to install tile drains on each side of the highway to replace the ditches and to fill in the ditches level with the highway pavement. The Engineer advised that investigation reveals that such project would cost about $102,000, including the construction of curbs, storm sewers, and paving the full width of the highway between the curbs. He suggested that action on the matter be deferred until the Commission discusses its 1946 budget, at which time the matter can be given consideration along with other projects of like nature. The Commission approved the recommendation and instructed the Engineer to furnish the members of the Commission with a list of projects in this category.

The Engineer brought up for discussion the matter of constructing a maintenance building in the town of St. Helens. He advised that the Highway Department is now leasing quarters at this place and that the owner wants to improve the property for his own use, so the State will have to find other accommodations; moreover, the owner is endeavoring to raise the rent. He gave as his thought, in view of the circumstances, that it would be advisable for the State to surrender its lease and construct its own building, which he estimated would cost about $10,500. He so recommended and requested authority to advertise the project for bids to be received at the next meeting. The Commission approved the recommendation.

A letter was presented from Mr. H. J. Andrews, Regional Forester, U. S. Forest Service, inquiring whether or not the State Highway Commission would be willing to assume the responsibility for snow removal operations on Timberline Road this winter on a reimbursable basis. Mr. Andrews advised that the Forest Service could furnish some of the necessary equipment, and possibly several operators, but is not in a position to do the work. The Engineer advised that snow conditions at this place are very bad and the task to keep the road open is a difficult one; however, he suggested approval of Mr. Andrews' request insofar as is possible after the Mount Hood Highway has been cleared. The Commission deferred a decision in the matter pending consultation with Mr. Andrews personally. The Engineer was instructed to invite Mr. Andrews to be present at the afternoon session. (See ahead for final decision.)

SEP 24 1945

A delegation from The Dalles, consisting of the following, was present in regard to the construction of the proposed bridge across the Columbia River at The Dalles: Geo. Stadelman, Mayor; J. B. Kirk, County Judge, Wasco County; Ward Weber, Vice-President, The Dalles Port Commission; Tod Gustafsen, Manager, The Dalles Port Commission; Homer S. Wall, City Engineer. Mayor Stadelman headed the group. He advised that the people of The Dalles are very anxious to secure this bridge and would like to know if there is anything that they can do to expedite construction. He urged the Commission to authorize the preparation of preliminary plans for the structure, which, he said, is badly needed in order to alleviate the present cross river traffic congestion. He presented a tabulation showing the volume of traffic that crossed the river on The Dalles Ferry during the period September 1 to September 8, 1945, totaling 5,103 vehicles, both north bound and south bound, and the approximate ferryage collected totaling about $2,682.25. It was his thought that everything possible should be done at this time to secure Federal aid to finance the project and to secure the construction of the bridge at the earliest possible time. Judge Kirk declared that the delegation is not a pressure group, but they are very anxious for the bridge and are simply offering their services to speed the matter along. Mr. Weber stated that The Dalles Port Commission is in full accord with the project and will do all it can to promote it.

Chairman Banfield advised that The Dalles bridge is not included in the Commission's postwar construction program, which, he said, was prepared after consultation with all of the counties and has received the approval of the county courts. He also said that the Commission has accepted the Engineer's report covering the Columbia River bridge investigations and has approved the location recommended therein for the bridge at The Dalles. Commissioner Chessman suggested, in view of the fact that the State of Washington is also interested in this bridge, that it would be advisable to ascertain the attitude of the Washington Highway Department relative thereto. The Engineer pointed out that before the bridge could be constructed an enabling act would have to be secured from The Congress and that, due to the fact that it is an inter-state structure, both states should join in the request for such enabling act, which is a prerequisite to the securing of a permit from the War Department authorizing construction of the bridge. He pointed out that the Federal Government has plans to construct a dam across the Columbia River in the vicinity of the bridge site, and if that materializes, it probably will increase the cost of the bridge. He gave as his thought that the Federal Government should provide the funds necessary to pay the additional cost. Chairman Banfield stated his approval of Commissioner Chessman's suggestion, as did also Commissioner Schaupp. The Engineer was thereupon instructed to contact the Washington Highway officials and ascertain their attitude with respect to this bridge project.

A delegation from Astoria and Pacific County, Washington, came before the Commission regarding the operation of the ferry across the Columbia River at Astoria. James O. Convill, Astoria City Manager, headed the delegation, which included Orvall Eaton, Mayor; James Hogg, City Commissioner; Sherman Lovell, President, Astoria Port Commission; Guy Boyington,

County Judge, Clatsop County; John Slotte, County Commissioner, Clatsop County; and the County Court of Pacific County, Washington, George King, Chairman, Otto Roessler, Commissioner, and Mr. Thompson, Commissioner. Mr. James L. Hope, City Attorney of Astoria, also was present on behalf of Captain F. S. Elfving, owner and operator of the present ferry.

Mr. Convill pointed out that the present ferry landing is at the end of 14th Street, whereas the former Highway Commission agreed to change it to the foot of 17th Street but was precluded from doing so because of the war. He urged such change now and the inauguration of a public-owned ferry operation because, he alleged, the ferry service now being furnished is entirely inadequate and cannot be made to serve the public properly under private ownership. He declared that the ferry operation at this place is a profitable venture in which the State should participate and urged immediate action to that end under authority of legislation enacted by the 1943 Legislature, which permits ports, counties, and cities to go into the ferry business if they want to.

Mr. Convill also declared that the providing of better ferry service here would attract tourists, many of whom by-pass Astoria because of the inconvenience of present ferry accommodations. He reiterated that better ferry service at this place is a necessity and gave it as their thought that it is the State's business to provide it.

Mr. King advised that the people of Pacific County, Washington, are experiencing the same trouble with this ferry operation and have the same cause for complaint as do the people in Astoria--part of the time the service rendered is satisfactory and at other times there is no service at all. Pacific County, he said, is ready and willing to do all that it can to help correct the situation.

In reply to an inquiry by Chairman Banfield as to what the delegation wants the Commission to do about the matter, Judge Boyington requested four things, viz: 1. That the State of Oregon join with the other agencies in bringing about a publicly-owned ferry service. 2. That the State Highway Commission designate someone to work with their Industrial Committee in investigations to ascertain on what terms and conditions surplus Government-owned boats can be acquired and to determine what it will cost to furnish the required ferry service. 3. That the services of the Commission's Chief Counsel be loaned to advise on legal matters that arise in the carrying out of this matter to a successful conclusion. 4. That the Commission take action immediately under the authority granted by Chapter 196, Oregon Laws, 1943, which authorizes and empowers the State Highway Commission and any county, city, town, and port bordering on any interstate stream to construct, maintain, and operate ferry service in and to an adjoining state, and to enter into agreements, etc. as may be necessary in connection therewith.

The Commission's Chief Counsel advised that the Commission has authority under the law mentioned by Judge Boyington to do the things requested, if it so desires.

SEP 04 1945

Following further discussion of a general nature Chairman Banfield advised that the Commission is not in a position to act on the matter today because there is a question how far the State can and should go. He suggested a joint investigation by the Engineer and the Chief Counsel to ascertain the facts. The suggestion was approved by Commissioner Chessman and by Commissioner Schaupp, who arrived at this juncture, and it was so ordered. Chairman Banfield made it clear that the Commission is making no promises or commitments now but will act as soon as possible.

Mr. Hope presented arguments on behalf of the North Beach Ferry Company, owner of the ferry under discussion. He advised that his client has no objections to the improvement of the present ferry slips but does take issue with the other speakers on the subject of inadequacy of service. He admitted that the service was inadequate during the month of August but alleged that was due to the fact that the Federal Government had taken one of the Company's ferry boats at the beginning of the war and the Company had not yet been able to reclaim it, although it was expected action to that end would be taken shortly. Mr. Hope also alleged that the traffic congestion that occurred at the ferry during August was the direct result of the lifting of gasoline rationing--people took advantage of the extra gasoline allowed and made long-delayed vacation trips. He further stated that he was not arguing whether or not the ferry operation should be a public or a private undertaking, but, in his estimation, it would be unwise for the City of Astoria to assume an additional obligation because it now has enough problems of its own.

Chairman Banfield explained that the question whether or not the ferry should be publicly-or privately-owned is not the main item before the Commission at this time; rather, the question is should the Commission join with the two counties and the City of Astoria in making an investigation to ascertain what can be done to improve existing conditions.

Mr. Hope stated that the North Beach Ferry Company has no objections to offer concerning such investigation. The Commission thereupon again instructed the Engineer and the Chief Counsel to join with the county courts of Clatsop County, Oregon, and Pacific County, Washington, and city officials of Astoria in making the investigation and to report their findings at the next meeting of the Commission, if possible.

Mr. Hope then brought up for discussion an offer from Mr. Irvan Rambeau, Astoria, to purchase a small strip of State-owned land bordering on the Columbia River Highway where it crosses Block 9, McClures Addition to Astoria, between 8th Street and 9th Street. He explained that Mr. Rambeau purchased a portion of this block that fronts on the highway but does not have access to the highway because of an intervening strip of State-owned land that was originally acquired as right of way but no longer is of value for such purpose since the highway was realigned at this point to accommodate a concrete building at the corner of 9th Street. He asked the Commission to deed the area to Mr. Rambeau, without charge, so Mr. Rambeau can proceed with developments that he has in mind. He asked for a like concession near the 14th Street intersection with the highway where, he said

a similar condition exists. The Engineer advised that the strip between 8th Street and 9th Street is of no value for highway purposes but there is a question as to the other area. He further advised that the right of way at these points was acquired from the City of Astoria, through Clatsop County, without cost, and in his estimation, if the Commission decides to dispose of the strips it should deed them back to the county, which, in turn, could deed them to the city for sale or disposition as it sees fit. County Judge Boyington, who was present, stated that the county would offer no objections if the property were deeded directly to the city. Following discussion the Commission referred the matter to the Engineer and the Chief Counsel with instructions to investigate whether or not the property should be disposed of. Motion was made by Commissioner Chessman that the property be deeded back to the city if the investigation reveals that the property is not needed for state highway purposes and that the Commission leave it with the Engineer and the Chief Counsel to make the decision. The motion was seconded by Commissioner Schaupp and carried by the unanimous vote of the Commission.

A delegation headed by Mr. Charles Erickson, Astoria, representing the Angora Club of that city, came before the Commission regarding the acquisition of Tillamook Head as an addition to Ecola State Park. Others in the group were: E. J. Hughes, Portland, President, Federation of Western Outdoor Clubs; W. G. Carey, Portland, President, Mazamas; Mrs. Martha Darcy, Vice-President, Mazamas; A. A. Loeb, Chairman, Recreational Committee, Portland Chamber of Commerce.

Chairman Banfield advised that the Commission discussed this matter at its morning session and authorized negotiations with the owners of the property to see what can be done. He pointed out that the area contains a stand of fine timber which would be very costly and beyond the limit of the State Highway Department to finance. He suggested that the group might be helpful some way in preserving this timber. This concluded the discussion.

The Assistant Attorney requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties, together with the offer which he recommended be made in connection with each parcel. After careful consideration of each item the Commission approved the request and by unanimous vote adopted the following resolution with regard thereto:

> WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

BERGER RANCH-BARNES ROAD SECTION, WOLF CREEK HIGHWAY

5203- Guerber, Adele E.
Right of Way
Option expires
March 16, 1946

1.0 acre at $500.00	$ 500.00	$	
Loss fruit and shade trees, large shrubs, grape vines, etc.	1,500.00		
General damages-cutting down acreage and leaving balance odd shape, little space for buildings	1,500.00		
Allowance-inconvenience during moving operations, etc.	500.00		
Estimated cost moving buildings and shrubs, etc.	3,100.00	7,600.00	Collins

ISLAND CITY-COVE SECTION, COVE HIGHWAY

12238- Hermann, Henry and Winnie M. Hermann
Stock Pile site
Option expires
March 14, 1946

0.97 acre at $51.55 per acre	$ 50.00	$ 50.00	Benson

SEP 04 1945

SODA MOUNTAIN SECTION, JOHN DAY-BURNS HIGHWAY

11317- Marsh, Davida
Channel Change

0.16 acre at $25.00	$ 4.00	$ 4.00	Cozad

FRONT STREET PROJECT, CITY OF PORTLAND, PACIFIC HIGHWAY WEST

11928- Foster and Kleiser Company
Right of Way

2,033 sq.ft. at 10¢	$ 203.30	$ 203.30	McCallister

9969- Cohen, Anna Rose
Right of Way
easement

Construction easement for purpose of excavation and construction concrete wall	25.00	25.00	McCallister

(*) Footnote:

Re item #12225 for purchase of right of way from Barnard L. Beal, the Commission authorized the taking of bids for the purchase of the buildings located on the property.

SEP 24 1945

Messrs. H. P. Eby and Earl Dexter, Redmond, representing Terrebonne Grange, came before the Commission and requested the improvement of the O'Niel State Secondary Highway from its junction with The Dalles-California Highway (U. S. 97) easterly a distance of about four and one-half miles to a connection with the Lone Pine Road. Mr. Eby advised that the road carries very heavy tonnage of farm produce, etc. and is in very bad condition, at times being almost impassible. He gave as his understanding that this road is a Federal aid secondary highway and that no provision has been made in the Commission's postwar program to improve it. He declared that the road carries much more traffic and is more deserving of improvement than the Tumalo-Deschutes Secondary Highway, for which provision has been made in such program. He urged reconsideration of the matter on account of the importance of the road to the people who have to use it. Chairman Banfield advised that the postwar program was arranged after consultation with the County Courts and that it is now too late to change it; however, the Commission will consider the improvement as a minor betterment project when the 1946 budget is formulated and may be able to do something if finances will permit, but is making no promise or commitment. Commissioners Schaupp and Chessman concurred. The Engineer was thereupon instructed to bring the matter to the Commission's attention when the budget is duscussed.

In this connection the Secretary presented a petition signed by 71 residents of Crook and Deschutes Counties requesting the improvement of this road from The Dalles-California Highway junction northerly and easterly to the east line of Section 30, Township 14 South, Range 14 East Willamette Meridian, and a second petition signed by 26 residents of Crook County requesting the improvement of the remaining section of this road into Prineville. The Commission ordered the petitions filed.

The Assistant Attorney presented an offer from Mr. L. A. McClintock to pay the sum of $3,100 for certain State-owned property known as the "Duck Lake" tract situate adjacent to the Boardman-Stanfield Highway in Umatilla County. He advised that Mr. McClintock is now willing to take the property with limited access to the highway. He recommended acceptance of the offer. The Commission approved the recommendation unanimously subject to the condition that the Engineer shall decide the points where access to the highway may be had.

The Assistant Attorney also brought up for discussion the granting of a two-year lease for the use of State-owned property in the town of Nyssa that was formerly owned by the Fletcher Oil Company. He advised that this property has been leased in the past on an annual basis with right of cancellation on 30 days' written notice, but inquiry has now been made whether or not the Commission would be willing to rent it for a definite two-year term without the cancellation reservation. The question arose whether or not the State is receiving enough rental for the property. In view thereof, the Commission deferred action in the matter until the next meeting. The Chief Counsel was instructed to look into the matter and report his findings at that time.

The question whether or not to sell certain State-owned buildings that were acquired with the right of way for the Front Avenue project in Portland had the attention of the Commission. The Assistant Attorney advised that there are about 25 buildings involved, all of which are now under lease. He pointed out that under the new Federal regulations six months' notice must be given the tenants to vacate and gave as his thought that perhaps the Commission would wish to take action to that end now so as to make certain that the buildings are disposed of before the next section of the Front Avenue project is constructed. The Commission voted unanimously to sell the buildings and instructed the Attorney to notify the present tenants to vacate. The Commission authorized legal action as may be necessary to secure compliance with the order.

The Commission's Chief Counsel discussed briefly with the Commission the sale of the old Knapp Hotel building in Port Orford. He advised that a number of inquiries have been received concerning this building and that he had hoped to report to the Commission at this meeting; however, there are new developments, so his report must be deferred.

Commissioner Schaupp brought up for discussion the matter of the sale of some houses that were acquired by the Commission in connection with right of way purchases in Klamath Falls. The Assistant Attorney advised that all of the renters have been notified to vacate as previously ordered by the Commission. In the discussion it was brought out that a Highway Department employee who is having difficulty finding a suitable place to live, due to the housing shortage in Klamath Falls, has asked the privilege of renting one of the buildings. It was the feeling of the Commission that the buildings should be sold now, notwithstanding such request for tenancy, so as to avoid the delaying of construction when the project is ready to go forward. The Commission thereupon authorized the advertising of the buildings for sale.

The Commission recessed for luncheon at twelve o'clock noon and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

A delegation from Lane County appeared before the Commission in the interests of the Siuslaw Highway. The delegation was headed by Hon. Earl Hill, State Representative, Cushman; and included Senator Angus Gibson, Junction City; County Judge Clinton Hurd, Eugene; H. L. Ashby, C. L. Carpenter, G. J. Johnson, and Glen Ditto, all of Junction City. These men spoke for the improvement of this highway, particularly the four-mile section over the summit of the Coast Range. Senator Gibson alleged that a former Highway Commission, which was headed by Hon. Leslie M. Scott, at one time promised the people of Lane County that the Commission would construct a tunnel to eliminate excessive curvature in the present highway over the mountain pass. He declared that there are seven or eight lumber companies that are hauling their products to Junction City over this road and that the proposed improvement is a necessity in order to eliminate the hazards of the curved alignment in the present highway. He further stated that the construction of the tunnel would greatly reduce the cost to maintain the highway over the summit; also, that they appreciate that the Highway Commission

is not in a position to do the work this year, but they want the Commission to keep the project in mind and undertake it at the earliest possible time.

Mr. Johnson stated that there are from 1,000,000 to 1,500,000 feet of lumber transported over this road daily. Construction of the tunnel, he said, would increase the capacity of the road 25 per cent. Mr. Carpenter urged approval of the project in order to eliminate the dangers that now exist in the transportation of lumber and logs. It was his thought that traffic would justify the improvement. Mr. Hill endorsed Senator Gibson's remarks and added that the Siuslaw Highway is the only highway access that Lane County has to the coast and is the shortest highway to the ocean beaches from the Klamath Falls district. He also said that the delegation is not pressing definite action by the Commission today but is simply asking encouragement. Mr. Ashby spoke for the improvement from the standpoint of the Standard Oil Company, which operates its tank trucks over the road.

The Engineer advised that the proposed tunnel would be nearly 1,000 feet long and that to construct the line change, four miles in length, including the tunnel, would cost approximately $600,000, based on an estimate made in 1936. It was his thought that the project would be eligible for forest highway monies and that it might be possible to finance it in that manner at some future time.

Chairman Banfield gave as his understanding that the delegation wants the Highway Commission to give consideration to this project, and if possible, to construct it as one of the first projects when funds become available to finance it, and such being the case, the Commission will be pleased to keep it in mind without making any definite commitment or promise regarding it. The Engineer was thereupon authorized by the Commission to work up the project to the point where it can be analyzed intelligently in connection with the formulation of future highway programs. This concluded the conference.

Mr. A. A. Comrie, Chairman of the Board of Directors of Timberline Lodge, was present in regard to the removal of snow from the Timberline Lodge Road during the coming winter season. He inquired whether or not it is within the province of the State Highway Commission to conduct the snow removal operations or at least render some assistance to that end. He advised that they plan to open up the Lodge soon and to keep it open during the winter months but cannot make definite arrangements until they know whether or not the road leading to the Lodge will be kept open for public use; in fact, they will not open up the Lodge unless they are assured people can get to it. Messrs. H. G. Andrews, Regional Forester, and James Frankland, Regional Engineer, of the U. S. Forest Service, were present and entered into the discussion of this matter. Mr. Frankland advised that the matter of improving the alignment and width of the road, which has hindered the operation of snow fighting equipment in the past, has been solved and that the only thing remaining to be done to put the road in good condition is a small amount of surfacing. The State Highway Engineer advised that the State Highway Department has rock that could be used for such purpose,

SEP 21 1945

but the deciding factor is the labor problem--that proper service cannot be rendered unless men can be obtained to do the work. He pointed out that the Forest Service has agreed to pay the expense of the snow removal operations if the State will assume the obligation to perform the work and advised that he would make arrangements accordingly if the Commission approves, but cannot guarantee to keep the road open at all times, especially during periods of bad storms. In reply to an inquiry from Chairman Banfield, the Commission's Chief Counsel advised that the Commission has legal authority to conduct the snow removal operations if it so desires. After further discussion Chairman Banfield suggested that the Engineer and the Chief Counsel be authorized to draw up a working arrangement with the Forest Service and the Timberline Lodge Company covering the snow removal operations. Commissioner Chessman gave as his thought that the Commission should do everything it can to keep this road open. The Commission thereupon, by unanimous vote, approved the suggestion, it being understood, however, that the snow removal operations would be discontinued if conditions get too severe. The Commission ordered that the matter be covered by appropriate written agreement among the parties concerned.

A committee representing the League of Oregon Cities, including Messrs. Fred C. Inkster, President; Herman Kehrli, Executive Secretary; and Orval Eaton, Mayor of Astoria and Chairman of the committee, came before the Commission regarding the improvement and maintenance of city streets that are being damaged by heavy traffic. Mr. Eaton advised that in conformity with the action taken by the Commission at the previous meeting, a conference on this subject was held in the office of the State Highway Engineer in Salem, and an outline for an agreement between the Commission and the League was arranged. He presented the outline, as follows, and gave as their belief that the carrying out of the plan will solve the problem of the eight small cities and towns that are financially unable to help themselves.

MEMORANDUM OF SUGGESTED AGREEMENT WITH LEAGUE OF OREGON CITIES

1. The State Highway Commission spent, during the years 1942 and 1943, approximately $150,000 a year of which $75,000 was in towns of less than 5,000 population and $75,000 in towns of more than 5,000 population.

2. It has been urged by the representatives of the League that some of the smaller towns do not receive enough money from the State Tax Street Fund to care for the damage caused by heavy traffic, particularly log-truck traffic.

3. It is suggested that the State Highway Commission budget approximately $75,000 per year and the money be expended for betterment and maintenance on the basis of showing of need rather than to be allocated upon the basis of any formula or per capita arrangement. It is felt that, in general, the towns of more than 5,000 generally receive enough money from the State Tax Street Fund to care for this damage.

SEP 24 1945

4. It is further suggested that for the first year an additional $25,000 be spent in betterment so as to place some of the streets in condition to be satisfactorily maintained.

5. It is further suggested that in all such cases estimates be made of the normal maintenance to care for ordinary traffic over the streets in question and that the city be required to advance funds from the State fax Street Fund in that amount and that the city be required to give an order on the Secretary of State for such funds.

This matter was discussed at considerable length and as a result thereof the Commission approved the above outline by unanimous vote, subject to the following conditions:

1. A definite agreement must be reached as to the streets that are to be improved under this arrangement and it is to be understood that the State shall not be asked to contribute toward the cost of improving any other street or streets and that the routes selected shall be the shortest possible and most direct.

2. The communities affected shall be required to exercise their police power to control the traffic, and, if necessary, to adopt appropriate ordinances to that end.

3. The cities affected shall, in the case of log hauling, designate the streets over which logs may be transported and shall ask the Public Utilities Commissioner to specify such routing in the "special carrier" permits hereafter issued by him so far as their respective communities are concerned.

4. This arrangement shall be considered as a temporary expedient only, subject to termination as soon as the present emergency no longer exists.

5. The funds appropriated for this purpose shall be expended by the State on the basis of need rather than population.

The Commission voted unanimously to make the arrangement effective immediately and instructed the Engineer and the Chief Counsel to work up the details at once. The arrangement with the respective cities is to be covered by written agreement, which in each instance shall include the above plan and conditions.

The Commission discussed with the Engineer the bids received at the morning session for highway construction work and for the operation of the Enegren Ferry in Coos County and took action as follows, by unanimous vote:

SEP 14 1945

The Commission rejected all bids received for the Greenleaf-Long Tom River Rock Production Project on the Siuslaw Highway in Lane County and for the Vale Rock Production Project on the Central Oregon and John Day Highways in Malheur County and ordered that these projects be readvertised.

The Commission awarded to Newport, Kern and Kibbe the contract for the La Grande Rock Production Project in Union County and awarded to Vernie Jarl, Gresham, the contract for the Fossil-Service Creek Rock Production Project on the John Day Highway in Wheeler County, the bids of these contractors being the low ones received for each of these projects. Award of the contract for furnishing ferry service across Coos River on the Coos River Secondary Highway at Enegren Crossing, Coos County, was deferred. The bids for this undertaking were referred to the Engineer with power to award the contract to the low bidder, Geo. F. Gunnell, on a 20-hour service basis with the privilege of furnishing 24-hour service, when necessary, at the rates quoted in his proposal, provided Mr. Gunnell will agree to such arrangement.

At 3:00 p.m. Chairman Banfield publicly announced the awards as follows:

"Construction of a frame maintenance building at Suntex Junction on the Central Oregon Highway in Harney County. No bids were received by the Commission for this project.

"Greenleaf Creek-Long Tom River Rock Production Project on the Siuslaw Highway in Lane County. The Commission received only one bid for this project, being that of Rogers Construction Company at $46,000. This bid has been rejected by the Commission and the project ordered re-advertised.

"Vale Rock Production Project on the Central Oregon and John Day Highways in Malheur County. The Commission received only one bid for this project, being that of M. C. Lininger & Son at $36,105. This bid has been rejected by the Commission and the project ordered re-advertised.

"La Grande Rock Production Project on the Old Oregon Trail, Wallowa Lake, and Cove Highways in Union County. The low bid was submitted by Newport, Kern & Kibbe, at $25,125; the second low bid was submitted by Arthur Gentemann, at $26,415. There were three higher bidders. The Commission has awarded this contract to Newport, Kern & Kibbe, the low bidder, at their bid price of $25,125.

"Fossil-Service Creek Rock Production Project on the John Day Highway in Wheeler County. The low bid was submitted by Vernie Jarl, at $22,100; the second low bidder was R. O. Dail, at $24,300. There was one higher bid. The Commission has awarded this contract to Vernie Jarl, the low bidder, at his bid price of $22,100.

"Furnishing ferry service across Coos River on the Coos River Secondary Highway at Enegren Crossing in Coos County. The low bid for this project was submitted by Geo. F. Gunnell, Coos Bay, with the second low bidder being Portland Tug & Barge Company. There was one higher bidder. The Commission referred the bids to the Engineer with power to award the contract to the low bidder when certain conditions have been satisfied."

The Assistant Attorney presented for the Commission's consideration a settlement with John LaGrand for right of way needed in connection with the proposed highway traffic separation structure at the intersection of Harbor Drive and Arthur Street in Portland. He advised that two businesses are involved, one of which is a Standard Oil Company service station and the other a warehouse, both of which will be severely damaged by the highway improvement. The service station, he said, will be put entirely out of business, in view of which the owner is demanding damages in the amount of $20,000. The warehouse owner, he added, is asking $10,000 damages, which makes a total of $30,000 that the State will have to pay.

The Commission deferred action on the matter pending further study and inspection of the premises.

A letter was presented from Mr. Walter B. Brown, Grants Pass, in which the Commission is asked to fill in the drainage ditches along the Pacific Highway south of Grants Pass, as an accommodation to the adjacent property owners whose holdings, he said, have depreciated in value by reason of existing conditions. The Engineer advised that the highway at this location was reconstructed several years ago and in connection therewith drainage ditches were excavated on each side of the pavement. Further, that there was no complaint about the ditches until 1944, after property values increased, when the Commission was asked to fill in the ditches. The investigation that was made at that time, he said, revealed that it would cost about $15,000 to do what the petitioners requested. He recalled that the Commission considered the expenditure of such a large sum unjustified and denied the request.

Commissioner Schaupp stated that he still is of the same opinion. Chairman Banfield expressed himself likewise, adding, however, that he might be willing to consider it further if the elimination of a hazardous condition were involved, which apparently is not the case. As a result of further discussion, the matter was referred to the Chief Counsel to explain to Mr. Brown the Commission's position.

The Commission had under discussion the following requests for extensions of time within which to complete highway contracts:

Frank Watt Construction Company, Contract No. 2687, for construction of four bridges on the Halsey-Harrisburg Section of the Pacific Highway, Linn County, requested an additional extension of time from June 15 to September 30, 1945, within which to complete this job. They alleged that their failure to complete

the job within the previously extended time limit was due to the fact that the contractor for the grading and surfacing of the Halsey-Harrisburg Section had not completed certain channel changes under the structure. The Engineer advised that the reason given by the contractor for over-running the time limit is correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Newport, Kern & Kibbe, Contract No. 2696, for furnishing crushed gravel in stockpiles for the Nimrod-Alder Springs Section of the McKenzie Highway in Lane County, requested an additional extension of time of 32 days, from June 30 to August 1, 1945, within which to complete this job. They advised that they were required to do certain extra work, but did not realize that this work had to be accomplished by a specified date, so delayed it until they had equipment available, which did not occur until the time limit for the completion of the job as previously extended had expired. The Engineer advised that the delay in completing the project has not inconvenienced the State nor has it increased the cost of engineering supervision. He recommended the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

F. H. McEwan and Jed Wilson, Contract No. 2707, for the Elsie-Sunset Camp-Vernonia Rock Production Project on four state highways in Clatsop, Tillamook, Columbia, and Washington Counties, requested an additional extension of time from September 12 to October 31, 1945, within which to complete this job. They attributed their failure to complete the project within the previously extended time limit to difficulties in securing certain materials, delays in moving their equipment due to transportation trouble, and delays incident to the purchase of new trucks by their hauling contractor. The Engineer advised that the failure of the contractor to complete the project within the specified time limit has not inconvenienced the State and he recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

J. S. Risley, Contract No. 2709, for the Hendricks Bridge-Nimrod Rock Production Project on the McKenzie Highway in Lane County, requested an extension of time of 52 days, from June 30 to August 21, 1945, within which to complete this job. He alleged that his failure to complete the project within the specified time limit was due to inaccessibility of the gravel bar in the McKenzie River which was the specified source of materials. It appears that the gravel bar is located on an island which was flooded, due to high water in the McKenzie River. The Engineer advised that the reason given by the contractor for over-running the time limit is correct. He further advised that the paving and oiling crews

were not inconvenienced by the delay, neither did the State incur any extra cost for engineering supervision. He recommended that the extension of time be granted without penalty. The Commission approved the recommendation unanimously.

T. F. Skelton and H. H. Wiecks, Contract No. 2710, for the Newport Rock Production Project on the Corvallis, Newport and Siletz Highways in Lincoln County, requested an additional extension of time of 12 days, from July 14 to July 26, 1945, within which to complete this job. They attributed their failure to complete the project within the previously extended time limit to difficulties in securing replacement of worn out manganese for their equipment. The Engineer advised that Highway Department extra gang crews were not inconvenienced by the failure of the contractor to complete the project within the specified time limit and that the State has suffered no loss due to extra cost of engineering supervision. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

Norris and Philpott, Contract No. 2719, for widening Trail Bridge over the Rogue River on the Crater Lake Highway in Jackson County, requested an additional extension of time from August 15 to October 15, 1945, within which to complete this job. They attributed their failure to complete the project within the previously extended time limit to difficulties in securing sufficient labor to perform the work. The Engineer advised that the labor shortage has become so acute that the contractors have not been able to hire more than two or three men for the work. In fact, for a considerable portion of the time the two contractors have been working alone, notwithstanding that they have made every effort to secure help. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The recommendation was approved by the Commission by unanimous vote.

John A. Logan, Contract No. 2731, for grade widening on the Myrtle Point-Elbow Point and Cape Sebastian Sections of the Coos Bay-Roseburg and Oregon Coast Highways in Coos and Curry Counties, requested an extension of time of 15 days, from August 31 to September 15, 1945, within which to complete this job. He stated that he failed to complete the project within the specified time limit because of shortage of labor and slide conditions. The Engineer advised that the principal reason for the contractor over-running the specified time limit was shortage of labor, he being unable to keep but a few men on the job. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

The Engineer reported that Contracts Nos. 2696 and 2731 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2696, with Newport, Kern & Kibbe, for furnishing crushed gravel in stockpiles on the Nimrod-Alder Springs Section of the McKenzie Highway in Lane County; completed August 1, 1945.

Contract No. 2731, with John A. Logan, for grade widening on the Myrtle Point-Elbow Point and Cape Sebastian Sections of the Coos Bay-Roseburg and Oregon Coast Highways; completed September 13, 1945.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Engineer reported on the bids received in Salem on September 17, 1945, for the purchase of State-owned real property in Albany and Reedsport, and for the purchase of "down" timber in Ecola State Park, as follows:

SALE OF PROPERTY IN ALBANY

J. A. McDowell, Albany	$ 1,500.00
George R. Olson, Albany	850.00
A. J. Hodges, Albany	625.00
M. R. Terry, Albany	501.00
J. R. Givens, Albany	331.00
L. L. Wimer, Albany	300.00
W. J. Whisnant, Albany	50.00

SALE OF PROPERTY IN REEDSPORT

James W. Ford, Gardiner	$ 526.00
Svend Knudsen, Reedsport	300.00
John C. Diehl, Reedsport	250.00
Robert Gregory, Reedsport	201.00

SALE OF DOWN TIMBER IN ECOLA STATE PARK

Leonard Gerritse, Cannon Beach $ 340.00

After careful consideration the Commission, by unanimous vote, accepted the offers of the high bidders for the properties in Albany and Reedsport, but rejected the offer of Mr. Gerritse for the "down" timber. The Engineer was authorized to negotiate the private sale of the timber.

A letter was presented from the Klamath County Junior Chamber of Commerce requesting the transfer of a traffic signal from its present location on the old Keno-State line County Road, near the California State line, to the crossing of the Klamath Falls-Malin Highway with the O. C. & E. Railroad at a place known as Hager. It was explained that the County Road is to be abandoned and that there is urgent need for the signal at the Hager Crossing.

The Engineer advised that the crossing at Hager is a traffic hazard and should be signalized. He suggested that the Public Utilities Commissioner should be petitioned to order a "wig wag" signal at this place and to assess the costs involved to the agencies benefited by the same. The Commission approved the suggestion by unanimous vote and so ordered.

The Commission discussed the advisability of protesting the establishment of a beer parlor adjacent to the Pacific Highway near the recently channelized intersection with the North Umpqua Road in Roseburg. The Engineer gave as his thought that it would be a mistake to allow such a business, or any other business, to be maintained at such location because of the traffic congestion that would result and the possibility of accidents occurring; in fact, the purpose of the channelization largely would be defeated. He advised that the Roseburg City Council has already authorized the construction of the building, so, if the Commission wants to stop it, the State Liquor Commission should be asked to refuse the operator a license. After discussion, the Engineer was instructed to write the City Council and point out the hazard that would be created if any business were conducted at this location.

The Engineer requested authority to purchase 18 engineer's transits and 13 levels at an estimated total cost of $7,000. He advised that those on hand have been in continuous service for about twenty-five years and should be traded in on new ones so the postwar program will not be handicapped by the use of inefficient instruments. The Commission approved the request by unanimous vote.

The Commission had under discussion the advisability of relinquishing the water right that was obtained some time ago with the acquisition of the Union Fish Hatchery property in Union County. The Engineer advised that the Highway Department has a right to 2.0 cubic feet of water

from Catherine Creek, but the water has never been used and there is a question that the right will ever be exercised because all of the water that is needed at this place is being obtained from the City of Union at a maximum of $2 per month; moreover, there are two good wells on the premises available for use if necessary. The present pipe line from the Creek, he said, is about one-quarter mile long and is badly decayed and unusable without costly repairs or replacement. He suggested, in view of the circumstances, that it would be advisable to sell the water right, which, according to information received from the State Engineer, will lapse if not used for five years. The Commission expressed reluctance to dispose of the water right and accordingly deferred action on the matter until its next meeting. The Engineer was instructed to give the matter further study in the meantime and to render a thorough report at that time.

The Engineer requested authority to post the Fort Hill Bridge on the Salmon River Highway near Grand Ronde for a speed limit of 25 miles per hour as an accident prevention measure. He advised that this is a narrow structure on which two vehicles traveling at legal speed cannot pass with safety; also, that it has been seriously damaged twice during the last few months by loaded trucks. It was his thought that a reduction of vehicle speed over the bridge would reduce the chances of accidents occurring to a minimum and recommended a maximum speed limit of 25 miles per hour. The Commission approved the recommendation and adopted the following resolution with regard thereto by unanimous vote:

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941, has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter

SEP 24 1945

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state highway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of Highway: Salmon River Highway

Highway number: 39 Route number 18

Location of termini	Established Speed
M. P. 22.40 to M. P. 22.70 Across Fort Hill Bridge over South Yamhill River and approaches thereto	25 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

Note:
Only one truck allowed to cross this bridge at one time.

In this connection the Commission also discussed a request from the United States Naval Hospital at Corvallis for the establishment of a "reduced speed" zone along the Pacific Highway West (U. S. 99W) through the Naval Hospital Reservation at Camp Adair, a distance of 3.7 miles. The Engineer recommended approval of this request and the establishment of a 35 mile per hour speed limit along this section. The Commission approved the recommendation, and thereupon by unanimous vote adopted the following resolution in regard thereto:

SEP 24 1945

12651

WHEREAS, the State Highway Commission, pursuant to the provisions of Section 115-320, O. C. L. A., as amended by Chapter 458, Oregon Laws, 1941 has caused an engineering and traffic investigation to be made with respect to certain state highways and/or certain sections of state highways more particularly and completely described and set forth hereinafter; and

WHEREAS, the data, facts and information obtained in connection with said investigation are all on file in the office of the State Highway Commission at Salem, Oregon; and

WHEREAS, based upon said engineering and traffic investigation the Commission has determined that the fixed and designated speeds prescribed by the provisions of subsection (b) of said Section 115-320, O. C. L. A., as amended, are in certain specified instances greater than is reasonable and safe and in other specified instances are less than is reasonable under the conditions found to exist upon or with respect to the state highways or sections of state highways hereinafter set forth and more particularly described and defined hereinafter, and the State Highway Commission has therefore determined to designate a different speed thereupon than the speed fixed in said statute, which said different speed or speeds shall be as specifically set forth hereinafter.

NOW, THEREFORE, based upon said engineering and traffic investigation and upon the finding and determination made by the Commission with respect thereto, the Commission does hereby determine and does hereby order that within the meaning and purpose of said Section 115-320, O. C. L. A., as amended, the speed at which a vehicle may be driven upon said state hignway and/or upon said sections of said state highway shall not exceed the rate of speed set forth immediately following.

Name of highway: Pacific Highway West

Highway number: 1W Route number: 99W

Location of Termini			Established Speed
M. P. 74.10	to M. P.	77.80	35 miles per hour

BE IT FURTHER ORDERED that the State Highway Engineer be and he hereby is ordered and directed to erect at appropriate places in sufficient number adequate signs giving notice of the particular applicable speed on said state highway.

SEP 24 1945

BE IT FURTHER ORDERED that any previous order heretofore made by the Commission with respect to speed or speeds applicable to any of the highways or sections of highways specified herein which is in conflict with the provisions of this order hereby is vacated and annulled.

Note:

Supersedes and voids 25 MPH zone on Highway 99W between Eng. Station 1577+00 and 1599+00 as established by prior action of the Commission. See Minutes of meeting of 10-1-42, page 11239.

Also supersedes and voids 35 MPH zone on 99W between M.P. 74.17 and 78.50 approved in Commission Minutes of 3-20-42, page 10924.

The Commission had under discussion the adoption of a resolution designating a "no parking" zone in the Town of Silverton as approved at the previous meeting. The following resolution in regard thereto was discussed and adopted by the Commission by unanimous vote:

WHEREAS, Water Street in the City of Silverton has heretofore been by the Highway Commission designated as and now is a street of said city over which there has been and is now being routed traffic moving over the Silver Creek Falls Highway, Secondary Highway No. 163; and

WHEREAS, said route is used by log truck traffic and by reason of the narrowness of said street and the length of the loaded log trucks parked cars within the said area are subjected to possible damage; and

WHEREAS, the City of Silverton by appropriate resolution in response to a request made by the Highway Commission has prohibited parking on the east side of Water Street from its intersection with Main Street for a distance of thirty feet southerly thereof, and has served on the State Highway Commission a copy of said resolution;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting, as follows:

1. That said resolution duly and regularly adopted by the Common Council of the City of Silverton be and the same hereby is approved and ordered filed in the records of the State Highway Commission at Salem, Oregon.

2. That this resolution be entered in the minutes and records of the Commission as of the twenty-fourth day of September, 1945, and a duly certified copy thereof delivered to the Common Council of the City of Silverton.

SEP 24 1945

A petition was presented, signed by numerous residents and users of the Richardson-Eugene Secondary Highway No. 220, requesting the designation of this highway as a through highway, and the installation of signs requiring traffic to come to a stop before entering the same. The Engineer advised that this highway carries a considerable volume of traffic and recommended approval of the request as a safety measure. It was the thought of the Commission that the attitude of the County Court of Lane County should be ascertained before definite action is taken and accordingly instructed the Engineer to obtain such information.

The Commission had under discussion the matter of rescinding its order, adopted on July 28, 1943, designating Wilhoit County Road in Clackamas County a through highway, in lieu of State Secondary Highway No. 161, on account of prevailing traffic conditions. The action taken by the Commission in 1943 was occasioned by the fact that the county road at that time carried considerable more traffic than the State Secondary Highway, and it was considered advisable to require the secondary highway traffic to stop before entering this intersection. The county road traffic, consisting of logging trucks for the most part, is now routed over a private road, so the reason for the Commission's action in 1943 no longer exists. The Engineer recommended that the highway designation at this intersection be restored to its original status. The Commission approved the recommendation and adopted the following resolution in regard thereto by unanimous vote:

WHEREAS, the Woodburn-Sandy Highway is a secondary state highway and is known and designated as State Secondary Highway No. 161 and said highway intersects the Wilhoit County Road in Clackamas County at a point approximately one mile east of Molalla; and

WHEREAS, the Highway Commission adopted and ordered entered in the minutes of the Commission as of the twenty-eighth day of July, 1943, a resolution by which the Commission directed that traffic moving over said secondary state highway where the same intersects the said county road should be required to stop because of the fact that at that time the county road traffic was greater in volume than was the state highway traffic; and

WHEREAS, it now appears that traffic conditions have changed and the county road as to traffic volume has now become secondary to the state highway; and

WHEREAS, it is the judgment of the Commission that said resolution made, adopted and entered in the Commission's minutes as of July 28, 1943, should be rescinded and held for naught;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. That the resolution made, adopted and entered in the minutes and records of the Commission as of July 28, 1943, be and the same hereby is rescinded and from this date on shall be deemed void and of no effect.

2. That traffic entering the said secondary state highway over the said county road shall be required to stop before entering said state highway.

3. That the Engineer be and he hereby is authorized and directed to erect and thereafter maintain necessary and appropriate stop signs in order to give effect to this resolution.

4. That said Engineer is further authorized and directed to remove and take down the stop signs heretofore erected pursuant to the provisions of said resolution of July 28, 1943.

5. That this resolution be entered in the minutes and records of the Commission as of the twenty-fourth day of September, 1945.

The Secretary presented a letter from the E. K. Wood Lumber Company requesting reinstatement of their log hauling permit that recently was cancelled for overweight violations. The Company advises that hereafter it will do everything within its power to curb the overloading of its trucks and to that end will purchase a set of scales to weigh their loads before they leave the woods. In view of this letter, the Commission voted unanimously to restore the permit, thus confirming its telephonic authority of September 15, 1945, and place this company on probation.

The advisability of discontinuing the granting of emergency wartime permits in view of the fact that the war is over and emergency conditions are not as acute as heretofore had the attention of the Commission. The Commission decided unanimously to continue the granting of such permits until July 1, 1947, when the law authorizing such permits expires.

A letter was presented from Mr. J. R. Frumm, Assistant Vice-President, Crown-Zellerbach Corporation, Portland, with regard to the order of the Highway Commission, adopted at its meeting on May 29, 1945, which prohibits the granting of overlength permits for the truck-hauling of logs over state highways after January 1, 1946, unless the logs are to be used for long structural timbers. Mr. Frumm points out that under strict compliance with this order it will not be possible to transport 40 foot logs over state highways because the overall length of a load of 40 foot logs using a single axle drive truck is nearly 55 feet and if a tandem axle drive truck is used the overall length is about 57 feet; moreover, the overall length when 48 foot logs are hauled is 61 1/2 feet on a single axle drive truck and 63 feet on the other type. He asks the Commission to modify this ruling so as to

permit the transportation of 40 foot and 48 foot logs on both types of equipment. The Commission deferred a decision in the matter until its next meeting and instructed the Secretary to invite Mr. L. A.Christensen, Seaside, contract hauler for the Crown Zellerbach Corporation, to be present at such time for discussion of the matter.

The Engineer reported that the following cities and towns have fulfilled the legal requirements with respect to the expenditure of the 1944 State Tax Street Funds which they received in 1945:

Butte Falls	Eagle Point	Mt. Angel
Canyonville	Imbler	Riddle
Creswell	Island City	Talent
Dundee	Joseph	Tillamook
		Wallowa

He presented resolutions from each outlining plans for the expenditure of the funds available and advised that the plans have been checked and meet with his approval. The following resolution with regard thereto was adopted by the Commission by unanimous vote upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chessman:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by this Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1945 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Butte Falls	$ 473.84
Canyonville	356.43
Creswell	694.68
Dundee	292.13
Eagle Point	339.65
Imbler	254.39
Island City	247.40
Joseph	828.86
Mt. Angel	1,442.48
Riddle	299.12
Talent	532.54
Tillamook	3,845.20
Wallowa	1,171.31

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Butte Falls - Bluff Street, Fee Street, Broad Street, Main Street, South Street

Canyonville - Canyon Street, 4th Street, 5th Street, Pine Street, Wall Street, 2nd Street, 3rd Street

Creswell - "C" Street, "D" Street, First Street, Second Street, Oregon Street

Dundee - 10th Street.

Eagle Point - 1st Street, 2nd Street, 3rd Street, County Road from 1st to 3rd Street, Main Street in Ulrich Addition, Rogue River Avenue, Cameron Avenue, Third Street in Central Addition

Imbler - Second Street, Third Street, Fifth Street, Sixth Street, Seventh Street, Esther Street, Lone Pine Avenue, Main Street

Island City - "C" Street

Joseph - College Street

Mt. Angel - Marquam Street, Taylor Street, College Street, Charles Street, Church Street, Garfield Street, Cleveland Street, Sheridan Street, Alder Street

Riddle - Main Street

Talent - Gibson Street, "I" Street

Tillamook - Front Street, 1st Street, Del Monte Street, Park Street, Miller Avenue, 4th Avenue East, 9th Street, 10th Street

Wallowa - Holmes Street, Storie Street, Alder Street, Spruce Street, Clairmont Street, Douglas Street, Fifth Street, Old Highway Route, First Street

2. That the type, plan and character of improvement proposed in the resolutions filed with this Commission by the above named respective cities and towns hereby are approved.

SEP 11 1945

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the same.

5. This resolution shall be entered in the minutes and records of this Commission as of the 24th day of September, 1945.

A letter was presented from the Port of Alsea requesting permission to construct a wharf and dock across State-owned park property situate between the Oregon Coast Highway and Alsea Bay near the South city limits of Waldport. The Commission was advised that these facilities are for the convenience of vacationists who want to fish in Alsea Bay, and is to provide a place for them to tie up their boats. The Engineer advised that the matter had been investigated, and there seems to be no objection to the granting of the request if the public is not charged for the use of the facilities, and the Port of Alsea will agree to assume all liability in connection with the operation of the wharf and dock. He recommended the granting of a permit on such basis. The Commission approved the recommendation unanimously.

The Secretary presented a letter from the Oregon Coast Association inviting the members of the State Highway Commission and its staff to attend the annual convention of the Association in Gearhart on October 23, 1945. Chairman Banfield and Commissioner Schaupp advised that they could not be present whereupon it was agreed that Commissioner Chessman should represent the Commission on this occasion.

The Engineer requested authority to attend, at State expense, meetings of the Executive Committee of the American Association of State Highway Officials which are to be held in Washington D. C. and in Chicago during the week October 16-24, 1945. The Commission approved the request by unanimous vote subject to approval by Governor Snell.

The Commission discussed a letter from the Commanding Officer of the Southeastern Oregon Aerial Gunnery Range in Harney and Malheur Counties, regarding the future use of this range for practice air-to-air gunnery. The Officer advises that the area is under lease by the Army Air Forces for practice gunnery from March 15 to October 1, during which time roads through the range are blocked to the public and anyone entering the range does so at his own risk. The Engineer advised that this letter is in response to his inquiry as to the future use of the range now that the war is over. He

pointed out that the Princeton-Rome Secondary State Highway which passes through the range is scheduled for improvement in the postwar program and that an engineering crew is now engaged in making necessary surveys, but the work is being handicapped and the lives of the men endangered by the practice gunnery activities of the Air Corps. He also pointed out that, while the former Highway Commission authorized the closure of this highway for a few months during 1942, the privilege was not extended beyond that time. He recommended, in view of the fact that the practice range is not as necessary now as it was during the war, and the further fact that the range contains many thousands of acres lying south of the highway that are available for this purpose, that the Commanding Officer of the range be informed that the Commission wants this road left open for continued public use next year and thereafter. The Commission approved the recommendation unanimously and instructed the Engineer to convey such a message to the Commanding Officer--in case that does not bring the desired results he was authorized to take up the matter with the Army authorities in Washington D. C.

The Chief Counsel brought up for discussion the question of the Commission's authority to control advertising signs upon and over state highways within the limits of incorporated cities and towns. He recalled that he told the Commission at the previous meeting that it had no control over signs installed within the city boundaries unless they constituted a hazard to highway traffic, and the Commission took action on the proposed sign at Grants Pass accordingly. The impression given at that time, he said, was not exactly correct in that the Commission does have legal authority if it wants to assume it, under its "general" powers, whereby the Commission is given complete jurisdiction over state highways within such areas from curb to curb, including signs over and across such highways. There is no specific law giving the Commission such power, he added, but the Commission has the power under authority of the general statute.

Chairman Banfield gave as his thought that, if the Commission has the authority and jurisdiction in such cases, it should exercise it, and in the present instance the request for permission to maintain the sign over the Pacific Highway in Grants Pass should be denied. Commissioners Schaupp and Chessman concurred and it was so ordered. The Commission later decided to let the matter rest, insofar as it pertains to the sign in Grants Pass, in view of the fact that the matter came to the Commission's attention as as inquiry rather than a request to install the sign; however, the Chief Counsel was instructed to prepare a form of resolution embodying a policy with respect to such matters for consideration by the Commission at its next meeting.

A letter was presented from the Portland Chapter of the Associated General Contractors of America, Inc. suggesting a change in the meeting dates of the Highway Commission when bids are to be received, as an accommodation to contractors. It was pointed out that the practice of opening bids on Mondays, which is now being followed, is an inconvenience to contractors, because many of them inspect propspective jobs on the preceding Saturday and Sunday, and do not have time before the opening of bids

at 9:00 a.m. on Monday to secure the necessary bid bonds or certified checks. After discussion of this matter, the Commission decided to continue to hold its regular scheduled meeting on Monday at the usual time, but deferred until 2:00 p.m. on that day the opening of bids. The Commission thereupon set Monday and Tuesday, October 29 and 30, as the date for its next regular meeting. Bids for construction projects are to be opened at 2:00 p.m. on Monday, October 29, and at 9:00 a.m. on Tuesday, October 30, if the Federal postwar monies are released in the meantime and there are sufficient jobs to justify a two-day letting.

The Engineer reported on the request of citizens of Redmond for improvement of 7th Street as a truck route in order to relieve traffic congestion on 6th Street, route of The Dalles-California Highway. He advised that two routes were investigated, viz., the 7th Street route, as suggested by the delegation, and a route along 5th Street. He estimated the cost to improve either of these routes, by constructing concrete pavement forty feet wide, concrete sidewalks and curbs, at approximately $100,000. The Commission tabled the matter in view of the expenditure involved, and there appearing no way to finance the project at this time.

The matter of improving certain city streets in Corvallis as requested by the Corvallis City Council in connection with the proposed installation of one-way traffic along U. S. 99W through Corvallis, had the attention of the Commission. The Engineer advised that the City Council has not as yet responded to the Commission's inquiry whether or not the city would contribute toward the cost of such improvement. Action on the matter was deferred by the Commission until the city expresses itself.

The Engineer reported on the request of the delegation from Columbia County that the Highway Commission make provision in its postwar program for additional improvements along the Lower Columbia River Highway between the end of the completed section and Astoria. He advised that, in his estimation, the modernization of the section at Little Jack Falls is the project of most importance. However, it is estimated to cost approximately $750,000. The Commission took no definite action on this matter other than to order that the people of Columbia County be informed that the Commission will give serious consideration to such improvement as a first priority project in the postwar construction program if monies remain available after the contracting of the projects that have been approved for such program.

The Chief Counsel reported the status of removal of a privately-owned cabin that is being maintained in Casey State Park on the Crater Lake Highway, Jackson County. He advised that the owner of the cabin refuses either to remove the cabin from the premises or to sell it to the State, so it appears necessary to start legal proceedings. The Commission expressed the desire to inspect the premises before taking definite action, and it was arranged to make such inspection following the next meeting of the Commission.

SEP 04 1945

The matter of designating a new State Highway between Bates, in Grant County, and Baker, in Baker County, to accommodate the truck hauling of logs had the Commission's attention. The Engineer advised that, as previously instructed by the Commission, a reconnaissance survey has been made of the route, and he anticipates that his report on the subject will be ready within the next month or two.

The Engineer reported briefly on the request of Senator Dean Walker, et. al., for construction of a bridge across the Willamette River at Independence. He advised that the action taken by the Commission at a previous meeting has been conveyed to the sponsors of this project who, he understands, are now considering the Commission's proposal with respect to the financing of the structure.

The Engineer reported on the request of the City of Oswego for the improvement of the Oswego Highway through this city, particularly as to the improvement of drainage facilities. He advised that he discussed the plans with Mr. Fred Inkster, President of the City Council, and ascertained that the city is not objecting to the plans as proposed, but they want the work advanced from a third postwar year project to the first postwar year program. The Commission decided not to make any change in its postwar construction schedule at this time. However, it will keep the matter in mind and will do the best that it can without making any promises.

The Commission discussed the question of sale of timber on the right of way recently acquired for the improvement of Pacific Highway at Stage Road Pass, Josephine County. The Engineer gave his thought that the timber should be sold, and suggested the taking of bids for same; also, if the Commission approves the sale by competitive bidding, that the clearing line be plainly marked so that prospective purchasers may know exactly just what timber they are bidding on. Following discussion, the Commission authorized the sale of this timber on the basis of the Engineer's suggestion, the bids to be taken at a convenient time in Salem, and the results thereof communicated to the Commission for decision.

The Commission had under discussion reports from the Engineer and the Chief Counsel regarding the need to increase the wages and salaries paid to State Highway Department employees. The Engineer recommended a blanket increase of $20 per month for all employees receiving less than $300 per month, with the exception of stenographic and clerical hire, a schedule for whom is now being worked up with the State Budget Director so as to conform with other State departments. He also recommended a salary increase for Mr. W. W. Stiffler, Assistant Maintenance Engineer, from $360 per month to $385 per month; an acrease from $230 per month to $250 per month for Mr. Loran Spaulding, Chief Weighmaster; and a salary of $400 per month for Mr. Harold B. Say, Director of the Travel Information Department, when he returns from his duties with the U. S. Navy.

With respect to the employees on paving crews, oiling crews, and other crews whose duties require them to travel from place to place, the Engineer pointed out that such employees now receive an allowance of 10 cents per hour to offset extra living costs incurred as the result of frequent moves, plus double time for overtime on a 54-hour week basis. He advised that, if the Commission approves the per diem allowance recommended for employees in this category, it is his plan to make it effective when the crews start out next spring on a 44-hour week basis for their 1946 assignments, rather than now, so as to avoid the confusion that would result if the change were made this fall. The extra 10 cent bonus and overtime, he said, will be discontinued when the new rates are put into effect.

The Chief Counsel recommended a blanket increase of $25 per month for each of the Right of Way Agents and for three Real Property men. After discussion the Commission approved by unanimous vote the salary increases recommended by the Engineer and Chief Counsel with the understanding that such increases shall be effective as of September 1, 1945, and then only if approved by the State Budget Director. The matter of increasing the salaries of stenographic and clerical employees was deferred until such time as a schedule that meets with the approval of the State Budget Director has been arranged. It was understood, however, that such increases as are allowed shall be effective as of September 1, 1945, and that a supplemental payroll for the month of September, covering such increases, will be prepared if necessary.

The Chief Counsel reported on the Commission's legal authority to control equestrian and vehicular traffic on the Oregon beaches and the Commission's jurisdiction over the removal of rock and sand from such areas. He advised that he can find no law that gives the Commission power to regulate horseback riding and/or the operation of vehicles on the beaches of this State, but the law vests such authority in the State Police, and in the counties and cities insofar as they abut on the beach areas; however, the Commission does have the legal authority to control and regulate the removal of rock and sand from such areas. The Chief Counsel was instructed to furnish the members of the Commission with a written opinion on this subject for its future guidance.

The Commission discussed briefly the requests of the cities of Canby, Molalla, and Sutherlin for the improvement of certain city streets that are being damaged by log hauling and other heavy traffic. The requests were referred to the Engineer to handle in conformity with the decision reached by the Commission on such subject earlier in the session.

The matter of revising the intersection at 6th and Washburn Streets, Klamath Falls, as suggested by Mr. A. D. Collier of that city, and two street intersections in the City of Forest Grove, which matters were held over from the previous meeting, had the attention of the Commission. The Engineer advised that these matters are being investigated, but he is not yet ready to submit his reports.

SEP 24 1945

The Engineer reported similarly on the request of the city of Pendleton for the widening of West Court Street, Pendleton, however, stated that it is his intention to personally inspect this project in the near future.

The question whether or not the highway route from Goshen, Oregon, to Weed, California, via Klamath Falls, should be designated U.S. 99 Alternate, as has been requested by organizations from Klamath County, was discussed briefly by the Commission. Commissioner Schaupp advised that a delegation from Klamath County wishes to discuss this matter with the Commission. Chairman Banfield stated that, while he is opposed to the designation at this time, he will listen to the delegation if and when it appears.

The Engineer reported the refusal of Mr. Harold Harry McGee, log hauler, Eugene, to allow a load of logs to be weighed by State Weighmasters on September 14, 1945. He advised that the record discloses that Mr. McGee is a consistent violator of the rules and regulations and recommended cancellation of his permit. The Commission approved the recommendation and instructed the Secretary to notify the Public Utilities Commissioner.

The Engineer also reported on log hauling operations that are being carried on over the Mount Hood Highway south of Parkdale. He advised that three concerns are truck hauling logs over this highway from the summit at Barlow Pass to the log dump in the Columbia River at Hood River, and, according to reports, they plan to continue operating throughout the winter season. He recalled that during the past winter the highway was kept open south of Parkdale to Cooper Spur to facilitate the movement of the logs that were needed in connection with war activities, and that the Federal Government contributed the major portion of the funds to finance the work. He doubted that the Federal Government would contribute additional funds this winter in view of the fact that the war emergency no longer exists, and recommended that hereafter no log hauling be permitted over this section of highway during the winter season. The Commission approved the recommendation unanimously.

The Engineer brought up for discussion the matter of penalizing log and piling haulers who do not comply with the flagging requirements of their permits. He advised that permits contain provision for the furnishing of flagmen and pilot cars only when it is considered necessary in order to protect other traffic, but reports indicate that there are quite a number of operators who do not observe the rule. Following discussion the Commission ordered that instances of this kind be reported to the Department of Stste Police with a request for investigation and action by that Department as may be necessary to force compliance with the rules and regulations.

The Commission considered and signed agreements, etc., as follows:

Agreement with the Standard Oil Company covering the boring of test holes within the right of way of certain state highways in connection with oil investigations.

Agreement with the U. S. Coast Guard and the Waldport Telephone Company covering telephone pole line construction along the Oregon Coast Highway between Newport and the outlet of Sutton Lake.

Permit authorizing the Federal Government to construct and maintain seven overpasses across the Pacific Highway at Camp Adair.

Acceptance of permit from the United States of America authorizing occupancy and use of portions of land comprising the U.S. Naval Hospital site at Astoria.

Easement granting to T. T. Crozer and S. M. Crozer the right to use an existing road across property acquired for quarry site purposes.

Bargain and sale deed conveying unto E. J. Wolfe State-owned property situate in Lots 29 and 30, Block 43, Kenton, Portland.

Quitclaim deed relinquishing the State's interest in a six acre tract of land situate in Umatilla County which was deeded to the State by J. E. Berry and wife by mistake.

There being no further business to come before the Commission at this time, the meeting adjourned at 5:00 p.m.

12931		Meeting adjourned at 5:00 p.m.

Portland, Oregon
October 29, 1945

The State Highway Commission met in regular session at 9:00 a. m. in the Stock Exchange Room of the Imperial Hotel. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner (Arrived at 10:20 a. m.)
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
C. B. McCullough, Asst. State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

The Commission discussed a letter from Mr. B. H. Carlton, McMinnville, requesting an "objective re-survey" of the Pacific Highway West through the City of McMinnville, on account of objections that have been offered to the modernization of the present route. A letter was also presented from McMinnville Hospital, Inc., objecting to the improvement of the present route of this highway through McMinnville as the permanent route. The Engineer pointed out that the present route along Baker Street was adopted by the former Commission as a result of considerable study, during which a public hearing on the subject was held in the City of McMinnville at which numerous citizens, as well as city officials, expressed their preferences. He suggested that the Commission adhere to its plan to improve the present route, leaving until some future time the re-routing of the highway to by-pass the city if that appears warranted. It appeared from the discussion that the County Court of Yamhill County is agreeable to the modernization of the present route, but there is a question as to the attitude of the City Council. It was the expressed opinion of the members of the Commission that there should be a meeting of minds of interested parties before the proposed improvement is allowed to proceed, and accordingly the Commission ordered that the attitude of the City Council be obtained.

(Mr. Eugene Marsh, City Attorney of McMinnville, came before the Commission during the afternoon session and presented a letter from the City Recorder of McMinnville advising that the City Council is unanimously in favor of the improvement of the highway on its present location. Following his departure the matter was given further consideration. The Commission accepted the letter as expressing definitely the attitude of the City Council and thereupon, by unanimous vote, decided to proceed with the proposed improvement of such route as previously planned.)

The Commission discussed a request from the Tillamook Chamber of Commerce for the construction of a new bridge over Stilwell Ditch on the Netarts Secondary Highway a short distance west of Tillamook City. The Engineer advised that the existing bridge is in very poor condition and should be replaced. He pointed out, however, that the project is not included in the postwar program so would have to be financed with State money. He estimated the cost of a new structure at $70,500. The Commission deferred a decision in the matter but instructed the Engineer to bring it to the

attention of the Commission for consideration when the major betterment budget for 1946 is discussed.

The Engineer reported that the location surveys for the following sections of highways have been completed and asked the Commission to approve them as the permanent route of such highway sections:

Middle Grove-Silverton Section of Salem-Silverton Federal Secondary Highway in Marion County.

West Unit Love Bridge-Black Bridge Section of Baker-Homestead Highway in Baker County.

After study, the Commission approved the locations as reported and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and location of the Middle Grove-Silverton Section of the Salem-Silverton Federal Secondary Highway in Marion County, and of the route and location of the West Unit, Love Bridge-Black Bridge Section of the Baker-Homestead Highway in Baker County, and in connection therewith prepare maps showing the route and location of said sections of highway and file said reports and records with the Commission for consideration; and

WHEREAS, the Engineer has reported that he has completed the said surveys and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said surveys, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:

1. That the surveys of the Middle Grove-Silverton Section of the Salem-Silverton Federal Secondary Highway in Marion County and of the West Unit, Love Bridge-Black Bridge Section of the Baker-Homestead Highway in Baker County, together with the maps, which for identification purposes bear the map file numbers 6B-17-23 and 6B-17-24, and 6B-16-10, respectively, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said sections of said highways are permanently constructed the same shall be done in accordance with said surveys and locations unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the twenty-ninth day of October, 1945.

The Commission had under discussion the following requests for extensions of time within which to complete highway contracts:

C. H. Wheeler, Contract No. 2644, for grading and surfacing the Astoria Airport Section of the Oregon Coast Highway in Clatsop County, requested an additional extension of time of 12 days, from August 1 to August 12, 1945, within which to complete this job. He attributed his failure to complete the project within the previously extended time limit to seasonal fire restrictions which would not permit him to burn accumulated debris and clean up the premises. The Engineer advised that the reason stated by the contractor for failure to complete the project within the extended time limit is correct. He added that the labor required to do the work was not available, so the burning could not be done earlier. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

Frank Watt Construction Company, Contract No. 2687, for construction of four bridges on the Halsey-Harrisburg Section of the Pacific Highway East in Linn County, requested an additional extension of time of eight days, from September 30 to October 8, 1945, within which to complete this job. They attributed their failure to complete the project within the previously extended time limit to wartime conditions that held up progress of the work. The Engineer advised that all work on this project, other than the removal of a small amount of the debris from the channel of one of the streams, was completed prior to September 30, 1945, the date of expiration of the previously extended time limit. He further stated that the traveling public has not been inconvenienced by the delay, neither has the State incurred any extra expense for engineering supervision. He recommended that the extension of time now requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation by unanimous vote.

M. C. Lininger & Sons, Contract No. 2704, for the Austin Junction-Unity Junction Rock Production Project on the John Day Highway in Baker and Grant Counties, requested an extension of time of 90 days, from September 30 to December 15, 1945, within

which to complete this job. They attributed their failure to complete the project within the specified time limit to numerous breakdowns of their machinery and to shortage of labor. They also stated that they were late in getting started on this job because of the necessity to complete their contract for the Weston-Elgin Rock Production Project; however, they anticipated that they would complete the present contract before bad weather sets in. The Engineer recommended approval of the extension of time now requested, without penalty, for reasons given by the contractor. The recommendation was approved by the Commission unanimously.

Skelton and Weicks, Contract No. 2707, covering the Elsie-Sunset Camp-Vernonia Rock Production Project on four state highways in Clatsop, Tillamook, Columbia, and Washington Counties, requested an additional extension of time from October 31 to December 15, 1945, within which to complete this job. They alleged that they failed to complete the project within the previously extended time limit because of labor difficulties and difficulties in obtaining suitable rock from the quarry. The Engineer recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation.

Guerin Brothers, Contract No. 2718, covering the Union Creek Rock Production Project on the Crater Lake and West Diamond Lake Highways in Jackson County, requested an extension of time of 60 days, from September 30 to November 30, 1945, within which to complete this job. They attributed their failure to complete the project within the specified time limit to breakdown of their rock crusher, repairs for which were not delivered for 60 days, and to labor shortage. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are correct. He recommended that the extension of time requested be granted without penalty, notwithstanding that the State incurred a small amount of extra expense for engineering because of the delay. The Commission approved the recommendation unanimously.

Rogers Construction Company, Contract No. 2721, covering the Chemult-Beaver Marsh Rock Production Project on The Dalles-California and East Diamond Lake Highways in Klamath County, requested an extension of time of 90 days, from September 30, 1945, to January 1, 1946, within which to complete this job. They attributed their failure to complete the project within the specified time limit to inability to secure sufficient labor. The Engineer advised that the reason given by the contractor for over-running the time limit is correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Rogers Construction Company, Contract No. 2722, for the Fort Klamath-Lobert Rock Production Project on state highways in Klamath County, requested an extension of time of 45 days, from September 30

to November 15, 1945, within which to complete this job. They attributed their failure to complete the project within the specified time limit to inability to secure sufficient labor to operate their plant at or near capacity. The Engineer advised that the reason given by the contractor for over-running the time limit is correct and recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Fisher Brothers, Contract No. 2723, for the Trent-Salt Creek Falls Rock Production Project on the Willamette Highway in Lane County, requested an extension of time of 40 days, from August 31 to October 10, 1945, within which to complete this project. They attributed their failure to complete the project within the specified time limit to difficulties in securing repair parts for their equipment and inability to secure sufficient labor to operate their plant more than one shift. The Engineer advised that the reasons given for the delay in completing the contract on time are correct; further, that the State has not incurred any extra engineering expense because of the delay and the general public has not been inconvenienced. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Oscar E. Joelson, Contract No. 2729, for furnishing crushed material in stockpiles for the Coos Bay-Roseburg and Powers Highways in Coos County (Hoffman Bridge Rock Production Project), requested an extension of time of 90 days, from September 30 to December 31, 1945, within which to complete this job. He attributed his failure to complete the project within the specified time limit to labor shortage and extreme difficulties in obtaining tires for his hauling equipment. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is correct. He also said that the State's expense for engineering supervision has been increased somewhat by the delay, but in his estimation, the contractor should not be charged for this expense because he did his best to carry on the work under adverse circumstances. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Watson and Morris, Contract No. 2730, for painting the Coos Bay Bridge on the Oregon Coast Highway at North Bend, Coos County, requested an extension of time of 365 days, from September 30, 1945, to September 30, 1946, within which to complete this job. They attributed their failure to complete the project within the specified time limit to their inability to secure workmen of reasonable aptitude for the type of work involved, notwithstanding that they made every reasonable effort to assemble a crew of men capable of doing the work. The Engineer advised that this contractor also has the contract for repainting the Yaquina Bay Bridge at Newport and it was their intention to start the Yaquina Bay Bridge and then to assemble a crew for starting the Coos Bay Bridge painting work; however, they were not

OCT 29 1945

able to secure enough men to complete the work at Yaquina Bay so were unable to start the Coos Bay Bridge painting. Every effort was made by the contractors, he said, to secure competent painters, and the failure to complete the project within the specified time limit is the direct result of circumstances beyond the control of the contractor. He recommended, in view of the circumstances, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously subject to the condition that the contractor shall be required to pay the cost of any extra work, such as spot painting, etc., that must be done now in order to carry over the project satisfactorily until next year when weather conditions are favorable for the full paint job.

Watson and Morris, Contract No. 2733, for painting the Yaquina Bay Bridge on the Oregon Coast Highway at Newport, Lincoln County, requested an extension of time of 304 days, from September 30, 1945, to July 31, 1946, within which to complete this job. They attributed their failure to complete the project within the specified time limit to difficulties in securing labor to perform the work, notwithstanding that they made every effort to secure competent help. The Engineer advised that the reason given by the contractor for failure to complete the project within the specified time limit is correct, and that the over-running of the time limit was a direct result of the shortage of competent workmen induced by circumstances entirely beyond the contractor's control. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously, subject to the condition that the contractor shall be required to pay all extra expense of spot painting, etc., that is required in order to carry over the job until next year.

Lloyd Babler, Contract No. 2735, for grading, surfacing, and oiling the Crater Lake-Fort Klamath Timber Access Road in Klamath County, requested an extension of time of 105 days, from August 31 to December 15, 1945, within which to complete this job. He attributed his failure to complete the project within the specified time limit to seasonal fire restrictions which did not permit the burning of accumulated debris, etc., until damp weather set in. The Engineer advised that the reason given by the contractor for over-running the specified time limit is correct. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

E. C. Hall Company, Contract No. 2740, for surfacing the Root Creek-Siletz Section of the Siletz Secondary Highway in Lincoln County, requested an extension of time of 20 days, from September 30 to October 20, 1945, within which to complete this job. They alleged that it was impossible to operate their plant to capacity due to extremely difficult conditions encountered in quarry operations, which accounted for the over-running of the time limit. The Engineer advised that the

contractor's statement as to the reason for failure to complete the project within the specified time limit is substantially correct, that, everything considered, the work proceeded in a very satisfactory manner. He recommended that the extension of time requested be granted without penalty. A letter was presented from the Public Roads Administration concurring therein. The Commission approved the recommendation unanimously.

In connection with the granting of extensions of time within which to complete highway contracts, the Commission also considered the matter of hurrying up the operations of the contractors so as to avoid the over-running of the time limits specified. The Engineer was instructed to notify the contractors through the Resident Engineers that the Commission hereafter expects contractors to complete their work within the time limit specified in the contract's provisions.

The Engineer reported that Contracts Nos. 2644, 2715, and 2719 and 2687 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2644, with C. H. Wheeler, for grading and bituminous surfacing on the Astoria Airport Section of the Oregon Coast Highway in Clatsop County; completed October 11, 1945.

Contract No. 2715, with Rogers Construction Company, for furnishing crushed material in stockpiles on the Oregon City-Molalla-Eagle Creek Rock Production Project, on the Cascade and Woodburn-Sandy Secondary Highways, in Clackamas County; completed October 13, 1945.

Contract No. 2719, with Norris & Philpott, for construction of the Trail Bridge over the Rogue River on the Crater Lake Highway in Jackson County; completed October 4, 1945.

Contract No. 2687, with Frank Watt Construction Company, for construction of the Halsey-Harrisburg Bridges on Halsey-Harrisburg Section of the Pacific Highway East, in Linn County; completed October 8, 1945.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

OCT 29 1945

The County Court of Sherman County, represented by County Judge Jerry M. Wilson, County Commissioners David Reid and Vernon I. Miller, and County Road Master, L. L. Peetz, came before the Commission regarding the plans for highway improvements in Sherman County to be undertaken in the Post-war Program. Judge Wilson was spokesman. He requested consideration of the following projects:

1. Improvement of the Sherar's Bridge Secondary Highway between Tygh Valley and Grass Valley. He urged this improvement as a priority project to facilitate the marketing of timber.

2. Improvement of the intersection of the Fulton Canyon-Wasco Secondary Highway with the Columbia River Highway so as to facilitate truck hauling of wheat to points east of this intersection.

3. Improvement of the road extending from Rufus on the Columbia River Highway to Klondike on the Wasco-Heppner Secondary Highway.

4. Construction of the Cottonwood Grade Section of the Wasco-Heppner Secondary Highway.

5. Widening of the Moro Underpass of the Southern Pacific Railroad on the Sherman Highway. He alleged that the narrowness of the opening through the present structure is conducive of accidents and urged the widening from the safety standpoint.

Chairman Banfield advised that the Commission has in mind the improvement of the Sherar's Bridge Secondary Highway and has set up in its second year postwar program the sum of $122,000 to finance the grading, surfacing, and oiling of the 8.7 mile section between Tygh Valley and the Sherman County Line. He also advised that the Commission's Postwar Program contains provision for grading, surfacing, and oilinga 1 1/2 mile section of the Fulton Canyon Secondary Highway, which is estimated to cost about $54,000, and includes the improvement of the intersection referred to. This work, he said, is contemplated for construction in the first postwar year. Concerning the third project mentioned by Judge Wilson, which is for the improvement of the road leading from Rufus to Klondike, Chairman Banfield advised that this project is not included in the Commission's Postwar Program although it has been recommended for the Federal Aid Secondary Highway System, and if the Public Roads Administration approves it for such system, then it would be eligible for future Federal funds. Concerning the improvement of the Cottonwood Grade Section of the Wasco-Heppner Secondary Highway, Chairman Banfield stated that the improvement of this highway also is not included in the Postwar Program, however, the Commission has authorized an expenditure of $100,000 of State money to reconstruct a portion of the grade during the third year following the war. Due to financial reasons, he added, the Commission is unable to take on any additional projects at this time, but will be pleased to give the matter reconsideration at some future time when the financial situation improves. This concluded the conference.

OCT 29 1945

A letter was presented from the City of Prineville requesting the loan of the services of an engineer to establish grade lines for certain city streets and sidewalks. The Commission approved the request provided an engineer can be spared to perform such service.

A resolution was presented from the Salem City Council requesting the signalization of the intersection of Rural Avenue where it crosses South Commercial Street, Salem, (U. S. Highway No. 99E), as a safety measure for school children who are obliged to cross the highway at this point. The Engineer advised that this matter has been thoroughly investigated by the Traffic Engineer who recommends that the request be denied because peak-hour traffic through this intersection is considerably less than that which is considered justification for the installation of signals. The accepted minimum warranted in this regard, he said, is 1,000 vehicles through the intersection per hour for eight consecutive hours, whereas the investigation reveals that peak-hour traffic now obtaining consists of only 664 vehicles. He stated his concurrence in the Traffic Engineer's recommendation. In view of the report, the Commission denied the request by unanimous vote.

The Secretary presented resolutions from the following cities and towns outlining plans for the expenditure of State Tax Street Funds which they received in 1944 from 1943 State Highway revenues:

Antelope	Richland
Scappoose	Vernonia

The Engineer advised that a check of the plans reveals that they meet the requirements; moreover, each of the cities has adopted appropriate resolutions with regard thereto as required by law. He recommended approval of the plans. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by this Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1944 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Antelope	$ 123.61
Scappoose	461.47
Richland	348.85
Vernonia	1,939.29

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Antelope - Maupin Street, Baird Street, McGreer Street

Scappoose - West Street, Maple Avenue, Laurel Avenue, Watts Avenue, Prairie Avenue, Columbia Avenue, Hall Avenue, Casey Avenue, 2nd Street

Richland - First Street

Vernonia - Bridge Street, 3rd Avenue, 2nd Avenue, 1st Avenue, Nehalem Street, Columbia Street, Cougar Street, Weed Avenue, 3rd Street, 2nd Street, 1st Street, Lane Avenue, Park Avenue, Grant Avenue, "A" Street, Washington Street, "B" Street, East Avenue, Rose Avenue, Maple Street, North Street, State Street

2. That the type, plan and character of improvement proposed in the resolutions filed with this Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That Resolution Form 3 adopted by the City of Antelope and approved by the State Highway Commission on January 22, 1945, shall be canceled, in accordance with the request of the City of Antelope on file in the records of the Oregon State Highway Department, and Resolution Forms 1 and 2 hereby approved be substituted therefor.

5. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plan submitted by the city.

6. This resolution shall be entered in the minutes and records of this Commission as of the 29th day of October, 1945.

OCT 29 1945

Resolutions were also presented from the following cities and towns outlining plans for the expenditure of State Tax Street Funds which they received in 1945, from 1944 State Highway revenues:

Antelope	Condon	John Day
Athena	Gearhart	Scappoose
Brownsville		

The Engineer advised that the plans in each instance have been checked and found satisfactory; also, that the cities have met the legal requirements in every way. He recommended approval of the plans. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by this Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1945 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Antelope	$ 125.80
Athena	717.04
Brownsville	1,095.83
Condon	1,196.47
Gearhart	445.88
John Day	989.61
Scappoose	469.64

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Antelope - Maupin Street, Baird Street, McGreer Street

Athena - 3rd Street, 4th Street, 5th Street, High Street, College Street

Brownsville - Maintenance of all city streets

Condon - First Street, Second Street, Well Street, Walnut Street, Gilliam Street, Pennoyer Street, Potter Street, Lincoln Street, Church Street, Oregon Street, Ward Street, East Street

Gearhart - First Street, Sixth Street, 11th Street, 12th Street, 13th Street, Cottage Avenue, Ocean Avenue, Marion Avenue, Hagar Avenue

John Day - North Canyon Street, North Second Street, Grace Street, Old Highway, Hilcrest Avenue, Maple Street

Scappoose - West Street, Maple Avenue, Laurel Avenue, Watts Avenue, Prairie Avenue, Columbia Avenue, Hall Avenue, Casey Avenue, 2nd Street

2. That the type, plan and character of improvement proposed in the resolutions filed with this Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the same.

5. This resolution shall be entered in the minutes and records of this Commission as of the 29th day of October, 1945.

The Engineer requested instructions relative to the cancellation of insurance that has been carried on certain state highway bridge structures and Arch Cape Tunnel during the wartime period. He advised that the insurance covered damage by explosion, riot, insurrection, vandalism, etc., which, in his estimation, no longer is required in view of the fact that the war is over. He further stated that if the insurance policies are cancelled as of November 1, 1945, the State Highway Department would secure the benefit of a refund in the amount of $1,531.17. The Commission considered that the conditions which prompted the purchase of the insurance in the first place no longer exist and accordingly instructed the Engineer to cancel the policies and secure the benefit of the refund.

The Engineer reported the results of the receiving of bids in Salem on October 22, 1945, for the purchase of timber along the revised alignment of the Pacific Highway at Stage Road Pass, Josephine County, and on the taking of bids in Salem on October 26, 1945, for the sale of State-owned property in North Portland and for the sale of several buildings in the town of North Plains. He advised that no bids were received for the purchase of

timber and that only one bid was received for the purchase of the real property in Portland, being that of Mr. Harry Whittle, Portland, at $100; however, two bids were received for the purchase of the buildings at North Plains, being those of Mr. L. M. Payne, Newberg, at $200, and Mr. Robert Meek, Hillsboro, at $125. He recommended acceptance of the offers of Mr. Whittle and Mr. Payne. The Commission's Chief Counsel concurred in the recommendation. The Commission thereupon authorized the sale of the Portland property to Mr. Whittle at his bid price of $100 and the sale of the buildings in North Plains to Mr. Payne at his bid price of $200. The Commission also authorized negotiations for the private sale of the timber on the revised alignment of the Pacific Highway through Stage Road Pass.

The Engineer requested instructions relative to the opening of Sams Valley Secondary State Highway, Jackson County, for general public use through the Camp White Cantonment area. He advised that this highway was closed in April, 1942, at the request of Army officials as a protection to the traveling public during times when target practice was under way, but, in his estimation, the need for such closure no longer exists in view of the fact that the war is over and target practice has been discontinued. He further stated that the road suffered considerable damage during the time it was closed, but the Army authorities have agreed to pay the cost of repairs if the work is done now. He estimated the cost of such repair work at $5,000, although, he added, it may be necessary to re-oil this section next year. He recommended that the Commission adopt an order declaring the road open for general public use and that he be given authority to bill the Army for the cost of the repairs. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

> WHEREAS, the Highway Commission on the thirtieth day of April, 1942, in response to a request made for and on behalf of the War Department, adopted and entered in the minutes and records of the Commission a resolution by which the Commission closed to public traffic the section of the Sams Valley Secondary Highway in Jackson County which is defined as follows:
>
> > Beginning at a road intersection at mile point 8.98 easterly from Gold Hill, and extending easterly and northeasterly to mile point 15.35 approximately one-half mile west of Dodge Bridge over the Rogue River, which point is also approximately 1.9 miles westerly from the Crater Lake Highway, being a distance of 6.37 miles;
>
> AND, WHEREAS, by the terms of said resolution the said section of said highway was to remain closed to public travel for the duration, but it was provided in said resolution that, upon advice in writing from the proper officer in charge of the Army Cantonment advising that the closing of said section of said highway was no longer necessary in national defense, the closing order should be vacated; and

OCT 29 1945

WHEREAS, notwithstanding the fact that for all practical and essential purposes the war is over, the Commission has not been informed by any Federal official that the closing of said highway is no longer a necessity; and

WHEREAS, it is the opinion of the Commission that the re-opening of said highway is essential in the interests of public travel and transportation;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and affirmatively voting, as follows:

1. That in the opinion of the Commission public welfare and public transportation needs require that the said section of said highway be opened to travel and maintained for such.

2. That the Engineer be and he hereby is instructed to remove all barricades and other physical obstructions and all road signs erected and maintained for traffic control during the period for which said road was closed, and take such steps as may be necessary to re-condition said highway for traffic.

3. That this resolution be entered in the minutes and records of the Highway Commission as of the twenty-ninth day of October, 1945, and a certified copy thereof delivered to the Superintendent of State Police, the Public Roads Administration, the County Court of Jackson County and the representative of the War Department in charge of said area.

The Commission confirmed the oral authority issued on October 2, 1945, authorizing re-instatement of the log hauling permit of Mr. Harold Harry McGee, Springfield, Oregon, which was cancelled for refusal to allow his load to be weighed by State Weighmasters. Mr. McGee was placed on probation.

The Commission also discussed the advisibility of cancelling the log hauling permit of Lester L. Bateson, Lebanon, for refusal to allow his loads to be weighed by State Weighmasters. The Engineer advised that the evidence against Mr. Bateson is not entirely clear, so there is a question whether or not the permit should be cancelled. The Commission decided, in view thereof, not to cancel the permit in this instance, however, ordered that Mr. Bateson be warned by letter that a repetition of the offense would result in the suspension of his permit for double the time that it would have been suspended for his first offense.

The Commission had under discussion the matter of closing the West Diamond Lake Secondary Highway to log hauling traffic. The Engineer advised that during the past two years there has been an increasing amount of log hauling over the southerly end of this road, which is causing severe damage to road surface. He pointed out that the road is of light construction, having been

built for recreational traffic only, and will not stand up under the heavy pounding of logging trucks; moreover, the section crews are short handed and cannot keep the highway in proper state of repair. He recommended, in view of the circumstances, that all log hauling on this highway between Diamond Lake and Crater Lake Highway Junction be prohibited. The Commission, by unanimous vote, approved the immediate closing of the road as a temporary proposition with the understanding that the matter of permanently closing the road to log hauling traffic will be given further consideration next spring.

Consideration was also given by the Commission to the closing of the Mt. Hood Highway to all log hauling traffic from Wapinitia Junction, Mile Post 57.5, and Mt. Hood Lodge, Mile Post 81.7. The Engineer advised that this highway is crooked and narrow and, like the Crater Lake Highway, was built primarily for recreational traffic. He recommended that log hauling be prohibited until such time as the highway has been reconstructed so as to avoid heavy maintenance expense and the subjection of other traffic to the hazards that obtain under present conditions. The Commission voted unanimously to close this road to log haulers as a temporary proposition until June, 1946, when the matter is to be reconsidered.

A delegation from Wallowa County came before the Commission regarding the establishment of a State Park at the head of Wallowa Lake. The delegation was headed by Mr. Max Wilson, Secretary, Joseph Commercial Club, and official of the Associated Ditch Co., and included the following:

R. V. Chrisman	District Attorney	Enterprise
Charles Reynolds	Vice-President, La Grande Chamber of Commerce	La Grande
Ben Weathers	Wallowa County Judge	Enterprise
George Dawson	Wallowa County Commissioner	Joseph
Glen Jacob	Wallowa County Engineer	Enterprise
A. Daisley	President, Joseph Commercial Club	Joseph
Stanley Shell	Chamber of Commerce	Wallowa
Ira E. Snyder	President, Chamber of Commerce	Enterprise
M. J. Rutherford	Secretary, Chamber of Commerce	Enterprise
J. O. McFetridge	Commercial Club	Joseph
W. J. Ortman	Real Estate	Enterprise
Mr. and Mrs. Tom Williamson	Owners of Lake property	Joseph

Speaking in behalf of the park were Messrs. Wilson, Chrisman, and Reynolds. Mr. Chrisman mentioned that the U. S. Department of the Interior at one time considered making the area a national park but was discouraged by local people who did not want the park on that basis because it would

OCT 29 1945

interfere with stock grazing privileges now enjoyed and for the further reason that, in their opinion, the State is the only agency that can develop the area satisfactorily. He alleged that the park would be a big tourist attraction because of the boating, swimming, fishing, hunting, and mountain climbing available at this place. He also mentioned that Wallowa Lake is the summer camping place for some 500 Boy Scouts and hundreds of Epworth Leaguers who have enjoyed the privileges of this location for many years and who might be deprived of such privileges unless the State acquires the property. It was his thought that the preservation of the area for this purpose alone is justification for the development by the State; however, he added that it is also justified by the fact that it would provide a state park for Northeastern Oregon where none exists at present. He declared that the project has the endorsement of everyone in the northeastern part of the State and suggested the development as a memorial for veterans of World War II.

Mr. Reynolds urged approval of the project from the standpoint of investment return, stating that the establishment of a state park at this place will attract thousands of tourists from whom sufficient revenue will be received to pay the costs of development within a comparatively short time. He endorsed the remarks of Mr. Chrisman.

Commissioner Schaupp arrived at this juncture.

Commissioner Chessman mentioned that the Commission previously had this matter under discussion and it then appeared to be a matter of developing a state park in connection with a privately-owned lodge, the owners of which wanted to control the fishing facilities at the Lake; also, there was a question of the high water mark in the Lake. He advised that the Commission is not interested in establishing a park if the fishing rights are in private control.

Mr. Wilson stated that his company, Associated Ditch Co., has the right to flood privately-owned lands around the Lake up to 25 foot elevation and that only four times in the last twenty years has the area been flooded to such elevation. He declared that the flooding would not interfere with the area for park purposes, particularly after the first of July.

Commissioner Schaupp gave as his understanding that the Commission in its previous discussion of this matter decided not to establish a park at Wallowa Lake because of the private interests that were involved.

Chairman Banfield said that Wallowa Lake is a very attractive spot, but advised that the Commission feels adversely toward the establishment of a state park there or anywhere unless it has control over the adjacent areas. He mentioned several features, as follows, which, he said, would have to be clarified to the Commission's satisfaction before the Commission would authorize an expenditure of public money for acquisition or development: cost to the State; State's rights relative to the flood area; question whether or not the flooding of the property would damage the area proposed for the park. He advised that the Commission will give the matter careful consideration and report its decision to the people of Wallowa County, together with objections

if there be any. The Commission thereupon referred the matter to the Engineer, Chief Counsel and Parks Superintendent for a detailed factual report. This concluded the conference with the delegation.

Mr. Ben Weathers, County Judge of Wallowa County, then inquired as to the plans of the Commission for completing construction of the Enterprise-Lewiston Highway between Flora and the Washington State line. The Engineer read aloud a letter from Clarence B. Shain, Director of Highways, State of Washington, on this subject wherein Mr. Shain advised that provision has been made in the second postwar year budget of the State of Washington for the completion of this highway in that state early in the year 1947. He estimated the cost to finish the grading work in Oregon at $100,000, to surface the Oregon section at $300,000, and to complete the Washington section at $300,000.

Chairman Banfield advised that Oregon is committed to the completion of the highway and that the work will be done simultaneously with that in the State of Washington. He also said the Commission would consult with the Director of Washington Highways regarding the project. The Engineer was thereupon instructed to arrange a conference with Mr. Shain.

Mr. John Greenbo, Mayor of the City of Waldport, and Mr. D. B. Ambler, City Engineer, appeared before the Commission on behalf of the Waldport City Council in regard to the construction of curbs and sidewalks along the west side of the Oregon Coast Highway from the south end of the Alsea Bay Bridge to the intersection of said highway with Maple Street, in Waldport. They asked the Commission for an improvement similar to those constructed in the towns of Taft and Nelscott and advised that the city is prepared to proceed with the construction of sidewalks at city expense if the Highway Commission will construct the concrete curbs. They filed with the Commission a resolution adopted by the Waldport City Council on October 18, 1945, whereby the Council agrees to cause the said sidewalks to be constructed if the State will build the curbs. The Commission referred the matter to the Engineer and the Chief Counsel for investigation and report, and advised that if the report is favorable the State will proceed with the improvement in conformity with its established policy.

A delegation from Pendleton, consisting of Sprague H. Carter, Mayor; Homer E. Waggoner, Councilman; and E. B. Aldrich, former State Highway Commissioner and publisher of the Pendleton East Oregonian, came before the Commission regarding the designation of two one-way routes for Old Oregon Trail traffic through Pendleton. Mr. Carter headed the group. He suggested the routing of westbound traffic along Court Avenue (present route of this highway) and the routing of eastbound traffic on Dorion Avenue. He declared that such routing will relieve present traffic congestion and will provide a natural free flow of traffic through their city. He pointed out, however, that such routing will necessitate the partial widening of Court Avenue and the construction of a connecting link between S. W. Court Avenue and S. W. Dorion Avenue with a traffic separation structure at S. W. Court Avenue. Mr. Carter presented a resolution from the Pendleton City Council requesting such improvement and a petition from affected property owners objecting to the

widening of Court Avenue as a two-way traffic route and endorsing the proposal of the city to designate Court Avenue and Dorion Avenue as one-way streets because it would result in less damage to their holdings.

The Engineer advised that the problem of routing traffic through Pendleton is of long standing and is getting more acute as time goes on. The cost to widen Court Street for two-way traffic, he said, is prohibitive. He gave as his opinion that the solution of the problem is the adoption of the suggestion offered by the city for two one-way streets. He pointed out that Dorion Avenue is now 36 feet wide between curbs, and would not have to be widened, but it would be necessary to widen Court Avenue somewhat for about ten blocks. Such widening work, he said, would necessitate the removal of only a few shade trees; and the cost of the entire improvement would be about $100,000. He pointed out that eventually the highway will be routed to by-pass the city of Pendleton. Mr. Carter declared that the proposed improvement of two one-way streets will satisfy traffic requirements in Pendleton for 15 or 20 years. Mr. Aldrich stated that such an improvement would take care of the traffic situation in Pendleton for a long time to come. Chairman Banfield advised that the State Highway Commission is reluctant to spend $100,000 of state money for an improvement that would be of value for only two or three years' time and then would have to be changed. After further discussion he concluded the conference by stating that the Commission cannot make its decision today because it involves the question of funds; however, the matter will be given serious consideration within the next two or three months.

Mr. Frank Lonergan, Portland, attorney for Mr. Paul Mumpower, was present in behalf of Mr. Mumpower's lease of State-owned property adjacent to the Columbia River Highway near the east end of the Sandy River Bridge at Troutdale. Mr. Mumpower was also present. Mr. Lonergan advised that Mr. Mumpower has received notice to vacate the premises because of violation of his agreement with the Highway Commission for the use of this property. He urged the Commission to permit Mr. Mumpower the continued use of the property until the next run of smelt in the Sandy River is over, or until about March 31, 1946. Mr. Mumpower, he said, will vacate the premises now if the Commission insists, but would appreciate the privilege of continuing his lease until the time stated. Chairman Banfield recited the facts in connection with the lease granted Mr. Mumpower. He pointed out that it was of a temporary nature and was given to accommodate Mr. Mumpower so that he would not lose his investment; however, Mr. Mumpower did not comply with the terms of the lease, in view of which the Commission considered it advisable not to let him occupy the premises longer. Mr. Mumpower declared that if the Highway Commission will allow him the use of the premises until the next smelt run is over, he will then vacate the premises permanently. The Engineer pointed out that the contract of the proposed improvement of the Columbia River Highway at this location is coming up soon and that the property occupied by Mr. Mumpower will be needed at that time. In any event, the premises would have to be vacated by the first of April, 1946. Following discussion, Commissioner Schaupp stated his willingness to allow Mr. Mumpower to continue the use of the premises until April 1, 1946, if the property is not needed for highway purposes. Commissioner Chessman expressed himself similarly, however, he added that the roadway through the property, which

discussion revealed has been closed to public use, must be kept open and clear so the public may use it if they wish. Chairman Banfield also approved the extension of the lease to April 1 on the same basis, making the decision unanimous. The Chief Counsel was instructed to prepare an appropriate form of agreement with Mr. Mumpower covering the matter.

The Commission, by unanimous vote, approved the minutes of the meetings held on July 9, August 30 and 31, and September 24, 1945.

The Assistant Counsel was present and requested authority to purchase certain parcels of real property that are needed for various highway improvements throughout the State. He submitted a list of such properties, together with the offer that he recommended for each parcel. After careful consideration of each item, the Commission approved the request and threupon, by unanimous vote, adopted the following resolution with regard thereto:

> WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and
>
> WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and
>
> WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.
>
> NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

Foot Notes:

* Re Item No. 12288, purchase of right of way for the Judkins Point-Goshen Section: In the discussion of this matter it appeared advisable to the Commission to complete the purchase of the right of way that is needed in connection with the proposed revision of this section of highway, because of developments that are taking place in this vicinity. Accordingly, the Commission authorized the Chief Counsel to proceed with the securing of options for the same. The Engineer was instructed to prepare descriptions of the land needed from the various owners for the use of the Chief Counsel in the negotiations.

** Re Items Nos. 12295, 12294, and 12293, acquisition of park property from William E. Dunlap and wife, Jennie M. Sawtell, and Grover C. Lynn and wife, being property situate in what is known as Dabney Park: The Commission authorized the acquisition of the tracts at the option prices subject to the condition that the options shall not be closed until and unless satisfactory title to the remaining portion of this park has been obtained from Multnomah County, the present owner. The Commission also authorized acceptance from Multnomah County of a narrow strip of land situate between the Columbia River Highway and Sandy River, about 1,000 feet west of Baseline Road Bridge.

*** Re Item No. 11913, acquisition of park property and right of way from Claudia L. Lorenz along the proposed revision of The Dalles-California Highway between Kirk and Spring Creek, in Klamath County: In this connection the Secretary read aloud a letter from Mr. Alfred D. Collier, Klamath Falls, to the State Parks Superintendent, in which Mr. Collier offers, on behalf of his brother and himself, to pay the sum of $6,500 for the property beyond the limits of the standard width highway right of way as a memorial for their parents, who were pioneer residents of the State of Oregon, it being understood that the State would pay the difference, $3,500, for the land contained within the right of

way limits. The Commission considered the offer of the Colliers a fine gesture on their part and expressed sincere appreciation for the same; however, decided unanimously to purchase the entire acreage with State funds with the understanding that a division of the costs would be discussed later with the Colliers.

The Commission recessed at 11:55 a.m. and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

At 2:00 p.m. bids as follows for highway construction work were opened and read in conformity with previously published notices, following which Chairman Banfield announced that the awards of contracts would be made at 9:00 a.m. on the following morning immediately preceding the opening of bids on that day:

OCT 29 1945

A delegation representing the "Keep Oregon Green Association" and consisting of Messrs. Edmund Hayes, Chairman, Portland; Charles Ogle, Secretary, Salem; and Arthur W. Priaulx, member, executive committee, Eugene; came before the Commission regarding the maintenance of "Welcome" signs at state highway entrances into Oregon. Mr. Priaulx was spokesman. He presented an artist's sketch of the sign they have in mind, which is to be constructed of logs with natural rustic finish and with gilded lettering. He asked the Commission to finance the installations as a state project inasmuch as each would be considered an official welcome to the state by a state agency. He offered the Association's help in the matter insofar as is possible except in the matter of financing.

Mr. Hayes advised that this is only one of many projects that the Association is sponsoring and is asking the state to assume the expense because the Association is without funds for the purpose.

Chairman Banfield advised that the Highway Commission has already budgeted funds to the limit it considers possible at this time and is not in position now to assume additional obligations of this nature. He added that the Commission is interested in the matter but not to the extent of spending $500 of public funds for each sign, which is the amount mentioned by the Engineer as the probable cost of each. As the result of further discussion the Commission agreed to give the matter study and accordingly referred it to the Engineer and the Parks Superintendent for a report.

A delegation from Albany, consisting of G. C. Knodell, Mayor; Ralph Banton, and George Parker, Councilmen; C. R. Ashton, Recorder; County Judge E. G. Arnold; County Commissioner Claude G. Smith, and County Engineer Walter W. Larsen, was present and asked the Commission to redesignate as state highways the county roads and streets in North Albany that were abandoned as such when the new highway was built through this city. They also asked for the rerouting of logging trucks from Benton County that enter Albany from the Willamette River Bridge and dump their loads on the Albany side of the river. It appears that the trucks cannot negotiate the turn at the end of the bridge and are obliged to travel twenty city blocks extra to get to the dumps. The extra distance could be reduced about eight blocks if the state will maintain a connection, one block long, on Fifth Street. The Commission referred the matter to the Engineer for report on both matters.

Mr. L. A. Christensen, logging contractor, came before the Commission regarding the transportation over state highways of logs that involve overall lengths in excess of the statutory limit of 50 feet. He particularly referred to the Commission's order of May 29, 1945, which prohibits the granting of overlength log hauling permits after January 1, 1946, and alleged that unless the order is modified to permit longer movements, a hardship will be created on the logging industry. He pointed out that the overall length of a load of 40 foot logs transported on a single axle drive truck and tandem axle trailer is from 53 feet to 55 feet, and if a tandem axle truck is used, the overall length would exceed 60 feet. He urged modification of the present ruling to permit the hauling of 40 foot logs on either type of equipment and the occasional transportation of logs of greater length. After considerable

discussion the Commission referred the matter to the Engineer for investigation to determine over which highways loads of logs 60 feet overall in length can be transported without endangering other traffic.

Mr. Christensen also requested permission to transport loads of logs 12 1/2 feet overall in height, which is one and one-half feet in excess of the statutory height limit. The Commission approved the granting of such permits on the condition that approved weight limits would not be exceeded and that there is sufficient vertical clearance on the highways to accommodate loads of such height.

The Commission conferred with a delegation from Marion and Polk Counties regarding the proposal to construct a bridge over the Willamette River at Independence to replace an existing ferry. The group included the following: County Judge Grant Murphy, and Commissioners Roy Rice and Jim Smith of Marion County; County Judge Herman Van Well, and Commissioners Fred Gibson and Herrison Brandt of Polk County; Senator Dean Walker, and his brother, Mike Walker, of Independence; Clay Cochran, Manager, and Ernest Miller, of the Salem Chamber of Commerce. Senator Walker headed the group. He advised that the two county courts had a joint meeting for discussion of the offer of the State Highway Commission to pay one-half of the cost to build the bridge at Independence if the two counties will pay the balance of the expense, and agreed to accept the offer on the basis that each county will pay one-fourth of the total cost. The counties are assuming, he said, that the state will advance the counties' share of the expense and proceed with the construction of the bridge, and then liquidate the obligations of the counties by utilization of their shares of the state gasoline tax revenues. The counties cannot finance their respective shares otherwise, he added.

He suggested the possibility of securing Federal Aid monies to help pay for the work. He urged the Commission to expedite the project and suggested that it is highly desirable that necessary surveys be authorized and that a definite location for the bridge be determined as soon as possible.

Chairman Banfield recalled previous conferences with both county courts regarding the project and the Commission's decision later to place it in the construction program if the counties agreed to pay 50% of the total cost up to a maximum of $600,000.

The discussion then centered on the question how much work is included in the $600,000 estimate. The Engineer advised that according to present day prices such sum will not pay the entire cost of the bridge and the roads leading to it, although there is included a sufficient sum to pay for the road approaches that are necessary to make the bridge usable. He pointed out that about one mile of new road construction is needed on the Marion County side of the river to eliminate a potential "death trap" when the bridge is built. He estimated the cost of such one mile section at $100,000.

Judge Murphy pointed out that the road on the Marion County side has been designated a Federal Aid Secondary Highway and suggested the allocation of Federal Secondary monies to pay for its improvement. He also said that Marion County would commit itself to improve the existing road and would go with the state in constructing the one mile section of new road as a first priority project when the Marion County projects that are included in the Commission's Postwar Program are completed. Chairman Banfield replied that the State Highway Commission is not prepared to make a commitment to construct the approaches when the bridge is built. He also said that the Commission feels that the counties should each be prepared to spend $150,000 toward the bridge cost if they are willing to pay one-half of the total expense; moreover, the reimbursement period for the counties to pay off their obligations to the state, would have to be of short duration in fairness to the balance of the state. Judge Murphy stated that Marion County could pay its share within five years, if necessary. Judge Van Well said that it would take Polk County 25 years to complete payment of its share; however, after further discussion he said that Polk County would complete its payments in eight years.

The Commission thereupon agreed to give the matter further study subject to the condition that the improvement on the Marion County side of the river shall include provision for the elimination of the "death trap" mentioned by the Engineer and that Marion County will pay its share of the cost within five years and Polk County within eight years. The Engineer was authorized by the Commission to make the necessary surveys, and he and the Chief Counsel were instructed to study all angles of the project and report back to the Commission the results thereof.

The State Parks Superintendent, Mr. S. H. Boardman, was present and presented the following park matters:

1. Offer of Douglas County to present to the State as a gift an 80-acre wayside tract along the Pacific Highway at Stage Road Pass, Douglas County: The Parks Superintendent recommended acceptance of this gift. The Commission approved the recommendation and ordered that an appropriate letter of acknowledgement be sent to the County Court.

2. $1,500 bequest by Alma E. Uzafovage, Deceased: The Parks Superintendent advised that such bequest was provided for in the will of Mrs. Uzafovage, who was an Oregon pioneer and a friend of Champoeg State Park, the bequest being made subject to the condition that the money be credited to the Operations Account of Champoeg State Park. The Commission accepted the gift with thanks and ordered that the money be spent for some purpose in Champoeg Park that meets with the approval of the Oregon Historical Society.

3. Request for permission to erect a building on Battle Rock, Port Orford: The Parks Superintendent advised receipt of a request for permission to construct a small building on Battle Rock for commercial purposes. He recommended that the request be denied. The Commission approved the recommendation.

OCT 29 1945

The Assistant Counsel brought up for discussion a request from Mr. Russell Hubbard, Reedsport, regarding the purchase of two fractional lots of State-owned property in Reedsport. He advised that the property in question was advertised for sale in 1941, but a satisfactory bid was not received, and now Mr. Hubbard wants to buy it by private negotiation rather than on a competitive bid basis. The Commission denied the request, however, authorized the taking of bids for the property if a further check reveals that the property still is no longer of value from the State's standpoint.

The Assistant Counsel requested authority to condemn certain parcels of real property that are needed for highway purposes. He presented a list of such properties, together with the offer that he recommended be authorized for each parcel as follows:

File Number	Name of Owner	Recommended Offer
CIRCLE BRIDGE-HUG POINT SECTION, OREGON COAST HIGHWAY		
9934 (Right of Way)	Robert C. Kinney	$ 135.00
10907 (Right of Way)	M. B. McKay	450.00
10342 (Right of Way)	Virginia H. Curtis	10.00
TROUTDALE-BRIDAL VEIL SECTION OF THE COLUMBIA RIVER HIGHWAY		
11899 (Right of Way and 11900 and Borrow)	Paul Martin	12,500.00

After discussion, the Commission approved the request and thereupon, by unanimous vote, adopted the following resolutions with regard thereto:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to,

OCT 29 1945

along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Virginia H. Curtis, which property is located in Government Lot 5 of Section 6, Township 4 North, Range 10 West, W. M., Clatsop County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as file R 10342, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; (*)

Real property owned by Robert C. Kinney, which property is located in the southeast quarter (SE¼) of the southwest quarter (SW¼) of Section 20, Township 5 North, Range 10 West, W. M., Clatsop County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 2, and is further identified in the records of the Highway Commission as file R 9934, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; (*)

Real property owned by the heirs of M. B. McKay, which property is located in the southwest quarter (SW¼) of the northwest quarter (NW¼) of Section 29, Township 5 North, Range 10 West, W. M., Clatsop County, Oregon, and is more particularly described on the attached sheet and designated as Parcel No. 3, and is further identified in the records of the Highway Commission as file R 10907, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway. (*)

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any of them, or any interest therein the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission.

Foot Note: (*)

The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 55, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening, or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture or roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance or unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along, or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways or for any other purpose designated by the United States; and

WHEREAS, by official act of the State Highway Commission there has been located and esta lished a state highway which is known as the Columbia River Highway and otherwise designated as State Highway No. 2; and

WHEREAS, in connection with and for the improvement and reconstruction of said highway it is necessary that real properties be acquired for right of way and other purposes; and

WHEREAS, as of this date the Highway Commission adopted a resolution by which, among other things, the Commission found, declared, and therefore authorized that for the purpose of making possible a

highway adequate for the needs of the traveling public there should be acquired in addition to the necessary rights of way all right of access to said highway, except at such places as might be agreed upon by the Highway Commission and the property owners; and

WHEREAS, the Commission does now find and declare that the real properties described on the attached sheets are required and are necessary for use in connection with the permanent construction, improvement, and maintenance of said highway;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. The Commission does hereby find and declare that the parcels of real property described on the attached sheets 1 and 2 and designated as Parcels Nos. 1, 2, 3, and 5 are each and all necessary and needed for rights of way for and in connection with the improvement and reconstruction of the said Columbia River Highway, and the real property described on sheet 2 and designated as Parcel No. 4 is needed for public park and recreational purposes. The properties the acquisition of which hereby is authorized and ordered are owned or are claimed to be owned by Paul Martin and Verla M. Martin, husband and wife, and are in their possession. (*)

2. The Commission does further find and declare that in addition to the acquisition of the real properties described on the attached sheets as Parcels Nos. 1, 2, 3, and 5 it is necessary, in order to make possible the proper construction and maintenance of a highway thereover adequate for the needs of the type, character, and volume of traffic which will move over the proposed highway, that there be acquired all rights of access from abutting properties to the said parcels of real property and the highway which is to be constructed thereover, except at such points or places as may be agreed upon by the respective owner or owners and the State Highway Commission.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested, authorized, and directed to attempt to agree with the owner or owners or with the tenants or persons in possession, if there be any, of said parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and is authorized and directed to acquire, in addition to title to the said described parcels of land, all rights of access to Parcels Nos. 1, 2, 3, and 5 except at such points or places as may be agreed upon by the respective owner or owners and the State Highway Commission, and, in the event that no satisfactory agreement or agreements can be reached, then it is hereby further ordered that the said J. M. Devers, as Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property and all rights of access to Parcels Nos. 1, 2, 3, and 5 except at such points or places as may be agreed upon by the respective owner or owners and the State Highway Commission.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said described real properties, or any of them, or any interest therein, the said J. M. Devers, as Chief Counsel to the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. This resolution shall be entered in full in the minutes and records of this Commission.

Foot Note: (*)

The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 56, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

In this connection the Assistant Counsel advised the necessity to institute condemnation proceedings to acquire remaining properties that are needed as right of way for the Front Avenue project in Portland. He submitted a list of such properties, together with the offer that he recommended be made in connection with each parcel as follows:

N.W. - S.W. Front Avenue - Section of M-99		Recommended Offer
10315 - Mabel Ragan & Hubert T. Ragan Right of Way		
Land - 2665 sq.ft. at 30¢ per sq.ft.	$ 800.00	$
6 room house, full basement	4,200.00	5,000.00
10313 - George B. Martin & Ruby O. Martin Right of Way		
Land - 141 sq.ft. at 25¢ per sq.ft.	35.00	
Shrubbery destroyed	65.00	
Garage to be wrecked	100.00	200.00
10311 - Cecil G. Applegath & Juliet Applegath Right of Way		
23 sq.ft. - Lump sum	10.00	10.00
11842 - A. Wolfman Right of Way		
314 sq.ft. at 25¢ per sq.ft.	78.50	
275 sq.ft. slope easement at 10¢ sq.ft.	27.50	
Grade change damages including waiver of access to S.W. Front Avenue	500.00	606.00
8730 - Oregon Realty Co. Right of Way		
5,000 sq.ft. at $1.00 per sq.ft.	5,000.00	
Building & improvements	2,500.00	7,500.00
8227 - Gertrude W. Smith Right of Way		
6,050 sq.ft. at 31¢ per sq.ft.	2,000.00	
Shrubbery and lawn	500.00	
Grade change damage and damage to building	1,000.00	3,500.00

N.W. - S.W. Front Avenue - Section of W-99 (Cont.)		Recommended Offer
8272 - School District #1 of Portland, Oregon		
Right of Way		
10,000 sq.ft. at 30¢ per sq.ft.	$ 3,000.00	$
10,000 sq.ft. at 20¢ per sq.ft.	2,000.00	5,000.00
11846 - E. A. Shank, Lip Shank & Roland Shank		
Right of Way		
1,928 sq.ft. at 50¢ per sq.ft.	964.00	
2,800 sq.ft. for slope easement at 20¢ per sq.ft.	560.00	
Damage to house or moving	1,000.00	2,524.00
11297 - Portland Gas & Coke Co.		
Right of Way		
21,500 sq.ft. at 70¢ per sq.ft.	15,000.00	15,000.00
11854 - Lee Patterson & Frank M. Moore		
Right of Way		
65 sq.ft. at 50¢ per sq.ft.	32.50	32.50
11927 - C. W. Boost		
Right of Way 986 sq.ft. at 20¢ per sq.ft.	200.00	
Double garage taken	200.00	
Damage to remaining property	300.00	700.00

OCT 29 1945

In the discussion that followed the Assistant Counsel advised that acquisition of the above properties will complete the acquisition of right of way for the Front Avenue project on the west side of the Willamette River and that the City of Portland has approved the recommended offers and will conduct the condemnation proceedings. In view thereof the Commission approved the offers by unanimous vote.

The Chief Counsel presented to the Commission for approval a form of "Consent to Vacate a Portion of the East Side County Road No. 360 in Umatilla County, Oregon," within the corporate limits of the City of Freewater. He advised that the purpose of the vacation is to eliminate a portion of the County Road which lies within the right of way of the new location of the Oregon-Washington Highway between Milton and the Washington State line, and that it is necessary for the Highway Commission to consent to the vacation as an abutting property owner. The Commission approved the vacation by unanimous vote. The form of vacation submitted was signed on the following day.

The Chief Counsel requested authority for Mr. M. D. McCallister, Right of Way Agent, to execute official notices to tenants of certain buildings along the Front Avenue project in Portland notifying them to vacate the premises so the property will be available to the Commission when it is needed in connection with the completion of this improvement. The Commission approved the request and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, the State Highway Commission and the City of Portland have jointly acquired several tracts or parcels of real property for use in connection with the Front Avenue Project, on some of which said properties there are residences, which residences the State and the City have rented to various individuals; and

WHEREAS, said properties are now needed in connection with the furtherance of the Front Avenue Project and therefore notice to vacate must be served on each of said tenants; and

WHEREAS, the detail and formality of the serving of said notices can be more expeditiously handled through and by a highway employe than if it were handled and disposed of by the Commission; and

WHEREAS, M. D. McCallister, who is the Right of Way Agent assigned to the Front Avenue Project, is familiar with all of said matters and is therefore qualified to handle the detail and routine with respect to the service of said notices;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED, all members being present and voting affirmatively, as follows:

1. That M. D. McCallister be and he hereby is instructed and vested with authority to act for the Commission in the preparation and service of notices to vacate with respect to all of the properties, title to which has been acquired jointly by the State and the City for said Front Avenue Project and which properties have been for some time and are now, pursuant to joint agreement by the Highway Commission and the City of Portland, occupied by persons or individuals as tenants.

2. That said M. D. McCallister is instructed to serve upon each of said tenants a notice to vacate, which notice shall be substantially in the form of notice hereto attached and made a part of this resolution. (*)

3. That in preparing and serving said notices to vacate the said M. D. McCallister shall cooperate with the representative of the City of Portland.

4. That any notices to vacate heretofore signed by the said M. D. McCallister for the Highway Commission hereby are ratified and approved.

5. That this resolution be entered in the minutes and records of the Commission as of October twenty-ninth, 1945.

Foot Note: (*)

NOTICE TO VACATE

You are hereby notified to vacate, quit and deliver up to the State of Oregon, by and through its State Highway Commission, and to the City of Portland, on the _____ day of

_____, 194__, the premises now held by you as tenant from month to month, said premises being designated as _____Street, in the City of Portland, Multnomah County, Oregon.

Dated this _____ day of _____, 194__.

STATE OF OREGON, by and through its State Highway Commission,

By_____

CITY OF PORTLAND

By_____

The Assistant Counsel presented a request from The First National Bank of Portland to purchase a small tract of State-owned land at the intersection of Interstate Avenue and Willis Boulevard in Portland, being a portion of Block 1, Kenton. He advised that the bank contemplates the erection of a new building at this intersection and wishes to control the State's property so that it will not be occupied by a structure at some future time which would obstruct the view of the bank building. The Engineer advised that the property is needed for highway purposes and recommended that it not be sold. The Commission approved the recommendation.

The Assistant Counsel also presented an offer from the Richfield Oil Corporation to pay the sum of $350 for a parcel of land situate in Lots 1 and 2 of Block 5, Berryvale Addition to the City of Medford. He advised that the Commission previously authorized the sale of this property and that bids for the same were received on August 20, however, all were rejected as being too low. The appraised value of the property, he said, was $250. He recommended acceptance of the offer of the Richfield Oil Corporation with the usual restrictions as to right of access. The Engineer concurred in the recommendation. The Commission, by unanimous vote, approved the sale to the Richfield Oil Corporation at its offer of $350.

The meeting adjourned at 5:00 p.m. to reconvene the following day at 9:00 a.m. in the same room.

Portland, Oregon
October 30, 1945

The State Highway Commission reconvened at 9:00 a.m. in the Stock Exchange Room of the Imperial Hotel, all Commissioners, the Engineer, the Assistant Engineer, the Chief Counsel, and the Secretary being present.

The first order of business was the announcement, as follows, by Chairman Banfield of the results of the bidding on the previous day. The action of the Commission in each instance was by unanimous vote as the result of previous discussion:

"Pudding River Bridge Section of the Pacific Highway East in Clackamas and Marion Counties. The low bid for this project was submitted by J. F. Johnston, Newberg, at $140,847. There were four higher bidders. The Commission has awarded this contract to J. F. Johnston, the low bidder, at his bid price of $140,847.

"Circle Bridge-Hug Point Section of the Oregon Coast Highway in Clatsop County. J. R. Maginnis, Portland, was the low bidder for this project at a bid price of $119,500. There were five higher bidders. The Commission awards this contract to J. R. Maginnis at his bid price of $119,500.

"Lake County Line-Silver Creek-Cinder Butte Rock Production Project on the Central Oregon and Lakeview-Burns Highways in Harney County. The low bidder on this project was Sound Construction and Engineering Company at a bid price of $31,660. The Commission received five higher bids for this project. The contract has been awarded to the low bidder, Sound Construction and Engineering Company, Seattle, at their bid price of $31,660.

"Construction of a frame maintenance building at Suntex Junction on the Central Oregon Highway in Harney County. Only one bid was received for this project, being that of McLaughlin Construction Company, Redmond, at $11,500. The Commission has rejected the bid.

"Madras-Juniper Butte Section of The Dalles-California Highway in Jefferson County. J. N. and M. J. Conley, Portland, were the low bidders for this project at a bid price of $226,310.75. The Commission received 14 higher bids. The contract has been awarded to J. N. and M. J. Conley, the low bidders, at their bid price of $226,310.75.

"Alkali Lake-Fort Creek Rock Production Project on the Lakeview-Burns Highway in Lake County. The Commission received four bids for this project, the low bidder being M. C. Lininger & Sons, Medford, at a bid price of $27,335.50. The Commission has awarded the contract to the low bidder, M. C. Lininger & Sons.

"Greenleaf Creek-Long Tom River Rock Production Project on the Siuslaw Highway in Lane County. The low bid for this project was submitted by Del R. Beebe, Fallon, Nevada, at $41,975. There were four higher bidders. The Commission has awarded this contract to the low bidder, Del R. Beebe, at his bid price of $41,975.

"Troutdale-Wahkeena Creek grading and bridge projects on the Columbia River Highway in Multnomah County. Bids were received for each project by itself and in combination. Leonard & Slate Oregon Ltd.

submitted the low bid for the grading project at $149,705. E. W. Elliott, Seattle, submitted the low bid for the bridge project at $26,352.50; however, he statedhis refusal to accept the award of this contract unless also awarded the grading contract. Archie R. Averill, Portland, submitted the next low bid for the bridge project at $32,467.50. The low combination bid for both projects was submitted by Leonard & Slate, Oregon Ltd. at $182,172.50, which is higher than the total of the unqualified low bids submitted for each job separately in view of which the Commission has awarded the contract for the grading project to the low bidder for that project, Leonard & Slate, Oregon Ltd., at $149,705, and has awarded to Archie R. Averill the contract for the bridge project, at $32,467.50, Mr. Averill's bid being the low one received for that job without qualification."

Following this announcement, bids for additional highway construction projects were opened and read in conformity with previously published notice, as follows:

COLUMBIA RIVER HIGHWAY IN COLUMBIA COUNTY
MAINTENANCE AND OFFICE BUILDING AT ST. HELENS

No bids received

CENTRAL OREGON HIGHWAY IN HARNEY COUNTY
BUCHANAN-MALHEUR RIVER SECTION

Rogers Construction Co., Dayton, Wn.	$ 235,479.00
E. C. Hall Co., Portland	236,020.25
Newport, Kern & Kibbe, Portland	247,960.00
Sound Construction & Engineering Co., Seattle	251,126.00
Porter W. Yett, Portland	260,471.00
*McNutt Bros., Eugene	269,632.00
E. W. Elliott, Seattle	282,824.00
C. J. Eldon, Portland	334,426.00

* Bidder will not accept this project alone.

CENTRAL OREGON HIGHWAY IN HARNEY AND MALHEUR COUNTIES
MALHEUR RIVER-JUNTURA SECTION

*Rogers Construction Co., Dayton, Wn.	$ 164,423.00
Newport, Kern & Kibbe, Portland	173,959.60
*E. C. Hall Co., Portland	179,113.75
***E. W. Elliott, Seattle	186,956.00
****Sound Construction & Engineering Co., Seattle	187,645.00
*McNutt Bros., Eugene	188,713.00
**Porter W. Yett, Portland	204,249.00
**C. J. Eldon, Portland	224,641.00

(Continued on next page)

Malheur River-Juntura Project (cont.)

* Bidder will not accept project alone.
** Bidder will make $7,000 reduction if also awarded Buchanan-Malheur River Project.
*** Bidder will make $2,500 reduction if also awarded Buchanan-Malheur River Project
**** Bidder will make $10,000 reduction if also awarded Buchanan-Malheur River Project.

COMBINATION BIDS FOR THE TWO ABOVE PROJECTS

	(1)	(2)	Reduc.	Comb. Bids
Rogers Constr. Co., Dayton, Wn.	$235,479.00	$164,423.00	$ ---	$399,902.00
Sound Constr. & Engr. Co., Seattle	251,126.00	187,645.00	10,000.00	428,771.00
Porter W. Yett, Portland	260,471.00	204,249.00	7,000.00	457,720.00

M. C. Lininger & Sons, Medford	35,605.00
P. B. Doherty, Portland	37,904.00

OLD OREGON TRAIL HIGHWAY IN UMATILLA COUNTY
MISSION-MEACHAM ROCK PRODUCTION PROJECT

Pendleton Sand & Gravel Co., Pendleton	$ 11,750.00
Rogers Construction Co., Dayton, Wn.	11,950.00

OCT 30 1945

Chairman Banfield then announced that the award of contracts would be made at 3:00 p.m. in the same room.

The Assistant Counsel requested instructions relative to the sale of property in Albany described as portions of Lots 1 and 2, Block 39, Hackleman's Second Addition. He advised receipt of an offer from Mr. Harley Sapp, Albany, to pay $250 for this property and recommended acceptance thereof. The Engineer concurred The Commission approved the recommendation unanimously.

The Assistant Counsel brought up for discussion the question whether or not to continue during the calendar year 1946 the issuance of permits for the use of excess Highway Department properties. The Commission, by unanimous vote, approved the issuance of such permits during that year.

The Commission discussed the question of renewing the rental agreement with Mr. J. W. Goin covering use of 11 acres of State-owned property near Albany. The Assistant Counsel advised that Mr. Goin has had the use of the property at the rate of $5 per year; however, he did not pay the charge for last year because of a misunderstanding, and he has indicated that he does not intend to pay the rental charge this year. The Commission decided, in view of the circumstances, not to let Mr. Goin have further use of the property.

The Commission discussed the offer of Lt. Claire E. Terry, Coos Bay, to pay the sum of $500 for a parcel of State-owned land situate in Block 62 of Bennett's Addition to the City of Coos Bay. The Engineer advised that Lt. Terry plans to develop the property so that it will be an asset to the community and has stated willingness to accept a deed from the State with limited right of access to the highway. He recommended acceptance of the offer on those conditions. The Commission approved the recommendation.

The Commission's Chief Counsel brought up for discussion a settlement with Mr. Beldon E. Block concerning property on the Pleasant Hill-Lost Creek Section of the Willamette Highway in Lane County. He advised that the property has been appraised at $1,375, but Mr. Block refuses to accept such sum, but will accept the sum of $1,525 as payment in full provided the State will furnish materials to rock his driveway. He requested instructions. After discussion, the Commission, by unanimous vote, authorized the Chief Counsel to settle this matter with Mr. Block for as much under $1,525 as is possible.

The Commission's Chief Counsel requested instructions with regard to the taking of options for right of way for the proposed improvement of the Oregon Coast Highway at Coos Bay. He advised that considerable valuable property is involved and that he is fearful that people with a speculative turn of mind will take options on some of it, and, in that case, it will be difficult for the State to acquire it. He suggested that he be authorized

to secure options for the State at this time in order to avoid complications. He particularly referred to a tract owned by a California concern which lies between land owned by Coos County and the City of Coos Bay. It appears that a building which occupied the premises recently burned and the California concern is now offering the land for sale. The Engineer advised that the Commission has not as yet adopted a definite location for the highway at this point, but recommended approval of the Chief Counsel's request because the strip of land involved is comparatively short. Following discussion, the Commission authorized the Chief Counsel to proceed with the taking of the options provided there is no obligation to complete the purchases. The Engineer was instructed to report to the Commission at its next meeting facts, insofar as he is able without an accurate location survey, concerning the proposed highway location.

The Chief Counsel recommended to the Commission the adoption of a resolution confirming the action taken at the previous meeting with respect to the securing of rights of access in connection with future purchases of right of way for certain types of highway improvements. The Commission approved the recommendation and adopted the following resolution with regard thereto by unanimous vote:

WHEREAS, the transportation of persons and property over public highways by private and for-hire motor vehicles has developed to a point where such means of transportation has become an integral and essential part of the transportation systems and agencies of the State and of the Nation; and

WHEREAS, the volume and type of motor vehicles now using the public highways of the State and the Nation have become such that highway standards and highway designs of yesterday are inadequate with respect to factors of safety, time element, weight of load, dimensions of vehicle, and all other factors entering into the problem of transportation over public highways; and

WHEREAS, highway construction, maintenance, and improvement are now and have been for some time financed in large measure by taxes and other charges imposed upon and paid by the road user, and therefore the convenience, safety, and economy of time and cost of operation are of prime significance to the road user; and

WHEREAS, highways which in design possess a minimum curvature, easy grade, two or more same-direction lanes, freedom from access or intersecting roads, streets, or lanes, and into, to, or from which abutting property owners have no, or at least a limited, right of access, constitute and are thoroughfares which, in the opinion of the Commission, afford and offer to the highway user economy of time and cost and safety of operation, to public officials charged with upkeep economy of maintenance costs, and for all interested parties a reduction in the toll of life and health and a reduction in property damage; and

WHEREAS, the state highways heretofore located and constructed, while adequate at that time to meet the needs and requirements of the type and volume of traffic then using the public highways, are now inadequate and in some instances unsafe for the type, volume, and character of traffic now imposed upon public highways; and

WHEREAS, it is deemed by the Commission advisable and for the public welfare that certain policies be defined and declared by the Commission to serve as patterns and guides in connection with future highway location and construction as applied to major highways;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. That whenever in the future any segment, section, or major part of the Pacific Highway East, the Pacific Highway West, the Salmon River Highway, the Wolf Creek Highway from Portland to Davies, the West Portland-Hubbard Highway, the Columbia River Highway and Old Oregon Trail from Portland to the Idaho State Line at Ontario, the Willamette Highway from its junction with the Pacific Highway to its junction with The Dalles-California Highway, or The Dalles-California Highway from its junction with the Willamette Highway to Klamath Falls is relocated or the alignment thereof altered, thereby requiring the acquisition of new rights of way, there shall be acquired at the same time from the owners from whom real property is acquired for right of way all right of access from the abutting property to the highway and all right of access from the highway to the abutting property, except at such points or places as may be agreed upon by the Commission and the said owners.

2. That when it becomes necessary to acquire any real property for the realignment or relocation of any of the above named highways, or any segment, section, or major part of any of said highways, by the power of eminent domain the resolution authorizing such proceeding shall contain necessary findings and declarations with respect to the acquisition of all rights of access, as contemplated by this resolution.

3. That the Engineer be and he hereby is instructed, when preparing and writing descriptions for the acquisition of real property for rights of way for highway construction as contemplated in this resolution, to provide for and include therein a call for a waiver of all right of access as provided herein, and the Chief Counsel hereby is instructed to conform to the purpose and provisions of this resolution when acquiring real property for the purposes covered by this resolution, whether such real property and right of access be acquired by agreement or by the exercise of the power of eminent domain.

4. That this resolution be entered in the minutes and records of the Commission as of October 30, 1945.

The Chief Counsel brought up for discussion the advisibility of continuing negotiations for right of way for the proposed improvement of the Oregon Coast Highway through the Town of Gold Beach. He recalled the original agreement between the Commission and the people of this town whereby the former Highway Commission agreed to do certain things and the local people agreed to assume certain obligations. This agreement, he said, was based on an estimated cost of $36,846 to acquire necessary right of way and move buildings; however, it now appears from the report of the right of way agant, Mr. Ray Landon, who is carrying on the negotiations, that the demands of the local people are far in excess of that originally anticipated so that now the estimated cost is about $47,736. Mr. Landon was present and explained details of the transactions.

It appeared to the Commission, from considerable discussion of the matter, that the people of Gold Beach are unwilling to proceed under the original arrangement, in view of which the Commission, by unanimous vote, ordered discontinuance of further right of way negotiations and the withdrawal of the engineers who may be working on the project until authorized to resume activities on this project. It was left to the city to make the next move.

The Chief Counsel brought up for discussion the matter of conveying to the Seventh Day Adventist Church in Freewater, Oregon, 8,752 square feet of land now included in Parallel Street abutting on lands acquired by the State for right of way purposes. He advised that the City of Freewater is vacating this street where it abuts on the property of the Adventist School and that it is the desire of the church and the school to obtain all of the vacated portion for an athletic field. The State has no particular interest in the property, he said, but would acquire title automatically if the street were vacated, so, in order to accommodate the church, it would be necessary for the Commission to execute a deed conveying half of the vacated property to the church. He recommended approval of the transaction. The Commission approved the recommendation unanimously and thereupon signed the deed of conveyance.

The Assistant Counsel reported the results of a hearing before the Public Utilities Commissioner pertaining to the application of the Brooks-Scanlon Lumber Company, Inc. for permission to construct its logging railroad across the McKenzie Highway, at grade, near the Town of Sisters. He advised that the application for the grade crossing was denied, but the Company was authorized to overbuild the highway with the understanding that the highway would be depressed in its present location about nine feet. The order also provides, he said, that all costs of the overhead structure and its future maintenance shall be born by the Brooks-Scanlon Lumber Company, and that the cost of resurfacing the McKenzie Highway and the future maintenance thereof is to be borne by the State Highway Department with the further proviso that

the Company shall provide an access road for vehicular traffic during the construction of the grade separation structure, at such location as may be designated by the State Highway Commission. The Engineer estimated tne cost of the State's portion of the work at about $5,000 and recommended approval of the project on the basis of the Public Utilities Commissioner's order. The Commission approved the recommendation by unanimous vote.

A letter was presented from Mr. E. A. Thomas, City Engineer, Klamath Falls, requesting the construction of concrete strips eight feet wide along Main Street in Klamath Falls (route of The Dalles-California Highway) between Seventh Street and Ninth Street to replace existing asphaltic pavement. Mr. Thomas alleges that the present pavement becomes very soft during hot weather and the parking of automobiles against the curb causes depressions in the pavement which impair the riding qualities of the paved surface and are a niusance when filled with water because cars passing over them splash water onto the sidewalks, to the discomfort of pedestrians. The Engineer suggested that the problem could be solved by planing off the surface of the pavement an inch or two in depth and replacing it with similar material of a drier mix, which could be done for considerably less money than construction of concrete strips. The Commission approved such project unanimously provided an improvement of that type meets with the approval of the city officials.

A petition was presented from citizens of Klamath County requesting the oiling of the West Side Klamath Lake Secondary Highway from the end of the present oiled section to Fort Klamath. The Commission denied the request.

The Engineer requested instructions relative to the disposition of bids received by the Commission on August 30, 1945, for the construction of the West Side Klamath Lake Timber Access Road. He advised that the low bidder for this work is still ready and willing to proceed with the construction in conformity with his bid, and to wait two or three weeks for a decision, in view of the question whether or not Federal Access Road monies will be made available to finance the work. Mr. W. H. Lynch, Division Engineer, Public Roads Administration, who was present, stated his approval of the withholding of action on this matter for such period of time. The Commission voted unanimously to wait for two or three weeks before making its decision. The Chief Counsel was instructed, in the meantime, to prepare an appropriate form of agreement with the contractor binding him to accept the award of the contract if the award is made within such time period.

The Secretary presented a letter from the Redwood Empire Association inviting the members of the Commission to be the guests of the Association at its 25th Annual Banquet which is to be held in Ukiah, California, on November 9, 1945. The Commission expressed regrets that it could not attend this function.

A letter was also presented from the Weston Chamber of Commerce inviting the members of the Commission to attend its Seventh Annual Turkey Banquet in Weston on November 14, 1945. The Commission expressed appreciation for the invitation, and regrets that it could not be accepted.

The Commission confirmed the oral authority heretofore granted W. W. Stiffler, Assistant Maintenance Engineer, to make a trip to Seattle on October 3, 4, and 5, 1945, at State expense to investigate the availability of ferry boats that might be used in connection with the establishment of state operated ferry service across the Columbia River at Astoria. The Commission also confirmed the authority heretofore granted Mr. C. B. McCullough, Assistant State Highway Engineer, to go to Olympia, Washington, at State expense on October 18 and 19 concerning the same matter.

The Engineer discussed with the Commission a letter from Clarence B. Shain, Director of Highways, State of Washington, on the following subjects:

1. Completion of the Enterprise-Lewiston Highway
2. Rehabilitation of the lighting on the Interstate Bridge between Portland and Vancouver
3. State-owned ferry operation across the Columbia River at Astoria.
4. Proposed bridge across the Columbia River at The Dalles (Seufert site)

He explained that the letter is a report of a conference held recently in Mr. Shain's office among engineers of the Washington and Oregon Highway Departments and an outline of the conclusions reached at that time. Mr. Shain advises, he said, that the State of Washington has made provision in its second postwar year budget for the construction of the Grande Ronde River-Oregon State line section of the Enterprise-Lewiston Highway (Evergreen Highway in Washington) on the basis that the contract will be awarded after the middle of the year so that construction may be carried on during the winter of 1946-47, which should result in completion of the work early in the year 1947. The Engineer was instructed to inform Mr. Shain that it is the intention of the Oregon State Highway Commission to construct the Oregon Section of this highway simultaneously with the construction of the Washington Section if Federal Forest Highway funds are made available in the meantime to finance the work.

Concerning the lighting of the Interstate Bridge, Mr. Shain advises that the State of Washington is ready and willing to proceed with the project in accordance with the maintenance agreement covering such matter heretofore agreed upon between the two states, the cost, estimated at $13,500, to be paid on a cooperative basis as provided in the agreement and construction to be undertaken in 1946. The Engineer advised that this project was started by the former Highway Commission but was not finished because of the war; also, that the cooperative agreement referred to by Mr. Shain provides that construction and maintenance shall be paid for 50% by Oregon and 50% by Washington. He recommended approval of the project as a traffic safety measure. The Commission approved the recommendation by unanimous vote.

Concerning the establishment of state-owned ferry service at Astoria, Mr. Shain advises that through the Washington Toll Bridge Authority, under Chapter 266, Laws of Washington, 1945, Washington could join with the State of Oregon in such an undertaking; however, there are two objections, viz., 1. The law provides for the joint operation to be carried out only through the authorization and sale of bonds, which precludes such joint operation; and, 2. No appropriation has been made to the Washington Toll Bridge Authority nor does it have funds to finance or carry on the operation; moreover, the Attorney General of the State of Washington has ruled that the joint operation of such ferry cannot be carried out by the Director of Highways, but it would be possible for Pacific County, Washington, to operate a ferry jointly with the State of Oregon if the approach is a county road at a terminus located in that county. It appeared to the Commission, in view of this report, that the only way remaining to secure cooperation in this undertaking is to effect an arrangement with Pacific County, Washington. A decision in the matter was deferred pending a conference with Mr. Shain, which is to be held after the Engineer has rendered a full report on the investigations previously ordered by the Commission on this subject.

In this connection the Engineer requested authority to consult a Naval architect relative to the cost, etc. to build a ferry boat suitable to handle the volume of traffic that crosses the Columbia River at this place. He was instructed first to ascertain the amount of the fee that such architect would demand and telephone such information to the individual members of the Commission, who will then make a decision relative thereto.

With respect to the proposed bridge across the Columbia River near The Dalles, Oregon, Mr. Shain advises that the matter was discussed at considerable length and because of recent requirements of the Army Engineers it was deemed advisable to investigate and study a proposed bridge site about 1,000 feet downstream from the site originally selected, where there would be no conflict with the dam that the Army Engineers plan to construct across the Columbia River. The Engineer requested authority to join with Mr. Shain in conducting such investigations. The Commission approved the request by unanimous vote.

The Commission had under consideration the renewal of its forgery bond, in the amount of $100,000, with the American Bonding Company for a three-year period ending November 2, 1948. The Commission voted unanimously to continue the bond with the same company.

The Secretary presented an offer from Mr. Carle Abrams, Salem, to furnish the State a blanket fidelity bond covering all State Highway Department employees in lieu of the presently-effective position-schedule bond furnished by the Ohio Casualty Company covering certain specified employees. The Commission declined the offer, it appearing that a blanket bond covering all employees is not required and that the premium to be paid for the same is considerably more than the State is now paying for the position-schedule bond written by the Ohio Casualty Company.

The Commission had under discussion the setting of a date and the designation of a place for its next regular meeting and decided to hold such meeting in Portland on Thursday and Friday, December 13 and 14, 1945. The Secretary was instructed to secure a larger room for future meetings, the present room being too small to accommodate the contractors and delegations that are anticipated.

The Engineer presented a letter from Mr. Frank Shull, Multnomah County Commissioner, regarding the expenditure of postwar Federal Aid monies for market road construction. Among other things, Mr. Shull inquires whether or not a county would be permitted to compete as a bidder on highway projects proposed for construction within the borders of the county. The Engineer suggested that it would be advisable to secure detailed information from the Public Roads Administration as a basis for a reply to Mr. Shull, and for adoption by the State Highway Commission of a definite policy to be followed in such matters. It was the opinion of the Commission that this matter should be given very careful consideration so that the best information possible can be given to all of the counties, inasmuch as all of them are interested in the same matters. Accordingly, the Engineer was instructed to secure the attitude of the Public Roads Administration relative thereto and report back to the Commission. The Chief Counsel was instructed to advise the Commission as to the legal features involved.

The Commission discussed the matter of adopting Sullivan's Gulch, Portland, as the route of a state highway, particularly as the permanent route of entrance of the Columbia River Highway into Portland. It appears that certain interests have in mind the development of industrial sites in this location and if such development materializes the use of the location for highway purposes will be precluded.

The Engineer advised that Sullivan's Gulch offers an ideal location for a main trunk highway because of its freeway possibilities and because the present culture along the route is such as to make a highway economically feasible provided future development inimical to the plan is restrained. He estimated the cost to construct a modern highway along this route from Portland to Troutdale at about $8,000,000, based on a rough reconnaissance survey. The Engineer read aloud a letter from William A. Bowes, Commissioner of Public Works, Portland, on the subject, suggesting, if the Commission will indicate to the city by letter or resolution that it has or will include the Sullivan's Gulch Highway project in its future highway program, then the City Council will begin the necessary proceedings for the re-zoning of the Sullivan Gulch area so as to control development thereon.

The Engineer and the Chief Counsel recommended action accordingly on account of the importance of the matter. Chairman Banfield gave as his opinion that the matter should be studied. Commissioners Schaupp and Chessman concurred, whereupon the Engineer was instructed to make such studies as are necessary to protect the State's interests. The following resolution with respect thereto was adopted by the Commission by unanimous vote:

WHEREAS, the volume, type and character of traffic now moving over public highways, and especially at points where such traffic enters metropolitan areas, are such as to demand highway routes and locations which afford the most freedom of unimpaired movement and the highest degree of restricted access; and

WHEREAS, a route and location known as the Sullivan Gulch route in Multnomah County offers possibilities for highway development which in the opinion of the Commission should be explored, pertinent facts assembled and other relevant information and data developed for examination and consideration by this Commission; and

WHEREAS, until such preliminary field work has been done an independent selection or rejection of the proposed location is impossible;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. That the Commission recognizes that the proposed Sullivan Gulch route offers a potential location having possibilities worthy of consideration, the ultimate value of which cannot be determined with the information which is now in the possession of the Commission.

2. That the State Highway Engineer be and he hereby is authorized and instructed to make or cause to be made a general survey of the said Sullivan Gulch route now proposed for consideration as a location and route of a main traffic artery into the City of Portland, and report to this Commission the results of such survey.

3. That the Commission's Counsel be and he hereby is authorized and instructed to make or cause to be made an estimate of the reasonable market value of all real property involved in said proposed route and location, including such property damage as may result by reason of any taking should a highway be located and constructed over said route, and report to this Commission such estimate and findings.

4. That upon receipt of such survey and such property appraisals and findings a study and examination of the same shall be made by this Commission, and such action then taken thereon as the record and public welfare may warrant.

5. That it is estimated that the cost incident to the making of said survey and the appraisal of real property involved in said proposed project will be a sum not less than $15,000.00, and since the proposed project is of equal interest to the City of Portland, and since the time element is a vital factor in the determination of the issue and problem under discussion, it is ordered by

the Highway Commission that said authorized survey and said property appraisal be commenced as soon as the City assures the Highway Co - mission that every legitimate means will be exercised by the municipal authorities for the protection of said proposed route against commercial or other development which would tend or which might tend to impair the said proposed route for highway construction.

6. That this resolution be entered in the minutes and records of the Commission as of October 30, 1945, and a copy thereof delivered to Mr. William A. Bowes, as representative of the City of Portland.

A letter was presented from the City of Powers requesting a meeting with the State Highway Engineer for discussion of the need for the improvement of the Powers Secondary Highway. The Engineer was instructed to have Division Engineer K. D. Lytle call on these people and ascertain what they have in mind.

A letter was presented from Mr. O. L. Lundell, Cecil, Oregon, in which the Commission is asked to construct a cattle pass under and across the Oregon-Washington Highway in the Southeast quarter of the Northeast quarter of Section 26, Township 3 North, Range 22 East, W. M., Gilliam County, for use by himself and other stock owners in the vicinity as a convenience in watering livestock, which, under present conditions, are cut off from water supply. The Engineer advised that a number of requests have been received for construction of similar facilities across existing state highways and suggested that it would be advisable for the Commission to establish a policy with regard thereto, which policy might include provision for payment of 50 per cent of the cost by the State, if the Commission feels so inclined. The Commission decided unanimously not to contribute toward the cost of constructing such cattle passes, however, offered no objection to the property owners building them at their own expense under permit from the Commission and in conformity with plans approved by the State Highway Engineer and under his supervision. The Secretary was instructed to inform Mr. Lundell accordingly.

The Commission discussed a letter from the Oregon-Washington Telephone Company requesting the privilege of maintaining its telephone pole line along the Central Oregon Highway between Bend and Burns in its present location during its useable life or until necessary to relocate the line on account of highway improvements, such location being a deviation from the location specified in the permit that was issued to the company by the Commission. The Engineer advised that the existing pole line was constructed by the War Department for use in connection with Army maneuvers in Central Oregon during 1943. Upon abandonment of the lines by the Army, he said, ownership of the poles was transferred to the telephone company, which now wants to maintain them in their present location in order to avoid the expense of digging new holes in rock formation near the edge of the right of way when necessary to replace the poles. He further explained that the poles installed by the Army are untreated pine poles of short life, and that many of them have

already fallen on the highway, creating a hazardous condition for the traveling public. He recommended that the company's request be denied and that it be requested to place the poles near the edge of the right of way where they will not become a niusance or a hazard, if they should fall, which is the location specified in the permit as the eventual location of the line. The Commission approved the recommendation unanimously and instructed the Secretary to so inform the Oregon-Washington Telephone Company.

A letter was presented from the City of Warrenton requesting State aid in the maintenance of certain city streets over which the truck hauling of logs is being carried on. The Commission instructed the Engineer to handle this matter in the same manner that others in the same category are being handled under the Commission's newly-established policy.

The Engineer brought up for discussion a letter from Mr. Paul B. Wallace, Chairman of the Park Committee of the Salem Long Range Planning Commission, regarding the selection of a site for the new bridge that is proposed to cross the Willamette River at Salem, as a replacement for the present structure. Mr. Wallace gave as his feeling that it is important that enough land on the Salem side of the river be set aside to insure adequate ingress and egress to the bridge, both for present needs and to safeguard against the time when the expanding use of the bridge will demand enlarged facilities; also, that a structure of the size and cost of the proposed bridge should be set off with a fitting approach which would enable the public to appreciate it and to see its beauty. He suggested, therefore, that when the bridge site is selected, that the City of Salem be advised thereof and that the City be given suggestions by the Engineer and the Parks Superintendent to the end that the City may have guidance in securing land for a proper and adequate bridgehead at the Salem end of the proposed structure. The Engineer advised that the City of Salem is not asking the Commission to spend State money to acquire the necessary property as that feature will be taken care of locally. Chairman Banfield gave as his thought that it is proper for the Engineer to answer this letter rather than the Commission. Commissioners Schaupp and Chessman concurred and it was so ordered.

A letter was presented from the Progressive Civic Club, Oceanlake, Oregon, giving as their understanding that the plans of the Highway Commission for the improvement of the Oregon Coast Highway between Oceanlake and Dorchester House do not include the straightening of a certain curve in the present alignment, and urging the Commission to revise its plans to include the elimination of this curve. The Engineer advised that the Commission previously discussed this matter and decided to improve the highway on the present alignment at this point. He further stated that the change requested is not justified, particularly in view of the fact that at some future time the highway will be re-aligned to miss this location. He recommended that the request be denied. The Commission approved the recommendation unanimously.

Consideration was given by the Commission to a letter from Mr. Floyd J. Cook, Highway Representative, Pacific Northwest Loggers Association, suggesting, in order to reduce the possibilities of accidents occurring

on state highways at points where logging trucks enter and leave, that logging operators be required to maintain standard signs at such locations warning the traveling public to beware of logging trucks, such signs to be uniform in type and placed at a sufficient distance on each side of the points where the trucks enter and leave the highway to insure that the public has ample warning of the operations. He further suggested, in order to insure that the signs are of proper design and construction, that they be furnished by the State Highway Commission at actual cost to the logging operators. The Engineer recommended adoption of the suggestions offered by Mr. Cook provided the use of the signs would not relieve the operators of liability. The Commission approved the recommendation unanimously provided that is satisfactory from the legal standpoint. The matter was referred to the Chief Counsel to pass on the legal feature.

The Engineer brought up for discussion a request from the Canada Dry Corporation for permission to occupy a portion of the service road on the east side of Water Avenue between Clay Street and Mill Street, Portland. He said that the service road is State-owned and is a component part of the Harbor Drive improvement. The Canada Dry Corporation, he said, is erecting a building fronting on this service road, the foundations of which encroach within the right of way; however, there are no objections thereto because the encroachment is about 12 feet under ground. In connection with the building construction, however, the Corporation is erecting a tower which encroaches in the roadway a distance of about six feet, and is objectionable from the highway standpoint. He read aloud a letter from Mr. Ben S. Morrow, City Engineer of Portland, advising that he is opposed to the relinquishment of any portion of this street area for private use by any method. The Engineer recommended that the request of the Corporation be denied and that it be required to construct its tower to avoid any encorachment whatsoever in the highway right of way. The Commission approved the recommendation unanimously.

The Commission recessed for luncheon at 11:55 a.m. and reconvened at 2:00 p.m. in the same room with the same persons present and participating.

The Engineer requested instructions regarding certain property in Albany which was sold to J. A. McDowell, Albany, for the sum of $1,500 as a result of competitive bidding on September 17, 1945. He advised that Mr. McDowell has been notified that he was the successful bidder for the property and has been requested to complete payment for the same, but he has not done so, which raises the question, how is the matter to be disposed of? The Commission ordered that a deed of conveyance be prepared and tendered to Mr. McDowell in person with a request for payment of the balance due. If he refuses to pay the balance such information is to be reported back to the Commission for instructions.

The Engineer requested authority to post "no parking at any time" signs on the east side of Denver Avenue, Portland, (U.S. 99W) just north of Schmeer Road junction, so as to stop patrons of the Anderson store, located at this point, from parking their cars in the highway acceleration lane. The Commission approved the request by unanimous vote.

Consideration was given by the Commission to the bids received at the morning session for construction work. The Commission, by unanimous vote, rejected the bids received for the remodeling of the Bearsley building in Klamath Falls and awarded to Rogers Construction Company the contracts for the construction of the Buchanan-Malheur River project and for the Malheur River-Juntura project on the Central Oregon Highway, on the basis of this contractor's combination bid for both projects. The bids received for the following projects; oiling, Flight Strip-McDermitt Section of the I.O.N. Highway; Vale Rock Production Project, and Mission-Meacham Rock Production Project were referred by the Commission to the Engineer with authority to award the contracts to the low bidder in each instance when certain conditions have been satisfied.

At 3:00 p.m. Chairman Banfield publicly announced the awards, as follows:

"Construction of a frame maintenance and office building at St. Helens, Columbia County: The Commission received no bids for this project and has ordered it re-advertised for bids to be received at the next meeting.

"Buchanan-Malheur River Section of the Central Oregon Highway, Harney County: Rogers Construction Company, Dayton, Washington, was the low bidder for this project, at $235,479. E. C. Hall Company, Portland, was the next low bidder at $236,020.25. There were six higher bidders. The Commission advertised that contractors could bid on this project in combination with the Malheur River-Juntura surfacing and oiling project on the Central Oregon Highway. The low bidder for the Malheur River-Juntura project was the Rogers Construction Company, at $164,423, conditioned on the award, also, of the Buchanan-Malheur River project. Newport, Kern & Kibbe, Portland, submitted the second low bid for the Malheur River-Juntura Project at $173,959.60. There were six higher bidders for this project. The combination bid of Rogers Construction Company for both projects was $399,902. The combination bid of Sound Construction and Engineering Company, Seattle, was second low for both projects at $428,771. Two higher combination bids were received. The Commission has awarded both contracts to the Rogers Construction Company, Dayton, Washington, on the basis of its combination bid amounting to $399,902.

"Remodeling of the Beardsley Building on South Sixth Street, Klamath Falls: The Commission received two bids for this project but has rejected both of them.

"Flight Strip-McDermitt Section of the I.O.N. Highway in Malheur County: Del R. Beebe, Fallon, Nevada, was the low bidder for this project at $91,905.75. The only other bid was that submitted by McNutt Brothers, Eugene, at $125,656. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Del R. Beebe, when certain conditions have been satisfied.

"Vale Rock Production Project on the Central Oregon and John Day Highways in Malheur County: The Commission received four bids for this project, the low bid being that of Newport, Kern & Kibbe, Portland, at $32,559. The second low bid was that submitted by E. C. Hall Company, Portland, at $34,520. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Mission-Meacham Rock Production Project on the Old Oregon Trail in Umatilla County: Pendleton Sand and Gravel Company, Pendleton, submitted the low bid for this work at $11,750. The next low, and only other, bid was submitted by Rogers Construction Company, Dayton, Washington, at $11,950. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Pendleton Sand and Gravel Company at its bid price of $11,750 when certain conditions have been satisfied."

Consideration was given by the Commission to the following matters of unfinished business:

1. Establishment of two one-way streets in the City of Corvallis for routing of traffic on U. S. 99W: The Engineer advised that the Corvallis City Council has been advised of the Commission's requirements with respect to such matter but the City has not as yet replied, so it is simply a matter of waiting for the city to act.

2. Removal of privately-owned cabin from Casey State Park, Jackson County: The Chief Counsel advised that there is no additional information to report in this matter. He recalled, however, that the Commission at the previous meeting indicated a desire to inspect the premises before taking definite action. The Commission decided to make such inspection trip some time before next spring.

3. Report on reconnaissance survey for establishment of a new state highway between Bates and Baker in Grant and Baker Counties to accommodate truck hauling of logs: The Engineer advised that the reconnaissance survey is completed but the Engineer in charge has not as yet reported his findings, although he believed that he would be in position to make an economic report on the project at the next regular meeting of the Commission. He was instructed by the Commission to include in his report the possibilities of improving a portion of the route. He was also instructed to call on the people of Baker and explain the status of the situation.

4. Proposed revision of the intersection of South 6th Street and Washburn Street, Klamath Falls, as suggested by Mr. A. D. Collier, Klamath Falls: The Engineer advised that this project involves the further remodling of the Badorek Building which had previously been cut back to accommodate the highway improvement as originally planned. Mr. Collier, he said, tendered his check to reimburse the state for the cost of cutting back the building the first time provided the Commission would approve the second cutback; however, bids received for the additional work were so high that he could not approve it. He recommended as a solution of the problem that the highway alignment be shifted slightly to eliminate the necessity for the further remodling of this building and that Mr. Collier's deposit be returned to him. The Commission approved the recommendation unanimously.

5. Proposed improvement of two street intersections in the City of Forest Grove to permit loads 80 feet overall in length to negotiate the turns without creating a hazard to other traffic: The Engineer advised that an attempt has been made to secure the attitude of the City Council regarding this improvement, as ordered by the Commission, but as yet no definite answer has been received. The matter will be followed up.

6. The question of granting a two-year lease for the use of State-owned property in the town of Nyssa formerly owned by the Fletcher Oil Company: The Chief Counsel advised that his report in this matter is not ready but expects to render a report at the next meeting of the Commission.

7. Disposal of old Knapp Hotel Building in Port Orford: The Chief Counsel advised that his report on this matter will be rendered at the next meeting of the Commission.

8. Report on cost to modernize the Siuslaw Highway over the summit of the Coast Range in Lane County: The Engineer advised that he has no report to make at this time but will prepare one as soon as possible.

9. Settlement with John La Grand for right of way for proposed highway construction at Harbor Drive and Arthur Street, Portland: The Assistant Counsel had no report on this matter other than that the City of Portland has approved settlement with Mr. La Grand for $30,000 and is willing to contribute city funds in the amount of $18,000 as the city's share of the expense. The Commission deferred a decision in the matter pending inspection of the premises immediately following adjournment.

10. Question of relinquishing the water right acquired with the Union Fish Hatchery property in Union County: The Engineer advised that there is no report to render at this time, but he will have it ready for the Commission at its next meeting if possible.

11. Question of designating the Richardson-Eugene Secondary Highway as a "through" highway. It was recalled that the Commission, at the previous meeting, indicated its approval of such designation provided there are no objections on the part of the County Court of Lane County, and that the Engineer was instructed to ascertain the attitude of the County Court relative thereto. The Engineer advised that the County Court has not yet expressed itself in regard to this matter.

The Commission considered and signed agreements, etc., as follows:

Bargain and Sale Deed conveying to the Seventh Day Adventist Church of Milton, Oregon, 8250 square feet of land now included in Parallel Street abutting upon lands owned as right of way by the State Highway Commission.

Bargain and Sale Deed conveying unto Carl O. Peterson a parcel of land containing 3.59 acres in Sec. 24, T. 2N., R. 4W., W. M., Washington County.

Consent to Vacation of a portion of County Road No. 360, within the corporate limits of the City of Freewater, Umatilla County.

Agreement (collateral) in connection with the acquisition of property owned by Mr. J. E. Tapp and wife and which is needed in connection with the Wolf Creek Highway.

Lease Agreement with Henry Zorn covering use of farm land in Champoeg State Park.

Agreement with Port of Alsea Commission covering maintenance of a floating wharf across State Highway Park Property at Waldport.

Project Statement on Mehama-Niagara Section of North Santiam Highway, near Linn-Jefferson County Line in Marion County.

Project Statement on John Day River-Fossil Section of Shaniko-Fossil Highway.

Project Statement on Dallas-Coast Highway between No. 11 near Valley Junction and No. 9 at Rickreall.

Project Statement on Klamath Falls-Lakeview Junction, Klamath Falls-Lakeview Highway between No. 4 in Klamath Falls and Dairy.

Contract with George F. Gunnell for furnishing ferry service at Knegren Crossing of Coos River, Coos County.

There being no further business to come before the Commission at this time, the meeting adjourned at 3:15 p.m. following which the Commission inspected the La Grand property at the intersection of Harbor Drive and Arthur Street in South Portland.

Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

OCT 30 1945

Portland, Oregon
December 13, 1945

The State Highway Commission met in regular session at 9:00 a.m. in the Auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner (Arrived at 10:50 a.m.)
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
C. B. McCullough, Assistant Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Bids, as follows, for highway construction, for sale of buildings in Klamath Falls, and for sale of a tract of land in Albany were opened and read in conformity with previously-published notices, following which Chairman Banfield announced that the awards of contracts for construction work and the sale of land in Albany would be made at 3:00 p.m. this day in the same room and that the Commission's decision with respect to the sale of the buildings would be announced at 3:00 p.m. on the following day:

MAINTENANCE AND OFFICE BUILDING IN
COLUMBIA COUNTY AT ST. HELENS ON
COLUMBIA RIVER HIGHWAY

Lockyear & White, Seattle, Wn.	$ 15,737.00
Berkemeier & Saremal, Portland	17,611.00
W. H. Philpott, Portland	19,260.00
Howard Halverson Co., Portland	19,594.60

REMODELING CLAYCOMB BUILDING IN
ASHLAND, OREGON, JACKSON COUNTY

	Units A. B. & C.	Units A. B. & D.
Pinniger & Watkins, Klamath Falls	$ 43,625.00	$ 47,950.00

This tabulation includes high bidders only. A complete list of all bidders is on file in the office of the State Highway Commission, Salem. See miscellaneous proposal file No. 306.

DEC 13 1945

SALE OF TRACT OF LAND AT ALBANY

C. E. Davis, Albany $ 651.00

Mr. Alfred D. Collier, Klamath Falls, was present in regard to a readjustment of pole and pipeline facilities on South Sixth Street, Klamath Falls, to accommodate the proposed improvement of this street as a postwar highway project. He urged the removal of the pole lines as a traffic safety measure and to improve the general appearance of the highway. He advised that the telephone company proposes to install its facilities under ground at its own expense, but, according to the franchise of the power company, the City of Klamath Falls is obligated to pay the cost to readjust the power circuits within the city limits. He asked the state to assume this expense, which he estimated at $1,728 if the poles are replaced at the curb line and $7,335 if the power facilities are moved entirely off this street.

He also urged the Commission to provide for the lighting of South Sixth Street in order to avoid the occurrence of accidents. In the event the Commission could not see its way clear to approve the lighting of the entire street, then he urged that lights be installed at certain hazardous intersections.

With respect to water pipe lines Mr. Collier advised that the existing pipeline is inadequate to properly serve this district and must be replaced with a new 12-inch main. He pointed out that the pipeline is owned by the California Oregon Power Company, and, under the terms of its franchise, it appears that the city is obligated to pay the cost of moving it. He asked that the state assume this expense, which he estimated at about $7,000, because the city has no money budgeted to pay it. The Engineer advised that, according to the Commission's Counsel, utilities have the right to occupy the highway right of way, but it is left with the State Highway Commission to designate the location where the facilities are to be installed outside of cities, but the cities control such features within the city limits. He pointed out that the existing facilities were installed under authority of the City of Klamath Falls and suggested that, if the city gave a franchise that contains provision that the corporation does not have to move them at its own expense, the city then is to blame and should see to it that the facilities are moved to the proper locations at no cost to the state. Under these circumstances he recommended that the city be required to see that the water main and poleline facilities are moved to the proper location insofar as they occupy the highway within the city limits, payment for the same to be made by the city. As to the section outside the city limits, he recommended that the California Oregon Power Company, which is the owner of the facilities, be required to move them at its expense. He mentioned that the decision in this instance involves the establishment of a precedent, and if the state assumed the full obligation in this particular instance, it would have to do likewise in other cases. Chairman Banfield stated that the state is not in position to assume the responsi-

DEC 13 1945

bility for changing of utilities within the corporate limits of cities and towns and feels that the cities should assume such obligations. He mentioned that he personally is not in favor of the state assuming the expense in the City of Klamath Falls. Commissioner Chessman likewise expressed himself, pointing out that the precedent that would be established is undesirable and might result in large expense to the state in future undertakings. Mr. Collier asked that the city be notified of the Commission's decision and be given full information as to the requirements. The Commission thereupon instructed the Engineer and the Chief Counsel to send such information to the city and to the California Oregon Power Company.

Mr. Collier then brought up for discussion the installation of traffic lights at four hazardous street intersections where accidents have occurred. Chairman Banfield advised that the Commission has no established policy with respect to the installation of traffic lights and cannot approve them indiscriminately but will approve them at points where the Engineer considers them required.

Commissioner Schaupp arrived at this juncture.

Mr. Collier then inquired whether or not the Commission would make provision for lighting in its plans for the highway improvement so that the city can install its own lighting system later on if it so desires. He was informed by the Engineer that such provision has already been made in the design of this project.

Mr. Donald Baldridge, Drain, Oregon, came before the Commission with regard to the reinstatement of his log hauling permit which was cancelled for gross violation of the laws, rules, and regulations covering log hauling operations. Mr. Baldridge admitted his mistakes and promised hereafter to abide strictly with the requirements if permitted to resume truck hauling over state highways. Following discussion, the Commission voted unanimously to reinstate Mr. Baldridge's permit subject to the understanding that his permit absolutely will not be reinstated if he is again arrested for violations and the permit is cancelled. Mr. Baldridge accepted this condition whereupon the Commission instructed the Secretary to recommend to the Public Utilities Commissioner reinstatement of the permit.

A delegation representing the Veteran Steamboatmen's Association, Portland, came before the Commission regarding the installation of a fireproof shrine in Champoeg State Park to house relics of the early days. The delegation was headed by the Hon. Fred W. Wilson, Circuit Judge, The Dalles, Oregon, and included the following:

Captain Walter Monical, President, Veteran Steamboatmen's Association
William O. Fischer, Secretary, Local 17, National Organization Masters, Mates, and Pilots, of America
Sam Shaver, marine engineer, representing Marine Engineers Beneficial Association
Gil Hayden, pilot, fire boat

Laurence E. Amell, Secretary, Inland Boatmen's Union of the Pacific
Com. Clyde Raabe, President, Columbia River Pilots
Fred C. Seran, Inland Boatmen's Union
Captain James Cambell, Veteran Steamboatmen's Association
Captain Ray Mooney, Veteran Steamboatmen's Association
Tom White, Attorney, Portland, legal adviser

Judge Wilson urged the Commission to construct a shrine in this park as a memorial to steamboatmen and their affiliates and as a place where records and relics of bygone days may be preserved. He presented letters from the following organizations in support of his oral request:

Columbia River Pilots
Portland Branch, West Coast Local No. 90, National Organization of Masters, Mates, and Pilots of America
Local No. 17, National Organization of Masters, Mates, and Pilots of America
Portland Steamship Operators Association, Inc.
Inland Boatmen's Union of the Pacific
Columbia Basin River Operators
Portland Yacht Club
Portland Chamber of Commerce

Chairman Banfield advised that the State Highway Commission previously has discussed the matter of constructing a building in this park and has gone on record in favor of such a building; in fact, preliminary plans for the same have been made and the matter is now being discussed with the Oregon Historical Society. He pointed out that one of the Commission's concerns is the location of the building so that it will not be flooded during periods of high water. Com. Raabe urged that provisions be made in the building for a "marine room" for the housing of relics. Judge Wilson urged that the plans for the general park development include the construction of facilities for the landing of pleasure boats. Chairman Banfield assured the group that such matters would be given due consideration in the formulation of the plans. He concluded the conference by stating that the Highway Commission is glad to cooperate in this undertaking.

A delegation from Corvallis representing the City Council and the Chamber of Commerce was present. The group was headed by Mr. V. L. Goodnight, City Engineer, and included Messrs. Charles Whiteside, of the Chamber of Commerce and City Planning Commission; and Vance Taylor, Secretary of the Chamber of Commerce. Mr. Goodnight exhibited a master plan of improvements scheduled for the City of Corvallis which, he said, were prepared by an expert planning engineer. Shown thereon was the plan of the State Highway Commission for the rerouting of the Pacific Highway West and the Albany-Corvallis Highway at the northerly city limits of Corvallis. Mr. Goodnight advised that considerable development is taking place in the district through which this proposed highway improvement is located and urged the Commission to take early action in the making of the location

survey and the securing of options for needed right of way which, he said, can be acquired now at much less cost than later on after the development has taken place. The matter was discussed at some length, but the Commission deferred action thereon pending further investigations by the Engineer.

Mr. Goodnight next presented to the Commission a letter from Ralph P. Shindler, Municipal Judge and Clerk of the City Council, in which the Commission is advised that the City Council has gone on record in favor of the proposed improvement of Harrison Street from Second Street to Ninth Street in accordance with the plans prepared by the State Highway Engineer, and on the basis that the state, the City of Corvallis, and the owners of the adjacent properties each pay 1/3 of the costs involved and with the understanding that Harrison Street is to be maintained as a temporary highway route pending construction and completion of the proposed grade separation project north of Corvallis. The letter was read aloud by Mr. Goodnight following which Chairman Banfield assured the delegation that the Highway Commission is ready and willing to proceed with this improvement as soon as the City Council takes appropriate action, although, in his estimation, the City should do more than indicated by the letter.

Mr. Goodnight then brought up for discussion a proposed revision and improvement of the approach of the Corvallis-Newport Highway into the City of Corvallis. He presented a map showing a suggested revision to the south of the present highway which would avoid school grounds. He was informed by Chairman Banfield that the Highway Commission cannot say now whether or not it will approve the rerouting of the highway as suggested. The Commission, he said, is in no position to advocate a new route now in view of its present committments. This concluded the conference.

Mr. E. S. Fenlason, Attorney, Portland, came before the Commission regarding the claim of Miss Maud Campbell, who alleges that she has not been fairly compensated for the damage that resulted to her property at the north end of the Union Avenue Viaduct, Portland, by reason of the construction of this viaduct. Mr. Fenlason stated that the former Highway Commission reached a settlement with Miss Campbell in 1939 whereby she was paid the sum of $500 and given a small parcel of land. Miss Campbell, he said, was not well at the time and did not have proper legal advice, and she feels that the settlement as effected was not reasonable or fair and has asked that the present Commission review the matter. The Commission referred the matter to the Chief Counsel with instructions to report the full facts of the case.

Mr. W. W. Purvis, Nelscott, Oregon, was present on behalf of his claim for damage to his property arising out of the improvement of the Oregon Coast Highway in front of his fish market at Nelscott. Mr. Purvis advised that he signed up for the highway improvement along with other property owners, that being a requirement of the State Highway Commission in order to secure sidewalks and curbs, notwithstanding that it involved the raising of his building some 2 1/2 feet. Raising the building, he said, has cost him the sum of $3,200, payment of which will "break" him. He asked the Commission to assume payment of 1/3 of this cost. The Engineer advised that when the survey was made for this improvement, Mr. Purvis was informed that the grade line in

front of his premises would be about 2 1/2 feet higher than Mr. Purvis' building; also, that the state would not raise the building, and if he did not raise it himself it would be necessary to construct a wall in front of his property with steps leading down to his entrance. It later appeared that Mr. Purvis found someone who agreed to raise the building for the sum of $800, which evidently was satisfactory because he proceeded with the work, but during the progress thereof an accident occurred and as a result Mr. Purvis was put to extra expense. He added that by reason of the fact that Mr. Purvis raised his building the state was saved the expense of building the retaining wall, a wooden guardrail, and a bulkhead, which were estimated to cost $111. The Commission deferred action on this matter until the next meeting. The Engineer and the Chief Counsel were instructed to ascertain the facts and report back to the Commission whether or not the state is liable and there is justification for payment of part of the extra expense incurred by Mr. Purvis.

The Commission recessed at 12 o'clock, noon, for luncheon and reconvened at 2:00 p.m. in the same room.

Mr. Robert P. Conklin, Engineer, North Bend, Oregon, appeared before the Commission on behalf of the Weyerhaeuser Timber Company relative to the acquisition of two state-owned tracts of land at North Bend, one of which is a tract containing 1.05 acres that was acquired by the state for a highway maintenance quarters site, and the other a larger tract opposite the Company's proposed mill site, which the Company wishes to lease as a parking space for its employees' automobiles. Mr. Conklin advised that his Company has either purchased or obtained options to purchase lands known as the "Kruse and Banks Shipyard" and "Culver Mill Site" in North Bend, on which the Company contemplates construction of its new mill, but in order to complete its holdings it needs the 1.05 acre highway maintenance site, which is surrounded by the other land. He offered to purchase and deed to the state another suitable maintenance site as a substitute for this tract. In the discussion of this matter mention was made of the agreement between the Company and the Highway Commission relative to the use of state-owned property under the south end of the Coos Bay Bridge which, it appears, could be cancelled if the Company constructs its mill on the above-mentioned property. Mr. Conklin advised that if the Company does not need that area it would agree to the cancellation of the agreement and would also sell to the state other land that it owns adjacent thereto which he understood the state would like to have as an addition to the state park at this location. He urged the Commission to take immediate action with regard to the maintenance site because the Company's options to purchase the other tracts expire on December 20. The State Highway Engineer advised that the City of North Bend owns a site that is suitable provided a small privately-owned tract adjoining this site is acquired. Mr. Conklin advised that inquiry reveals that such tract can be acquired for $400. Chairman Banfield stated that the Commission is willing to negotiate with the Company for the exchange of properties but wishes to know first what kind of a proposition the Company will make. He suggested that the Company officials consult with the State Highway Engineer and the Chief Counsel with respect thereto and that the results thereof be communicated to the Commission which will then take definite action. The transaction, he said, depends entirely on the ability

of the parties to come to a mutual agreement with respect to the maintenance site and the proposed park area. The suggestion was approved by Commissioners Schaupp and Chessman and it was so ordered. The Chief Counsel was thereupon instructed to inform the Company in writing just what the Commission has in mind.

Mr. Adrian Schroeder, President, Gold Beach Chamber of Commerce, and Mr. Fred Adams, Member, were present concerning the proposed improvement of the Oregon Coast Highway through the town of Gold Beach. Mr. Schroeder gave as their understanding that the Highway Commission has stopped all work in connection with this project because of right of way difficulties, and inquired what could be done to reinstate it because they are anxious for the improvement to proceed. Chairman Banfield explained that the Commission previously approved this project as planned by the former Highway Commission and authorized negotiations for needed right of way; however, during the progress of such negotiations it appeared that there was a lack of desire on the part of the local people to proceed on the previously-agreed basis, in view of which the Commission considered it advisable to stop the work, particularly because of the fact that there are so many other places for the funds. The Commission, he said, does not wish to force a project on any community but rather wants to undertake them on a friendly basis. If the people of Gold Beach are willing to have the Gold Beach project proceed on such basis and will re-establish themselves with the Commission's Chief Counsel and the Right of Way Department, then the Commission will authorize resumption of the negotiations for the right of way; however, until the city evidences a desire to cooperate, the Commission will not deviate from its present decision. He made it clear that the Commission is making no promises with respect to the project until the right of way matters have been clarified to the satisfaction of the Chief Counsel. Commissioners Schaupp and Chessman concurred.

Mr. W. H. Dean, President, Oregon-Washington Telephone Company, Hood River, came before the Commission regarding the construction of a telephone pole line along the right of way of the Central Oregon Highway between Bend and Burns. He advised that his Company has acquired the poles erected in 1943 by the U. S. War Department in connection with the Army maneuvers that were conducted at that time in Central Oregon, and requested and has received from the Highway Commission a permit authorizing the maintenance of the poles on the highway right of way; however, the provision of the permit with respect to the location of the poles is not satisfactory because a strict interpretation thereof requires that the poles be re-established, which is a costly undertaking and, in his estimation, is impractical and unnecessary. He asked the Commission to permit the maintenance of the poles in their present location so as to avoid the heavy expense of digging new holes in solid rock. He stated the Company's willingness to re-set any of the poles that now constitute a hazard to the traveling public but urgently requested that the Company be allowed to maintain the balance of its poles in their present location. The Engineer explained that the permit that was granted the Company specified a location of the poles in conformity with the standard policy of the Highway Commission. He pointed out that the existing poles are in very bad condition and soon will have to be replaced. Many of them, he said, constitute a serious hazard to highway traffic in that they are very close to the traveled roadway,

and if they should fall on the highway, as some have already, serious accidents could result. It was his thought, in view of the fact that so many of the poles have to be replaced at this time, that the Company should be required to place them in the proper location near the edge of the right of way, and he so recommended. Following considerable discussion of this matter, Chairman Banfield suggested a conference with the State Highway Engineer and the Commission's Chief Counsel in an endeavor to reach an agreement for the limited use of the poles in their present location at such points where no hazard exists. He advised that the Commission wishes to cooperate to the greatest extent possible without creating a public hazard but cannot allow the pole line to be maintained in unsafe location. Commissioners Schaupp and Chessman concurred in Chairman Banfield's statements, whereupon it was agreed that a conference would be held in the near future following the Engineer's personal inspection of the existing pole line.

Messrs. A. A. Loeb, O. C. Roehr, and K. Wolfe, Chairman and members, respectively, of the Recreational Committee of the Portland Chamber of Commerce, were present and urged the Commission to increase its park budget sufficiently to allow for the purchase of more timbered areas and beauty spots along state highways. It was their thought that this requires immediate attention while such areas are still available. Chairman Banfield expressed appreciation for the interest displayed by this group and referred the delegation to past actions of the Commission in this regard, which, he said, speak for themselves.

The Commission discussed with the Engineer the bids received at the morning session for construction projects and the sale of property. The Commission voted unanimously to award the contract for the Cloverdale-Ocean Lake Rock Production Project to E. C. Hall Company, low bidder, and to award to Vernie Jarl the contract for grading and topping the Porcupine Butte-Chichester Gulch Section of the Shaniko-Fossil Secondary Highway, Mr. Jarl's bid being the low one submitted for this job. The Commission accepted the low bid submitted by J. S. Risley for The Dalles-Maupin Rock Production Project but referred it to the Engineer to make the award when certain conditions have been satisfied. All bids received for the remaining jobs were rejected by the Commission as being too high. The Commission also rejected the bid submitted by Mr. C. E. Davis for the purchase of real property at Albany.

At 3:00 p.m. Chairman Banfield publicly announced the awards as follows:

"Construction of a frame maintenance and office building at St. Helens, Columbia County. The Commission received four bids for this project but has rejected all of them.

"Remodel and construct additions to the Claycomb Building, at Ashland, Oregon, Jackson County. The Commission received only one bid for this job. It has been rejected.

"Mill Creek-Miller Flat Section of the Warm Springs Highway in Jefferson and Wasco Counties; seven miles of grading work. The Commission received six bids for this project, all of which have been rejected.

"Cloverdale-Ocean Lake Rock Production Project on the Oregon Coast Highway, in Lincoln and Tillamook Counties. The low bid for this job was submitted by E. C. Hall Company, Eugene, at $28,820. The next low bid was submitted by J. S. Risley, Milwaukie, at $30,360. There were two higher bidders. The Commission has awarded the contract to the low bidder, E. C. Hall Company, at its bid price of $28,820.

"Gates-Niagara Section of the North Santiam Secondary Highway, in Marion County; 3.35 miles of grading and bituminous macadam surfacing. The Commission received nine bids for this project, all of which have been rejected.

"Troutdale-Wahkeena Creek Section of the Columbia River Highway, in Multnomah County; 6.18 miles of hydraulic-dredged roadbed embankment. The Commission received one bid for this project, which has been rejected.

"Troutdale-Wahkeena Creek Section of the Columbia River Highway, in Multnomah County; 0.9 miles rock toe embankment, 2.58 miles rock slope protection, 8.43 miles roadbed topping, slope oiling. The Commission received eight bids for this project, all of which have been rejected.

"The Dalles-Maupin Rock Production Project on The Dalles-California Highway, in Wasco County. The low bid for this job was submitted by J. S. Risley, Milwaukie, at $38,670. The next low bid was that of E. C. Hall Company, Portland, at $38,700. There were ten higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, J. S. Risley, when certain conditions have been satisfied.

"Bridge over Mill Creek on the Warm Springs Highway, Wasco County. The Commission received three bids for this project, all of which have been rejected.

"Porcupine Butte-Chichester Gulch Section of the Shaniko-Fossil Secondary Highway, in Wheeler County; 3.37 miles of grading and topping. The low bid for this project was submitted by Vernie Jarl, Gresham, at $37,212. M. L. O'Neil & Son, Eugene, submitted the next low bid at $49,578.10. There were seven higher bidders. The Commission has awarded this contract to the low bidder, Vernie Jarl, at his bid of $37,212.

"Sale of a tract of land at Albany. The Commission received only one bid for the purchase of this tract, being that of C. E. Davis, of Albany, at $651. The bid has been rejected."

Chairman Banfield also made the following public announcement concerning the bids received at the morning session: "Contractors will note that the Commission has rejected bids received today for most of the jobs

advertised. The Commission cannot proceed with the highway program on the basis of the bids received today. They have been rejected and the projects will not be advertised again for bids until labor and material conditions are more settled, because the Commission feels it is impossible to proceed with the road program on the basis of the bids submitted today."

A delegation from Tillamook County representing the Tillamook Chamber of Commerce and including members of the City Council and the County Court was present regarding the Commission's plans for the following state highway improvements:

1. Wilson River Highway entrances into the City of Tillamook

2. Permanent location for the Oregon Coast Highway from Pleasant Valley into and through the City of Tillamook to a connection north of the city limits

3. Proposed connecting link between the Wilson River and the Wolf Creek Highways from Glenwood to North Plains

4. Improvement of the Netarts Secondary Highway from Tillamook west to the Tillamook River, including a new bridge over Stillwell Ditch

Mr. John Aschim, Secretary-Manager of the Chamber of Commerce, headed the group, which included the following: Senator George P. Winslow, President-elect of the Chamber of Commerce; O. E. Effonberger, President; Fred H. Guyton, Treasurer; John Schild, R. J. Epping, W. H. Paynter, Thomas H. Bailey, H. T. Botts, W. B. Stevens, C. A. Ross, Sam Parker, M. D. Ackley, and Carl Haberlach, all members of the Chamber of Commerce; Harland M. Woods County Judge, Tillamook County; and D. E. Steinbach, Mayor of Tillamook. Senator Winslow acted as floor leader. He urgently requested the Commission to designate permanent routes of entrance of state highways entering Tillamook from all directions, including some revisions in present routing through the city to relieve traffic congestion. As a reason for such request he stated that the City of Tillamook is growing in all directions and important developments are taking place, which makes it imperative that definite information with respect to highways be made available to the people so they can plan their improvements properly and avoid mistakes. He urged the Commission to designate now permanent routes of entrance into the city from each direction so as to eliminate future uncertainties and questions. He particularly stressed the importance of completing construction of the Wilson River Highway into Tillamook in order to eliminate the bottleneck which he declared now exists. He also urged immediate attention to the construction of the bridge over Stillwell Ditch on the Netarts Secondary Highway in the western part of the city.

Chairman Banfield advised that the reconstruction of the Tillamook-Pleasant Valley Section of the Oregon Coast Highway is included in the Commission's Postwar Program and present indications are that the work will

be contracted during the second year following the war. A survey for this project, he said, has been made but has not as yet been adopted by the Commission because of the possibilities of a revision in the alignment that would make it possible to avoid interference with farms and buildings. He added that the Engineer is now studying the matter, and in connection therewith will inspect the location on the ground as soon as he can. He explained that the Commission does not want to bisect farms indiscriminately but, on the other hand, cannot spend $200,000 or more on any project in order to avoid a barn. The Engineer advised that he plans to inspect this project within the next two or three weeks following which he will report his findings to the Commission. He pointed out that something would have to be done to take care of traffic congestion within the City of Tillamook because of the narrowness of the streets over which the highway is presently routed. To widen the present street he said would be a costly undertaking because of the necessity to cut back buildings, and he suggested the designation of two one-way streets in lieu thereof. He agreed to discuss this matter with the city officials when he makes his inspection trip into Tillamook County.

Concerning the Wilson River Highway project, the Engineer advised that construction is not contemplated in the three year Postwar Program and the Commission has not as yet adopted the survey. Mr. Winslow urged the designation of the entrance definitely now so that building construction can proceed in conformity therewith. The Commission agreed to give the matter consideration after receiving the Engineer's report. Mr. Winslow again urged the rebuilding of the Stillwell Bridge and was informed by Chairman Banfield that this is one of the projects that is to be considered by the Commission at this meeting.

Mr. Botts urged construction of the uncompleted link in the Wilson River Highway from Glenwood to the Wolf Creek Highway junction at North Plains, about ten miles in length. He advised that it is of vital interest to Tillamook County from the recreational as well as the commercial standpoint. Chairman Banfield replied that when the present Highway Commission was appointed it assumed many of the obligations of the previous Commission involving various communities throughout the state and that the present Commission is endeavoring to fulfill these obligations so far as is possible; however, it does not seem possible to do so in every instance. The Glenwood-North Plains project, he said, is not included in the Postwar Program; however, in about a year or so the Commission may be in a position to add additional projects, in which event it will give due consideration to this one.

Mayor Steinbach urged an early decision by the Commission with respect to the permanent entrance of the Wilson River Highway into Tillamook, which would be helpful to the City in providing a program for city street widening. He was informed by Chairman Banfield that the Engineer would discuss this matter along with others on his visit to Tillamook City. Judge Woods also endorsed the remarks of the other speakers relative to the Wilson River Highway and he also mentioned the proposed improvement of the Oregon Coast Highway at Fisher Point and the betterment project on the existing location of the Wilson River Highway at Randall's Corner. He said that he is merely mentioning these projects because the county cannot proceed with its

plans until the Commission has acted on them. This concluded the conference.

The following persons, representing the Improvement Committee of the Southeast Portland Chamber of Commerce, came before the Commission and urged early construction of a proposed extension of Foster Road to a connection with the Mt. Hood Highway: L. A. Mathisen, Chairman of the Committee; L. M. Lepper; Mrs. Vera Sabin; Miss Margaret Sullivan, Secretary, representing the Roads and Highways Committee of the Portland Chamber of Commerce; James Himes, Executive Secretary, Oregon's Mt. Hood, Inc.; Randall Kester, Secretary, Oregon's Mt. Hood, Inc. Mr. Mathisen headed the group. Speaking in behalf of this project were Messrs. Mathisen, Kester, and Lepper, and Mrs. Sabin. Chairman Banfield advised that this project is not in the Highway Commission's Postwar Program and presently there are no funds available to finance it; however, the Commission anticipates arranging a supplemental program some time next fall and at that time would be pleased to give the project fair consideration. Mr. Mathisen advised that a Foster Road extension has been before the Commission for a number of years and the answer given today is the same answer they have always received. He urged the Commission to give the people a definite promise that the proposed road would be placed on the state highway system and advised that if the Commission would do that they would take their chances of securing the funds with which to finance construction. The Commission expressed regrets that it could make no such definite promise but reiterated that it would consider the matter in a year or so.

The following members of the Baker County Chamber of Commerce were present in the interests of a proposed new state highway extending from Bates, in Grant County, to Baker, in Baker County: A. S. Grant, President; N. N. Elliott, Chairman of the Road Committee; George B. Saunders and R. M. Phipps, County Commissioners, Baker County; and Henry McKinney, Mayor of Baker. Mr. Grant headed the group. The discussion of this matter centered on the improvement of the Dooley Mountain Section of the Baker Unity Highway rather than the construction of the proposed shortcut highway between Bates and Baker, it appearing from the Engineer's report on this subject dated December 4, 1945, (see copy of report in general files) that the expense of constructing the shortcut highway is unjustified and that the improvement of the Dooley Mountain Section will serve the purpose for which the Bates-Baker Road was requested. The discussion was based on the Engineer's report. Chairman Banfield pointed out that, according to this report, the estimated cost to construct the shortcut highway is $2,766,000, whereas, for the sum of $457,000 the present route over Dooley Mountain could be improved to satisfy the requirements. He advised that the Commission has budgeted the sum of $303,000 in its postwar construction budget for improvement of the Sumpter Valley Secondary Highway and that it is the suggestion of the Engineer that this amount be transferred to the Dooley Mountain project and that it be augmented by an additional amount of $154,000 of state money, which would be sufficient to finance the Dooley Mountain improvement. He inquired whether or not the Dooley Mountain improvement would satisfy the people of Baker County. Mr. Grant gave as his thought that such a program would be satisfactory, particularly because they do not want the state to spend $303,000 for improvements on the Sumpter Valley Road that will be abandoned when the Sumpter Valley Railroad is discontinued and the right of way turned over to the state for

highway purposes, as Mr. A. C. Lighthall, President of the railroad, has agreed. The Engineer estimated the cost to improve the Sumpter Valley Secondary Highway through the canyon at $150,000 if the work were done now, but if it were deferred until the railroad right of way is made available, it would cost only about $60,000. Mr. Grant reiterated that they do not want the Highway Commission to spend any money on the Sumpter Valley Highway until the railroad has been abandoned and the right of way made available for highway purposes. The Engineer advised that if his suggestion is adopted it should be possible to finish the improvement of the Dooley Mountain Section by the fall of 1946, provided the Public Roads Administration will approve transferring to the Dooley Mountain project the $303,000 of the postwar funds that are now set up for the improvement of the Sumpter Valley Road. He recommended adoption of the plan for the improvement of the Dooley Mountain Section and postponement of the work proposed on the Sumpter Valley Highway until the railroad has been abandoned. Chairman Banfield suggested the adoption of the recommendation with the understanding that the matter of improving the Sumpter Valley Road will be reconsidered within a year or so and that such plan is acceptable to the County Court of Baker County and is approved by the Public Roads Administration. Commissioners Schaupp and Chessman approved the suggestion. The members of the delegation signified their approval, whereupon the Commission authorized the Engineer to take up the matter with the Public Roads Administration when written evidence has been received from the Baker County Court that the plan is acceptable to the people of that County.

Mayor McKinney then brought up for discussion the matter of constructing a railroad grade separation structure on Dewey Avenue in Baker, route of the Baker-Unity Highway. He urged the construction of an underpass at this point primarily to enable the Baker City Fire Department to properly serve the industries and many homes that are situated on the opposite side of the railroad from the town proper. He alleged that under present conditions such service could not be rendered if Dewey Avenue were blocked by a train, which frequently happens. It was brought out in the discussion of the matter that the project was once authorized by the former Highway Commission and some right of way obtained, but the project was called off when the monies budgeted therefor were "frozen" at the beginning of the war. It appears also that the new Federal Highway Act made no provision for funds for projects of this kind in cities and towns of 5,000 population or more. Following discussion, the Chief Counsel was instructed by the Commission to check into the new Federal Aid Law and ascertain definitely concerning this feature. The Engineer was instructed to secure a statement from the Public Roads Administration with respect thereto.

Mr. A. J. Naterlin, Mayor of Newport, was present and inquired as to the possibilities of securing state funds to finance the ornamental lighting of Yaquina Bay Bridge and certain portions of the Oregon Coast Highway through Newport. He gave as his understanding that the State Highway Commission has budgeted certain funds for such purpose and advised that the City Council would like to have some of this money spent in Newport if his understanding is correct. He was informed by Chairman Banfield that the Commission has budgeted no funds for such purposes; moreover, the Commission has not discussed the lighting of any state highway except the Pacific Highway

where it crosses the Interstate Bridge between Portland, Oregon, and Vancouver, Washington.

A delegation from Powers, consisting of Mr. James Kellond, Mayor; Mr. Loy Reed, logger; and Mr. R. L. Clark, wholesale meat dealer, Portland, came before the Commission and requested the improvement of the Powers Secondary Highway. Mayor Kellond was spokesman. He advised that this highway is badly in need of repair so as to facilitate the marketing of produce, including the trucking of cattle, from this community to Portland. He mentioned in particular four curves which he said should be widened, and a bad slide condition at one point. The Engineer advised there is justification for the request because the highway is constructed through terrain that is very unstable, particularly the upper ten mile section where slides frequently occur. He estimated the cost to rebuild the highway to high standards at about $60,000 per mile, but advised that traffic volume is not sufficient to justify such expense. He recommended in lieu thereof the expenditure of a reasonable amount to repair the points mentioned by Mr. Kellond as a minor betterment project. The Commission deferred action on the matter pending a further report by the Engineer. The project is to be given consideration in the adoption of the 1946 Budget.

The meeting adjourned at 5:30 p.m. to reconvene the following morning.

Portland, Oregon
December 14, 1945

The State Highway Commission reconvened at 9:00 a.m. in the Auditorium of the Public Service Building, all Commissioners, the Engineer, the Chief Counsel, the Assistant State Highway Engineer, and the Secretary being present.

Bids as follows for highway construction were opened and read in conformity with previously published notices, following which Chairman Banfield announced that the award of contracts would be made at 3:00 p.m. in the same room.

BAKER-HOMESTEAD HIGHWAY IN BAKER COUNTY
RUCKLES CREEK-MIDDLE BRIDGE SECTION

E. C. Hall Co., Portland	$ 109,120.00
Leonard & Slate, Portland	116,091.50

Lockyear & White, Seattle, Wn.	12,760.00
Birkemeier & Saremal, Portland	13,440.00

The Commission, by unanimous vote, approved the minutes of the meeting held on October 29 and 30, 1945.

The Engineer brought up for discussion the designation as a Federal Aid Primary Highway of the new route of The Dalles-California Highway (U.S. 97) between Lobert and Beaver Marsh, Klamath County, on the east side of Sun Mountain He advised that such designation is required in order to secure Federal funds with which to finance construction of this road, and urged favorable consideration at this time. He pointed out that such designation of this highway would necessitate the redesignation of the section of the existing highway from Lobert to Klamath Agency and northerly thereof to Fort Klamath Junction, together with the section of the Crater Lake Highway between Fort Klamath Junction and Crater Lake National Park boundary, as a Federal Aid Secondary Highway. The Commission, by unanimous vote, approved the new highway designations as recommended by the Engineer and thereupon instructed the Chief Counsel to prepare an appropriate resolution covering the matter.

The Engineer reported an inquiry from Mr. F. T. Fowler, Traffic Engineer for the City of Portland, whether or not the Commission has objections to the temporary use of the park area along Harbor Drive between Alder Street and Pine Street, Portland, as a parking area for automobiles. He advised that the car parking situation in downtown Portland is serious and that the city is of the belief that such use of the park strip, which lies between Harbor Drive and Front Avenue, until it is needed for highway purposes, would be very helpful. He explained that the city proposes to lease the area to a private party as the result of competitive bidding for the same and that the public will be charged for parking privileges. It was the thought of the Commission that the use of the property for this purpose would be unwise because of the hazard that will be created by reason of cars crossing the highway to and from the parking area; moreover, it appears unjustified from the revenue standpoint. In view thereof, the Commission voted unanimously against the use of the property for this purpose. The matter was reconsidered later, however, when Mr. Fowler was present. Mr. Fowler explained in more detail the plans for the use of the property and urged favorable consideration by the Commission to relieve the parking problem. As a result of his presentation, the Commission agreed to give the matter further study. Following Mr. Fowler's departure the matter was again discussed and the use of the area for parking purposes again denied.

The Commission had under discussion the Engineer's report on the proposed modification of the Commission's order of May 29, 1945, which pro-

hibits the granting of overlength permits for the transportation of logs over state highways after January 1, 1946. The Engineer presented a set of regulations which would allow log movements 80 feet overall in length under certain conditions, and advised that he has discussed them with Mr. Floyd Cook, Highway Representative of the logging industry, and with a committee representing such industry, by whom they were endorsed. He recommended adoption of the regulations as follows:

1. Under authority of Chapter 55, Laws of 1941, the State Highway Commission hereby authorizes the granting of permits for the transportation of long logs over any state highway regardless of the purpose for which the logs are to be used, based upon the recommendation of the State Highway Engineer, provided;

a. That no part of the load, or the hauling equipment, will encroach on the opposing lane of travel and provided;

b. That the axle and/or gross weights of the vehicle and load do not exceed the Oregon Statutory weight limits or the weight tolerances allowed by the State Highway Commission relating thereto, and provided;

c. That in no case shall the over-all length of vehicle and load exceed 80 feet, measured from the front bumper of the truck to the rear end of the load.

Permits shall not be issued if investigations of the State Highway Engineer reveal that the character and volume of other traffic, regardless of geometric design of the highway, are sufficient in his estimation to make the operation of overlength loads hazardous to the public.

The recommendation of the State Highway Engineer shall be based upon a test run of a load of logs made over a designated section of highway to determine the maximum length of vehicle and load that can be safely transported over such highway section without any portion of the vehicle or load encroaching on the opposing travel lane. A pilot car will not be required to accompany such maximum length movements. Stationary flagmen will not be required at the point of entry to or exit from the highway unless more than one-half of the traveled roadway is utilized in making the turns, or unless the character and volume of other traffic or the impairment of sight distance makes flagging necessary for the protection of the general public.

The State Highway Engineer will determine the amount and character of flagging or other traffic controls required in all cases.

The Engineer shall compile a record of all traffic accidents and, if the experience record of any operator is unfavorable, shall report the record of such operator to the State Highway Commission which may consider it sufficient cause for cancellation of the operator's permit.

2. Temporary permits for limited periods of time may be granted for isolated movements of overlength loads over highways where the alignment is such that the vehicle and load cannot be moved thereover without some part of the load, or vehicle, encroaching into the opposing travel lane, provided;

a. That said permits shall not be granted unless and until the mill, company, or owner of the logs furnishes an affidavit to the Highway Commission certifying that the long logs are required for long structural timbers, and provided;

b. That all such permits shall be granted subject to the condition that a pilot car shall accompany the movement as an advance flagman, and that other flagging or traffic controls shall be furnished as the conditions warrant to safeguard and protect the public, and provided;

c. That should the proposed movement indicate that there may be difficulty in complying with the Oregon Statutory weight limitations and the tolerances allowed by the State Highway Commission relating to axle and gross loads, then the permit shall require that each load be weighed by Oregon State Highway Department Weighmasters before entering upon any state highway. The expense of such weighing shall be borne by the permittee who shall deposit with the Highway Commission, in advance, a certified check or cash to cover the estimated cost thereof, and provided;

d. That such permits may, in exceptional cases, be issued for overlength log loads in excess of 80 feet over-all length, including vehicle and load, when each load is weighed by Oregon State Highway Department Weighmasters at the expense of the permittee before entering upon a state highway, and when proper flagging requirements are observed, and provided further;

e. That applications for permits under the conditions outlined above shall be denied, regardless of the affidavit showing the necessity, and regardless of the geometric design of the highway, when the character and volume of traffic, in the opinion of the Engineer, indicate that the movements would be hazardous to other traffic.

After discussion the Commission approved the regulations by unanimous vote and instructed the Secretary to use them hereafter in the granting of overlength permits for truck hauling of logs over state highways.

The Commission discussed a proposal now before the Public Utilities Commissioner for a modification of the P. U. C. order which requires streetcars to stop before crossing the Pacific Highway East (U. S. 99E) at Jennings Lodge, Clackamas County. The Engineer advised that highway traffic is now protected by a "wigwag" signal at this crossing and, in his estimation, there is no particular need for streetcars to stop at this place. He recommended approval of the proposed modification. The Commission approved

the recommendation by unanimous vote as a trial proposition.

The Engineer reported that the "Perry Monument" at St. Helens was dedicated with ceremonies on Sunday, November 25, 1945, the boulder having previously been delivered to the site by state forces and the parking area rocked in conformity with the Commission's agreement with Mr. Roy A. Perry, Portland, who had charge of the matter in behalf of the Perry family. The Commission took no action in this matter.

The Commission discussed a letter from the Fire Companies Adjustment Bureau, Inc. offering to pay the sum of $6,955.95 as settlement in full for the loss of the Suntex Maintenance Building which was destroyed by fire on August 31, 1945. The Engineer gave as his opinion that the offer is fair and reasonable and recommended acceptance of same. The Commission approved the recommendation by unanimous vote and thereupon authorized the Engineer to sign the "Proofs of Loss" as required by the Adjustment Bureau.

A letter was presented from the City of Enterprise in which the Commission is requested to approve the routing of trucks along North Street to River Street, thence along River Street to Main Street, by-passing the business district which is on Main Street. The Engineer advised that the present route of the Wallowa Lake Highway in Enterprise is easterly along North Street to West Second Street, thence south along West Second Street to Main Street, thence east along Main Street to River Street where it again turns south. He pointed out that such routing involves three right-angle turns, two of which would be eliminated were the highway routed along the truck by-pass route recommended by the city; however, it would not pass through the business section of the town and probably would not meet with the satisfaction of the city. He recommended that the designation of the truck route as desired be approved with the understanding that the city will maintain it at its own cost and expense. The Commission approved the recommendation unanimously and instructed the Secretary to advise the city accordingly. He was also instructed to inform the city that the Commission will reroute the highway along such by-pass route if the city will approve such routing, in which event the state will maintain the new route but not the old one.

The Commission had under discussion proposed modification of the state's obligation with respect to the financing of the construction of the North Santiam Highway between Gates and Niagara under a cooperative agreement with the U. S. War Department, the U. S. Forest Service, and the Federal Works Agency. There was presented to the Commission a redraft of Article V thereof which shows a substantial modification of the original draft and particularly as to the state's contribution. According to the redraft, the state is to contribute definitely toward construction costs an amount equal to the amount by which the total construction cost of said work exceeds $900,000, but in no event shall such contribution exceed $300,000. It was pointed out that the original agreement covering this project provided no definite contribution by the state but did provide that the state would underwrite the project in an amount not to exceed $300,000 if that appeared absolutely necessary. The Engineer recommended a definite contribution of

$300,000 for this project because of the value of the work that will be received from such a comparatively small investment, and because the principle established thereby would be creating a precedent for future undertakings of similar nature. The Commission approved the recommendation by unanimous vote.

Mr. A. L. Gile, Director of the North Beach Ferry Company, Astoria; Mr. James L. Hope, Attorney for the Company and Astoria City Attorney; and Mr. Guy Boyington, County Judge of Clatsop County, came before the Commission regarding the establishment of a state-owned ferry service across the Columbia River between Astoria, Oregon, and Megler, Washington. The State Highway Engineer read aloud his report to the Commission on this subject dated December 11, 1945, summarizing the result of investigations that he has conducted to date with respect to this matter. (See letter in general files for details) The investigations reveal that no ferry boats of the required size are available for operation at this point except those owned by the Astoria-Megler Ferry Company; also, that this company is offering to sell its entire plant to the state for what he considers to be a very reasonable sum. He recommended, if the Commission sees fit to establish this state ferry service and to purchase this equipment, the purchase of all of the company's facilities except the 14th Street ferry landing in Astoria, and the construction of a new landing at 17th Street. Pending construction of the new landing, he said arrangements could be made with the ferry company for the use of its landing on 14th Street. He pointed out that the City of Astoria and Clatsop County have indicated a willingness to deed to the state certain properties that would be needed for a new landing and approaches thereto. However, he pointed out that additional frontage about 100 feet wide is required because of the operations of another company. It was the opinion of Judge Boyington and Mr. Gile that no particular difficulty would be encountered in arranging for the extra frontage. Mr. Hope stated that the ferry company has an offer to purchase the 14th Street ferry landing in excess of the amount that it is asking the state to pay for it, but the company is willing to sacrifice the higher offer in favor of the state if the state wants the property; moreover, if the state wants to lease it that will be satisfactory for a year or two provided the state will pay the taxes and five per cent on the investment. Mr. Gile advised that the ferry company is willing to enter into an agreement with the Commission to pay the entire amount of the purchase price out of profits, the first payment to be made during the last part of the first year after the deal is closed and then $40,000 or $50,000 a year thereafter until the payments have been completed.

The matter of tolls was then discussed. Chairman Banfield inquired as to the attitude of the people of Astoria and Clatsop County with regard to the payment of tolls. Judge Boyington advised that to a large extent the people are committed to the payment of a toll until such time as the tolls can be reduced an amount equal to the actual cost of operation. He suggested that the amount of the toll be left to the Highway Commission inasmuch as their primary interest is to secure the best service possible, the matter of the toll being secondary. Chairman Banfield stated that it would not be possible for the state to operate the service free of charge. He inquired as to the position of the State of Washington and was informed

by the Chief Counsel that the Commission has authority to join with the State of Washington or with Pacific County, Washington, in this undertaking, or it may operate the service on its own account if it so desires, but so far as the law is concerned, the Commission has authority to operate the ferry jointly. Commissioner Chessman gave as his thought that, due to the fact that the ferry operation is an interstate proposition, the service and the rates should be under the control of the two states. He also said that he is not in favor of cutting off the tolls until the State of Washington pays one half of the capital cost and agrees to pay 50 per cent of the cost of operation and upkeep. The matter was discussed further at some length but a definite decision was deferred until later so as to give the members of the Commission an opportunity to discuss the matter among themselves.

Following the departure of this group, the Commission resumed the discussion of this matter and as a result thereof the Engineer and the Chief Counsel were instructed to submit to the Commission a complete report, in writing, covering the entire matter so that the Commission may have the benefit of the facts when the matter is considered at the next meeting. The report is to include, among other things, full information concerning cost to acquire the ferry facilities and the cost to operate them.

The Engineer requested instructions relative to a readjustment of water mains in connection with the contract for the construction of the North Bend-Coos Bay Section of the Oregon Coast Highway, bids for which were received at this meeting. He explained that it is necessary to move the pipe lines so they will not be under the highway pavement, and there is a question who should pay the costs thereof. Past practice, he said, has been for the state to assume the expense if the facilities are owned by a city, but in this instance they are privately owned, although the city is negotiating to take them over. He estimated the cost of moving the mains at about $4,000 and advised that the item is included in the budget for this project. It was his thought that the Commission should understand the situation because it is similar to the situation that exists on South 6th Street in Klamath Falls. The low bid received today for this project, he said, is within the limit for contracting, but if the Commission elects not to pay for the moving of the pipe line then the award cannot be made until the matter has been clarified. The Chief Counsel advised that if the owner of the pipe line is operating under franchise and the facilities are damaged by reason of highway construction, then he could call upon the state for damages. He gave as his thought that the Commission would be justified in spending state money to relieve a liability that might become greater. If the city owned the pipe line, he said, there is no question that the state would be liable. He advised that his remarks are based on the premise and the assumption that the pipe lines are in place under authority of franchise and that the municipality had the authority to issue the franchise. Following discussion, the Commission approved the payment of moving costs in the present instance; however, instructed the Engineer hereafter to discuss these things with the Commission before taking on such obligations.

The Engineer brought up for discussion the programming of Federal Lands Highway Funds, amounting to $154,000, that were authorized for fiscal

years 1941, 1942 and 1943, but which have been "frozen" during the wartime period. He advised that these funds now are released for expenditure according to information received from the Public Roads Administration, which is asking that the Commission recommend projects to be financed with such funds. The Engineer suggested the allocation of this money to the Lakeview-Burns Highway, which is eligible and in need of improvement. The Commission deferred a decision in the matter until the next meeting and instructed the Engineer to submit at that time a list of all the highways eligible for the funds under discussion.

The matter of attending the next annual meeting of the American Association of State Highway Officials, which is to be held in Oklahoma City from January 29 to February 1, 1946, inclusive, had the attention of the Commission. All members of the Commission, the State Highway Engineer, the Chief Counsel, and the Bridge Engineer were authorized to attend this meeting at state expense if that meets with the approval of Governor Snell.

The Commission discussed a letter from the Klamath County Court, dated November 28, 1945, requesting the improvement of the Bonanza-Malin County Road as a Federal Aid Secondary Highway project in the Commission's Postwar Program rather than the Olene-Poe Valley Road, for which the sum of $260,000 has been budgeted for expenditure in the third postwar year. The Engineer advised that both roads at times are called the Poe Valley Road and through misunderstanding the wrong one was scheduled for improvement in the above-mentioned program. He pointed out that the Commission has allotted the sum of $390,000 of Federal Secondary monies to Klamath County, $260,000 of which was to be expended on the Olene-Poe Valley Road and $130,000 on the Lower Klamath Lake State Secondary Highway but it now appears that the amount set up for the latter project is about $50,000 short of being sufficient to finance the proposed improvement, so it has been necessary to transfer such sum from the amount set up for the other project. The Klamath County Court, he said, has agreed in writing to contribute county funds in the amount of $50,000 to help defray the cost of improving the Bonanza-Malin Road if the Highway Commission will agree to improve this road rather than the Olene-Poe Valley Road. (See County Court's letter dated December 11, 1945 in the general files) He recommended approval of the transfer of the projects as requested by the County Court, and that he be authorized to take up with the Public Roads Administration the matter of transfer of the funds. Commissioner Schaupp moved adoption of the recommendation. Commissioner Chessman seconded the motion whereupon Chairman Banfield declared the motion carried by the unanimous vote of the Commission.

Mr. John A. Laing, Chairman of the Travel Advisory Committee, was present and reported the recommendation of the Committee with respect to the selection of an agency to handle the Commission's advertising program for the ensuing year, and with respect to a proposed budget for the year 1946. He advised that at a meeting of the Advisory Committee held on November 9, 1945, the Committee, after very careful consideration, selected the advertising firm of MacWilkins, Cole and Weber to handle this work upon

termination of the Commission's agreement with the present agency. He also advised that it is the opinion of the Committee that a temporary operating budget of from $25,000 to $30,000 should be authorized now to finance the activities of the Travel and Information Department pending the adoption later on of a complete budget for 1946, such temporary budget to be prepared by Mr. Harold B. Say, Director of the Travel and Information Department, and Committee members residing nearby. He also mentioned that the ideas of the Committee have changed somewhat since the matter of the 1946 budget was first discussed and the feeling now is that the basic advertising budget for 1946 probably should not exceed $100,000, although the Committee may recommend a larger budget for 1947-48. He asked the Commission to confirm the appointment of MacWilkins, Cole and Weber as its advertising agency and to authorize a temporary budget of from $25,000 to $30,000. Following discussion, Commissioner Chessman moved adoption of the recommendations of the Travel Advisory Committee. The motion was seconded by Commissioner Schaupp and carried by the unanimous vote of the Commission.

The Commission conferred with the following representatives of the Washington State Highway Department concerning matters of mutual interest: Clarence B. Shain, Director of Highways; James A. Davis, Assistant Director; C. S. Reynolds, Edward A. Anderson, Fred L. Wolf, members of the Washington Highway Advisory Board. The Oregon State Highway Engineer, Mr. R. H. Baldock, mentioned five main subjects for discussion:

1. Lighting of the Interstate Bridge between Portland and Vancouver

2. Construction of the remaining portion of the Enterprise-Lewiston Highway at the Oregon-Washington state line (This highway is known as the Evergreen Highway in the State of Washington)

3. Construction of the proposed highway connection between Oregon and Washington at the state line north of Milton, Umatilla County

4. Construction of a bridge across the Columbia River at The Dalles

5. Inauguration of a joint state ferry operation across the Columbia River at Astoria

In the discussion that followed it was brought out that mutual agreement has been reached with respect to the first two of the above-listed subjects and that as to the third it appears that both states have approved construction of their sections in the postwar program, the Oregon section being scheduled for construction in the spring of 1946 and the Washington section possibly in the fall of 1946. Relative to the proposed bridge across the Columbia River at The Dalles, it was pointed out that the Army Engineers have selected as the site for one of the proposed Columbia River

dams a location very close to the site that was selected for the joint state bridge as the result of engineering studies by both highway departments, and if the bridge were now constructed at such location it would cost much more than was originally estimated. Mr. Baldock advised that preliminary investigations reveal that another bridge site is available about 1,000 feet downstream from the original site, but whether or not it is definitely satisfactory cannot be stated until a survey has been made. He suggested a survey jointly by both states and inquired the attitude of the Washington Highway Department relative thereto. Chairman Banfield stated that the Oregon Highway Commission would like to join with the Washington Highway Department in making an analysis of this site similar to that which was made of the original site. Mr. Shain stated his willingness to join with the State of Oregon in making this survey.

The matter of conducting a joint state ferry operation across the Columbia River at Astoria was next discussed. Chairman Banfield inquired whether or not the State of Washington is in position to join with the State of Oregon in such an operation. Mr. Shain replied that there are a number of reasons why the State of Washington can not join in such an undertaking, the principal one being that they do not have legal authority to do so. Other reasons are that no provision has been made in their budget to finance such a business and from experience gained from operation of toll ferries on Puget Sound they would not care to become involved in the ferry business. He pointed out, however, that a county in the State of Washington may legally participate in such an undertaking if it is financially able to do so and the ferry connects with a county road. Mr. Reynolds confirmed Mr. Shain's statement. Chairman Banfield thereupon remarked that the Oregon Highway Commission understands that "no" is the answer of the Washington Highway Department with respect to the operation of a joint ferry at this location. Mr. Shain confirmed such understanding, which concluded the conference.

The Commission discussed with the Engineer the bids received at the morning session for highway construction and by unanimous vote took action as follows: Contracts were awarded to the low bidders in each of the following instances: Grading, surfacing, and oiling the Ruckles Creek-Middle Bridge Section of the Baker-Homestead Highway, in Baker County; grading and topping the Jefferson County Line-Lytle Creek Section of the Madras-Prineville Secondary Highway, in Crook County; grading the Madras-Lamonta Section of the Madras-Prineville Secondary Highway, in Jefferson County, the latter two projects being awarded on the basis of combination bids; Mitchell-John Day River Rock Production Project on the Ochoco Highway, in Grant and Wheeler Counties.

The Commission accepted the offer of the low bidder for each of the following projects but deferred the award of the contracts pending satisfaction of certain conditions. The bids were referred to the Engineer with authority to award when such conditions have been satisfied: Grading and paving, North Bend-Coos Bay Section of the Oregon Coast Highway, in Coos County; construction of the Arthur Street Grade Separation Structure on S. W. Front Street, Portland.

DEC 14 1945

The Commission rejected all bids received for the following projects: Remodeling the Beardsley Building and construction of an addition thereto on South 6th Street, Klamath Falls; Henderson Ranch-Deadwood Rock Production Project on the Alsea-Deadwood Secondary Highway, Lane County; construction of a frame maintenance building at Grand Ronde on the Salmon River Highway, Polk County.

Regarding the sale of buildings in Klamath Falls, bids for which were taken on the previous day, the Commission decided, due to complications, to defer final action pending investigation. The matter was referred to Commissioner Schaupp, the Engineer, and the Chief Counsel with full power to act.

At 3:00 p.m. Chairman Banfield announced publicly the action taken by the Commission with respect to the above-mentioned bids, as follows:

"Ruckles Creek-Middle Bridge Section of the Baker-Homestead Highway, in Baker County; 2.52 miles grading, surfacing, and oiling, and furnishing crushed rock in stockpiles. The Commission received three bids for this project, the low one being that submitted by E. C. Hall Company, Portland, at $109,120. Leonard and Slate, Portland, submitted the next low bid at $116,091.50. The Commission has awarded this contract to E. C. Hall Company at its bid price of $109,120.

"North Bend-Coos Bay Section of the Oregon Coast Highway, in Coos County; 2.28 miles grading and paving. The Commission received only two bids for this project, the low one being that submitted by Porter W. Yett, Portland, at $459,572. The other bid was submitted by Coos Bay Dredging Company, Coos Bay, at $488,932. The Commission has deferred the award of this contract and has referred the bids to the Engineer with authority to make the award to the low bidder when certain conditions have been satisfied.

"Jefferson County Line-Lytle Creek Section of the Madras-Prineville Secondary Highway, in Crook County; 4.88 miles of grading and topping. R. A. Heintz Construction Company, Portland, submitted the low bid for this project in the amount of $54,320.70. This bidder offered to reduce the amount of his bid by $2,000 if also awarded the contract for the grading of the Madras-Lamonta Section of the Madras-Prineville Secondary Highway. Leonard and Slate, Portland, submitted the next low bid in the amount of $76,178. They also agreed to reduce their bid in the amount of $2,000 if also awarded the Madras-Lamonta project, in Jefferson County. There were ten higher bidders. The Commission has awarded this contract to R. A. Heintz Construction Company, the low bidder, on the basis of its combination bids for both projects.

"Madras-Lamonta Section of the Madras-Prineville Secondary Highway, in Jefferson County; 9.91 miles of grading. R. A. Heintz Construction Company, Portland, submitted the low bid for this project in the amount of $76,152.20. Leonard and Slate, Portland, submitted the next low bid in the amount of $79,619.60. There were eight higher bidders. The

DEC 14 1945

Commission has awarded this contract to R. A. Heintz Construction Company on the basis of its combination bid for this project and for the construction of the Jefferson County Line-Lytle Creek Section, in Crook County.

"Mitchell-John Day Rock Production Project on the Ochoco Highway, in Grant and Wheeler Counties. The low bid for this job was submitted by Vernie Jarl, Gresham, at $25,292. M. C. Lininger & Sons, Medford, submitted the next low bid in the amount of $28,218.50. There were five higher bidders. The Commission has awarded this contract to Vernie Jarl, the low bidder, at his bid price of $25,292.

"Remodel the Beardsley Building and construct an addition thereto on South 6th Street, Klamath Falls, Klamath County. The low bid for this work was submitted by Struss & McCoy, Redmond, at $11,975. Burkhard & Schortgen, Klamath Falls, submitted the next low bid in the amount of $11,998. There were two higher bidders. The Commission has rejected all of the bids.

"Henderson Ranch-Deadwood Rock Production Project on the Alsea-Deadwood Secondary Highway (south section), Lane County. The Commission received only one bid for this job, being that of Del R. Beebe, Eugene, in the amount of $15,750. The bid has been rejected.

"Arthur Street Grade Separation Project on S. W. Front Avenue, Portland, Multnomah County; construct concrete viaduct and walls. The low bid for this work was submitted by Marine Contractors, Inc., Portland, at $269,209.70. The next low bid was submitted by Kern & Kibbe, Portland, at $302,184.70. There were three higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder when certain conditions have been satisfied.

"Construct a frame maintenance building, 32' x 76' in dimension, at Grand Ronde on the Salmon River Highway, Polk County. W. H. Philpott, Portland, submitted the low bid in the amount of $11,600. The next low bid was submitted by Lockyear & White, Seattle, in the amount of $12,760. There was one higher bidder. All of these bids have been rejected by the Commission.

"Sale of houses in Klamath Falls. The Commission announced yesterday that the sale of the buildings would be made today; however, due to complications, it is necessary to defer the sale. The Commission has referred all of the bids to Commissioner Schaupp, the Engineer, and the Chief Counsel with full power to dispose of the buildings in the manner that will serve the best interests of the State of Oregon."

A petition was presented from residents and taxpayers of Josephine County who reside along the "River Bank Secondary Highway" (Rogue River Loop Secondary Highway) requesting the surfacing of this highway from its junction with the Redwood Highway to Robertson Bridge, a distance of

about nine miles, thence toward Grants Pass to the end of the present oiled section, a distance of about five miles. The Engineer advised that the amount of $130,000 has been budgeted in the third postwar year program to grade, surface, and oil the five-mile section between Grants Pass and Robertson Bridge, but no provision has been made for the nine-mile section. The Commission decided that the present allotment is all that it can afford now and instructed the Secretary to so inform the petitioners.

The Commission discussed a letter from the City of Newport requesting that the state take over the repair and maintenance of certain city streets which they allege are "continuously and regularly" being used by logging trucks and fish trucks. The Engineer advised that inspection reveals that all of these streets are oil-surfaced and in good condition although a little patching work to eliminate rough spots might be desirable. He further advised that, from the best information available, logs are not now being hauled over these streets and it appears that the maintenance work is not beyond the ability of the city to finance with funds that the city receives from the State under the provisions of the State Tax Street Fund Law. In view of this report, the Commission denied the request by unanimous vote.

A letter was presented from Chester K. Sterrett, Manager, Industries Department, Portland Chamber of Commerce, in which the Commission was requested to join with a number of Portland industrial concerns in the financing of a cooperative mapping project of the Portland area which is now being conducted under the auspices of the U. S. Coast and Geodetic Survey, and for which the Portland Chamber of Commerce is acting as coordinating supervisor. Mr. Sterrett advises that the project is estimated to cost $100,000, fifty per cent of which will be paid by the Federal Government and the balance by local agencies. He gave as his thought that the State Highway Department would secure sufficient benefit from the survey to justify participation in the expense and requested a contribution of $2,500 of state funds for this purpose. The Engineer advised that the information made available by the survey would be valuable for state highway purposes; in fact, much more information could be secured from such a survey than could be obtained by State Highway Department engineers for $2,500. He presented an opinion from the Commission's Chief Counsel to the effect that the Commission has authority to disburse state highway funds for this purpose if it so desires and if benefits will accrue to the state. He recommended that the contribution of $2,500 be authorized. The Commission approved the recommendation unanimously.

The Commission discussed briefly and ordered filed a letter from Mr. L. M. Lepper, Director of Highways and District Improvements of the East Side Commercial Club, Portland, urging early construction of a number of state highway projects heretofore recommended by him for undertaking in the postwar program.

The Commission also discussed briefly and ordered filed another letter from Mr. Lepper suggesting that the Commission consider construction of an elevated highway in its study of an "express" highway through Sullivan's Gulch, Portland.

DEC 14 1945

The Engineer reported receipt of a request from the Myrtle Point Chamber of Commerce for the improvement of the Coos Bay-Roseburg Highway south of the town of Myrtle Point so as to accommodate longer loads where sharp curves now exist. He recommended approval of an expenditure of about $15,000 for two small line changes to eliminate the worst curves, the work to be done under a minor betterment order. The Commission deferred action on this matter pending consideration of the 1946 budget.

A letter was presented from Dr. Max H. Friedman, Optometrist, Portland, in behalf of people who reside along 82nd Avenue (Cascade Secondary Highway) between Gladstone and Oatfield Road Junction, Clackamas County, requesting construction of a sidewalk along this section of highway for the benefit of children who attend school in Gladstone and Oregon City. The Engineer advised that this matter had been investigated by the Traffic Engineer who reports that the project is not feasible from a practical and economic standpoint and that, notwithstanding certain inherent hazards to pedestrians and bicyclists, he could not recommend construction of the sidewalk at this time, particularly in view of the fact that there are many other potential projects over the state which are more urgently in need of attention than this one. In view of this report, the Commission denied the request.

The Secretary presented a resolution from the McMinnville City Council approving the designation of South Baker Street and Sheridan Road as the permanent route of the Pacific Highway West (U.S. 99W) through McMinnville, and requesting the improvement of these streets in accordance with plans heretofore prepared by the State Highway Commission. The Commission approved the resolution unanimously and ordered it filed.

The Commission considered and ordered filed for future consideration resolutions from the Board of Commissioners, Port of The Dalles; City Council of Dalles City; and Wasco County Court recommending as the permanent route of the Columbia River Highway (U.S. 30) through The Dalles a location north of the river revetment and between the Port dock and the grain elevators.

The Engineer reported receipt of an inquiry from the California State Highway Department as to the attitude of the Oregon State Highway Commission with regard to the designation and improvement, as a Federal Aid Secondary Highway, of the county road which extends along the Oregon-California state line from a point six miles east of Hatfield, California, to a point four miles west of Hatfield, thence westerly, entirely within the State of California, to a junction with U. S. Highway No. 97. The Engineer advised that the highway centers on the boundary line between the two states from a point six miles east of Hatfield to a point four miles west of Hatfield and that the California section has been placed on the Federal Aid Secondary Highway System of that state, and that the people of Siskiyou County, California, are very anxious to have the road improved. He also said that the State of California is ready and willing to join with the State of Oregon in constructing the ten-mile section that lies partly in both states if the

Oregon Highway Commission will make provision for its share. He estimated Oregon's share of the cost of construction of the ten-mile section at $185,000 and Oregon's share of the cost to construct the four-mile section west of Hatfield at $75,000. He said that the County Court of Klamath County has expressed itself as having no objections to including this road in the Federal Aid Secondary Highway System and the eventual construction as such if it is not given priority over other projects in Klamath County. He recommended that the road be designated a Federal Aid Secondary Highway on the basis that it will take its turn in the order of priority among the other county roads in Klamath County for construction. Following discussion, the Commission decided unanimously not to place this road in the Federal Aid Secondary Highway System.

The Commission had under consideration the adoption of a resolution approving the plans of the following cities and towns for expenditure of 1944 State Tax Street Funds that they received in 1945:

Clatskanie	Gaston	Mosier
Dayville	Merrill	

The Engineer advised that these cities and towns have met the legal requirements with respect to the funds and that the plans have been inspected and found satisfactory. He recommended approval of the same. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by this Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1945 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Clatskanie	$989.61
Dayville	190.09
Gaston	465.45
Merrill	905.74
Mosier	301.91

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction, improvement, or maintenance with the funds above specified

the following streets in the following named cities:

Clatskanie - 13th Street, 11th Street, 10th Street, 9th Street, 7th Street, 4th Street, 3rd Street, 2nd Street, Larch Street, Conyers Street, Nehalem Street, Tichenor Street, Bryant Street, Spring Street, Poplar Street

Dayville - A street southwest from highway (Franklin Avenue) for 200 feet and a street south from highway (Franklin Avenue) for 300 feet

Gaston - 2nd Street, Park Street, 3rd Street, Church Street

Merrill - Polk Street, 3rd Street, Madison Street, Clay Street

Mosier - Washington Street, 3rd Avenue

2. That the type, plan and character of improvement proposed in the resolutions filed with this Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the same.

5. This resolution shall be entered in the minutes and records of this Commission as of the 14th day of December, 1945.

The Commission, by unanimous vote, confirmed the telephonic authority heretofore given the Engineer to construct a maintenance building at Suntex on the Central Oregon Highway, Harney County, with state forces.

The Engineer requested instructions relative to disposal of the bids received on August 30, 1945, for the construction of the West Side Klamath Lake Timber Access Road Project, in Klamath County. He recalled that the low bid submitted by Slate Construction Company, Albany, for this work was satisfactory, but the contract was not awarded because of uncertainties with respect to the Federal funds which were to be used to

finance the work. It now appears, from information received from the Public Roads Administration, that the Federal Access Road monies definitely will not be available. In view thereof, he recommended that all bids for this project be rejected. The Commission approved the recommendation unanimously and so ordered.

The Engineer asked the Commission to confirm the sale of state-owned property as follows, bids for which were received in Salem on November 26, 1945, the sales having been made upon telephonic authority given by the Commission:

Tract of land in N. E. Portland, sold to the high bidder, Ben M. Hecht, Portland, for the sum of $3,200.

Tract of land north of Madras, Jefferson County, sold to the high bidder, F. V. Stiegelmeier, Boise, Idaho, for $752.

Buildings at Milton and Freewater, Umatilla County: Building No. 10532 sold to the high bidder, R. C. Sheets, Freewater, for $116; Building No. 10547 sold to the high bidder, O. J. Fox, Freewater, for the sum of $150; Building No. 10548 sold to the high bidder, O. J. Fox, Freewater, for the sum of $150.

Tract of land in North Bend; only one bid was received for this tract, being in the amount of $100, which was considered too low and was rejected.

The Commission by unanimous vote confirmed the disposition of the bids as reported.

The Commission discussed briefly and ordered filed a letter from C. J. Montag & Sons, contractor for the construction of the Steiwer Hill and Albany Bridges, explaining the reasons why they were not able to complete this contract within the specified time limit.

The Commission referred to the Engineer for investigation and report a petition from residents of Oceanside, Tillamook County, requesting the extension of the Netarts Secondary Highway northerly a distance of about 200 yards from its present terminus at the north end of the business area in this town.

The Engineer reported a request from skiers of Bend for snow removal this winter on Century Drive Secondary Highway southwesterly from Bend, so that they may have access to favorable skiing areas; also, a request from the U. S. Forest Service for snow removal on the loop road that extends from the Santiam Highway to Santiam Lodge at the summit of the Cascade Mountains, for the benefit of skiers and others who patronize this place. He estimated that the cost to perform such service at each place would not exceed $500, or a total of $1,000, and recommended approval of the requests. The recommendation was approved by the Commission unanimously subject to the condition that men

and equipment are available to do the work without handicapping regular operations.

The Commission had under consideration the following requests for extensions of time within which to complete highway contracts:

Rogers Construction Company, Contract No. 2714, for the Baker Rock Production Project on the Old Oregon Trail and other highways in Baker County, requested an extension of time of 30 days, from November 30 to December 30, 1945, within which to complete this job. They attributed their failure to complete the project within the specified time limit to their inability to secure sufficient labor to keep their plants running to capacity. The Engineer advised that the principal reason for overrunning the time limit was the contractor's delay in starting the project and this was occasioned by the fact that he experienced difficulties on another project. The materials being produced by the contractor, he said, will not be used until next summer so the overrunning of time limit will not interfere with the state's operations. For this reason and because the state has incurred no additional expense for engineering, supervision, he recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

O. C. Yocom Company, Contract No. 2743, for grading and surfacing the Nelscott Section of the Oregon Coast Highway, in Lincoln County, requested an extension of time of 30 days, from October 31 to November 30, 1945, within which to complete this job. They alleged that they were delayed in starting the project because of the telephone company's failure to reestablish its pole line facilities which were in the way of grading operations. They also alleged that labor strikes prevented them from obtaining required materials when needed. They gave such reasons for their request for an extension of time to complete the job. The Engineer advised that the contractor handled this project in a very satisfactory manner from a standpoint of the general public and the State Highway Department and, in his estimation, the request for the extension of time should be granted. He recommended approval of the extension of time without penalty. The Commission approved the recommendation unanimously.

The Engineer reported that Contracts Nos. 2704, 2723, 2726, 2735, and 2743 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof, and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2704, with M. C. Lininger & Sons, for furnishing crushed materials in stockpiles on the Austin Junction-Union Junction Section of the John Day Highway, in Baker and Grant Counties; completed November 1, 1945.

Contract No. 2723, with Fisher Brothers, for furnishing crushed material in stockpiles on the Trent-Salt Creek Falls Section of the Willamette Highway in Lane County; completed October 5, 1945.

Contract No. 2726, with Warren Northwest, Inc., for pavement resurfacing on the Albany-Crabtree Corner Section of the Santiam Highway in Linn County; completed August 17, 1945.

Contract No. 2735, with Lloyd Babler, for grading, surfacing and oiling the Crater Lake-Fort Klamath Timber Access Road Section in Klamath County; completed October 29, 1945.

Contract No. 2743, with O. C. Yocom Co., for grading, curbs and surfacing on the Nelscott Section of Oregon Coast Highway in Lincoln County; completed November 24, 1945.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission had under consideration a petition from residents and taxpayers of Wheeler County requesting the designation and improvement as a state secondary highway of the county road which extends southeasterly from its junction with the Service Creek-Mitchell Secondary Highway, near the town of Richmond, to the town of Waterman, thence southwesterly to a junction with the Ochoco Highway, about nine miles east of the town of Mitchell. The petitioners alleged that this road is essential for the transportation of logs, lumber, livestock, and other produce of this district, that it is a star mail route between Richmond and Waterman, that it is in deplorable condition, and that Wheeler County is unable financially to properly maintain the road. The Engineer pointed out that the present road between Service Creek and Mitchell is a State Secondary Highway but is not a high class road and,

in his estimation, should be improved before the Commission assumes a new obligation in this vicinity. The Commission thereupon denied the request.

The Engineer brought up for consideration a proposed budget for highway expenditures in 1946. Due to the lack of time within which to give this matter proper attention, the Commission deferred action until a special meeting which is to be called some time between Christmas and New Years. (December 27, 1945, was later set as the date for this special meeting)

The Engineer reported the advisability of designating a "no parking" zone on the Mt. Hood Highway in front of Battle Axe Inn at Government Camp in order to relieve the traffic congestion that occurs at this point when busses stop to discharge or take on passengers during the time that winter sports activities are under way. He recommended the designation of a "no parking-bus stop" zone about 150 feet long in front of this inn; also, that private automobiles be required to park "head-in" rather than parallel in the vicinity of Government Camp so as to provide more parking space and to give cars a better footing when they leave. Commissioner Chessman moved adoption of the Engineer's recommendations. The motion was seconded by Commissioner Schaupp and carried unanimously. The Engineer was authorized to maintain "no parking" signs at this place and the Chief Counsel was instructed to prepare an appropriate resolution covering the matter.

The Commission also discussed a resolution from the Eugene City Council requesting the designation of a bus loading zone along the south side of 6th Avenue East, route of northbound Pacific Highway traffic, and extending 75 feet easterly from the easterly sidewalk line on Willamette Street, Eugene. The Engineer advised that 6th Avenue has been designated a one-way traffic street for northbound Pacific Highway travel and that the bus loading zone now proposed at this point is simply a temporary expedient to facilitate the loading and unloading of bus passengers until such time as the bus companies can acquire property at a more suitable location for a permanent terminal. He recommended, in view thereof, approval of the request on such basis provided the City of Eugene will properly police the area. The Commission approved the recommendation, and by unanimous vote adopted the following resolution with regard thereto upon motion of Commissioner Chessman, which was seconded by Commissioner Schaupp:

> WHEREAS, pursuant to Section 100-122, O. C. L. A., the Highway Commission has selected Sixth Street in the City of Eugene as a street of said City over which to route state highway traffic; and
>
> WHEREAS, the West Coast Trailways and the Eastside Bus Company have jointly established in connection with a transportation service in which said companies are engaged terminal quarters and facilities in the City of Eugene at the southeast corner of Willamette

and Sixth Streets and for such purpose and in connection with said transportation service have requested the City of Eugene to establish a bus zone at said location; and

WHEREAS, the City of Eugene, acting by and through its Common Council has, by resolution duly and regularly adopted, established said bus zone, which said resolution is as follows:

> "BE IT RESOLVED by the Common Council of the City of Eugene that a recommendation of the City Manager and with the concurrence of the Oregon State Highway Department, that a bus loading zone be established at the Southeast corner of 6th Avenue East and Willamette Street, be approved and the Chief of Police be and he hereby is directed to establish said zone and to erect the necessary signs to carry the recommendation and resolution into effect, the zone to extend on the South side of 6th Avenue East, extending 75' easterly from the sidewalk line of Willamette Street."

AND, WHEREAS, it is the judgment of this Commission that by cooperating with the City of Eugene in the establishment and administration of said bus zone public welfare and public interest will be promulgated and conserved;

NOW, THEREFORE, subject to the limitations and conditions herein set out and subject to the enforcement of the provisions of said resolution, it is resolved by the Commission, all members being present and affirmatively voting, as follows:

1. The Commission does hereby ratify and concur in the establishment of said bus zone as provided for in the resolution adopted by the City of Eugene and quoted above.

2. The concurrence by the Highway Commission in said action on the part of the City is conditioned on the promulgation by the City of all necessary protective measures and the properand rigid enforcement by the City of all such protective police regulations.

3. That in the event of the development of conditions and circumstances which in the interests of the public warrant, in the opinion of the Commission, the discontinuance of such bus zone, then the Commission shall by appropriate action bring such matter to the attention of the Common Council of the City of Eugene and request appropriate action on the part of said City.

The Engineer called to the attention of the Commission a hazard that exists at the "Auction Mart" on the Pacific Highway a short distance north of Eugene where people park their automobiles on the shoulders of the highway while doing business in the "Mart." He advised that the hazard is extremely serious on days when a public sale is being conducted because of the large number of cars that are parked on both sides of the highway. He said that this hazard could be eliminated if the parking of cars were prohibited. He pointed out that such prohibition would not inconvenience the people who patronize the "Mart" nor would it handicap the business of this establishment because there is available at the rear of the auction building a large open area that could be used for parking purposes. He recommended the establishment of a "no parking at any time" zone along both sides of the highway for a distance of about 600 feet in front of this establishment. The Commission adopted the recommendation by unanimous vote as a safety measure and authorized the Engineer to maintain appropriate signs. The Chief Counsel was instructed to prepare a resolution covering the matter.

The Engineer reported the attitude of the Lane County Court regarding the designation of the Richardson-Eugene Secondary Highway as a "through" highway so as to require all vehicles to stop before entering the same. He advised that the County Court was contacted in conformity with instructions received from the Commission at its meeting on September 24, and it is the opinion of the Court that such designation is necessary and desirable. In view thereof, the Commission, by unanimous vote, adopted the following resolution designating this highway a "through" highway:

> WHEREAS, by the provisions of Section 115-351, O. C. L. A., the State Highway Commission with respect to state highways is authorized to designate main-traveled or through highways or sections thereof by placing at the entrance thereto from intersecting highways signs or markers notifying drivers of vehicles to stop before entering or crossing such designated highway or highways; and
>
> WHEREAS, the Highway Commission has heretofore, to wit: on the twenty-seventh day of April, 1943, adopted a resolution in which a large number of state highways have been declared to be and have been designated as through highways, and the Engineer was instructed to properly mark the same; and
>
> WHEREAS, it is now the judgment and opinion of the Commission that the highway known and designated as the Richardson-Eugene Secondary Highway, otherwise identified as Secondary Highway No. 220, is a highway which carries a large volume of traffic, both local and through traffic, and by reason thereof and by reason of other traffic conditions and facts said highway should, in the judgment of the Commission and in the interests of the general public, be declared to be a through highway;
>
> NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively, as follows:

DEC 14 1945

1. That the Richardson-Eugene Secondary Highway (Secondary Highway No. 220) from its westerly terminus at Mile Point 11.94 to the westerly city limits of Eugene at Mile Point 48.71 hereby is declared to be and is designated as a through highway.

2. All traffic entering said highway from intersecting roads or highways shall come to a stop before entering said secondary highway, except that at the southerly junction of the Richardson-Eugene Secondary Highway (Secondary Highway No. 220, Mile Point 37.46) and Territorial Highway (Road No. 200, Mile Point 19.70), just north of Veneta, westbound traffic entering the intersection from the Richardson-Eugene Secondary Highway shall be required to stop before proceeding through the intersection.

3. That the State Highway Engineer be and he hereby is instructed to place, or cause to be placed, and thereafter maintain the necessary signs and markers to accomplish the traffic control and regulation contemplated by law and by this resolution. Such signs as may be erected at said points of intersection shall conform to the types and standards heretofore approved by the Commission.

4. The Engineer is instructed to place such signs or markers as nearly as practicable at the place where said intersecting road meets a prolongation of the nearest property line of such through highway, and such signs or markers so placed or installed shall indicate or designate to all drivers of motor vehicles entering said highway from said intersecting road the place where the stop shall be made.

5. This resolution shall be entered in the minutes and records of the Commission as of the 14th day of December, 1945, and a duly certified copy thereof delivered to the Public Roads Administration and the County Court of Lane County.

The Engineer brought up for discussion the matter of purchase of new equipment to replace equipment that has become obsolete and worn out during the wartime period. He explained that much of the old equipment should have been replaced a long time ago, but it was not possible to purchase new equipment because of wartime conditions. He requested authority to spend $300,000 of state highway money for this purpose and advised that the equipment would not be purchased on the open market unless he is unable to obtain surplus Army equipment. He explained that during the past four years the Equipment Department has accumulated a credit of $378,000 by reason of depreciation charged out, so from a bookkeeping standpoint, there still will be a credit in the equipment purchase account. The Commission approved, by unanimous vote, the expenditure of $300,000 for equipment on the basis of the Engineer's report,

with the understanding that the Engineer would report to the Commission each time purchases are made.

The Engineer also requested authority to purchase some housing units for housing engineering personnel, there being an acute shortage of living quarters throughout the state which creates a hardship on engineers who are shifted from one job to another at frequent intervals. He was authorized by the Commission to look into the prospects of purchasing trailers and Quonset huts and to report back to the Commission the probable cost of the same.

The Commission discussed the advisability of terminating a number of agreements with counties and cities whereby the state is obligated temporarily to maintain certain county roads and city streets which were being subjected to excessive wartime traffic. It appears that some of these agreements are effective "for the duration of the war." Some are effective "for the duration of the war and six months thereafter," and some read, "for the duration of the emergency." The Engineer presented a list of the agreements in this category as follows:

1. Agreement with Benton and Polk Counties and the City of Independence for the maintenance of the county road which extends from the Albany-Corvallis Highway, near Granger, to the Monmouth-Independence Highway, in Independence. The Engineer recommended that this agreement be terminated as of March 31, 1946.

2. Agreement with Marion County covering the maintenance of the North Santiam Secondary Highway from M. P. 30.8, near Gates, to M.P. 46.71, at Detroit. The Engineer advised that the agreement provides that the county shall do the maintenance work and the state shall reimburse the county for the expense, and that the agreement is effective for the duration of the war and six months thereafter or until superseded by mutual agreement between the parties, or until revoked. He pointed out that this section of the highway is proposed for construction in the first postwar year program, and in view thereof, recommended that the agreement be continued until the construction work is completed.

3. Agreement with Umatilla County covering maintenance of the county road which extends from Hermiston to the Umatilla Ordnance Depot, a distance of about 4 1/2 miles. The Engineer recommended that this agreement be terminated as of December 31, 1945.

4. Agreement with Jefferson County covering the maintenance of two bridges on the Culver-Grand View County Road, one bridge being over the Crooked River and the other over the Deschutes River. The Engineer recommended that this agreement be terminated as of December 31, 1945.

5. Agreement with Clatsop County and the cities of Warrenton and Hammond covering the maintenance of the Warrenton-Fort Stevens

County Road, a distance of 4.45 miles, and the reconstruction and maintenance of a bridge over Alder Creek in the City of Warrenton. The Engineer pointed out that this agreement expired on December 31, 1944, unless renewed or extended by agreement in writing executed by all parties. He suggested in this particular instance that definite termination of the agreement be deferred pending consultation with the County Court and the officials of both cities.

6. Agreement with Clatsop County and the cities of Warrenton and Hammond covering maintenance of the Fort Stevens-Camp Clatsop County Road and the Delaura Beach Road for the duration of the war and for six months thereafter. The Engineer suggested that definite action on the termination of this agreement be deferred until the County Court and the officials of the cities have been consulted.

7. Agreement with Jefferson County covering maintenance of the Madras-Redmond Target Range Road for the duration and six months thereafter. The Engineer recommended that this agreement be terminated as of March 31, 1946.

Following considerable discussion of this matter, the following action was taken by the Commission by unanimous vote:

The Secretary was instructed to inform the County Courts of Benton and Polk Counties and the Independence City Council that the Commission wishes to terminate, as of March 31, 1946, its agreement covering the maintenance of the county road which extends from Granger to Independence and to request from each county and the city its consent to such termination.

The Commission decided to continue its agreement with Marion County covering the maintenance of the North Santiam Secondary Highway between Gates and Detroit until the new road is completed. The Secretary was instructed to so inform the County Court and secure its consent thereto.

The Commission decided to terminate its agreement with Umatilla County as of December 31, 1945, covering the maintenance of the county road that extends from Hermiston to the Umatilla Ordnance Depot. The Secretary was instructed to so inform the County Court and to secure its consent to such termination.

The Commisrion elected to terminate its agreement with Jefferson County for the maintenance of two bridges on the Culver-Grand View County Road as of December 31, 1945, and instructed the Secretary to secure the consent of the County Court to such termination. The Secretary was also instructed to notify the County Court that the Commission desires to terminate its agreement with the County for the maintenance of the Madras-Redmond Target Range Road as of March 31, 1946, and to secure the County's consent thereto.

DEC 14 1945

The Commission deferred the taking of definite action on the termination of its agreements with Clatsop County and the cities of Warrenton and Hammond for the maintenance of the Warrenton-Fort Stevens County Road and for the maintenance of the Fort Stevens-Camp Clatsop Road and the Delaura Beach Road pending conference with the members of the County Court and officials of both cities. The Secretary was instructed to invite these officials to be present at the next regular meeting of the Commission to discuss the matter.

A letter was presented from Mr. J. O. Bredemeier, Auditor pro tem, City of Portland, advising that the City Council has referred to Commissioner William A. Bowes, Department of Public Works, to confer with the State Highway Commission, the petition from Mr. Charles L. Schneller for a change in zone classification from Zone I to Zone III of a tract of land situate on the south side of N. E. Lombard Street (Northeast Portland State Secondary Highway) just east of the northerly prolongation of N. E. 18th Avenue, Portland. The Commission ordered that this matter be disposed of in conformity with the policy recently established covering matters of this kind.

A letter was presented from Mr. Hal H. Hale, Executive Secretary, American Association of State Highway Officials, advising that there has been introduced in Congress a bill to amend the Federal Aid Highway Act of 1944, which, if it passes, will, in effect, place all highway construction under the Bacon-Davis Act and will empower the Secretary of Labor to fix wage scales for all highway work financed in whole or in part by Federal funds. The Commission took no action in this matter.

The Commission discussed a letter from Hon. Willard L. Marks, Albany, concerning a plan of the Albany Rotary Club to erect a "Sea Scout Clubhouse" on the shore of Waverly Lake at Albany if the State Highway Commission will permit the use of its property for such purpose. Mr. Marks advises that the clubhouse will be constructed in the shape of a boat but will not be placed in the water and that it will be painted attractively. He submitted an artist's drawing of the proposed building. A letter from the Albany Rotary Club on the same subject was also considered. Following discussion, during which the established policy of the Commission with respect to encroachments on state property was recalled, the Commission decided to postpone definite action in the matter pending a conference with Mr. Marks. The Secretary was instructed to invite Mr. Marks to be present at the next meeting of the Commission.

The Assistant Counsel reported that, according to advice received from the Assistant State Highway Engineer, numerous complaints have arisen regarding the services rendered to the Commission's employes under existing medical and hospital contracts which provide that "if for any reason an employe is unable to obtain services and care from a physician, surgeon, or hospital designated by the medical contractor in the community in which the employe is located the employe shall have the right to obtain such services from any regularly licensed physician, surgeon, or hospital and the medical contractor shall bear the expense thereof to the same extent as if the services and care had been rendered

by a doctor or hospital designated by the medical contractor." Under this provision, he said, numerous cases have arisen in which an employe has been unable to secure services from a doctor or hospital designated by the medical contractor and has had to make payment of the bill at the usual private rates prevailing in the community, and, upon presentation of the bill to the medical contractor the employe has been reimbursed only at the medical contractor's standard rates and has been forced to pay the deficit out of his own pocket.

The Assistant Counsel further explained that in order to remedy this situation a proposed form of amendment to the existing contracts, which would change the contracts so as to provide that in such instances the medical contractor should bear the expense at the usual rates and charges prevailing for private services in the particular community, was prepared and was submitted to Oregon Physicians' Service and National Hospital Association. The Oregon Physicians' Service, he said, accepted and executed the proposed amendment, but the National Hospital Association refused to do so and instead submitted a letter suggesting that the entire contract be rewritten, which would involve numerous other and radical changes. The Assistant Counsel requested instructions as to how to proceed in the matter. The Commission felt that the suggested amendment had been presented too late for action to be effective January 1, 1946, and decided that action should not be taken at this time; however, ordered, in view of the existing situation, that any employe of the Commission who desires to transfer from one organization to another be given authority to do so within a reasonable time, even though such transfer should not be applied for in strict accordance with the time limits set out in the existing contract. Continuance during 1946 of the medical and hospital protection offered by both associations was approved by the Commission.

The Assistant Counsel requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with the offer that he recommended for each parcel. After careful consideration of each item on the list, the Commission approved the request and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

> WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and
>
> WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and
>
> WHEREAS, it is the judgment of the Commission that the

said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

The Assistant Counsel requested instructions regarding the purchase from the Southern Pacific Company of several strips of land situate along the westerly side of McLaughlin Boulevard, Portland, (U.S. 99E) south of the Ross Island Bridge. He advised that this property was acquired by the Southern Pacific Company in connection with a proposed improvement of the railroad, but the Company has changed its plans and no longer needs this property and would like to dispose of it. A portion of the property is valuable, he said, as a site for a service station, and gave as his thought that the Commission might be interested in acquiring the property so as to avoid the creation of a hazard were the property used for service station purposes, and to preserve an unobstructed view of the Willamette River from the highway. He added that the Southern Pacific Company has offered to sell all of the property for the sum of $5,700 or the northerly tract alone for about $2,400, if the Commission will close the deal now, but will demand more for the property if the purchase is deferred until next year. The Engineer advised that the tract that lies next to the Ross Island Bridge will be needed as right of way in connection with a proposed ramp to facilitate the movement of southbound traffic from the bridge, but the purchase of the remaining property is not so important unless the Commission wishes to acquire it as a safety measure. The matter was discussed at some length but action by the Commission was deferred until the next meeting.

The Chief Counsel reported on the proposed settlement with Mr. John La Grand for right of way needed in connection with the improvement of Front Avenue at Arthur Street, in Portland, and on the city's ability

to finance its share of the cost to acquire this property and the balance of the right of way that is needed for the Front Avenue Project. He advised that, as previously instructed by the Commission, he has had the La Grand property appraised by two competent appraisers, each of whom reports that a settlement with Mr. La Grand at $30,000 is fair and reasonable. An examination of the city's records, he said, reveals that the city has funds on hand to pay its 60 per cent share of this expense, which would leave a balance of $12,000 to be paid by the state. The Chief Counsel then presented the following statement showing the status of the financial arrangement with the city concerning the acquisition of right of way for the Front Avenue improvement and in support thereof advised that, in his estimation, the city will be able to meet its obligations as they arise with funds now on hand augmented by monies received from the sale and rental of the city-state-owned property along this street:

Total cost of rights of way purchased to November 1, 1945--		$2,026,098.95
Estimated cost of right of way unacquired on West Side-----		131,784.30
Estimated cost of right of way unacquired on East Side-----		212,450.00
Estimated cost due to grade change damage----------		25,000.00
Total acquired and unacquired right of way costs		$2,395,333.25
Portland's share of above costs-----	$1,437,199.95	
State's share of above costs-------	958,133.30	
Total	$2,395,333.25	
City funds available (Bond money)----------		$1,200,000.00

Total		$2,293,450.84
Deficit to cover all unacquired land		
City funds----------		$ 60,129.45
State funds----------		40,752.96
Total		$ 101,882.41
Unexpended funds to November 1, 1945		
City funds----------		$ 113,061.29
State funds----------		75,374.20
Total		$ 188,435.49

DEC 14 1945

In view of the report of the Chief Counsel, the Engineer recommended approval of the $30,000 settlement with Mr. La Grand so that the city can go ahead with its resolution proceedings to acquire the property. The Commission approved the recommendation by unanimous vote.

The Engineer reported that, due to changes in Highway Department personnel, it would be advantageous if additional employees were authorized to sign emergency transportation permits. He recommended that such authority be granted to the following:

W. C. Williams, Division Engineer, Portland
S. Paul Jones, Division Office Engineer, Bend
Ralph Eggstaff, Assistant to the Commission's Secretary, Salem
Paul Davies, Assistant to the Commission's Secretary, Salem

The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the Commission heretofore, to wit: on the twenty-fourth day of October, 1944, approved and adopted a resolution by which the Commission approved and adopted certain forms of permits as the forms to be used when permits are issued under the provisions of Section 115-393, O. C. L. A.; and

WHEREAS, in and by said resolution the Commission named certain state highway employes, to each of whom the Commission gave authority to sign permits issued on either of the forms identified and approved in said resolution; and

WHEREAS, it now appears that by the naming of additional employes and by vesting in them authority to sign such permits the business of the Commission can be more expeditiously disposed of and the public interests better served;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively, as follows:

1. That the following state highway employes:

W. C. Williams, Division Engineer, Portland;
S. Paul Jones, Division Office Engineer, Bend;
Ralph Eggstaff, Asst. to the Commission's Secretary, Salem;
Paul Davies, As t. to the Commission's Secretary, Salem;

hereby are authorized to sign permits for the movement over state highways of motor vehicles, articles or things when such movements and such vehicles come within the purview, purpose and meaning of Section 115-393, O. C. L. A., and within the purpose and meaning of the Commission as disclosed and declared in said resolution adopted October 24, 1944.

DEC 14 1945

2. That all of the instructions, requirements and provisions set out in said resolution of October 24, 1944, shall apply to and control the action of the employes herein named

3. No permit shall be issued by any of said employes unless and until all of the facts have been communicated to the State Highway Engineer and to the Secretary of the Commission, and the issuance of such permit has been approved by them.

4. No permit shall be issued by any of the persons named herein or by any of the persons named in said resolution of October 24, 1944, unless and until adequate insurance has been exacted from the applicant for the protection of the members of the Commission and the members of the general public.

5. None of the persons named herein and none of the persons named in the said resolution of October 24, 1944, may issue a permit on any form other than one of the forms heretofore approved.

6. This resolution shall modify and supplement the resolution of October 24, 1944, to the extent and in the manner herein set out and not otherwise.

7. This resolution shall be entered in the minutes and records of the Commission as of December 14, 1945.

The Engineer presented a letter from City Commissioner William A. Bowes, Portland, requesting approval by the Commission of a site that has been selected for a monument commemorating the 100th anniversary of the naming of the City of Portland. Mr. Bowes advises that the site chosen is located at the foot of S. W. Miller Street and is on a small plot (traffic island) between S. W. Front Avenue and S. W. Harbor Drive; also, that it is proposed to place a boulder on this site, the face of which will be about eight feet distant from the east edge of the sidewalk and approximately midway between the north and south curbs that surround the plot. He further advised that the sponsor of the monument is the American Trails Association, which wants to dedicate it in the near future. The Engineer recommended approval of the site. The Commission approved the recommendation.

The Commission approved and signed agreements, etc., as follows:

Ground lease with James S. Ingles et al , covering 3.87 acre quarry site in Wasco County. This lease later assigned to Wasco County by agreement.

Agreement with Marion County regarding abandonment of portions of North Santiam Highway when new highway built between Gates and Niagra.

Agreement with Wasco County for use of County quarry on the Dalles-California Highway near M.P. 17.8 near Dufur.

1946 agreement with Oregon Physicians' Service.

Agreement with E. L. Swaggert & Calvin V. Wagner covering removal of timber from state owned property located south of the Wolf Creek Highway., about 1 1/2 miles west of the Tillamook-Washington County line.

Bargain and Sale Deed conveying to Clair E. Terry and Thelma L. Terry a parcel of land in Lot 1, Block 62, Bennett's Addition to Coos Bay (formerly Marshfield), together with certain reversionary rights in Platted Fourth Street.

Agreement with City of Portland covering the subject of traffic analysis.

Agreement with City of Eugene designating Franklin Boulevard as a part of the route of U. S. 99 in said City.

Bargain and Sale Deed conveying property in Lots 5, 6, 7, 8, Block 80, Amended Plat of Railroad Addition to the City of Reedsport which lies outside of the right of way, to James W. Ford, Jr. and Edna C. Ford, husband and wife.

Agreement with Ernest D. Wade which covers our lease of Lot 6, Block 2, Elkton, Douglas County, Oregon, as an equipment storage headquarters for a period of one year, beginning June 15, 1945 and ending June 14, 1946.

Agreement with F. G. Brown pertaining to snow removal on the West Klamath Lake Secondary Highway, between Crystal School House and the Rogue River National Forest Boundary.

"Extension Rider" in connection with the renewal for the lease of the O.W.R.& N. stockpile site at Island City.

The Commission discussed the date for its next regular meeting for the receiving of bids and decided to hold such meeting on Thursday and Friday, January 17 and 18, 1946. The Secretary was instructed to make the usual arrangements to hold this meeting in the Auditorium of the Public Service Building, Portland. The Commission also decided to hold a special meeting in Portland some time between Christmas and New Years for consideration of the 1946 Budget. A definite date for the meeting was to be set later, and the Secretary was instructed to arrange for the meeting to be held in the Imperial Hotel. He was further instructed not to schedule delegations for this meeting. The Secretary advised that he had planned to be absent from the state on vacation during the

Christmas holiday season if that meets with the approval of the Commission. The Commission approved such vacation and instructed the Secretary to arrange with Mr. Oscar Cutler, Assistant Staff Engineer, to act as Secretary in his absence.

There being no further business to come before the Commission at this time, the meeting adjourned at 5:15 p.m.

Chairman

State Highway Engineer

Commissioner

Secretary

Commissioner

Portland, Oregon
December 27, 1945

The State Highway Commission met in special session at 9:00 a.m. in Room 615 of the Imperial Hotel on December 27, 1945. Present were:

T. H. Hanfield, Chairman
A. W. Schaupp, Commissioner
M. R. Chessman, Commissioner
R. H. Baldock, Chief Highway Engineer
J. M. Devers, Chief Counsel
Oscar Cutler, Acting Secretary

Mr. H. B. Glaisyer being absent from the state, the following resolution was unanimously adopted by the Commission appointing Oscar Cutler as Acting Secretary during Mr. Glaisyer's absence.

WHEREAS, H. B. Glaisyer, the duly appointed, qualified and acting Secretary to the Oregon State Highway Commission, will be absent from the State of Oregon for the period beginning December 21, 1945, and ending January 6, 1946; and

WHEREAS, it is necessary that someone be appointed to serve as Acting Secretary during the absence of the said H. B. Glaisyer; and

WHEREAS, Oscar Cutler is, in the opinion of the Commission, qualified to perform the duties of such office and serve as Acting Secretary during the absence of the regular Secretary;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That Oscar Cutler be and he hereby is appointed as Acting Secretary to the Oregon State Highway Commission, and that he serve in such capacity during the period beginning December 21, 1945, and ending January 6, 1946.

2. That as such Acting Secretary the said Oscar Cutler is hereby authorized and empowered to do and perform all of the duties appertaining to the said office for said period.

The State Parks Superintendent, Mr. S. H. Boardman, was present and reported on the following State Park matters:

1. The acquisition of a "Praying Tree" at Troutdale: Mr. Boardman stated that this tree was not on a state highway; therefore, he did not recommend that it be taken over by the state. The Commission, by unanimous vote, approved Mr. Boardman's recommendation.

DEC 27 1945

2. The report to be made by Messrs. Baldock, Devers, and Boardman with regard to a park at Wallowa Lake was deferred until the next meeting.

3. Mr. Boardman brought up the matter of Federal aid in acquisition and development of state parks, a bill now pending in Congress to provide for such aid. After discussion of this matter, the Highway Commission, by unanimous vote, decided to take no action with regard to the bill.

4. Mr. Boardman then brought up for consideration the renewal of a lease to Mr. E. L. Dimmitt of Vista House on the Columbia River Highway. After discussion of this matter, the Commission, by unanimous vote, approved the renewal of the lease to Mr. Dimmitt permitting him to sell curios, with the understanding that wages now paid to him be discontinued.

5. The matter of renewal of a rental agreement for a residence at Bonneville leased to Mr. G. L. McConnell, who is an employee of the Bonneville Administration, was considered. During the discussion it was brought out that the present rental rate is $25 a month. It was the opinion of the Commission that $25 a month is not enough for the house at the present time, and the Commission ordered that an investigation be made and a report on the matter be submitted at an early date.

6. Mr. Boardman then brought up for discussion the matter of acquiring a park on the Rogue River near Camp White. Mr. Boardman stated that former Commissioner F. L. Tou Velle, of Jacksonville, plans to donate part of a tract along the Rogue River as a state park and has tentative plans for placing a building on the site. Mr. Boardman also advised that if Camp White is made surplus property the state should acquire 200 feet on either side of the Rogue River to join with the tract which Mr. Tou Velle plans to deed to the state. After discussion of this matter, the Commission ordered that an investigation and report be made.

7. Mr. Boardman also brought up for discussion the matter of the Federal Income Tax Law in relation to park gifts. A copy of the letter written by Mr. Ben F. Dorris, of Eugene, addressed to the State Tax Commission, was read, in which letter Mr. Dorris objected to paying a tax on a park which was a gift to the state. After discussion of this matter, the Commission ordered that an investigation be made and that a report be submitted to the Commission.

8. A letter was presented to Mr. Boardman from Mr. Tom West, Chairman of the Multnomah County Commissioners, with regard to the vacation of the whole of the plat of Dabney Park in Multnomah County. This area, adjacent to the Columbia River Highway, is being acquired as a state park. After discussion of this matter, the Commission approved the order of vacation and requested the Secretary to acknowledge Commissioner West's letter.

9. The matter of leasing the concession building at Silver Creek Falls State Park was then presented for discussion. Mr. Boardman stated that he would like to open the park the first of May and advertise for

DEC 27 1945

bids for the concession in February. The matter was discussed at some length and the Commission ordered that Mr. Boardman, Mr. Baldock, and Mr. Devers present a report to the Commission at a later date outlining a definite plan for advertising the concession.

The Assistant Counsel requested instructions with regard to acquisition from the Southern Pacific Company of certain lands on McLaughlin Boulevard. The Assistant Counsel stated that at the last meeting the question of acquiring additional property on McLaughlin Boulevard, consisting of two tracts just north of the Ross Island Sand and Gravel Plant, was considered. It has been found that Mr. James A. Lathrop, Tax and Right of Way Agent for the Southern Pacific Company will recommend the sale to his company for $5,690. The Assistant Counsel stated that this was a reasonable price and Mr. Baldock, for safety measures, recommended that the tracts be purchased. The Commission, by unanimous vote, approved the purchase of the land.

J. W. DeSouza reported that the estimate to complete the right of way purchase in Ocean Lake would amount to about $40,000. This consisted exclusively of moving buildings as the lands were donated. Mr. Baldock suggested that, rather than perform the Ocean Lake project piece-meal, the entire construction job, estimated to cost $135,000 exclusive of right of way, be advertised and performed with state funds, eliminating from the third-year postwar federal aid projects the item of $75,000 set up for Ocean Lake. Mr. Banfield stated that he did not realize this job would cost so much for either construction or right of way. The Engineer was instructed by the Commission to make a report on the project for consideration at the next meeting, giving copies of minute entries to show the history of the development of the project.

The Assistant Counsel requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He presented a list of such properties, together with the offer that he recommended in connection with each parcel. After careful consideration, the Commission approved the request and offers and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

WALDPORT-SCOTT CREEK SECTION, ALSEA HIGHWAY

12267- Lincoln County
Easement for
hauling road

0.036 acre $ 00.00 $ 00.00 McChesney

---

The Assistant Attorney requested authority to condemn certain parcels of real property adjacent to the Oregon Coast Highway, in Lincoln County, which is valuable for roadside development and recreation and which he has been unable to acquire at reasonable cost by negotiation from the owner,

Mr. E. C. Newell. He recommended an offer of $800 in connection therewith. After careful consideration the Commission approved the request and the offer and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, under and by virtue of the provisions of subsections 6 and 7 of Section 100-115, O. C. L. A., the Highway Commission is authorized to acquire by agreement, donation, or the exercise of the power of eminent domain real property, or any right or interest therein, necessary or deemed necessary for the preservation of scenic places and other objects of attraction or scenic value adjacent to or along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and the Commission is also authorized to acquire land and ground necessary for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or other places of attraction and scenic value which in the judgment of the Commission are necessary for the convenience of the public and which will contribute to the general welfare and pleasure of the motoring public or road users; and

WHEREAS, in the opinion of the Highway Commission the real property hereinafter described is scenic in character, adjoins other real property owned by the State, and possesses possibilities of development as a scenic and recreational area and likewise affords opportunity for roadside development; and

WHEREAS, it is the judgment and opinion of this Commission that the acquisition of said real property and the development of the same will contribute to the convenience of the general welfare and to the general welfare and pleasure of the motoring public or road user;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Highway Commission does hereby find and declare that the real property hereinafter described is scenic in character and is suitable for development as a scenic area or viewpoint and for roadside development and recreation.

2. That this Commission does hereby find and declare that the acquisition of fee title to said real property, free and clear of all interests of every kind and character, is necessary in order to make possible the preservation and development of the same for the convenience of the public and so that said area may be developed and maintained for its scenic value or public view qualities as well as for roadside development, all of which the Commission does find and declare to be for the general welfare and pleasure of the motoring public and road user.

3. That the real property the acquisition, preservation, and development of which the Commission now finds necessary for the purposes heretofore stated is described as follows, to wit:

Parcel No. 1

A parcel of land lying in the north 594 feet of Government Lot 2 of Section 7, Township 12 South, Range 11 West, W. M., Lincoln County, Oregon, the said parcel being a strip of land lying between the easterly right of way line of the Oregon Coast Highway and the westerly right of way line of the now abandoned U. S. Spruce Production Railroad and being described as follows:

Beginning at a point which is the intersection of the easterly right of way line of said highway and the north line of said Lot 2; said point being approximately 1355 feet south and 930 feet west of the north quarter corner of said Section 7; thence South 6° 08' West along said right of way line a distance of 606 feet, more or less, to the south line of the owner's property; thence east along said south line a distance of 20 feet, more or less, to the westerly right of way line of said railroad; thence northerly along said railroad right of way line a distance of 626 feet, more or less, to the north line of said Lot 2; thence west along said north line a distance of 122 feet, more or less, to the point of beginning, containing 0.98 acre.

Parcel No. 2

All of that portion of the north 594 feet of Government Lot 2 of Section 7, Township 12 South, Range 11 West, W. M., Lincoln County, lying between the Oregon Coast Highway and the Pacific Ocean, containing 2.3 acres, more or less.

4. That the survey of said area heretofore made by the State Highway Engineer and the description prepared hereby are approved by the Commission and the Commission does hereby order and direct that said description be used and employed in the preparation of necessary deeds of conveyance or in necessary court proceedings.

5. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners, or persons in possession if there be any, with respect to the compensation to be paid for the acquisition of said property and damage to the remaining property, if there be any remaining property, and in the event that the title to said property cannot be acquired by agreement then it is hereby ordered that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit

or action, or suits or actions, as may be necessary and appropriate to acquire title to the said premises and all rights therein for the purposes herein stated.

6. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real property, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owner.

7. That this resolution be entered in the minutes and records of this Commission as of December 27, 1945

The Engineer presented to the Commission the matter of securing additional right of way on the Wolf Creek Highway at the Barnes Road intersection where a Portland company plans to open a subdivision as a suburb of Portland, and to secure a wider right of way with controlled access provision for the first two miles west of the head of Canyon Road to Barnes Road. The Commission discussed this matter and, after considering the suggestions made by Mr. Baldock and Mr. Devers, instructed the Engineer and the Chief Counsel to prepare an estimate of cost of the acquisition of the increased right of way recommended and present it to the Commission at its next meeting.

The Chief Counsel presented an opinion to the Commission with respect to the Commission's authority to receive and consider bids submitted by counties for highway construction, and advised that under the state law, counties may bid on State Highway construction; however, on contracts involving Federal funds the Public Roads Administration refuses to reimburse the state for the federal share of the cost. The Engineer was instructed to write Commissioner Shull, of Multnomah County, in response to his letter of inquiry, advising him that the Federal Government would not participate with Federal funds when a county was the low bidder.

The Chief Counsel then presented a resolution to the Commission with regard to the Commission's authority to regulate or prohibit erection and maintenance of advertising signs within corporate limits of cities if the signs extend into the highway right of way. He advised that the Commission does not have authority inside the city. It was his suggestion that the cities be advised that the Commission considers it unwise to issue permits for such advertising signs. He presented the following resolution which was unanimously adopted, upon motion of Mr. Schaupp, and seconded by Mr. Chessman.

12799

WHEREAS, the Commission is frequently requested to grant permits authorizing the erection and maintenance of advertising signs, emblems or structures within the right of way limits of streets which have been designated by the Commission as streets of an incorporated city over which to route state highway traffic; and

WHEREAS, the Commission is of the opinion that the installation and maintenance of advertising signs, emblems or structures within the right of way of a street, or which may be suspended over a part of the traveled section of such street area or highway, may become a hazard to members of the public lawfully traveling thereon; and

WHEREAS, it is the opinion and judgment of this Commission that the use by private interests for profit of any part of a public highway, either for the installation thereon or the suspension thereover of advertising signs, emblems or structures, is inconsistent with the primary purpose for which such thoroughfare was established and is being maintained, and such use in the judgment of the Commission presents a potential hazard to persons lawfully using said thoroughfare;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and voting affirmatively, as follows:

1. The Commission does hereby find and declare that the use of any part of the area of streets designated by the Highway Commission as streets over which to route state highway traffic, whether such use be by the erection thereon or the suspension thereover of advertising signs, emblems or structures, is foreign to public welfare, is contrary to the primary purpose for which such traffic artery was established and is being maintained and is possessed of potential hazards to traffic and possible inconvenience to public officials in connection with the improvement and maintenance of such street.

2. That it hereby is declared to be the policy of this Commission that the use by private interests for profit of streets under the jurisdiction of the Highway Commission for the erection and maintenance thereon or the suspension thereover of advertising signs, emblems or structures shall be discouraged and, unless warranted by special and peculiar circumstances, applications for permits therefor shall be denied.

3. That consistent with good business judgment and the principles of equity it is the sense and judgment of this Commission that all reasonable effort be made to accomplish the removal of all advertising signs, emblems or structures which have heretofore been placed within or over any part of the area of any street under the jurisdiction of the Highway Commission.

DEC 27 1945

4. That this resolution be entered in the minutes and records of the Commission as of the 27th day of December, 1945.

The matter of a tie bid between Mr. John Lampert and Mr. Everett R. Dennis for one of the buildings at Klamath Falls, recently offered for sale by the Commission, was discussed and the sale of the building to Mr. Lampert was authorized, since Mr. Dennis withdrew his bid.

A request was submitted to the Commission from Mr. F. W. Deedon with respect to the oiling of a section of the Eugene-Walton Secondary Highway between Elmira and Badger Mountain. After discussion of this matter, the Commission denied the request.

The Engineer submitted a request from the City of Salem and Marion County that the state take over and maintain as a by-pass route the South 12th Street by-pass connection with the Pacific Highway East, in Salem. The Engineer suggested that this matter be held in abeyance until the matter of highway routes in Salem has been given further study. His suggestion was unanimously approved.

The Engineer brought to the attention of the Commission a letter and map concerning the location and survey at the north entrance to the City of Corvallis. A delegation from Corvallis was present at the December 13 meeting with regard to this matter, at which time the delegation was advised that the matter would be given consideration at a later date after a preliminary investigation has been made. The Engineer recommended that a survey be made at this point to determine construction costs and to enable him to prepare descriptions to be turned over to the Legal Department to secure options. The Commission ordered that the survey be made and that options be secured and presented to the Commission at a later date without any commitment as to time of construction.

A resolution was presented from the City of Portland, approved by the City Council, with regard to the Sullivan's Gulch location. The Chief Counsel advised that the city, in their resolution, had complied with the Commission's request that such action be taken before the survey was authorized. After discussion of this matter, the Commission authorized a survey at a cost of $15,000.

The Engineer presented a preliminary report to the Commission regarding the issuance of temporary log hauling permits on the Siletz Secondary Highway, in Lincoln County. He advised that a more thorough investigation should be made of this route before further permits are granted and asked the Commission to approve the granting of permits until February 1, by which time the investigation should be completed. The Commission approved the Engineer's recommendation.

The Engineer also brought to the attention of the Commission the fact that a private concern is now operating an airfield between Brooks and Gervais adjacent to the East Side Pacific Highway. He advised that this operation is subjecting traffic to danger and hazard and he recommended that

the matter be referred to the Chief Counsel to see what could be done to protect the public. The Counsel was instructed to take proper action to protect the highway traffic and to investigate the legal status of such operations.

The Engineer advised the Commission that he had been notified by the Public Roads Administration that there are $154,000 of public lands highway funds available for expenditure on public lands highways. He advised that there is a road in Southeastern Oregon, the Burns-Lakeview Highway, being part of US 395, that traverses about 100 per cent public land and that additional construction on this road would reduce the maintenance cost. He recommended that the entire amount, $154,000, be spent on this road. The Commission approved the Engineer's recommendation.

The Engineer then brought up for consideration the matter of changing the designation of The Dalles-California Highway from Klamath Junction to Mazama Junction to a Federal Secondary Highway. At present this section of road is on the Federal Primary System, but when the proposed new route is constructed from near Lobert, easterly of Sun Mountain to Mazama Junction and part of the present route from Fort Klamath Junction north should be removed from the Federal Primary System. It appears necessary to retain that portion of the present Dalles-California Highway from a point near Lobert to Klamath Junction on the Federal Primary System as it connects with the Crater Lake Highway, which is a Federal Primary Highway. He recommended that the section to be removed from the Federal Primary System be made a state secondary highway if such designation meets with the approval of the Klamath County Court. He suggested that the matter of designating as a Federal Primary Highway the Lobert-Mazama Junction location be taken up first with the Public Roads Administration and after it is approved that the Lobert-Klamath Junction section be made a part of the Crater Lake Federal Primary Highway, and the Klamath Junction-Mazama Junction section be placed in the Federal Secondary Systems. The Engineer's suggestion was approved and the Commission signed a letter addressed to the Public Roads Administration with regard to the designation of the Lobert-Mazama Junction location as a Federal Primary Highway.

The Engineer called to the attention of the Commission that the power lines owned by the California Oregon Power Company will need to be moved along South Sixth Street in the city of Klamath Falls, from the present position to a location back of the proposed curbs; likewise, that the water main should be moved from under the pavement to a position back of the curbs to prevent the tearing up of the pavement in the case of a break. The Engineer stated that the Attorney advised the City of Klamath Falls that it would be necessary for them to move the power poles at the expense of the City because of the terms of the franchise the city issued and that he likewise advised the California Oregon Power Company that it would be necessary for them to move the poles outside of the city at their own expense to a location designated by the Engineer. The Attorney was of theopinion that the Commission had the authority likewise to order the water main moved from under the present pavement area outside the city limits to a location back of the curbs, at the expense of the California Oregon Power Company which owns the water service. The Engineer stated that the

California Oregon Power Company estimates that it would cost about $7,000 to move the water pipes from under the pavement to a point back of the proposed curbs in the city area of which cost about $5,600 represents labor. The Engineer advised that the Commission has paid the labor cost under similar conditions in other cities and recommended that the State pay the labor cost to move the pipe line within the city limits, the water company to pay the balance, in the city limits and the entire cost outside the city. The Engineer and the Chief Counsel were instructed to prepare proper agreements to be executed by the California Oregon Power Company, the City of Klamath Falls and the Highway Commission, following the plan recommended by the Engineer and Counsel. In this connection, at the suggestion of Chairman Banfield, the Engineer and Chief Counsel were instructed by the Commission to bring in such agreements for the moving of public utilities in cities well in advance of the advertising of projects.

The Engineer reported that the location survey for the following section of highway has been completed and asked the Commission to approve it as the permanent route of such highway:

> West Union-Cornelius Pass Section of the Hillsboro-Cornelius Pass County Road which is a part of the recommended Federal Aid Secondary Highway System.

The Commission approved the location as reported and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

> WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and location of the West Union-Cornelius Pass Section of the Hillsboro-Cornelius Pass County Road in Washington County, and in connection therewith prepare a map or maps showing the route and location of said section of highway and file said report and record with the Commission for consideration; and
>
> WHEREAS, the Engineer has reported that he has completed the said survey and has submitted the same for the approval or disapproval of the Commission; and
>
> WHEREAS, after due consideration of said survey, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;
>
> NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:
>
> 1. That the survey of West Union-Cornelius Pass Section of the Hillsboro-Cornelius Pass County Road, together with the map, which for identification purposes bears the map file No. 6B-15-4, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

OCT 27 1945

2. That when said section of said highway is permanently constructed the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the 27th day of December, 1945.

The Commission had under discussion the following requests for extensions of time within which to complete highway contracts:

Skelton & Weicks, Contract No. 2707, for the Alsea-Sunset Camp-Vernonia Rock Production Project, in Clatsop County, requested an additional extension of time of two months, from December 15, 1945, to February 15, 1946, within which to complete this job. They attributed their failure to complete the project within the previously-extended time limit to unseasonable weather. The Engineer advised that the reason stated by the contractor for failure to complete the project within the extended time limit is correct and that the delay has not inconvenienced the state. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Guerin Brothers, Contract No. 2717, for the Prospect-Antelope Creek Rock Production Project on Crater Lake Highway, in Jackson County, requested an extension of time of 242 days, from November 1, 1945, to June 30, 1946, within which to complete this job. They attributed their failure to complete the project within the previously-extended time limit to the fact that their plant is snowed in at Union Creek and will not be available for finishing this contract until they can complete Contract No. 2718 at Union Creek. Delay in completing Contract No. 2718 was caused by plant and equipment breakdown and difficulty in securing parts and labor, and by early snows. The Engineer advised that the reasons stated by the contractor for failure to complete the project within the extended time limit are correct, and that the delay has not inconvenienced the Department. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

Guerin Brothers, Contract No. 2718, Union Creek Rock Production Project on Crater Lake Highway, in Jackson County, requested an additional extension of time of 152 days, from November 30, 1945, to May 1, 1946, within which to complete this project. They attributed their failure to complete this job within the previously-extended time limit to early snows, plant and equipment breakdown, and to difficulty in getting delivery of repair parts and a scarcity of labor. The Engineer advised that the reasons stated by the contractor for failure to complete the project within the extended time limit are correct, and that the delay has not inconvenienced the Department. He recommended that the extension of time requested be granted without penalty.

The Commission approved the recommendation unanimously.

Coos Bay Dredging Company, Contract No. 2741, for the Hall Lake Drainage Change Project, Oregon Coast Highway, in Coos County, requested an extension of time from October 30, 1945, to January 3, 1946, within which to complete this job. They attributed their failure to complete the project within the specified time limit to inability to procure necessary lumber due to labor trouble. The Engineer advised that the reason stated by the contractor for failure to complete the project within the time limit is correct. He recommended that the extension of time be granted without penalty. The Commission approved the recommendation unanimously.

The Engineer reported that contracts Nos. 2711, 2714, and 2722 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. The following resolution accepting the above projects was adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2711, with M. C. Lininger & Sons, for furnishing crushed material in stockpiles, on the Elgin Section of the Weston-Elgin and Wallowa Lake Highways in Umatilla and Union Counties; completed September 26, 1945.

Contract No. 2714, with Rogers Construction Company, for furnishing crushed material in stockpiles on the Baker Section of the Old Oregon Trail, Baker-Unity, Baker-Homestead and Medical Springs Highways in Baker County; completed December 12, 1945.

Contract No. 2722, with Rogers Construction Company, for furnishing crushed rock in stockpiles on the Fort Klamath-Lobert Section, and on five adjacent highways, in Klamath County; completed November 17, 1945. Extension of time was approved to November 15, 1945, by the Commission on October 29, 1945. Additional extension of time to November 17 has been requested but not returned from the contractor. (*)

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

Footnote: (*) See next page

Footnote: (*)

Final payment was authorized subject to approval of extension of time of two days, from November 15 to November 17, 1945.

The Commission then had under consideration removal of a building, at the north end of the Waldport Bridge. The Chief Counsel advised that the Commission authorized the owner of this building, Mr. Frank H. Hilton, Portland, to maintain the building on the highway premises for the duration of the war and a period of six months thereafter, which matter was covered by written agreement. He pointed out that the war has not as yet officially been declared over so the agreement is still in effect. He recommended that nothing be done about removing the building until the time limit specified in the agreement expires. The Commission approved his recommendation.

The Chief Counsel reported to the Commission that the Gilchrist Timber Company is hauling logs across The Dalles-California Highway near Crescent. No permit has been issued for this operation and it is the Counsel's opinion that the state has no authority to issue such permit as the trucks are not legal and are not licensed. The logs are hauled over a private road and move across the highway at one point only. He advised that he has prepared a letter to be sent to the Gilchrist Timber Company with a copy to Mr. Charles P. Pray, Superintendent of State Police, advising the Gilchrist Timber Company "that your operation is in violation of the Commission's established policy and procedure and to further advise that you will be held strictly accountable for damage to the highway and that lack of definite action on the part of the Commission to interfere with or prohibit such use of the highway shall not be deemed or construed as a consent or approval on the part of the Commission and that full responsibility must necessarily rest with the Gilchrist Timber Company." After due consideration the letter of the Chief Counsel was approved and the Secretary was instructed to forward such letter to the Gilchrist Timber Company with a copy to the Superintendent of State Police.

The Commission had under consideration an ordinance of the Medford City Council approving the routing of south-bound Pacific Highway truck traffic along Front Street between 4th Street and 10th Street. The Commission noted the ordinance and ordered that it be filed in the Commission's records.

A letter was presented to the Commission by the Engineer from the Coos Electric Cooperative, Inc., of Coquille, Oregon, advising that the company plans to spend approximately $400,000 for street lighting improvements in Port Orford. They desire to make such improvements on the Oregon Coast Highway through Port Orford and have requested that they be advised where the light poles should be placed to conform with the Highway Commission's regulations. The Engineer requested that he be given authority to confer with the company so that the improvements may be made and in the proper manner. The Commission approved his request.

A letter and bill from the American Association of State Highway Officials was presented to the Commission, the bill being for dues to the Association for 1946, in the amount of $450. The Commission authorized the Engineer to draw a check for this amount and forward it to the Association.

A letter from Mr. S. S. Montague, President of the Portland Chapter, Associated General Contractors of America, protesting rejection of bids when higher than the Engineer's estimate was presented to the Commission. The Commission ordered this letter filed in the Commission's records.

The Engineer presented to the Commission a form of agreement in the nature of a claim made by Mr. C. H. Wheeler, contractor who had the contract for the construction of a section of the Oregon Coast Highway from Youngs River Bridge, south of Astoria, to Warrenton. The contractor claims additional compensation for taking out a certain cut below grade which extra work he performed at the request of the state. The Engineer reported that after consultation with the contractor an agreement was reached whereby $4,056.40 was considered adequate compensation for the claims made. The Engineer stated that the extra work performed, which is to be paid for under this agreement, was of benefit to the state and he recommended that this amount be paid and the agreement signed by the Commission. After due consideration the Commission unanimously authorized the payment of the claim and signed the agreement.

The Commission then had under consideration the construction of a bridge known as the Stillwell Bridge just west of Tillamook. The Engineer advised that the funds for this improvement are included in the Major Betterment Budget for 1946. This matter had been discussed previously by the Commission and the project approved.

The Engineer and the Chief Counsel advised the Commission that they were not yet ready to make a report with regard to the establishment of a state park at the head of Wallowa Lake.

The Commission then had under discussion a report on the construction of curbs and sidewalks in Waldport. Mr. Baldock stated that the money for this improvement is included in the budget. After a discussion of this matter the Engineer and the Counsel were ordered to complete the necessary plans and carry on negotiations with the city officials and property owners for the building of the sidewalks and acquisition of the right of way.

The Commission discussed the matter of a two one-way street plan in Pendleton. The Engineer reported that improvement of these streets would cost approximately $100,000 including right of way, and recommended the selection of this project as one of the projects to be constructed with state funds this year. Mr. Schaupp asked what would prevent the City of Pendleton from repealing an ordinance designating the two one-way street plan in the future. It was the Engineer's opinion that channelization of the streets would so change the traffic pattern that it would be impractical for the city to repeal such an ordinance. The Chief Counsel advised that the Commission has no authority to make the city designate one-way streets but merely asks the city to pass such an ordinance to assist the Commission. He suggested that it might be

desirable to go before the Legislature to secure authority for the Commission to designate as one-way streets any streets in this category that are taken over by the Commission in the future. The proposed improvement in Pendleton was unanimously approved by the Commission.

The Commission then had under consideration the matter of one-way streets in Corvallis. The Engineer presented a map showing the proposed routing of traffic on Third Street, Fourth Street, Harrison Street, and Van Buren Street. He advised that the Commission had previously informed the city that the improvement of Harrison Street for north-bound traffic would be authorized by the Commission if the private property owners paid 1/3 of the cost, the city 1/3 of the cost, and the Commission 1/3 of the cost. The Engineer advised that this matter is now before the Corvallis City Council. The Commission approved the report.

The Commission had for consideration the matter of "welcome" signs at highway entrances into Oregon as suggested by the "Keep Oregon Green Association". The Engineer advised that no report was ready.

The Engineer reported that further time was needed with regard to the request of the City of Albany and the Linn County Court for designation as state highways of old highway routes in North Albany. He advised that a report would be made at a later date. In this connection he also advised that no report was ready with regard to the re-routing of logging trucks in Albany.

The matter of construction of a bridge over the Willamette River at Independence had the attention of the Commission. The Engineer and the Chief Counsel advised that this matter was not yet ready to be submitted for the consideration of the Commission.

The matter of securing of options for the building of a new street in the city of Coos Bay to carry northbound traffic, Broadway to carry south-bound traffic, the securing of options for which the Commission had previously approved, was reported by the Chief Counsel who stated that he was not ready as yet to submit the options.

The Commission then had under discussion the establishment of a state-owned ferry service across the Columbia River at Astoria. The Engineer and the Chief Counsel advised that they are not yet ready to report on this subject. They were instructed to bring in the report as soon as it is ready, and the Counsel was ordered to prepare an agreement with the Astoria Megler Ferry Company and Clatsop County and then bring it to the Commission for the consideration of that body.

The Engineer brought to the attention of the Commission the matter of the improvement of two street intersections in Forest Grove. He stated that he was not yet ready to make a report on this matter.

Mr. Baldock then brought to the attention of the Commission a letter from Mr. Frank Shull, Multnomah County Commissioner, with regard to the expenditure of Federal Aid Secondary Funds in Multnomah County. Funds have been set up in the three-year program for the construction of a bridge from the Columbia River Highway to Sauvies Island. The Multnomah County Commissioners now want to change this project and ask that the money be expended for improvement of the roads on the Island due to the fact that they have recently completed the construction of a new ferry. The Engineer was instructed to consult with the Board of County Commissioners and with the Public Roads Administration and make a report on this matter.

The Commission had under consideration the leasing of certain property in Nyssa. The Chief Counsel advised that the individual who formerly made the offer has now withdrawn it and the Commission therefore ordered that the matter be considered closed.

The Attorney also brought to the attention of the Commission the matter of the Knapp Hotel Building in Port Orford. He advised that the project in Port Orford may soon be constructed and he requested authority to advertise the building for sale, the bids to be received in Salem. The Commission approved this suggestion and ordered that the building be advertised for sale.

The Engineer advised that he had no report ready on the modernization of the Siuslaw Highway over the summit of the Coast Range.

The matter of the location survey from Tillamook to Pleasant Valley, on U. S. 101, was brought to the attention of the Commission by the Engineer. He advised that no report was ready but that he expected to call on the Tillamook County Court and city officials in the City of Tillamook shortly to discuss the matter with them.

The Commission recessed for luncheon at 11:55 a.m. and reconvened at 1:30 p.m. in the same room with the same persons present and participating.

The Commission had under discussion the approval of the budget. Details of the proposed budget for maintenance, betterment, operation, including state parks and the Travel Information Department were considered. After full discussion the following budget was adopted by unanimous vote on motion of Commissioner Schaupp, seconded by Commissioner Chessman.

12809

1946 APPROVED BUDGET

RECEIPTS	AMOUNT
State Funds:	
Motor vehicle license fees	$ 3,400,000
Gasoline tax	13,000,000
Diesel fuel tax	225,000
Motor transportation fees	1,950,000
Fines for traffic law violations	85,000
Miscellaneous cash receipts from rentals, discounts, etc.	46,000
County cooperation	2,000
Gross receipts, State funds	$ 18,708,000
Less contributions to State Police	346,000
Less contributions to Counties (15.7%)	2,598,000
Less contributions to Cities (5%)	828,000
Net receipts, State funds	$ 14,936,000
Federal Cooperative Funds	6,970,000
Net receipts for highway purposes	$ 21,906,000
First of year balance	13,466,000
Estimated total available funds	$ 35,372,000

EXPENDITURES

Capital Outlays:	
Federal cooperative projects	$ 12,500,000
State construction projects	1,500,000
Cooperation in forest road work	136,000
Minor betterments (primary)	350,000
Minor betterments (secondary)	150,000
Surveys (primary)	200,000
Surveys (secondary)	100,000
Surveys (county roads)	50,000
Property acquisition, general expense	50,000
Purchase of real property:	
For rights of way, general	775,000
For right of way on Front Avenue ($800,000)	125,000
For quarries and gravel pits	10,000
For stockpile sites	5,000
For parks	125,000
For miscellaneous sites	6,000

DEC 07 1945

Construction of buildings and improvements:		
In parks (general)		75,000
In parks (roadways)		6,000
At maintenance stations		200,000
On other properties		10,000
Equipment:		
Purchase and betterment of equipment		300,000
Sale and depreciation credits	Cr.	200,000
Contingencies, construction		200,000
		$ 16,673,000
Maintenance:		
Special maintenance (primary)		250,000
Special maintenance (secondary)		120,000
General maintenance (primary)		4,400,000
General maintenance (secondary)		1,330,000
Maintenance of county roads		27,000
Maintenance of city streets		100,000
District maintenance superintendence		154,000
Contingencies, maintenance		100,000
		$ 6,481,000
Operation:		
Administration and general supervision		525,000
Planning and traffic surveys		250,000 *
Travel and information bureau		85,000
Radio communication system		13,000
R-W, quarry and stockpile leases		5,000
Park operation and maintenance (general)		130,000
Park maintenance (roadways and minor parks)		11,000
Maintenance station operation		44,000
Truck load inspection		87,000
Drawbridge and ferry operation		90,000
Research and special investigation		15,000
Contribution to retirement fund		90,000
Miscellaneous general expense		50,000
		$ 1,395,000
Service and Clearing Accounts:		
Equipment, repair shops and storerooms (charges)		1,500,000
Equipment, repair shops and storerooms (credits)	Cr.	1,500,000
Rock production projects (charges)		850,000
Rock production projects (credits)	Cr.	850,000

District rock service account (charges)		1,100,000
District rock service account (credits)	Cr.	800,000
Other service and clearing accounts (net)		

Debt Service:

Bond maturities	1,050,000
Bond interest	167,000
Service charge on bond payments	1,000
Estimated total expenditures	$ 26,070,000
Unexpended balances	9,302,000

* Approval withheld on this item pending further consideration.

The Commission withheld approval of the $250,000 set aside for the Traffic Department and planning surveys. The Engineer explained that the Federal government required the expenditure of 1½% of Federal Aid funds for special traffic surveys, inventory of roads, economic investigations and the like, so as to intelligently select projects for improvement. Mr. Tom Davis, of the Public Roads Administration, confirmed this. The Engineer was ordered to make a detailed report on this item for consideration of the Commission at its next meeting.

The following projects were selected for immediate construction, using state highway funds without federal aid and authority was given to bring in options on property acquisition:

COUNTY	HIGHWAY	SECTION AND KIND OF WORK	ESTIMATED COST
Baker	Baker-Unity	Dooley Mt., Widening	$ 154,000
Curry	Oregon Coast	City of Port Orford, Curbs & Pav.	25,000
Deschutes	McKenzie	Overpass near Sisters (State cooperation)	7,500
Deschutes & Linn	Santiam	Hogg Pass Section, Widen Cut	75,000
Douglas	Tiller-Trail	Coffee Creek, Timber bridge	10,500
Jackson	Pacific	Siskiyou Slide, Timber trestle	50,000
Klamath	County Road	Sprague River Road, Bridges & Grad.	150,000
Marion	Pacific East	City of Woodburn, curbs & pav.	75,000
Marion & Polk	County Road	Independence Bridge (State share)	300,000
Tillamook	Netarts Highway	Stillwell Bridge	70,000
Umatilla	Old Oregon Trail	City of Pendleton	100,000

In this connection the Commission again asked the Engineer to make a report on the details of the Ocean Lake project and its extension north to the Dorchester House.

The Engineer then brought up for discussion the matter of sick and accident contracts with the National Hospital Association and the Oregon Physicians' Service. He advised that a representative of the National Hospital Association desires to appear before the Commission in January to discuss matters in connection with the proposed contract with this Association.

The Commission considered and signed agreements, etc., as follows:

Agreement with Southern Pacific Company covering moving of Company's tracks between North Bend and Coos Bay, Oregon.

Agreement with Baker County covering abandonment of old sections of Baker-Homestead Highway.

Agreement with Jefferson County covering abandonment of old section of Madras-Prineville Sec. State Highway.

Agreement with City of Sweet Home covering maintenance of city street by Highway Commission.

Request for vacation of the plat in Dabney Park, Multnomah County.

Agreement with City of Lebanon covering maintenance of city streets by Highway Commission.

Agreement with Peoples Water & Gas Company covering rearranging water pipes in North Bend and Coos Bay.

Agreement with City of Canby covering maintenance of city street by Highway Commission.

Agreement with C. H. Wheeler, contractor, covering adjustment of claim.

Agreement with Spokane, Portland and Seattle Railway Company covering grade separation project on Wolf Creek Highway.

Bargain and Sale Deed conveying to Ben M. Hecht, and wife, land in northeast Portland.

Contract No. 2765 with Vernie Jarl covering Mitchell-John Day River Section, Ochoco Highway, in Wheeler and Grant Counties.

Contract No. 2762 with Vernie Jarl covering Porcupine Butte-Chichester Gulch Section, Shaniko-Fossil Sec. Highway in Wheeler County.

There being no further business to come before the Commission at this time, the meeting adjourned at 4:00 p.m.

T H Banfield
Chairman

State Highway Engineer

Arthur W Schaupp Jr.
Commissioner

Vera Lustig
Acting Secretary

W M Stuart
Commissioner

Portland, Oregon
January 17, 1946

The State Highway Commission met in regular session at 9:00 a.m. in the Auditorium of the Public Service Building. Present were:

A. W. Schaupp, Commissioner (Acting Chairman)
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
C. B. McCullough, Assistant State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Chairman T. H. Banfield was absent on account of illness.

Bids as follows for highway construction work were opened and read in conformity with previously published notice, following which Commissioner Schaupp announced that the awards of contracts would be made at 3:00 p.m. in the same room.

*Bidder will accept only one project.

JAN 17 1946

The Commission disposed of state park matters reported by the State Parks Superintendent, Mr. S. H. Boardman, in person, as follows:

1. The Parks Superintendent reported a request from the Farmers Union of Pedee for the establishment of a state park at Maple Grove, a short distance south of Lewisville, Benton County, on Camp Adair surplus land about five miles west of U. S. 99W. He advised that the state now owns a park in this vicinity, known as Helmick State Park, that fronts on the highway and that the park now proposed, in his estimation, is not suitable for state park purposes. He recommended that the request be denied. The Commission approved the recommendation unanimously but authorized the Parks Superintendent to assist the Farmers Union by giving advice with respect to the development of the area as a park, if they need his help.

2. The Parks Superintendent reported the results of investigations relative to the rental of a state-owned residence building near Bonneville to a Mr. G. E. McConnell. He advised that Mr. McConnell is a Government employee and receives a salary of $230 a month, and under the Army regulations employees are not permitted to pay more than 10 per cent of their salaries for house rent, so it appears that the $25 per month that the state has been receiving for the use of this building is the maximum that it can charge. He pointed out that Mr. McConnell acts as a sort of caretaker for the grounds, for which he receives no compensation, and were the Commission to employ a special caretaker to do this work it would cost the state about $120 per month. Following discussion, Commissioner Chessman suggested that Mr. McConnell be allowed the continued use of the property at the old rate of $25 per month with the understanding that he will maintain the premises in a suitable condition, including the grounds; also, that the matter be covered by written agreement so there would be no misunderstanding later on. His suggestion was approved by Commissioner Schaupp and it was so ordered.

3. The Parks Superintendent brought up for discussion the proposed lease of concession privileges in Silver Creek Falls State Park. The Commission's Chief Counsel read aloud provisions of a proposed agreement covering this concession, which provides that for the use of the lodge and nearby buildings and equipment therein the concessionaire shall pay to the state a monthly rental of $25 plus a percentage of his gross receipts and sales based on a five-year lease. He pointed out that under this arrangement the successful bid would be based on the percentage of gross receipts and sales the concessionaire would pay the state. He further pointed out that the agreement provides for monthly payments by the concessionaire except that for the first six months of his occupancy no payment need be made but the concessionaire shall accumulate and pay the full amount in one lump sum. He also pointed out that the agreement provides that the concessionaire shall maintain a meter to register sales. Following discussion of this matter, Commissioner Chessman moved adoption of the form of agreement. The motion was seconded by Commissioner Schaupp and carried. The Commission

thereupon authorized the Secretary to advertise the sale of this concession for bids to be received at the next regular meeting.

4. The Parks Superintendent brought up for discussion formal acceptance by the Commission of a tract of land situate adjacent to the new route of The Dalles-California Highway at Spring Creek, Klamath County, that Collier brothers of Klamath Falls have presented to the state as a gift, for park purposes, in memory of their parents. He advised that the Commission has not as yet formally accepted this gift and suggested that that be done at this time. The Engineer advised that the Collier brothers have reimbursed the state for advancing the purchase price of the property and that the transaction is now clear. He concurred in the suggestion of the Parks Superintendent that the Commission accept the gift by formal action. Commissioner Chessman moved that the gift be accepted and that an appropriate letter of appreciation be sent to the Collier brothers. Commissioner Schaupp seconded the motion, which carried by unanimous vote.

The Assistant Counsel requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state. He submitted a list of such properties together with the offer that he recommended be made for each parcel. After careful consideration, the Commission approved the request and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

FRONT STREET PROJECT, CITY OF PORTLAND, PACIFIC HIGHWAY WEST

JAN 17 1946

In this connection the Engineer brought up for discussion the proposed improvement of the Oregon Coast Highway between Ocean Lake and Dorchester House, Lincoln County. He advised that, according to the latest estimate, this entire improvement will cost approximately $135,000, including the construction of curbs and a full width pavement between the curbs. He pointed out that the Commission's third year Postwar Program includes an item of $75,000 for grading and construction of bituminous macadam surfacing along this section and suggested that it would be advisable to eliminate this item from the Postwar Program and finance the entire improvement now with state funds so as to take advantage of the offer of Mr. A. C. Kirtsis of free right of way and sidewalks, Mr. Kirtsis having previously agreed to donate sufficient land to provide the standard 100 foot right of way in front of his premises. He urged favorable consideration of this suggestion as being to the best interests of everyone and pointed out that the $75,000 of Federal money would not be lost but could be applied on some other project. In the following discussion Commissioners Schaupp and Chessman indicated that they would approve the arrangement as outlined, if Chairman Banfield offers no objections, whereupon the Engineer advised that he has discussed the matter thoroughly with Chairman Banfield, who asked him to inform the other Commissioners of his approval.

The question of additional right of way cost arose. The Assistant Counsel advised that the final estimate on this item indicates that an expenditure of $44,000 would be required, such amount being mostly for the moving of buildings. The Commission deferred a definite decision in the matter pending consultation with Chairman Banfield. (Commissioners Schaupp and Chessman discussed this matter with Chairman Banfield on the following day and, as a result thereof, approved the method of financing as recommended by the Engineer, and authorized the contracting of the work on such basis as soon as the plans are prepared and right of way acquired.)

The Assistant Counsel requested instructions concerning a small parcel of land in Albany that was sold to Mr. J. A. McDowell of that city as a result of competitive bidding on September 17, 1945. He advised that Mr. McDowell submitted with his bid a proposal guaranty in the amount of $500, but now refuses to accept the deed or to pay the balance due because of a technicality, it being his excuse that he was not notified within the specified time that he was the successful bidder for this property. The Engineer advised that Mr. McDowell was sent the customary tabulation of bids well within the prescribed time limit but he was not officially notified of the acceptance of his offer until the time limit had expired, because of the fact that someone representing him called at his (the Engineer's) office with a compromise settlement which involved the Albany Chamber of Commerce. It appeared to him that Mr. McDowell is now simply wanting to be relieved of his obligation because his offer was so much higher than the other offers received by the Commission. The Assistant Counsel advised that technically the state cannot hold Mr. McDowell to his bid. This was confirmed by the Commission's Chief Counsel whereupon the Engineer recommended rejection of the bid, the return of Mr. McDowell's bid deposit, and that the property be readvertised for sale. The Commission approved the recommendation unanimously.

The Commission discussed a report from the Engineer on the proposed 1946 Budget for planning and traffic surveys, which item was deleted from the budget that the Commission adopted at the meeting on December 27, pending additional information. (See Engineer's report to the Commission dated January 7, 1946, in general files for details) The Engineer presented a proposed budget, as follows, and advised that Chairman Banfield has approved it as prepared:

1946 BUDGET
TRAFFIC ENGINEERING STATE FUNDS

Item	Description		Amount
1	ADMINISTRATION AND GENERAL SUPERVISION		$12,000
2	MINOR SURVEYS		23,600
	a. Signals and Illumination	$10,000	
	b. Intersectional Design	6,600	
	c. School Boy Patrols	750	
	d. Parking Studies	2,750	
	e. Time Studies	1,250	
	f. Railroad Grade Crossing Studies	750	
	g. Interim Committee Studies on Motor Transport	1,000	
	h. Traffic Laws and Regulations	500	
3	CITY STREET INVENTORY SURVEY		3,000
4	MOTOR VEHICLE ACCIDENT ANALYSIS		20,000
	a. Oregon Urban (other than Portland)	7,000	
	b. Rural	5,000	
	c. Portland	6,000	
	Special Studies	2,000	
5	SPEED ZONING		8,000
	a. State Highway Commission	3,000	
	b. State Speed Control Board	5,000	
6	ORIGIN-DESTINATION SURVEYS - ANALYSIS & REPORT		5,000
	a. Portland	3,500	
	b. Klamath Falls	1,000	
	c. Corvallis	500	
7	IBM TABULATING SECTION		12,000
	a. Accident Analysis	6,900	
	b. Weighmaster Operations (Charged to Weighmaster not included in Grand Total)	3,600	
	c. Origin-Destination Surveys	750	
	d. Miscellaneous	750	
	GRAND TOTAL		$80,000

JAN 17 1946

1946 BUDGET
FEDERAL AID PLANNING SURVEY FUNDS

Item	Description	Amount
1	State-wide traffic counts	$ 46,300
2	Automatic recorders	7,370
3	Special city traffic counts	26,600
4	Origin and destination traffic survey	5,000
5	Special studies and reports	5,500
6	Bridge inventory	8,000
7	Preparation of maps and cost estimates for sub-standard highway sections	5,000
8	State highway inventory and current costs and earnings records	3,600
9	Collection of annual statistics	1,000
10	Highway research correlations	2,550
11	Revision of road inventory	6,000
12	Revision of maps and straight lines	5,000
13	Federal Aid Secondary Highway Survey	5,000
14	Special Bridge Investigations	15,000
		$141,920
	Contingencies	28,080
	Total	$170,000

Following discussion, Commissioner Chessman moved adoption of the budget. The motion was seconded by Commissioner Schaupp and carried.

The Engineer reported on the request of the "Keep Oregon Green Association" that the State Highway Commission authorize the maintenance of rustic "welcome" signs at state highway entrances into Oregon. He advised that investigations have been made and it appears that there are only four suitable locations at the state boundary line: Longview Spur near Rainier, Oregon Coast Highway near Brookings, Redwood Highway near the state line, and the Pacific Highway at the Siskiyou Summit. He further advised that members of the committee representing the Association have approved these sites. He recommended installation of a sign at each of such points. He estimated the cost involved at $300 each. During the discussion, Commissioner Chessman suggested that it might be advisable to install one of the signs on the Oregon Coast Highway near Astoria. Commissioner Schaupp suggested the installation of a sign at the junction of U. S. 97 with U. S. 99 in Weed, California. The Commission took no definite action on these two additional sites; however, authorized the erection of four signs at the approved locations with the understanding that additional signs may be erected later if the four now approved bring desired results.

JAN 17 1946

The Engineer brought up for discussion the proposed rerouting of logging trucks through Salem. He advised that the trucks are now routed over the Silver Creek Falls Secondary Highway (East State Street) to 12th Street, thence on 12th Street to Court Street, thence on Court Street to Capitol Street (U. S. 99E), thence along Capitol Street to Highland Avenue, thence along Highland Avenue to Cherry Street, and north along Cherry Street to the mill. This routing, he said, is not satisfactory on Salem's heavily traveled streets, so it has been proposed to reroute them on county roads so they will enter the city over the Silverton County Road which connects with Highland Avenue. Such routing, he said, has been approved by the City of Salem and by the Marion County Court, the County Court's approval being based on the installation of traffic scales on the Silverton Road to weigh the trucks that pass over the county highways. He recommended approval of such route, including installation of scales as required by the County, and that the matter be covered by a written agreement with the County. The Commission approved the recommendation unanimously upon motion of Commissioner Chessman, which was seconded by Commissioner Schaupp.

The Commission had under consideration the bids received in Salem on January 15, 1946, for the purchase of the old Knapp Hotel building at Port Orford, and the buildings located at the former WPA camp near Manning, Washington County. The Commission rejected the bids received for the Knapp Hotel building and authorized the Chief Counsel to negotiate the private sale of this building. The Commission voted unanimously to accept the high bid received for each of the buildings located at the old WPA camp near Manning, which high bids are as follows:

Item No.	Item	High Bidder	High Bid
1	Barracks Bldg. No. 1	Joseph B. Vanderwelden, Forest Grove	$ 76.00
2	" " " 2	" " " " "	66.00

15	Kitchen "	W. D. Dennis, Banks	331.00

The Engineer reported the results of an arrangement effected with the officials of the Oregon-Washington Telephone Company concerning the location of its telephone poles on the Central Oregon Highway between Bend and Burns. He advised that, pursuant to the Commission's instructions, a conference was held in his office with Messrs. W. H. Dean and Z. O. Brooks, company officials, and a mutual agreement was reached whereby the poles that now constitute a hazard to highway traffic will be moved back immediately to standard alignment, and the remaining poles will be allowed to remain in their present location for not to exceed 15 years, when all of them shall have been re-established in the proper location near the right of way line. He recommended approval of this arrangement. The Commission approved the recommendation unanimously.

The question of acquiring additional-width right of way for the Sylvan-Barnes Road Section of the Wolf Creek Highway (later renamed Sunset Highway) was brought up for discussion by the Engineer. He advised that right of way for this section of highway was acquired in 1936 on a 100-foot basis, which is too narrow for a highway of this importance; moreover, no provision was made for limiting the right of access thereto. He further advised that Commonwealth, Inc., a Portland concern, has plans to subdivide and develop considerable acreage along the highway at this point and is securing options on the land at the price of $2,000 per acre. He suggested that it would be advisable to commence immediately to acquire a standard-width right of way 220 feet wide along this section and rights of access thereto so as to avoid complications with the development company later on and the extra expense which undoubtedly would result if the acquisition were delayed. He requested authority to make surveys, from which descriptions of the properties may be prepared, and authority for the Right of Way Department to take options for the land required. The Assistant Counsel estimated that the right of way, including restricted access, would cost a total of about $130,000. He confirmed the Engineer's statement that the development company is obtaining options at $2,000 an acre and concurred in the recommendation that right of way negotiations be commenced now. Commissioner Chessman expressed himself in favor of securing the options, but he was not in favor of completing any purchase. Commissioner Schaupp expressed himself similarly. The Engineer was thereupon authorized to complete the survey and write the property descriptions, and the Chief Counsel was authorized to negotiate for options.

A letter was presented from County Judge Charles E. Baird, Baker County, advising that the County Court of Baker County approves the transfer of $303,000 of Federal Aid Secondary Highway Funds, heretofore budgeted by the Commission for the improvement of the Sumpter Valley Secondary Highway as a postwar project, from such project to the improvement of the Baker-Unity Highway over Dooley Mountain, as proposed at the Commission meeting held on December 13,1945. In view of this letter, the Commission voted unanimously to proceed with the Dooley Mountain improvement in conformity with the action taken by the Commission at the former meeting. The Engineer was authorized to do what is necessary to secure the Public Roads Administration's approval to such change.

The Engineer presented a list of construction projects proposed for financing entirely with state funds and requested authority to advertise them for competitive bidding. The Commission deferred action on the matter pending consultation with Chairman Banfield. (See minute entry on following day for final action).

A letter was presented from Mr. George W. Knox, Ashland, requesting a definite statement from the Commission as to when the proposed improvement of the Pacific Highway at Plaza Corner in Ashland will be undertaken. The Secretary was instructed to inform Mr. Knox that, due to unsettled conditions, the Commission is unable to state when the project will be placed under contract, but that the work will be done when the time is propitious.

Consideration was given by the Commission to a request from the City of Ione for state maintenance of certain city streets that are used by wheat hauling trucks. The Engineer advised that inspection of these streets reveals that the streets are in very good condition at the present time and that there is no apparent reason why the city cannot finance small repair work with funds it receives under the provisions of the State Tax Street Fund Law, as the necessity arises. He recommended that the request be denied. The Commission approved the recommendation unanimously.

The Engineer reported on a request from Messrs. H. S. Mersereau and J. F. Daggett, Prineville, for a cattle pass under and across the new location of the Madras-Prineville Secondary Highway, which bisects their farm between the Jefferson County line and Lytle Creek. The Engineer advised that these gentlemen suggest that the installation of several hundred feet of highway drainage pipe called for in the plans of the proposed improvement could be avoided if the state installed one 72-inch pipe through a nine foot fill in front of their premises, which opening, they allege, could be used not only for drainage purposes but also as a cattle pass. The owners allege, he said, that the highway bisects their property in such a manner that their barns and other buildings are on one side of the highway and that the only pasture they have available for stock is on the opposite side, and unless the cattle pass is constructed it will be necessary to drive their cattle back and forth across the highway daily, which, in their estimation, will create a serious traffic hazard and can be avoided if the cattle pass were made available. The Engineer advised that some of the pipes that are to be installed are for irrigation purposes and cannot be changed unless the above parties will find some other way to carry irrigation water to their land; however, others are drainage pipes which could be eliminated and the water carried through the cattle pass. He estimated the cost of the underpass at approximately $900 and advised that the state would benefit to the extent of about $450 by the elimination of the drainage pipes. He recommended construction of the cattle pass on the basis that the owners will pay one-half of the cost of the same. The Commission approved the recommendation unanimously in order to avoid the potential hazard.

A letter was presented from Mr. Ray Hough inquiring as to the status of the improvement of the Klamath Lake Secondary Highway between Klamath Falls and Fort Klamath. The Engineer advised that this project is low in priority among projects in the Klamath Falls district. Commissioner Schaupp stated that the road is in need of improvement but pointed out that no provision has been made in the Postwar Program for such an improvement. He suggested that Mr. Hough be informed to that effect, and also, that he be told that the Commission has no plans for the improvement of the road and that its finances at the present time are such that the Commission is precluded from making any commitment thereto. The suggestion was approved by Commissioner Chessman and it was so ordered.

A petition was presented from taxpayers and citizens of the Lorane community, Lane County, requesting the oiling of the Territorial Secondary Highway from its junction with the Lorane County Road at Gillespie Corner to the Lane-Douglas County line, a distance of about ten miles. The petitioners alleged that this road "is in a deplorably rough condition" and "is in such state of disrepair as to endanger life." The Engineer advised that the road under discussion has a graveled surface and that the Highway Department is spending an appreciable sum of money annually to keep it maintained in as good a condition as a graveled road can be kept; also, that it is not in a deplorable condition such as the petitioners allege. He further advised that the Commission has budgeted the amount of $310,000 to oil about ten miles of this road at its northern end during the second postwar year, although no money has been appropriated to oil the section requested by the petitioners. The Commission ordered that the petitioners be informed to that effect and that the Commission is precluded at the present time from allocating funds to oil this section because of its other financial obligations.

The Engineer reported on a request from residents of Oceanside for a 200-yard extension of the Netarts Secondary Highway northerly from the present terminus of this highway in Oceanside so as to provide a good roadway to their public parking area. He said that investigation of the matter reveals that the proposed extension is not a proper one for this secondary highway and that rightfully the improvement comes under the jurisdiction of the Tillamook County Court; further, that the matter has been discussed with County Judge Harland M. Woods who has agreed that the matter should be referred to the county for any additional improvement that may be needed. The Commission approved the report and ordered that the petition be referred to the County Court for further handling.

The Commission recessed at 12 o'clock noon and reconvened in the same room at 2:00 p.m. with the same persons present and participating.

The Commission discussed with the Engineer the bids received at the morning session for highway construction and took the following action thereon by unanimous vote;

Redmond Rock Production Project on four state highways, in Crook and Deschutes Counties. The Commission awarded this contract to Struss & McCoy, the low bidder.

Grading and surfacing the Gates-Niagara Section of the North Santiam Secondary Highway, Marion County. The Commission deferred the award of this contract pending satisfactory agreement with the Southern Pacific Company covering encroachments on railroad property. The bids were referred to the Engineer with authority to award the contract to the low bidder when this condition has been satisfied.

Grading and surfacing the Buell and Salt Creek-Dolph Corner Sections of the Dallas-Coast Secondary Highway, in Polk County. The Commission awarded this contract to the low bidder, O. C. Yocom Company, on the basis of using tar.

Construction of a bridge over Mill Creek on the Dallas-Coast Secondary Highway near Buell, Polk County. The Commission rejected all bids received for this job.

Grading the Berger Ranch-Barnes Road Section of the Wolf Creek Highway (renamed Sunset Highway), Washington County. The Commission awarded this contract to the low bidder, Sound Construction and Engineering Company, Seattle.

Construction of a pile trestle bridge over McKay Creek on the Wolf Creek Highway (renamed Sunset Highway), in Washington County. The Commission awarded this contract to the low bidder, C. J. Eldon.

The Engineer reported that the following-named cities and towns have satisfied the legal requirements with respect to the disbursement of the funds that they received in 1945 from 1944 revenues of the State Highway Fund under the provisions of the State Tax Street Fund Law and that plans submitted by all of them have been examined and been found satisfactory:

Chiloquin	Florence	Ione
Empire	Freewater	Sherwood

He recommended approval of the plans by the Commission. The Commission approved the recommendation and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by this Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calender year 1945 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Chiloquin	$1,035.73
Empire	929.50
Florence	640.17
Freewater	1,153.14
Ione	366.21
Sherwood	624.79

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Chiloquin - All streets within the corporate limits
Empire - Broadway Street, Pennsylvania Avenue, Newmark Avenue
Florence - Front Street, Main Street
Freewater - Robbins Street, Washington Street
Ione - Second Street, "H" Street
Sherwood - Washington Street

2. That the type, plan and character of improvement proposed in the resolutions filed with this Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That Resolution Form 3 adopted by the City of Freewater and approved by the State Highway Commission on August 31, 1945 shall be canceled, in accordance with the request of the City of Freewater on file in the records of the Oregon State Highway Department, and Resolution Forms 1 and 2 hereby approved be substituted therefor.

5. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plan submitted by the city.

6. This resolution shall be entered in the minutes and records of this Commission as of the 17th day of January, 1946.

JAN 17 1946

Consideration was given by the Commission to the general apportionment of State Highway Funds to the cities and towns of their five per cent share of the 1945 highway revenues as is required by the provisions of the State Tax Street Fund Law. The Engineer presented a statement of the apportionment showing the amount allocated to each city and town and advised that they have been carefully checked and are correct. He asked the Commission to approve the apportionment by appropriate resolution. The following resolution with regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, it is provided by Chapter 371, Oregon Laws, 1943, that:

> "Beginning with the year 1943 and annually thereafter there shall be and hereby is appropriated out of the state highway fund such sums of money as will equal 5 per cent of all moneys credited to the state highway fund by the state treasurer between January 1 and December 31 of each year, and which have accrued from funds transferred to the state highway fund by the state treasurer under the provisions of section 115-135, O. C. L. A., and under the provisions of section 115-528, O. C. L. A., and under the provisions of section 110-1705, O. C. L. A., and from fines and penalties assessed and collected for violations of the motor vehicle and transportation laws, and which have been paid to the state treasurer, which appropriation shall be distributed among the several cities as provided in this act; but in no event shall payment under this act be made to cities for any year unless more than $11,000,000 is credited to such fund, and allocations hereunder shall be made to cities only from any excess over $11,000,000 credited to such fund in any year."

AND, WHEREAS, the moneys which have been credited to the state highway fund by the state treasurer between January 1 and December 31 of the year 1945, and which have accrued from the sources designated in said Chapter 371, Oregon Laws, 1943, amount to $16,550,494.56, being as follows:

Section 115-135, O. C. L. A. (Motor Vehicle License Fees)	$ 3,416,141.33
Section 115-528, O. C. L. A. (Motor Transportation Fees)	2,009,059.92
Section 110-1705, O. C. L. A. (Gasoline Tax)	11,033,246.54
From fines and penalties assessed and collected for violations of the motor vehicle and transportation laws, and which have been paid to the state treasurer	92,046.77
Total	$16,550,494.56

JAN 17 1946

AND, WHEREAS, the five per cent of this $16,550,494.56 which is available for apportionment to the cities and towns amounts to $827,524.73;

AND, WHEREAS, an additional sum of $135.58, which was apportioned to the City of Silver Lake for the year 1944, but which was not paid by reason of the city having voted to disincorporate, is also available for inclusion in the amount to be apportioned for the year 1945.

AND, WHEREAS, the total amount to be apportioned to the cities and towns for the year 1945 is $827,524.73 plus $135.58 or $827,660.31;

AND, WHEREAS, the apportionment of the $827,660.31 to the cities and towns of the State is to be based upon the "population" as defined by Chapter 371, Oregon Laws, 1943, subject to such changes as have been made under authority of Chapter 122, Oregon Laws 1945:

AND, WHEREAS, by applying the factors of allocation provided for in said Chapter 371, Oregon Laws 1943; and Chapter 122, Oregon Laws 1945; the State Highway Commission has arrived at and made its apportionment of the said $827,660.31 to the several cities and towns of the State;

NOW, THEREFORE, the State Highway Commission does hereby certify to the Honorable Robert S. Farrell, Jr., Secretary of State of the State of Oregon, the following apportionment or appropriations out of said state highway fund for the calendar year 1945, to wit:

I. Cities of Populations 1,000 or More

* Population as determined by actual count made under supervision of Secretary of State.

That before cities having populations less than 1,000 may expend funds apportioned to them out of said state highway fund, they must first qualify by submitting to the State Highway Commission, for approval, plans for the expenditure of such funds.

That a certified copy of this resolution and certificate be delivered to the said Secretary of State for his use and guidance in the administration of said law.

That this resolution be entered in the minutes and records of the Commission as of January 17, 1946.

The Engineer advised that, in conformity with authority previously granted him by the Commission, he has awarded contracts as follows, bids for which were received by the Commission at its meeting on December 13 and 14, 1945:

Contract for North Bend-Coos Bay Section of Oregon Coast Highway, awarded on January 2, 1946, to Porter W. Yett, low bidder

Contract for The Dalles-Maupin Rock Production Project, awarded January 2, 1946, to J. S. Risley, low bidder

Contract for Arthur Street Overcrossing, Portland awarded on December 27, 1945, to Marine Contractors, Inc., low bidder

The Commission, by unanimous vote, confirmed the awards as reported.

A letter was presented from Mr. C. W. Morse, Portland, requesting state aid in the development of his private property, consisting of 20 acres of land situate on the west side of the Oregon Coast Highway about one-third mile north of the Alsea Bay Bridge at Waldport. Mr. Morse advises that he has plans to level off his land and construct a service station, store building, and cabins thereon, but in order to do this it will be necessary to remove considerable dirt from the highway right of way, the highway at this point being in a deep cut. He estimated that there are 1800 yards of material to be moved and inquired whether or not the State Highway Department would remove it at state expense or pay him to remove it. He also requested access to his property from the highway along the entire property frontage. The Engineer gave as his thought that this is a private undertaking in which the state is not interested and recommended that Mr. Morse's request be denied and that he be required to remove this material at his own expense; further, that Mr. Morse be required to provide access to this property in conformity with the established policy, which limits the number of access roadways that will be allowed. He also suggested that the proposed development should be investigated by the landscape engineer to determine whether or not it will result in damage to the highway or the public so that provision for the same may be made in the permit or agreement that may be issued covering operations on the state's property. The Engineer's recommendations were approved by the Commission by unanimous vote.

The Commission discussed a request from the Wasco County Court and the City Water Commission of The Dalles that the State Highway Department include in its contract for the improvement of the Mill Creek Federal Aid Secondary Highway (County Road) provision for moving and re-establishing the city's water mains that are now being maintained beneath the road surface. The Engineer advised that the Mill Creek Road is scheduled for improvement as a Federal Aid Secondary Highway, the sum of $215,000 of the first year postwar funds having been allocated for the same; further, that the City Water Commission has agreed to furnish all new water pipe that is required and that the expense of excavation, moving the present water pipes, and the installation of the new pipe will be paid for two-thirds by the county and one-third by the City Water Commission thus relieving the state from any of such expense. The county and the city will deposit a check with the Commission to pay for all of these items when the Commission awards the contract for the work and the cost of the rehabilitation of the water main has been determined. In other words, the county and the city wish the work of rehabilitating the pipeline to be done by the state's contractors so as to secure the benefit of the state's prices, and have agreed to pay all costs incident thereto. He recommended approval of the request. The Commission approved the recommendation by unanimous vote.

The Engineer reported that the survey to establish the location of the "Fuller" and "Ojalla" bridges on the Siletz Secondary Highway, in Lincoln County, has been completed and asked the Commission to approve it as the permanent location of said bridges and of the said highway at such points.

The Commission approved the survey as reported and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and location of the "Fuller and Ojalla" Section of the Siletz Secondary State Highway in Lincoln County, and in connection therewith, to prepare a map or maps showing the route and location of said sections of highway and file said report and record with the Commission for consideration; and

WHEREAS, the Engineer has reported the completion of the said survey and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said survey, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, a majority of the members being present and affirmatively voting as follows:

1. That the survey of the "Fuller and Ojalla" Sections of the Siletz Secondary State Highway, together with the map, which for identification purposes bears the map file number 3V-11-1, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

2. That when said sections of said highway are permanently constructed the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the seventeenth day of January, 1946.

The Engineer reported that State Highway Contract No. 2745 with Newport, Kern & Kibbe covering the furnishing of crushed materials in stockpiles for the Old Oregon Trail and the Wallowa Lake and Cove Secondary Highways, in Union County, was satisfactorily completed by the contractor in accordance with the provisions of the contract or modifications thereof on January 10, 1946. He recommended the acceptance of this contract by the Commission and that authority be granted for the payment of the final estimate. After due consideration, the Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, the Engineer has reported that State Highway Contract No. 2745 for furnishing crushed materials in stockpiles on the Old Oregon Trail and on the Wallowa Lake and the Cove Secondary Highways was completed on January 10, 1946, according to

the terms and provisions of the contract and that the said job is now ready for acceptance:

THEREFORE, BE IT RESOLVED that the work covered by said State Highway Contract for the furnishing of said crushed materials in stockpiles be declared completed according to the terms of the contract and that said job is hereby accepted and final payment in connection therewith is hereby authorized.

The Engineer reported that, pursuant to the Commission's instructions, notification was sent to the several counties and cities that have agreements with the Commission for the temporary maintenance of county roads and certain city streets, that the Commission is desirous of terminating such agreements, except that in the case of the Clatsop County Court and the cities of Warrenton and Hammond letters were sent inviting them to be present at the next meeting of the Commission for discussion of their problem. He further reported that replies have been received as follows:

Polk County Court agrees to the termination of the maintenance agreement now in effect on the Independence-Granger Road on the condition that this road be made a state secondary highway, and in that event the county will assume jurisdiction over the former route of the Pacific Highway West between Monmouth and Suver, which is now being maintained by the state as a state secondary highway.

The City of Independence also agrees to the termination of the maintenance agreement covering the Independence-Granger Road as of March 31, 1946, insofar as it pertains to the section that lies within the City limits of their city.

The Umatilla County Court agrees to the termination of the agreement with respect to the maintenance of the county road which extends from Hermiston to the Umatilla Ordnance Depot, as of December 31, 1945.

The Marion County Court has signified its willingness to continue the present arrangement for the maintenance of the Gates-Detroit Section of the North Santiam Highway until such time as the new highway between these points is completed.

The Jefferson County Court agrees to the termination of its agreement for state maintenance of two bridges on the Culver-Grand View County Road as of December 31, 1945, and also agrees to the termination of its agreement for state maintenance of the Madras-Redmond Target Range Road effective March 3, 1946.

He further stated that no reply has as yet been received from the Benton County Court with respect to the termination of the agreement covering the state maintenance of the Benton County Section of the Granger-Independence Road, but information received indirectly is to the effect that the county

desires this road to be placed on the state secondary highway system in exchange for another secondary highway in Benton County. With respect to the Clatsop County Court and the cities of Warrenton and Hammond, he advised that information has been received to the effect that representatives of these places will be present on the following day for discussion of the termination of their agreements. In the discussion of this matter the Commission instructed the Engineer to investigate the exchange of secondary highways in Polk and Benton Counties. The Commission approved the termination of the agreements with Umatilla County and Jefferson County and also approved the continuance of the agreement with Marion County with respect to the North Santiam Secondary Highway. Action on the termination of the agreements with Clatsop County and the cities of Warrenton and Hammond was deferred pending discussion with the delegation on the following day.

A letter was presented from the National Council of State Garden Clubs, Inc. requesting the Commission's approval of the designation of U. S. Highway No. 101 as a unit of a memorial highway route in tribute to the armed forces of World War II. The Engineer recommended that the request be denied. The Commission approved the recommendation. In this connection Commissioner Chessman suggested that the Wolf Creek Highway be renamed "Sunset Highway" as a tribute to the Sunset Division of the U. S. Army, which is composed largely of men from the Pacific Northwest. It was his thought that this is a natural designation, not only as a tribute to this division, but because this highway leads toward the setting sun. In any event, "Wolf Creek Highway" is a misnomer because there are so many places known by that name in the State of Oregon. Following discussion, motion was made by Commissioner Chessman that this highway be renamed "Sunset Highway" for the reasons stated. The motion was seconded by Commissioner Schaupp and carried unanimously.

The Commission discussed a letter from the Albany Junior Chamber of Commerce requesting the privilege of using Waverly Lake and the surrounding state-owned property at Albany in connection with their annual "Timber Carnival," which is scheduled to be held on July 3 and 4. The Engineer recommended approval of this request subject to certain conditions that are to be imposed for the protection of the state's property and provided there are no legal impediments. The Chief Counsel advised that the Commission has the legal authority to allow the use of the property for this purpose if it so desires. The request was thereupon granted by the Commission by unanimous vote subject to the conditions mentioned by the Engineer.

A letter was presented from the Salem Electric Company requesting permission to maintain a single power pole on the right of way of the Salem-Dayton Secondary Highway (Wallace Road), in West Salem. The Engineer advised that this is a controversial matter that involves the policy of the Highway Commission in that the facilities of the Portland General Electric Company already occupy the highway at this location under a county franchise. According to the Highway Commission's regulations, he said, the latter company must allow joint use of its poles by the other company in order to avoid a multiplicity of poles on the highway right of way. It appears that the Salem Electric Company and the Portland General Electric Company are unable

to arrive at a satisfactory agreement with respect to the joint use of the facilities, in view of which the Salem Electric Company now desires a permit of its own. He suggested that it might be possible to iron out the differences between these two companies were a conference held among the officials. The Commission approved the suggestion and authorized the Engineer to call such a conference in his office in Salem at a convenient time in the near future. (The meeting was later arranged for Monday, January 21, 1946)

The Engineer advised that Mr. Austin J. Ford has replaced Mr. J. G. Toole as District Maintenance Superintendent at Eugene and that it would be convenient if both Mr. Ford and his officeman, Mr. Charles J. Thornton, were authorized to sign emergency transportation permits in order to expedite emergency movements over state highways. The Commission approved the recommendation. The following resolution with regard thereto was adopted by the Commission by unanimous vote:

WHEREAS, the Commission heretofore, to wit: on the twenty-fourth day of October, 1944, approved and adopted a resolution by which the Commission approved and adopted certain forms of permits as the forms to be used when permits are issued under the provisions of Section 115-393, O. C. L. A.; and

WHEREAS, in and by said resolution the Commission named certain state highway employes, to each of whom the Commission gave authority to sign permits issued on either of the forms identified and approved in said resolution; and

WHEREAS, it now appears that by the naming of additional employes and by vesting in them authority to sign such permits the business of the Commission can be more expeditiously disposed of and the public interests better served;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively, as follows:

1. That the following state highway employes:

Austin J. Ford, District Maintenance Superintendent, Eugene;
Charles J. Thornton, Officeman, Eugene;

hereby are authorized to sign permits for the movement over state highways of motor vehicles, articles or things when such movements and such vehicles come within the purview, purpose and meaning of Section 115-393, O. C. L. A., and within the purpose and meaning of the Commission as disclosed and declared in said resolution adopted October 24, 1944.

2. That all of the instructions, requirements and provisions set out in said resolution of October 24, 1944, shall apply to and control the action of the employes herein named.

3. No permit shall be issued by any of said employes unless and until all of the facts have been communicated to the State Highway Engineer and to the Secretary of the Commission, and the issuance of such permit has been approved by them.

4. No permit shall be issued by any of the persons named herein or by any of the persons named in said resolution of October 24, 1944, unless and until adequate insurance has been exacted from the applicant for the protection of the members of the Commission and the members of the general public.

5. None of the persons named herein and none of the persons named in the said resolution of October 24, 1944, may issue a permit on any form other than one of the forms heretofore approved.

6. This resolution shall modify and supplement the resolution of October 24, 1944, to the extent and in the manner herein set out and not otherwise.

7. This resolution shall be entered in the minutes and records of the Commission as of January 17, 1946.

The Commission, by unanimous vote, cancelled the authority heretofore given Mr. J. G. Toole, formerly District Maintenance Superintendent at Eugene, and that heretofore given Mr. H. H. Heath, Officeman in the District Maintenance Superintendent's office in Klamath Falls, to sign permits on behalf of the Commission, Mr. Toole having been transferred to other work where such authority is not required and Mr. Heath having severed his connections with the State Highway Department.

The Commission discussed the dates for its next two regular meetings for the receiving of bids for construction work. The Engineer advised that Chairman Banfield has approved the holding of such meetings on Monday and Tuesday, February 25 and 26, and on Tuesday and Wednesday, April 2 and 3, 1946, if those dates are convenient for the other Commissioners. Commissioners Schaupp and Chessman both declared such dates satisfactory whereupon the Secretary was instructed to arrange to hold the meetings as usual in the Auditorium of the Public Service Building, Portland.

At 3:00 p.m. Commissioner Schaupp announced awards as follows for highway contract work, concerning which bids were received at the morning session, the awards having previously been approved by the Commission by unanimous vote:

"Redmond Rock Production Project on four state highways, in Crook and Deschutes Counties. The low bid for this work was submitted by Struss & McCoy, Redmond, at $26,160. The next low bid was that of Arthur Gentemann, Portland, at $31,800. There were seven higher bidders. The Commission has awarded the contract to the low bidder, Struss & McCoy, at their bid price of $26,160.

"Grading and surfacing the Gates-Niagara Section of the North Santiam Secondary Highway, in Marion County. Kuckenberg Construction Company, Portland, was the low bidder for this work in the amount of $387,929, based on the use of tar. They did not submit a bid based on the use of asphalt. Berke Bros., Portland, submitted the next low bid in the amount of $415,520, based on the use of asphalt. They did not submit a bid based on the use of tar. There were three higher bidders. The Commission has referred the bids to the Engineer with authority to award the contract to the low bidder, Kuckenberg Construction Company, when certain conditions have been satisfied.

"Grading and surfacing the Buell and Salt Creek-Dolph Corner Sections of the Dallas-Coast Secondary Highway, in Polk County. O. C. Yocom Company, McMinnville, submitted the low bid for this work in the amount of $152,869 based on the use of tar. Their bid based on the use of asphalt was $153,181. Babler Bros., Portland, submitted the next low bid in the amount of $167,135, based on the use of tar. They did not submit a bid based on the use of asphalt. There were three higher bidders. The Commission has awarded this contract to the low bidder, O. C. Yocom Company, at their bid price of $152,869 based on the use of tar.

"Construction of a bridge over Mill Creek on the Dallas-Coast Secondary Highway near Buell, Polk County. The Commission received seven bids for this work, all of which were considered too high. The bids have been rejected.

"Grading the Berger Ranch-Barnes Road Section of the Sunset Highway (formerly Wolf Creek Highway), in Washington County. Sound Construction and Engineering Company, Seattle, submitted the low bid for this work in the amount of $150,759.40 based on the use of asphalt. They submitted no bid based on the use of tar. Kuckenberg Construction Company, Portland, submitted the second low bid in the amount of $152,311 based on the use of tar. They submitted no bid based on the use of asphalt. There were ten higher bidders. The Commission has awarded this contract to the low bidder, Sound Construction and Engineering Company, at their bid price of $150,759.40 based on the use of asphalt.

"Construction of a treated pile trestle bridge over McKay Creek on the Sunset Highway (formerly Wolf Creek Highway), in Washington County. The low bid for this work was submitted by C. J. Eldon, Portland, at $14,249.80. The next low bid was submitted by W. H. Philpott, Portland, at $14,534. There were four higher bidders. The Commission has awarded this contract to the low bidder, C. J. Eldon, at his bid price of $14,249.80."

The Commission discussed the following matters of unfinished business:

1. Proposed state park at the head of Wallowa Lake, Wallowa County. The Engineer advised that the report is not ready but he

anticipates that he will be able to present it at the next meeting of the Commission.

2. Proposed state park on Rogue River at Camp White, Jackson County. It was stated that the report on this matter is not ready.

3. Question of paying a Federal tax on parks presented to the state as gifts. The Chief Counsel advised that the State Tax Commission has taken cognizance of this matter and will exempt such gifts from tax impositions; however, it appears that nothing can be done with regard to the Federal Government regulation, so if taxes are imposed, they will have to be paid.

4. Report on survey in the City of Coos Bay for a new route to carry northbound Coast Highway traffic. The Engineer and the Chief Counsel advised that this matter is not ready to be reported on.

5. Question of designating former highway routes in North Albany as state secondary highways so as to relieve the City of Albany from maintenance expense caused by log hauling traffic. The Engineer advised that he is not ready to make a report on this matter but anticipates being able to do so at the next regular meeting of the Commission.

6. Request of the City of Albany for the rerouting of logging trucks which enter the city from Benton County via the Willamette River Bridge. The Engineer advised that he expects to be able to report on this matter at the next meeting of the Commission.

7. Report on the proposed bridge over the Willamette River at Independence. The Engineer and the Chief Counsel advised that this report has not as yet been prepared.

8. Report of the Engineer on the cost to modernize the Siuslaw Highway over the summit of the Coast Range. The Engineer advised that he has not as yet had time to render this report but will do so as soon as possible.

9. Proposed modification of the agreement with the hospital associations for the furnishing of medical aid to Highway Department employees. The Engineer advised that a satisfactory agreement has been reached with both associations which provides for new agreements to be effective January 1, 1947, and it is planned to have the new agreements approved and ready by July 1, following which the matter will be discussed with officials of the State Employees Association, and then the personnel of the Highway Department will be circularized to determine which of the two companies, if either, they desire to affiliate with. The Engineer also stated that there is no argument with the Oregon Physicians' Service, but the differences are with the National Hospital Association, which will have someone present on the following day to discuss this matter with the Commission. The Commission approved the report.

10. Claim of Miss Maud Campbell for alleged damage to her property at the north end of the Union Avenue Viaduct, Portland, on account of the viaduct construction. The Chief Counsel advised that Miss Campbell's property is situated at the north end of the Union Viaduct and is considerably lower than the grade of the highway. Part of her property was acquired in connection with this highway improvement, but the Commission had trouble reaching an agreement, and while the final approved settlement was not the best possible that could have been reached, it was the best that could be done under the circumstances. Miss Campbell accepted the settlement, he said, but still is not satisfied. It was his thought that the case should not be reopened, and he so recommended. The Commission expressed sympathy with Miss Campbell but decided not to reopen the case and instructed the Chief Counsel to so inform Mr. F. O. Fenlason, Miss Campbell's Attorney, who appeared before the Commission at the previous meeting regarding the matter.

11. Proposed exchange of properties with Weyerheauser Timber Company at North Bend. The reports by the Engineer and the Assistant Counsel in this matter were discussed briefly by the Commission, but action thereon was deferred until the next meeting.

12. Report of the Engineer on proposed highway improvements at Tillamook. The Engineer advised that he called upon the people of this vicinity pursuant to instructions from the Commission and that he reached certain agreements which will be reported in written detail later.

13. Claim of Mr. W. W. Purvis arising out of the curb and sidewalk improvement on the Oregon Coast Highway at Nelscott. The Engineer and the Chief Counsel advised that their report on this matter has not as yet been prepared.

The Engineer reported on the matter of log hauling on the Siletz Highway as a supplement to the report rendered on December 27, 1945. He advised that inspection of this highway was made on January 9, 1946, by Mr. Ralph Sipprell, Assistant Maintenance Engineer, in company with Mr. Floyd Cook, Highway Representative, Pacific Northwest Loggers Association, and a Mr. Jacoby, Logging Superintendent of the C. D. Johnson Lumber Corporation, during which it was learned that the Corporation is now operating, or contemplates doing so shortly, five separate operations on this highway between M. P. 12.92, at Roots Creek, and M. P. 26.46, which is near the railroad undercrossing about three miles south of Siletz, and that there will be a total of about 85,000,000 board feet of logs to be truck-hauled during the next two years from these five operations to the company's mill at Toledo. In addition to these operations, he said, it is anticipated that a number of smaller operators will also use the highway from time to time. He pointed out that the alignment and width of the highway at the present time is such that loads of logs of any length cannot operate without endangering other traffic; however, for an expenditure of about $2,000 additional turnouts can be provided which, together with the existing turnouts, will permit the safe movement of logs 40 feet long over the 19 mile section from Roots Creek

to the junction with the Corvallis-Newport Highway. The C. D. Johnson Corporation, he said, has indicated a willingness to cooperate with the state in doing this work to the extent of furnishing a one-half-yard power shovel and a power blade, which represents approximately 25 per cent of the total cost. He recommended approval of the project and that permits be granted for the transportation of loads 58 feet overall in length with the following restrictions:

1. A speed limit of 20 miles per hour for loaded trucks between M. P. 12.93 and the Town of Siletz.

2. Maximum speed limit of 30 miles per hour between the Town of Siletz and the junction with the Corvallis-Newport Highway.

3. Loaded trucks to observe one-way traffic at the two covered bridges across the Siletz River at M. P. 20.72 and at M. P. 23.13.

The Commission approved the recommendation by unanimous vote and authorized the Secretary to grant permits on such basis when the work is completed. In the meantime, he was authorized to continue to issue permits based on the action taken by the Commission at its meeting on December 27.

The Chief Counsel brought up for discussion a complaint from Mr. W. J. Easter who was the successful bidder for two of the houses in Klamath Falls that were recently sold by the Commission. Mr. Easter advises, he said, that a lady who occupies one of the buildings refuses to vacate the premises so he is asking the State Highway Department to help evict her. The Commission authorized the Chief Counsel to assist Mr. Easter in this matter.

The Commission considered and signed agreements, etc., as follows:

Bargain and sale deed conveying to the trustees of the German Congregational Church of Cedar Mills 0.51 acre of land in Washington County.

Bargain and sale deed conveying unto Elmer Bankus fractional Lots 1 to 6, inclusive, Block 12, Brookings, Curry County.

Agreement with Adele E. Guerber with respect to an option to purchase land in the N½ of NW¼ of Sec. 32, T. 1N., R. 1 W., W. M., Washington County.

Agreement with Edward L. Dimmitt covering the lease of state property known as Vista House located at Crown Point on the Columbia River Highway, Multnomah County.

Agreement with Polk County covering disposition of the old right of way of the Dallas-Coast Secondary Highway when abandoned by the state after construction of the proposed revision at Buell and

between Salt Creek School and Dolph Corner has been completed.

The meeting adjourned at 3:45 p.m. to reconvene the following morning in the same room.

Portland, Oregon
January 18, 1946

The State Highway Commission reconvened at 9:00 a.m. in the Auditorium of the Public Service Building with the following persons present and participating:

M. R. Chessman, Commissioner (Acting Chairman)
A. W. Schaupp, Commissioner
R. H. Baldock, State Highway Engineer
C. B. McCullough, Assistant State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

Chairman T. H. Banfield was absent on account of illness.

Bids, as follows, for highway construction work were opened and read in conformity with previously-published notice, following which Commissioner Chessman announced that the awards of contracts would be made at 2:00 p.m. in the same room:

TWO BRIDGES OVER SILETZ RIVER IN LINCOLN COUNTY
ON SILETZ SECONDARY HIGHWAY

Tom Lillebo, Reedsport	$ 180,141.40
Kern & Kibbe, Portland	188,938.20
C. J. Eldon, Portland	192.462.00
Marine Contractors, Inc., Portland	243.413.00

HALSEY-SWEET HOME SECONDARY HIGHWAY IN LINN COUNTY
HALSEY-HOLLEY ROCK PRODUCTION PROJECT

Harrisburg Sand & Gravel Co., Harrisburg	$ 22,350.00
R. O. Dail, Portland	22,600.00
J. S. Risley, Milwaukie	25,430.00
O. C. Yocom, McMinnville	26,760.00
A. H. Saxton & Sons, Corvallis	27,060.00
E. C. Hall Company, Portland	27,675.00
Newport, Kern & Kibbe, Portland	27,700.00
Del R. Beebe, Eugene	29,880.00
M. C. Lininger & Sons, Medford	30,005.00

THREE STATE HIGHWAYS IN MALHEUR COUNTY
CAIRO JUNCTION-ADRIAN ROCK PRODUCTION PROJECT

Newport, Kern & Kibbe, Portland	$ 21,880.00
Del R. Beebe, Eugene	24,200.00

WASCO-HEPPNER SECONDARY HIGHWAY IN MORROW COUNTY
GILLIAM COUNTY LINE-EIGHTMILE SECTION

Newport, Kern & Kibbe, Portland	$ 128,520.10
Warren Northwest, Inc., Portland	137,875.50
J. S. Risley, Milwaukie	145,906.00
E. C. Hall Company, Portland	147,216.50
Curtis Gravel Company, Spokane, Wn.	150,912.00
Max J. Kuney Company, Spokane, Wn.	154.774.00
J. N. & M. J. Conley, Portland	156,941.00
Rush & Baird, Seattle, Wn.	161,701.00
T. W. Thomas, Portland	162,772.00
Colonial Construction Co., Spokane, Wn.	163,593.00
C. J. Eldon, Portland	168,361.00
Vernie Jarl, Gresham	171,561.50
R. O. Dail, Portland	173,814.00
O. C. Yocom, McMinnville	175,367.82

OREGON COAST HIGHWAY IN TILLAMOOK COUNTY
THREE RIVERS BRIDGE AT HEBO

W. H. Philpott, Portland	$ 26,945.00
Birkemeier & Saremal, Portland	28,307.00
Walder & Kenworthy, Oregon City	32,035.00
Lockyear & White, Seattle, Wn.	41,706.00

WOLF CREEK HIGHWAY IN WASHINGTON COUNTY
DAVIES-NORTH PLAINS SECTION

Sound Constr. & Engr. Co., Seattle, Wn.	$ 173,126.90

**Bidder will make reduction of $3,000 if also awarded Davies-North Plains project.
#Bidder will make reduction of $1,000 if also awarded Davies-North Plains project.

A delegation from Clatsop County representing the County Court, the City of Warrenton, and the City of Hammond was present at the Commission's invitation for discussion of the question of terminating two joint agreements pertaining to the maintenance of the Warrenton-Fort Stevens County Road, the Fort Stevens-Camp Clatsop Road, and the Delaura Beach Route. Representing the County Court were County Judge Guy Boyington and County Commissioner Alfred Zundell. Representing the City of Warrenton was Mr. E. R. Baldwin, City Manager. Representing the City of Hammond was Mr. J. A. Hopkins, Mayor. It was explained that the agreement covering the Warrenton-Fort Stevens Road expired on December 31, 1944, notwithstanding which the state has been maintaining the road since then. It was also pointed out that the agreement for the maintenance of the Fort Stevens-Camp Clatsop Road provided that the state would maintain the road "for the duration of the present war and for six months thereafter," and that the State Highway Commission would like to terminate both of these agreements. Judge Boyington advised that so far as Clatsop County is concerned there are no objections whatsoever to the termination of state maintenance on the latter-mentioned road and that if the Highway Commission feels that this agreement should be terminated, that will be satisfactory with the County Court; however, the Warrenton-Fort Stevens Road is another matter. He pointed out that this road, for the most part, lies within the cities of Warrenton and Hammond but is not strictly a local road inasmuch as it serves the Fort Stevens Army Reservation, and the traffic that uses the road primarily is state and federal in character. He gave as his thought, because of such situation, that the State Highway Commission should continue maintaining the road. Mr. Baldwin spoke for the state maintenance of the road because of the log hauling traffic that uses it enroute to the

log dump. He advised that neither the City of Warrenton nor the City of Hammond are in position financially or otherwise to take care of the maintenance and urged the Commission either to place the road on the state highway system or to extend the aforementioned agreement for many years so as to relieve the cities from the maintenance expense. Mayor Hopkins filed with the Commission a letter expressing the attitude of the City of Hammond with respect to the Warrenton-Fort Stevens Road. He advised that he has no special arguments to present on behalf of the City but concurs in the remarks of the other speakers. This matter was discussed at considerable length and additional arguments presented by the group; however, no action was taken. A definite decision in the matter was deferred by the Commission pending consultation with Chairman Banfield.

Judge Boyington then brought up the question of securing Federal aid to finance certain county road construction as an employment relief measure. He mentioned the Lewis and Clark County Road and the Youngs River County Road. He inquired whether or not Federal funds could be used to acquire right of way where an insufficient width of right of way now obtains. He was informed by Mr. T. M. Davis, District Engineer of the Public Roads Administration, that Federal funds can be used to acquire right of way if the roads are on the Federal Aid Secondary Highway System; also, that 60 foot minimum right of way is required to qualify for such funds. Judge Boyington then advised that the question has arisen with the County Court concerning the alignment of one of these roads which involves an engineering problem. The Commission authorized the Engineer to advise the county in this regard.

A delegation from Gilliam County headed by Senator E. R. Fatland and including C. K. Barker, rancher; Ralph W. Potter, rancher; Pete Pattee, rancher; Hollis Bull, Manager, Grain Growers Cooperative; and R. E. Irby, County Commissioner, came before the Commission and urged the improvement of the Wasco-Heppner Secondary State Highway westerly from the town of Condon for a distance of four or five miles so as to facilitate the truck hauling of wheat, the principal commodity of this district. Speaking in behalf of the improvement in addition to Senator Fatland were Messrs. Barker, Porter, Bull, and County Commissioner Irby. Figures were given to show the tonnage of wheat that is truck-hauled over this section and the number of trucks that are engaged in the hauling of the same. Senator Fatland urged the Commission to improve the road in some manner before next harvest, particularly to make necessary temporary repairs so that the road can be used. Otherwise, he said, it is quite likely that the ranchers will not be able to market their crops. This four-mile section of highway, he said, should be oiled, and he urged that careful consideration be given by the Commission to such a project. Mr. Irby advised that the County Court receives more complaints concerning the condition of this road than concerning all of the other roads in the county combined. He said that the maintenance crew blades the road frequently, but it doesn't do much good because the road is worn out and there is practically nothing to blade. He gave as his thought that the Highway Commission should fix the road immediately and urged construction of an oiled surface on the same. The Engineer gave approximate figures on the cost of doing the work, however, advised that, in order to arrive at a close estimate, a survey costing approximately $5,000 would have to be made. The

conference was concluded by the Acting Chairman, Mr. Chessman, who advised that the Commission understands the wishes of the delegation but regrets that it cannot make its decision today. He pointed out that the Commission is now considering projects to take up extra state money that may become available and will be pleased to give this project consideration along with the others. It was his thought that the Commission would act on such matters in the not distant future. In the meantime, the Commission would secure an engineering report on the subject. The Engineer was thereupon instructed to make certain investigations that may be necessary and render such a report.

Messrs. C. C. Bechtold and Walter Page of the National Hospital Association, Portland, came before the Commission regarding the Association's contract for the furnishing of medical and hospital service to State Highway Department employees. Mr. Bechtold was spokesman. He advised that their present contract with the Commission was written in 1940 and contains provisions that are more or less obsolete because of changed conditions and, in his estimation, should be brought up to date. He mentioned, among other things, the furnishing of blood plasma at a cost of $35 per unit, which item was not available when the original contract was entered into. He suggested the modification of the present contract to take care of these items and the continuing in effect of the present contract until the new one has been executed. The Engineer gave as his thought that the State Highway Department should be given sufficient time to discuss thoroughly with both companies the proposed amendments, following which the matter should be discussed with the directors of the State Employees Association and then, about the first of September, 1946, the employees of the State Highway Department should be circularized to express their wishes as to the Association that they wish to affiliate with so that the entire matter may be disposed of before January 1, 1947. Commissioner Schaupp expressed his approval of such a plan. Mr. Bechtold did likewise. Commissioner Chessman stated that the plan meets with his satisfaction, whereupon the Engineer was instructed to handle the matter in such manner.

A delegation of farmers from Salem, consisting of H. B. Aker, O. G. McClaughry, J. A. Starker, H. E. Boehm, and Antone Pfau, Jr., was present regarding a drainage matter at Lake Labish about five miles north of Salem. Mr. Aker headed the group. He advised that the farmers are having trouble draining their property due to the fact that the culvert which crosses the highway at Lake Labish acts as a dam and interferes with the free flow of water. He advised that the culvert satisfactorily drained their land when first installed, but the land is of such a nature that it keeps settling, and as a result, the floor of the culvert is too high to properly drain their properties. The Engineer advised that the culvert is of the concrete box type and, due to the nature of the subsoil, was constructed on piling to keep it from settling. He further stated that it operates entirely satisfactorily in carrying off surface waters, but what is now wanted is the lowering of the floor of the culvert so as to act as a subdrain for adjacent lands, which, in his estimation, is strictly a local concern in which the general public is not particularly interested. He estimated the cost to make the changes requested by the delegation at about $1,500 and quoted the Chief Counsel's opinion in which he advises that "it is my opinion that the

Commission has no legal obligation with respect to the request. It is also my opinion that the Commission is without authority, under the circumstances, to use state highway funds for the purpose of providing the facility and the service requested." The Engineer recommended, in view of this opinion, that the request be denied but that the property owners be allowed to make the necessary change in the culvert at their own expense if they so desire and will follow his instructions with regard thereto. The Commission approved the recommendation unanimously.

The following persons, representing the City Council of the City of Woodburn, came before the Commission regarding the improvement of the Hillsboro-Silverton Secondary Highway between its junction with U. S. 99E and the business district of Woodburn: H. M. Austin, Mayor; J. Melvin Ringo, Fred Hecker, and Elmer Matson, City Councilmen. Mayor Austin headed the group. He advised that the City of Woodburn is anxious to improve this street by construction of curbs, sidewalks, sewers, etc. and is ready and willing to do this work entirely at city expense, but wants the state to pave the street full width between the curbs. The city, he said, has the money on hand at the present time to pay for its share of the cost. In the discussion of this matter the Engineer suggested, if the Commission decides to join with the city in this improvement as requested, that the work could all be done under the state's contract, in which event, there should be a written agreement between the city and the state covering the matter, which agreement would provide that the city deposit with the Commission, in advance of construction, the amount of its share of the estimated cost. Mr. Austin stated that this arrangement would be satisfactory with the city because the city has money on hand to pay cash. Commissioner Chessman advised that the Commission is not in a position today to take definite action but will be pleased to consider the matter along with others in the preparation of the construction program for state monies. The Engineer advised that the city has requested that he make the necessary survey and design of the proposed sewer pipe that is to be installed on this street so as to facilitate proceedings under the Bancroft Bonding Act. The request was approved by the Commission unanimously.

A delegation representing the Recreational Resources Committee of the Portland Chamber of Commerce, and including Messrs. Arthur I. Moulton, A. R. Kirkham, and Ed A. Hughes, came before the Commission regarding the preservation of myrtle tree groves in Coos and Curry Counties. Mr. Moulton headed the group. He advised that a question has arisen whether or not the State Highway Commission has legal authority to acquire such tracts when they are not situated immediately adjacent to a state highway. He suggested, in view of this question, that the Commission obtain an opinion from the Attorney General in order to clarify the matter. He presented a letter directed to the Commission formally requesting that such opinion be obtained. The Commission approved the request and referred tha matter to the Chief Counsel to handle. Mr. Kirkham explained that there remain only about three or four myrtle tree groves in the state that are suitable for recreational purposes, which, in his estimation, should be preserved for future generations. These groves are situated several miles from a state highway but all can be reached over public roads, which is the reason that they are now asking that the

Attorney General's opinion be obtained so as to clarify the Commission's authority to acquire such tracts.

The Commission recessed at 12 o'clock noon for luncheon and reconvened at 1:30 p.m. in the same room with the same persons present and participating.

The Engineer asked the Commission to approve the contracting of a number of state construction projects. He presented a list of projects on which construction is ready to proceed. After careful consideration and previous consultation with Chairman Banfield, the Commission selected the following projects and authorized the Engineer to advertise them for bids to be received as soon as plans, specifications, and right of way matters have been clarified:

COUNTY	HIGHWAY	SECTION AND KIND OF WORK	ESTIMATED COST
Josephine	Rogue R. Loop	Rogue River Loop, Oiling	$ 30,000
Lane	Pacific	Junction City, Concrete Bridge	42,000
Lincoln	Oregon Coast	Ocean Lake	135,000
Linn	Santiam	Lebanon-Sweet Home 8 miles Resurface	100,000
Linn	Santiam	City of Lebanon	40,000
Malheur	Old Oregon Trail	City of Ontario	70,000
Marion	Hillsboro-Silverton	City of Woodburn	30,000
Polk	Salmon River	Ft. Hill Bridge (Yamhill River)	85,000
		Total	$ 532,000

The Engineer reported on the proposed rounding off of the corners at two street intersections in Forest Grove to accommodate overlength log hauling traffic. He advised that the Assistant Maintenance Engineer attended a meeting of the City Council on January 14 when this matter was thoroughly discussed, and as a result thereof, the City Council passed an ordinance routing logging trucks along the Main Street from Third Avenue North to First Avenue South, thence along First Avenue South to Fifth Street, and south on Fifth Street to the mill in South Forest Grove, which routing eliminates the right angle turn on to the Tualatin Valley Highway in the center of the business district. The City Council, he said, approves the rounding off of the turns at the intersection of Main Street with Third Avenue North and at the intersection of First Avenue South with Fifth Street but is asking the state to maintain First Avenue South and Fifth Street because of the extraordinary expense occasioned by the hauling of logs. The Engineer estimated that the maintenance expense for these two streets should not exceed $2,000 for the calendar year 1946. He recommended approval of the rounding off of the corners at the two street intersections and that the state maintain First Avenue South and Fifth Street as requested by the city. The recommendation was approved by the Commission by unanimous vote, Commissioners

Chessman and Schaupp having previously discussed the matter with Chairman Banfield.

A letter was presented from Mr. F. D. Mayer, City Attorney, Lebanon, on behalf of the Lebanon City Council, advising that a Mr. Thomas Gazeley, of their city, has purchased property adjacent to South Main Street (South Santiam Highway) which he intends to develop for business purposes. It appears that Mr. Gazely proposes to deed to the city ten to fifteen feet off his highway frontage for the widening of South Main Street so that it will conform with the street width to the north, although this would involve a jog in the street south of his property. Mr. Mayer inquires whether or not the Highway Commission has any objections to such an arrangement. He also inquires whether or not the state will pave this street for the full width between curbs if the city will construct curbs. Action in this matter was deferred by the Commission pending investigation and report by the Engineer.

The Commission discussed with the Engineer the bids received at the morning session for construction work and took the following action thereon by unanimous vote:

Construction of two bridges over the Siletz River on the Siletz Secondary Highway, in Lincoln County. This contract was awarded to the low bidder, Tom Lillebo.

Halsey-Holley Rock Production Project on the Halsey-Sweet Home Secondary Highway, Linn County. This contract was awarded to the low bidder, Harrisburg Sand and Gravel Company.

Cairo Junction-Adrian Rock Production Project on three state highways, Malheur County. This contract was awarded to Newport, Kern & Kibbe, the low bidder.

Regrading, surfacing, and oiling the Gilliam County Line-Eight-mile Section of the Wasco-Heppner Secondary Highway, in Morrow County. This contract was awarded to the low bidder, Newport, Kern & Kibbe.

Construction of a bridge over Three Rivers on the Oregon Coast Highway, at Hebo, Tillamook County. The Commission rejected all bids for this job.

Grading the Davies-North Plains Section of the Sunset Highway (formerly Wolf Creek Highway), in Washington County. This contract was awarded to the low bidder, Sound Construction and Engineering Company, on the basis of its combination bid for this project and for the grading of the North Plains-Gardner Ranch Section.

Grading on the North Plains-Gardner Ranch Section of the Sunset Highway (formerly Wolf Creek Highway), in Washington County. This contract was awarded to the low bidder, Sound Construction and Engineering Company, on the basis of its combination bid for this project

and the Davies-North Plains Section.

At 2:00 p.m. the Acting Chairman, Commissioner M. R. Chessman, publicly announced the awards as follows:

"Construction of two bridges over the Siletz River on the Siletz Secondary Highway, in Lincoln County--Fuller Bridge and the Ojalla Bridge. Tom Lillebo, Reedsport, submitted the low bid for this job in the amount of $180,141.40. Kern and Kibbe, Portland, submitted the next low bid in the amount of $188,938.20. There were two higher bidders. The Commission has awarded the contract to the low bidder, Tom Lillebo, at his bid price of $180,141.40.

"Halsey-Holley Rock Production Project on the Halsey-Sweet Home Secondary Highway, in Linn County. The Harrisburg Sand and Gravel Company, Harrisburg, submitted the low bid for this job in the amount of $22,350. R. O. Dail, Portland, submitted the next low bid at $22,600. There were seven higher bidders. This contract has been awarded to the low bidder, Harrisburg Sand and Gravel Company.

"Cairo Junction-Adrian Rock Production Project on three state highways, in Malheur County. The Commission received two bids for this job, the low one being that submitted by Newport, Kern & Kibbe, Portland, in the amount of $21,880. Del R. Beebe, Eugene, submitted the other bid in the amount of $24,200. The Commission has awarded this contract to the low bidder, Newport, Kern & Kibbe.

"Grading, surfacing, and oiling the Gilliam County Line-Eightmile Section of the Wasco-Heppner Secondary Highway, in Morrow County. Newport, Kern & Kibbe, Portland, submitted the low bid for this job at $128,520.10. Warren Northwest, Inc., Portland, submitted the next low bid in the amount of $137,875.50. There were twelve higher bidders. The contract has been awarded to the low bidder, Newport, Kern & Kibbe.

"Construction of a bridge over Three Rivers on the Oregon Coast Highway, in Tillamook County. The Commission received four bids for this job, the low one being that of W. H. Philpott, Portland, at $26,945. The Commission has rejected all of these bids.

"Grading on the Davies-North Plains Section of the Sunset Highway (formerly Wolf Creek Highway), in Washington County. The low bidder for this project was Sound Construction and Engineering Company, Seattle, at $173,126.90. The next low bid was submitted by Berke Brothers, Portland, at $182,451. There were ten higher bidders. The Commission has awarded this job to the low bidder, Sound Construction and Engineering Company.

"Grading on the North Plains-Gardner Ranch Section of the Sunset Highway (formerly Wolf Creek Highway), in Washington County. Sound Construction and Engineering Company, Seattle, submitted the low bid for this job in the amount of $45,881. They offered to reduce the bid

by $3,000 if also awarded the Davies-North Plains project. The second low bidder was Kuckenberg Construction Company, Portland, at $50,323.50. This company stated that they would not accept the award of this contract unless also awarded the Davies-North Plains project. Leonard & Slate, Portland, submitted the third low bid in the amount of $53,419. There were eleven higher bidders. The Commission has awarded this contract to the low bidder, Sound Construction and Engineering Company, on the basis of its combination bid for both projects."

Mr. Russell Hubbard, Reedsport, came before the Commission regarding the purchase of a one-acre tract of state-owned land adjacent to the Umpqua Highway at Reedsport. The Engineer advised that this matter has been before the Commission on previous occasions and has been "turned down." Mr. Hubbard urged reconsideration. He was advised by the Commission to make his request in writing, giving all the facts, and the matter would then be investigated.

Mr. Louis A. Peacock, Vice President and General Manager of Marine Contractors, Inc., to whom the Commission awarded the contract for the construction of the Arthur Street Grade Separation project on S. W. Front Avenue, Portland, came before the Commission regarding the furnishing of State Industrial Accident insurance in connection with this job. He advised that eighty per cent of the company's business is of such a nature that the State Industrial Accident Commission will not furnish insurance coverage, so the company is carrying private coverage on all of its work. To comply with the requirements of the State Highway Commission, he said, with respect to the acceptance of the Workmen's Compensation Act on the Arthur Street project would mean that they would have to change over the insurance coverage on all of their jobs. He urged the Commission to waive its requirements for state insurance. The Commission referred the matter to the Engineer and the Chief Counsel to handle, and it was thereupon arranged that Mr. Peacock would call at the office of the State Highway Engineer in Salem on the following Monday for a conference on the matter.

The Commission had under consideration the offer of the Astoria North Beach Ferry Company and the Columbia Transportation Company to sell to the state their ferry properties at Astoria for use by the state in the event the Commission decides to establish a state-owned ferry operation at this point. Present and participating in the discussion were Mr. James L. Hope, Attorney, and Captain F. V. Elfving, representing the property owners; County Judge Guy Boyington and County Commissioner Alfred Zundell, representing Clatsop County. Mr. Hope also represented the City of Astoria as its City Attorney. After due consideration of all matters affecting the sale and transfer of this property, including consideration of the report of the Engineer containing factual data (See Engineer's report in general files for details), the following resolution with regard thereto was adopted by the unanimous vote of the Commission upon motion of Commissioner Schaupp, which was duly seconded by Commissioner Chessman, it previously having been submitted to and approved by Chairman T. H. Banfield:

WHEREAS, the Astoria-Megler ferries operating between Astoria, Oregon, and Megler, Washington, are and constitute an important link in a primary state highway, which highway is an interstate artery of traffic, and said ferries should therefore be owned and operated by and for the convenience and service of the general public; and

WHEREAS, the Astoria-North Beach Ferry Co. and the Columbia Transportation Company, joint owners and operators of said ferries, have offered their properties for sale to the State of Oregon at a price and on terms which the Commission's own appraisers have, and the Commission has, adjudged fair and reasonable; and

WHEREAS, Clatsop County and the City of Astoria have each offered to convey to the State for ferry purposes real properties owned by the County and the City, respectively; and

WHEREAS, Pacific County, Washington, has offered to purchase from said ferry owners the Megler ferry-landing properties on the terms and for the price for which said properties have been offered to the State and thereafter make said Megler properties available to the State for use in connection with the operation of said ferries for and by the public; and

WHEREAS, it is the judgment of this Commission that the offer of said ferry owners to sell to the State their said properties should in the interest of the public be accepted.

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED:

1. That, subject to the provisions and conditions herein set forth, the offer of the Astoria-North Beach Ferry Co. and the Columbia Transportation Company to sell to the State of Oregon the said ferry properties is hereby accepted, except as to the ferry-landing facilities at the foot of 14th Street in Astoria, and as to said landing facilities the offer to lease the same to the State on a two-year basis at a rental of $150 per month is also accepted.

2. That the offer made by Clatsop County and the offer made by the City of Astoria to transfer to the State without cost real properties owned respectively by the County and the City, and which real properties are needed and will be used in connection with the operation of said ferries, hereby are accepted.

3. That the offer of Pacific County, Washington, to purchase and pay for the property designated and known as the Megler ferry-landing properties be and said offer is accepted.

4. That when said properties and the whole thereof have been acquired as herein contemplated they shall be operated by and for the public for ferry purposes, such operation to be by the State Highway Commission with its own personnel or by contract.

JUL 18 1946

5. That said ferries shall be operated by the Commission on a toll basis, the rate of toll to be sufficient to provide funds adequate to meet all operating costs and amortization of all capital investment. The imposition of tolls shall continue in force until such time as the State of Washington joins the State of Oregon in the operation of said ferries on a mutually agreed toll schedule or until the capital investment has been fully liquidated.

6. That before this action on the part of the Commission shall become final, the County of Clatsop and the City of Astoria and Pacific County, Washington, must each, through and by their respective officials and pursuant to statutory and charter procedure and requirement, confirm in writing their several offers heretofore informally made, on which formal offers this Commission has acted, and the County of Clatsop and the City of Astoria must each, by formal resolution duly adopted, approve the purchase of said ferries and the operation of the same on a toll basis by the State Highway Commission.

7. That the Commission's Chief Counsel is instructed to prepare a formal written agreement setting out therein the obligations, offers and other pertinent detail, including proper recognition of a prorating of current taxes, all in strict conformance with the Commission's purpose and plan as disclosed herein and in formal discussion, and procure the execution of said instrument by the owners of said ferry properties by the County of Clatsop, the City of Astoria and Pacific County, Washington, and then present the same to this Commission for execution.

8. That the said Counsel shall likewise prepare for execution by the said companies and the State an appropriate lease covering the landing facilities at the foot of 14th Street in Astoria.

9. That it is the meaning and purpose of this Commission that this entire transaction shall be closed at a date not later than May 1, 1946.

There being no further business to come before the Commission at this time, the meeting adjourned at 3:00 p.m.

State Highway Engineer

Commissioner

Secretary

Commissioner

Portland, Oregon
February 25, 1946

The State Highway Commission met in regular session at 9:00 a.m. in the Auditorium of the Public Service Building. Present were:

T. H. Banfield, Chairman
A. W. Schaupp, Commissioner (Arrived at 10:20 a.m.)
M. R. Chessman, Commissioner
R. H. Baldock, State Highway Engineer
C. B. McCullough, Assistant State Highway Engineer
J. M. Devers, Chief Counsel
H. B. Glaisyer, Secretary

The State Parks Superintendent, Mr. S. H. Boardman, reported on the following park matters:

1. Proposed state park on the Rogue River at Camp White, Jackson County: Mr. Boardman presented a letter from former State Highway Commissioner, Mr. Frank LeBlond Tou Velle, Jacksonville, presenting to the state as a gift for park purposes 25 acres of land situate on the Rogue River about seven miles north of Medford, which park is to be a memorial to his wife and is to be named "Elizabeth Blosser Tou Velle and Frank LeBlonde Tou Velle State Park." He recommended acceptance of this gift as a valuable addition to the state park system and that it be named in conformity with Mr. Tou Velle's wishes. The Commission approved the recommendation by unanimous vote and ordered that an appropriate letter of thanks be sent to Mr. Tou Velle expressing appreciation for his generous gift.

2. Proposed addition to Short Sand Beach State Park, Tillamook County: The Parks Superintendent reported that it is essential, in order to fill out this park, to acquire 42 acres of land belonging to the E. S. Collins Estate. He advised that the property can be acquired for the sum of $14,800, which is at the rate of $350 per acre, and recommended the acquisition on such basis. The Commission deferred a decision in the matter until later.

3. Provision for telephone service at Honeyman State Park: The Parks Superintendent advised that this park has had telephone service in the past through the system of the U. S. Forest Service, but the Forest Service has sold its facilities to the Siltcoos Mutual Telephone Company of Westlake, Oregon, and in order to continue to receive the service, it will be necessary for the state to purchase a stock certificate in this company. The Commission's Chief Counsel advised that the state cannot purchase stock of this kind and suggested that the matter be handled by negotiation and special agreement. The Commission approved the suggestion and referred the matter to the Chief Counsel to handle.

4. Sale of three lots at Ecola State Park: The Parks Superintendent said that this property, which is described as Lots 15, 16, South half of Lot 10, and the North half of Lot 11 of Block 17, Seal Rock Beach Addition to Cannon Beach, is of no value for state park purposes and recommended that it be advertised for sale. He pointed out that the lots were acquired as a gift in connection with other property at this location and that the former owners have given their consent to the sale of the property, the monies derived therefrom to be used in the development of Ecola Park. He also advised that the lots have been appraised at $500 each. Following discussion the Commission authorized the sale of the property on the basis of competitive bidding.

5. Proposed state park at the head of Wallowa Lake, Wallowa County: The Commission's Chief Counsel reported the results of negotiations for the acquisition of the properties needed. He advised that, with two exceptions, the Commission's requirements with respect to the acquisition of this property have been met, the exceptions being an agreement with the Association Ditch Company, which has stated its willingness to assign to the state whatever right or interest the state wants in its holdings, and the other being settlement with Mr. and Mrs. T. H. Williamson, the owners of 55 acres of land involved. The Williamson property, he said, is appraised at about $10,000, but the owners are demanding some $25,000. He pointed out that if the Williamson property can be acquired for $10,000 the entire park should not cost the state more than $15,000. He recommended that if a satisfactory settlement cannot be reached with the Williamsons, their property be condemned. After careful consideration of the entire matter, the Commission approved the suggestion and thereupon, by unanimous vote, adopted the following resolution authorizing the acquisition of the Williamson property by condemnation.

DEC 05 1946

WHEREAS, under and by virtue of the provisions of subsections 6 and 7 of Section 100-115, O. C. L. A., the Highway Commission is authorized to acquire by agreement, donation, or the exercise of the power of eminent domain real property, or any right or interest therein, necessary or deemed necessary for the preservation of scenic places and other objects of attraction or scenic value adjacent to or along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and the Commission is also authorized to acquire land and ground necessary for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds, or other places of attraction and scenic value which in the judgment of the Commission are necessary for the convenience of the public and which will contribute to the general welfare and pleasure of the motoring public or road users; and

WHEREAS, it is the opinion of the Highway Commission that the real property hereinafter described is scenic in character and possesses possibilities of development as a scenic and recreational area and resort; and

WHEREAS, it is the judgment and opinion of this Commission that the acquisition of said real property and the development of the same by the State within the meaning and purpose of subsections 6 and 7 of Section 100-115, O. C. L. A., will contribute to the convenience, the public welfare, and the enjoyment and pleasure of the motoring public or road user;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That this Commission does hereby find and declare that the real property hereinafter described is scenic in character, possesses possibilities for the development of a park or recreational area within the meaning and purpose of said legislative act.

2. That this Commission does further find and declare that the acquisition of the fee title to said real property, free and clear of all interests of every kind and character, is necessary in order that said real property may be preserved and developed for the convenience and pleasure of the general public as a recreational area and resort and for other uses which may contribute to the pleasure and welfare of the general public.

3. That the real property the acquisition, preservation, and development of which the Commission now finds necessary for the purposes heretofore stated is described as follows, to wit:

A parcel of land lying in Lots 2 and 3 and the southeast quarter (SE¼) of Section 20, Township 3 South, Range 45 East, W. M., Wallowa County, Oregon; the said parcel being described as follows:

Beginning at a point on the westerly boundary line of the southeast quarter (SE¼) of Section 20, Township 3 South, Range 45 East, W. M., said point also being 1479 feet north and 9 feet east of the south one-quarter corner of said Section 20; thence North 0° 22' East along said westerly boundary line a distance of 1230 feet to the center of said Section 20; thence South 87° 45' East along the northerly boundary line of said southeast quarter (SE¼) a distance of 1129 feet; thence North 0° 16' West parallel to and 1485 feet westerly from the east line of said Section 20 to the intersection of the meander line of Wallowa Lake; thence easterly along the meander line of Wallowa Lake to the intersection of a line drawn parallel to and 825 feet westerly from the east line of said Section 20; thence South 0° 16' East along said parallel line to the intersection of the northerly boundary line of said southeast quarter (SE¼); thence South 0° 16' East along said parallel line a distance of 660 feet; thence North 87° 45' West a distance of 165.7 feet; thence South 7° 40' West a distance of 569 feet; thence North 87° 53' West a distance of 1557.7 feet to the point of beginning, containing 55 acres, more or less.

Subject to all valid existing flood rights and existing water pipe and power pole easements.

4. That the survey of said area heretofore made by the State Highway Engineer and the description prepared hereby are approved by the Commission, and the Commission does hereby order and direct that said description be used and employed in the preparation of necessary deeds of conveyance or in necessary court proceedings.

5. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners, or persons in possession if there be any, with respect to the compensation to be paid for the acquisition of said property and damage to the remaining property, if there be any remaining property, and in the event that the title to said property cannot be acquired by agreement then it is hereby ordered that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate

DEC 05 1946

to acquire title to the said premises and all rights therein for the purposes herein stated.

6. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real property, or any interest therein, the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said property or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

7. That this resolution be entered in full in the minutes and records of this Commission as of February 25, 1946.

---

6. Acquisition of myrtle tree groves in Coos County: The Park Superintendent exhibited a map showing the location of a number of myrtle tree groves which the Highway Commission has been requested to acquire. He explained that the tracts are O. and C. lands near the old Coos Bay Wagon Road, some of them being situate about 25 miles from a state highway. The Commission decided not to acquire any of these tracts because of their isolation.

The Assistant Counsel requested authority to acquire certain parcels of real property that are needed for various highway improvements throughout the state and presented a list of such properties, together with the offer that he recommended in connection with each parcel. After careful consideration the Commission approved the request and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, in connection with the further improvement of the highways hereinafter designated, it is and has been necessary to acquire property for right of way, quarry sites, gravel or other material sites, or sites for the storage of materials, as hereinafter more definitely set forth, and

WHEREAS, as a result of negotiations carried on with the owners of the property required, options have been obtained, which options have been considered by the Commission, outlining the bases of settlement which have been agreed upon, and

WHEREAS, it is the judgment of the Commission that the said options should be approved and accepted, and/or the said reports be declared acceptable to the State Highway Commission as bases of settlement for the properties involved, and that the acquisition of the properties should be completed.

NOW, THEREFORE, BE IT RESOLVED that the several offers or bases of settlement hereinafter enumerated be, and the same hereby are approved and accepted, and that the Attorney for the State Highway Commission be, and he hereby is instructed to complete the acquisition of the said properties and to take title thereto in the name of the State of Oregon. The said properties hereby ordered and authorized to be acquired are as follows:

CHEMULT-BEAVER MARSH SECTION, THE DALLES-CALIFORNIA HIGHWAY

11903-A	Liskey, D. D. and Mabel Liskey, and Maude E. Liskey Stockpile site and hauling road	$	$	
	7.055 acres at $2.00		14.11	14.11 McChesney

NELSCOTT SECTION, OREGON COAST HIGHWAY

12508-	Reed, Robin Easement	$	$	
	Slope easement - 5,500 sq. ft.		10.00	10.00 Witt

DAVIS-VADIS SECTION, SUNSET HIGHWAY

6525-A	Behrman, Ernest and Florence Behrman Right of way drainage ditch Option expires July 21, 1946	$	$	
	0.17 acre at $400.00	68.00	68.00	Collins
6521-A	Rufener, William H. and Marie Rufener Right of Way (deed executed)			
	0.21 acre at $476.19 plus per acre	100.00	100.00	"

DAVIES-NORTH PLAINS SECTION, SUNSET AND NEHALEM HIGHWAYS

12583-	Gaddy, Marion and Lillian Gaddy Right of Way Option expires August 15, 1946	$	$	
	1.17 acres at $30.00	35.10	35.10	Benson

VADIS-GARDINER RANCH SECTION, SUNSET HIGHWAY

6536-A	Cusick, Fred E. and Daisy Cusick, and C. H. Jones and Opal K. Jones Easement	$	$	
	Drainage easement 10 ft. wide and 500 ft. long	300.00	300.00	Collins

BERGER RANCH-BARNES ROAD SECTION, SUNSET HIGHWAY

5210-B	Bauer, Arthur and Lydia Bauer Easement	$	$	
	Drainage easement for open ditch, containing 2,595 sq. ft.	25.00	25.00	Collins

FEB 25 1946

OCEAN LAKE-DELAKE SECTION, OREGON COAST HIGHWAY

11665-	Loomis, Gailord and Ella E. Loomis Right of Way (CORRECTION) Option expires (No option)	$	$	
	1,041 sq. ft. (sidewalk area)	00.00		
	1,041 sq. ft. at 25¢ sq. ft.	260.25		
	Allowance - removal and destruction oil station (Richfield)	1,500.00		
	Allowance - in lieu moving cottages 8, 9, to make place for new service station	500.00		
	Allowance - flowers, shrubs, bulbs	100.00		
	Allowance - labor - owner to stain roofs buildings at own expense	150.00		
	Moving and reconstructing Apartment #2, and owner's house, laundry, heating plant, changing grade within court, reconstruction concrete sidewalks, rock wall, septic tanks and dry wells-low bid-	5,858.70	8,368.95	Witt

(Continued)

OCEAN LAKE-DELAKE SECTION, OREGON COAST HIGHWAY (Continued)

11664- Hawkins, Edna Right of Way (CORRECTION) Option expires November 27, 1945		$	$	
	542 sq. ft. (sidewalk)	00.00

---

In connection with Item No. 5876 in the above resolution, being the settlement with the Tidewater Association Oil Company for the right of way on the Astoria Section of the Oregon Coast Highway, the Commission ordered that, as a matter of policy, hereafter a settlement should not be negotiated on the basis of performance of certain work by the state but should be clean cut, without conditions. The Commission also ordered that, hereafter, when settlements involve a correction of a purchase already approved by the Commission, the report of such transaction shall include the settlement as originally approved as well as the corrected settlement.

The Assistant Counsel also brought up for discussion the matter of acquiring certain parcels of real property that are needed as right of way for the Burns-Lawen Section of the Burns-Crane Highway, Harney County. He presented a list of the properties, together with the offer that he recommended in connection with each parcel, as follows:

Burns-Lawen Section of Burns-Crane Highway				Recommended Offer
12394	John C. Moor (Right of Way)	530 square feet at 0.018¢ State to rebuild fence	9.54	10.00

12405	Charles A. Korten and Lydia B. Korten (Right of Way)	0.59 acre at $25.00 State to rebuild fence	14.75	15.00

Following discussion, including the careful consideration of each parcel, the Commission, by unanimous vote, approved the recommended offers and authorized the taking of options for the properties on the basis of such offers.

The Assistant Counsel also requested authority to condemn certain parcels of real property that are needed as right of way for the Spencer Creek-Agate Beach Section of the Oregon Coast Highway, in Lincoln County, and for the Fate Grade-Tiller Section of the Tiller-Trail Secondary Highway, in Douglas County. He presented a list of such properties, together with offers that he recommended for condemnation, as follows:

				Recommended Offer

After careful consideration the Commission approved the offers and by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, by virtue of the laws of the State of Oregon, the State Highway Commission is authorized and empowered to acquire by purchase, agreement, donation, or by the exercise of the power of eminent domain real property and/or any right or interest therein necessary or deemed necessary for rights of way, either for original location or for widening, straightening,

FEB 25 1946

or otherwise changing already established highways, whether within or without the corporate limits of cities and towns, together with rights of access from abutting property thereto, and/or for shops, equipment sheds, office buildings, maintenance sites, patrolmen accommodations, snow fences, quarry sites, gravel pits, storage sites, stockpile sites, weighing stations, broadcasting stations, and/or for appropriation, acquisition or manufacture of roadbuilding materials, approach or hauling roads, highway drainage, drainage tunnels, maintenance of unobstructed view of any state highway so as to provide for the safety of the traveling public, and/or for the culture of trees and the preservation of scenic places and other objects of attraction or scenic value adjacent to, along or in close proximity to state highways or which may be conveniently reached from or by a public highway, and/or for the development and maintenance of parks, parking places, auto camps, camp sites, roadside development, recreational grounds or resorts, forest or timbered areas, or other places of attraction and scenic value, and/or for any other use or purpose necessary or deemed necessary for carrying out the purposes of the Oregon Highway Code, and/or for flight strips, airfields, access roads, public highways, or for any other purpose designated by the United States; and

WHEREAS, it is the judgment of the Highway Commission that the tracts or parcels of land hereinafter described are each necessary for the specific and particular purposes hereinafter expressly set forth;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the State Highway Commission as follows:

1. That the Commission does hereby find and declare that the parcels of real property hereinafter described are each necessary for the accomplishment of the purposes hereinafter expressly and specifically set forth, which said real properties and the specific purposes for which the same are being acquired are described as follows, to wit:

Real property owned by Karl S. Staatz, which property is located in the southwest quarter (SW¼) of the northwest quarter (NW¼) of Section 25, Township 30 South, Range 3 West, W. M., Douglas County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 1, and is further identified in the records of the Highway Commission as file R 11864, which property is being acquired for right of way purposes in connection with the Tiller-Trail Highway; (*)

Real property owned by Chauncey Florey, which property is located in the northeast quarter (NE¼) of the northwest quarter (NW¼) and the northwest quarter (NW¼) of the northeast quarter (NE¼) of Section 33, Township 30 South, Range 2 West, W. M., Douglas County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 2,

and is further identified in the records of the Highway Commission as file R 11879, which property is being acquired for right of way purposes in connection with the Tiller-Trail Highway; (*)

Real property owned by William Bohn, et ux., which property is located in the southeast quarter (SE¼) of the northeast quarter (NE¼) of Section 23, Township 30 South, Range 2 West, W. M., Douglas County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 3, and is further identified in the records of the Highway Commission as file R 12211, which property is being acquired for the purpose of securing roadbuilding materials therefrom in connection with the Tiller-Trail Highway; (*)

Real property owned by Mrs. Asenath Evans, which property is located in the west one-half (W½) of the west one-half (W½) of the southwest quarter (SW¼) of the northeast quarter (NE¼) and in Government Lot 2 of Section 17, Township 10 South, Range 11 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 4, and is further identified in the records of the Highway Commission as file R 4369, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; (*)

Real property owned by Charlotte M. (Echols) Thomas, which property is located in Government Lots 3 and 4 of Section 20, Township 10 South, Range 11 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 5, and is further identified in the records of the Highway Commission as file R 4372, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; (*)

Real property owned by Samuel Draper Dunlop, et ux., which property is located in Government Lot 2 of Section 8, Township 10 South, Range 11 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 6, and is further identified in the records of the Highway Commission as file R 5256, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; (*)

Real property owned by W. K. Deal, et ux., and Curtis E. Christy, et ux., which property is located in Government Lots 1 and 2 of Section 8, Township 10 South, Range 11 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 7, and is further identified in the records of the Highway Commission as file R 4249, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; (*)

Real property owned by I. M. Hayes, et ux., which property is located in Government Lot 1, Section 8, Township 10 South, Range 11 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 8, and is further identified in the records of the Highway Commission as file R 12601, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; (*)

Real property owned by Wilby R. Dorman, et al., which property is located in Government Lot 2 of Section 8, Township 10 South, Range 11 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 9, and is further identified in the records of the Highway Commission as file R 12602, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; (*)

Real property owned by H. E. Patterson, et al., which property is located in Government Lot 2 of Section 8, Township 10 South, Range 11 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 10, and is further identified in the records of the Highway Commission as file R 12603, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; (*)

Real property owned by Curtis E. Christy and Florence M. Christy, which property is located in Government Lot 2 of Section 8, Township 10 South, Range 11 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 11, and is further identified in the records of the Highway Commission as file R 12604, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; (*)

Real property owned by Pacific Shore Land Company, which property is located in Government Lots 3 and 4 of Section 17, Township 10 South, Range 11 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcel No. 12, and is further identified in the records of the Highway Commission as file R 4370, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; (*)

Real property owned by Atlantic Western Company, which property is located in Government Lot 3 of Section 17, and in Lots 3 and 4 of Section 8 and Government Lot 1 of Section 17, Township 10 South, Range 11 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 13 and 14, and is further identified

in the records of the Highway Commission as files R 12128 and 3932-B, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; (*)

Real property owned by W. K. Deal and Ruth Deal, which property is located in Lots 1 and 2 of Section 8, Township 10 South, Range 11 West, W. M., Lincoln County, Oregon, and is more particularly described on the attached sheets and designated as Parcels Nos. 15 and 16, and is further identified in the records of the Highway Commission as file R 12630, which property is being acquired for right of way purposes in connection with the Oregon Coast Highway; (*)

2. That the Commission does hereby find and declare that each of the said described parcels of real property is necessary and acquisition of the same by the State is required for the specific purposes hereinabove set forth, and the said properties are being acquired for the express and specific purposes in this resolution set forth.

3. That the State Highway Engineer be and he hereby is instructed and directed to make or cause to be made all surveys necessary in connection with the determination, description, and acquisition of said real properties, and said Engineer is further instructed to prepare and submit to the Legal Department necessary and adequate descriptions of the said real properties, which said descriptions shall be available for the preparation of any deed or deeds or other instrument or instruments necessary to complete the acquisition of said property or properties, whether said properties be acquired by purchase, donation, agreement, or by the exercise of the power of eminent domain.

4. That J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he is hereby requested, authorized, and directed to attempt to agree with the owner or owners and/or with the tenants or persons in possession, if there be any, of said parcel or parcels of land with respect to the compensation to be paid for the taking of the same and the damage, if there be any, and in the event that no satisfactory agreement or agreements can be reached . then it is hereby further resolved that J. M. Devers, Assistant Attorney General and Chief Counsel for the State Highway Commission, be and he hereby is requested and authorized to commence and prosecute to a final determination such suit or action, or suits or actions, as may be necessary and appropriate to acquire title to the said parcels of real property.

5. That in the trial or prosecution of any action or actions instituted for the purpose of acquiring by condemnation or otherwise the said above described real properties, or any of them, or any interest therein the said J. M. Devers, as Chief Counsel for the Oregon State Highway Commission, is hereby authorized and empowered to make such stipulation, agreement, or admission in connection with any trial or court procedure connected with or prosecuted for the acquisition of said properties

or interest therein as in his judgment may be for the best interests of the State, the State Highway Commission, and/or the defendant property owners.

6. That this resolution be entered in full in the minutes and records of this Commission.

(*) Footnote:

The names of the property owners and the detailed description of the respective parcels of real property mentioned in this resolution are attached to the original resolution on file in the office of the State Highway Commission, Salem, being Resolution No. 58, under the heading "Real Property Condemnation Resolutions" and said descriptions by this reference are made a part of this minute entry to the same extent as if copied in full herein.

The Chief Counsel brought up for discussion the matter of acquiring right of way needed in connection with construction of a railroad grade separation project at Prineville. He advised that difficulties have been encountered in negotiating with the owner of the property, who is asking an exhorbitant amount in addition to certain crossing privileges, including an underpass for his stock and to facilitate the moving of farm machinery from one side of the highway to the other. He recommended, in view of the circumstances, condemnation of the property, if necessary, and an offer of $4,000 in connection therewith. The Commission approved the recommendation by unanimous vote.

The Chief Counsel brought up for discussion the matter of taking options for right of way needed in connection with the improvement of the Oregon Coast Highway in the City of Coos Bay. He advised that negotiations to date indicate that the property owners are extremely anxious for information concerning the plans of the Commission for this proposed improvement because they wish to develop their holdings and are precluded from doing so until such information has been made available. This is particularly true of one owner, he said, who has already started to construct a service station and who, when the proposed highway improvement was brought to his attention, stated a willingness to change his plans which will involve moving his service station back from the highway right of way several feet. The Engineer advised that the highway improvement is vital and, if the cost of the work is not exhorbitant, should be considered for construction in the Commission's next program; otherwise, it would have to wait for three or four years. Chairman Banfield gave as his thought that the Commission should not approve any one project until it has had an opportunity to study a complete list of projects proposed for the new program; however, in the case of the one property owner in the City of Coos Bay who is now constructing a service station, he suggested, if the owner will move his building to the proper location, that the state gravel the area in front of the station so as to

provide suitable access thereto. Commissioner Chessman concurred and it was so ordered. The question then arose as to the remaining properties in Coos Bay and it was decided to condemn such properties later on, if necessary, rather than to complete the negotiations at the present time. Such action of the Commission was based on its desire not to be placed under obligation to make a definite commitment to construct a project just because right of way is being purchased and for the further reason that the Commission does not know when the project will be placed under contract.

Commissioner A. W. Schaupp arrived at this juncture.

The Commission, by unanimous vote, approved the minutes of the meetings held on December 13 and 14 and December 27, 1945. Commissioners Schaupp and Chessman approved the minutes of the meeting held on January 17 and 18, 1946, Chairman Banfield not voting because he was absent from such meeting.

The Chief Counsel requested instructions relative to the sale of the old Knapp Hotel building in Port Orford. He advised that he has received a number of offers to purchase this building as junk, the high one being that of Mrs. Lewis L. Henderson, Denmark, in the amount of $850; also, that an offer has been received from an architect of Salem who wishes to remodel the building and re-establish it on state-owned land lying between the highway and the ocean, at Port Orford. He exhibited a drawing showing the architect's plan and pointed out that if the Commission allows the building to be placed in the proposed location the scenic view of the ocean at this point will be cut off. It appeared to the Commission that the plan of the architect is undesirable from the aesthetic standpoint, whereupon the Commission decided unanimously to sell the building to Mrs. Henderson at her bid price. The matter was referred to the Chief Counsel to complete the transaction.

The Assistant Counsel brought up for discussion a compromise settlement with Leora R. Miller and Mr. and Mrs. Harold E. Hadaway for damages connected with a right of way settlement on the South Santiam Highway in Sec. 34, T. 13 S, R. 3 E, W. M., Linn County. He advised that, in connection with the original settlement, the State Highway Department agreed to take care of a certain spring located on the property; however, the work was not done during construction of the highway because it was thought that the flow of water might be lost and for like reasons has not been done since then. The proposed betterment work, he said, was originally estimated to cost $250, but the individuals concerned now agree to release the state from further responsibility if they are paid the sum of $150. He recommended approval of such settlement. The recommendation was approved by the Commission by unanimous vote.

The Assistant Counsel reported a number of inquiries relative to the purchase of certain state-owned land situate in Block 3 of the re-plat of Victoria Heights Addition to the City of Eugene. He advised that this is excess property situate adjacent to the right of way of the Pacific Highway at Judkins Point. He pointed out that the property was acquired from Lane County for a nominal consideration of $1, so there is a question whether the Commission would wish to sell the property to private purchasers or deed it

back to the County, without cost, for disposal. The Commission decided not to sell the property at the present time.

The Commission had under consideration the application of Mr. O. K. Perkins for use of the ocean beach near Seal Rock, Lincoln County, as an aircraft landing field. The Commission denied the request by unanimous vote upon motion of Commissioner Chessman, which was seconded by Commissioner Schaupp.

The Assistant Counsel brought up for discussion a right of way settlement with Everett R. Stoaks and wife on the North Santiam Highway in the Town of Niagara, Marion County. He advised that an option has been obtained from Mr. and Mrs. Stoaks to purchase the property for the sum of $1,375; however, examination of the title shows certain defects which must be cured before clear title can be given. Mr. and Mrs. Stoaks, he said, have agreed to institute suit to quiet title, which will require some six weeks or two months, and have also agreed to surrender to the state immediate possession of the property if the state will advance them the sum of $750 to apply on the purchase price, the balance of $625 to be paid by the state when the title is clear. The Assistant Counsel advised that the contract for construction of the highway at this point has already been awarded, and he suggested that, in order to avoid delay in the construction operations, the Commission authorize the immediate payment of the $750. He explained that the state will take no chances in the deal because the Stoaks have already executed and delivered a warranty deed to the property, which will be placed on record as soon as the title is clear. The Commission approved the suggestion by unanimous vote. A contract agreement covering the matter was executed by the Commission on the following day.

The Commission had under discussion the matter of programming Federal Aid Funds that are authorized for acquisition and improvement of wayside strips. The Engineer advised that this fund amounts to three per cent of the Federal Aid Funds available and will total about $1,000,000 during the next three years. He pointed out that the Postwar Program as now prepared does not make provision for this item; moreover, in his estimation the money can be used to better advantage for other purposes. Chairman Banfield gave as his thought that the Commission should not provide a definite program for this class of funds now but should consider projects as they arise from time to time. Commissioners Chessman and Schaupp concurred and it was so ordered.

The Commission discussed briefly the written opinion of the Chief Counsel with regard to the authority of the Commission to acquire, with state highway funds, recreational areas that can be reached only over public highways that are not under the jurisdiction of the Commission. According to this opinion, the Commission has such authority if it wishes to exercise it. The Commission approved the report and ordered that a copy of the opinion be forwarded to the Recreational Resources Committee of the Portland Chamber of Commerce, which recently raised the question.

The Chief Counsel reported that the State Highway Commission is threatened with a law suit filed by Attorney H. E. Slattery, of Eugene, regarding the Commission's authority to acquire right of access to a highway as well

as fee title, the instant case being in connection with the acquisition of right of way in the Town of Halsey, Linn County, where the owner of the property alleges that he still retains right of access to the highway as an abutting property owner. The Commission voted unanimously not to deviate from its present established policy with regard to such matters and decided that it would be advisable to let the suit proceed in order to ascertain by court action just what authority the Commission has in such matters.

The Engineer reported the results of the taking of bids in Salem on February 18, 1946, for the purchase of state-owned real property in Albany, Medford, Tigard, Reedsport, and Southeast Portland.

Concerning the sale of a tract of land in Albany, he advised that five offers were received, the high one being that of Mr. Charles Childs, Albany, at $752. He estimated the value of the property at $1,000 and recommended rejection of all the bids; also, that the property be not again offered for sale. The Commission approved the recommendation unanimously.

The Engineer reported two offers received for the purchase of a small tract of land offered for sale in North Medford, the high one being that of Mr. B. Ralph Akey, Alameda, California, at $77.80; the other being that of The Alwyr Company, Medford, at $75. He read aloud a letter from The Alwyr Company advising that their interest in the property is simply to keep the area clear of advertising signs or other obstructions to the end that their truck drivers, in turning into the alley on which this property abuts, would have clear vision of the highway. The company suggested that the state should retain possession of the property permanently as a safety proposition. The Engineer recommended, in view of this letter, that both bids be rejected and that the property be taken off the market permanently. The Commission approved the recommendation unanimously.

Concerning the tract of land at Tigard, the Engineer advised that 11 bids were received, that of Mr. Emil A. Johnson, Tigard, being high at $3,010. He presented a letter from Hon. J. O. Johnson, State Representative, protesting the sale of the property and advocating the retention and improvement of the same by the state for park purposes. Mr. Johnson alleged that the citizens of Tigard were given to understand at one time that the state intended to use the property for such purpose and suggested that the call for bids be withdrawn so the property can be preserved for the benefit of their community. The Engineer advised that, insofar as he is able to ascertain, no such commitment or promise ever was made with regard to the future use of this property, which, he said, is valued by the Right of Way Department at $1,250. Following discussion, the Commission decided unanimously to sell the property and thereupon accepted the offer of Mr. Johnson at $3,010.

With regard to the sale of a small tract of land at Reedsport, the Engineer advised that five bids were received, that of Mr. V. P. Arens, Reedsport, being high at $800. He estimated the value of the property at $150 and recommended acceptance of Mr. Aren's offer. The Commission approved the recommendation.

Tract of land in Southeast Portland: The Engineer advised that three bids were received for the purchase of this property, that of Mr. A. P. Bocci, Portland, being high at $2,050. He recommended acceptance of Mr. Bocci's offer notwithstanding that a letter has been received from Mr. Bocci requesting the privilege of withdrawing the offer because, subsequent to presenting it, he has ascertained that the property for sale is located in a zone that will not permit the use of the property for the purpose that he intended. Following discussion, the Commission decided unanimously to sell the property to Mr. Bocci at his bid price with the understanding that if he does not complete the purchase his proposal guaranty of 10 per cent of the purchase price will be considered forfeited.

In this connection consideration was given by the Commission to numerous requests that are being received for the purchase of small fragments of excess property which have been acquired in connection with right of way purchases. It was pointed out by the Engineer that such sales involve a mass of detail in investigating the advisability of sale, the making of appraisals, the preparation of descriptions and deeds, and the advertising for, and receiving of, bids, etc. He said that this is interfering with the postwar construction program and suggested that, under the circumstances, no consideration whatsoever should be given to the sale of small tracts except in emergency cases. The Commission approved the suggestion unanimously and so ordered.

The Engineer reported on the cost to widen a number of curves on the Necanicum Highway to accommodate the transportation of 40-foot logs involving overall lengths of 58 feet measured from the bumper on the truck to the rear end of the load. He estimated the cost at approximately $10,000 and recommended the expenditure as a minor betterment project because it is anticipated that the truck hauling of logs over this highway will continue for eight or ten years, and for the further reason that such operations on this highway under present conditions are unsafe. The matter was discussed at some length, and as a result thereof, the Commission authorized the expenditure of $10,000 for this purpose subject to the condition that the loggers will agree to the closure of the Oregon Coast Highway for all log hauling operations between Cannon Beach Junction and the junction with the Necanicum Highway near Mohler.

The Engineer presented a report on the request of the City of Roseburg for the installation of traffic signals at the Cass St. and Oak St. intersections with the Pacific Highway in that town. He estimated the total cost involved at $4,000 and recommended approval of the expenditure on the condition that the City of Roseburg will assume 50 per cent of the expense and will pay the cost to operate the signals. The Commission approved the recommendation unanimously.

A report was rendered by the Engineer on the cost to improve the four-mile section of the Wasco-Heppner Secondary State Highway west from the Town of Condon, as requested by Senator E. R. Fatland and a group of farmers from Condon at the previous meeting. He estimated the cost to construct this section at approximately $135,000 and the cost to make the location survey,

which would have to be about ten miles in length in order to make a proper connection with the existing road, at an additional $15,000. He explained that, while the survey would be about ten miles in length, construction would be limited to about four miles, which would take care of the worst section of the highway. He requested authority to make the survey and recommended the contracting of the four-mile section as soon as the plans and specifications can be prepared, the cost to be paid with state funds. The Commission approved the request and the recommendation by unanimous vote.

The matter of rerouting logging trucks operating in the City of Albany was discussed briefly by the Commission. Mr. Floyd Cook, Highway Representative of the Pacific Northwest Loggers Association, who was present, advised that recently mutual agreement was reached among all concerned with respect to the routes that the logging trucks should follow, but since then it has been necessary to alter the plan, so there is nothing definite to report at this time. The Commission deferred action in the matter pending a further report from Mr. Cook.

The Commission discussed the Chief Counsel's opinion with respect to the construction of a grade separation project at the Baker-Unity Highway crossing of the Union Pacific Railroad in the City of Baker. According to this opinion, the project is not within an urban area as defined in the Federal Aid Highway Act of 1944, and is not on the Federal Aid System, so it does not qualify as a secondary feeder road, either outside of a municipality or inside a municipality of less than 5,000 population; moreover, the project, insofar as he is able to ascertain, is not within the reach of any of the classifications outlined in the Federal act. The Engineer advised that the mayor of the City of Baker has been advised of this opinion but has not as yet replied thereto. He pointed out that the former Highway Commission at one time obligated itself to construct this structure and purchased some of the needed right of way, but the project was cancelled when war was declared. The Chief Counsel pointed out that the project might be financed with state money, and if the Commission felt so inclined, then a hearing could be held before the Public Utilities Commissioner who could assess a portion of the cost to the railroad company. Chairman Banfield expressed himself in favor of this project in view of the obligation of the former State Highway Commission. Commissioners Schaupp and Chessman concurred. The Engineer and the Chief Counsel were thereupon instructed to initiate the necessary proceedings to secure an order from the Public Utilities Commissioner.

The Chief Counsel presented a letter from the Union Pacific Railroad Company advising that investigations by railroad company officials with respect to the rock and earth slide which recently occurred along the Columbia River Highway about one-half mile east of Multnomah Falls and which also covered the tracks of the Union Pacific Railroad Company "indicates that the slide resulted from the excavation of a large borrow pit by the State Highway Commission and its contractors ," also, advising that "when the amount of damage sustained by the railroad companies is determined, we will present a bill therefor to the state for payment." The Chief Counsel was instructed to reply to this communication to the best interests of the state.

A letter was presented from the Salem City Council requesting a survey of East State Street, Salem, (Secondary Highway No. 222) for future widening. The Engineer advised that a few years ago this street was widened for one block, from 12th Street to 13th Street, and that it would cost about $50,000 to continue the improvement to 17th Street. He was instructed by the Commission to prepare a list of all projects in this category, from which the Commission will provide a construction program when money is available to finance the work.

A letter was presented from the Mt. Angel Businessmen's Club requesting the improvement of the Secondary State Highway No. 140 between Woodburn and Silverton. The Commission denied the request for immediate construction but instructed the Engineer to include this project in the list for future consideration.

A request was presented from the City of Roseburg for state maintenance of certain city streets that are being damaged by log hauling operations. The Engineer advised that this matter has been investigated, and it is estimated that needed repairs will cost about $7,800. He pointed out that the population of the City of Roseburg, according to the 1940 Census, was 4,924. He gave as his belief that the present population is well over 5,000, in which event the city would not qualify for state aid under the Commission's special street maintenance policy, which limits such aid to cities of less than 5,000 population, unless the Commission considers that its policy was based on the latest Federal Census in 1940. The Commission rules unanimously that the arrangement applies to present-day population rather than to the population shown in the 1940 Census and ordered that the city be so informed.

The Commission discussed a letter from Mrs. J. J. O'Dair, Baker, Oregon, requesting the improvement of the road leading to the Town of Granite, Grant County, being an extension of the Sumpter Valley Secondary Highway. The Commission denied the request.

The Engineer requested authority to advertise for bids for the resurfacing of the Territorial Secondary Highway between Crow and Lorane, in Lane County, 15.7 miles in length. He advised that the present surface is in bad condition due to log hauling traffic, and, unless something is done soon in the way of repairs, the road will become impassible. He estimated the cost to resurface the road at $30,000 and recommended the expenditure as a special maintenance item. The Commission approved the recommendation unanimously.

The Commission considered and denied a request from citizens of Benton County who own property adjacent to the Albany-Corvallis Highway for improvements to this highway for a distance of about two miles westerly from the Willamette River Bridge at Albany, it appearing to the Commission that the work is not justified at the present time in view of the many other projects throughout the state that are of more importance.

A letter was presented from the Siletz Valley Grange requesting the designation and improvement as a state secondary highway of the county

road which extends from the Town of Siletz easterly to a connection with the Eddyville-Blodgett State Secondary Highway, at Nashville. The Engineer advised that this project is very low in priority and to construct it to proper standard would cost about $500,000. The Commission denied the request.

The Commission discussed a letter from the U. S. War Department requesting that the State Highway Department make the location survey and prepare complete plans, specifications, and estimates of costs for the relocation of that portion of the Willamette Highway which will be abandoned when the proposed dam, known as the Meridian Dam, is constructed across the Willamette River near the Town of Lowell, in Lane County, and, in addition thereto, to make a similar survey of some 13.97 miles of Forest Service roads and 1.81 miles of county roads which also are to be relocated as a result of the dam construction. The Engineer advised that the costs of the survey etc. will be paid entirely with Army funds and recommended approval of the request. The Commission approved the recommendation unanimously. An agreement covering the arrangement was signed by the Commission on the following day.

The Commission had under discussion the proposed assignment by Marine Contractors, Inc. to Morrison-Kundsen Company, Inc. of its contract for the construction of the Arthur Street Viaduct, Portland, which was awarded to them by the State Highway Commission on December 27, 1945. It appeared from the discussion that Marine Contractors, Inc. cannot comply with the Commission's requirements with respect to the Oregon Workmen's Compensation Act without disrupting its entire insurance set up, its operations for the most part being of such a nature that it has to carry marine insurance, and if it is now required to carry insurance with the state it will make a duplication of expense, which can be avoided if the contract is assigned to the Morrison-Knudsen Company inasmuch as this company is now operating under the protection of the Workmen's Compensation Act. The Engineer recommended approval of the assignment. The Chief Counsel concurred. Following discussion, Commissioner Schaupp moved that the Commission approve the assigning of this contract subject to the approval of the Public Roads Administration. The motion was seconded by Commissioner Chessman and carried by the unanimous vote of the Commission. The matter was referred to the Commission's Chief Counsel to handle the details.

Letters were presented from the County Court of Josephine County and the Grants Pass and Josephine County Chamber of Commerce urging the designation and improvement as a U. S. Forest Highway of the county road which extends from Takilma, Josephine County, Oregon, to a place known as Happy Camp, in the State of California. A letter was also presented from Mr. F. V. Horton, Acting Regional Forester, U. S. Forest Service, pertaining to the same subject. The Engineer advised that investigations reveal this would be a very costly road to construct and would be very low in benefits; also, that there are many other roads throughout the State of Oregon that are of more importance and where the funds could be spent to much better advantage. In view of this report, the Commission denied the request and ordered that the petitioners be informed that the state is in no position to program the improvement at this time.

The Commission recessed at twelve o'clock noon and reconvened at 2:00 p.m. in the same room with all Commissioners, the State Highway Engineer, the Chief Counsel, the Assistant Highway Engineer, and the Secretary present.

At 2:00 p.m. bids, as follows, for highway construction work and for the purchase of concession privileges at Silver Creek Falls State Park were opened and read in conformity with previously published notices, following which Chairman Banfield announced that awards of contracts would be made at 5:00 p.m. in the same room:

NEW TIMBERS IN VINE MAPLE BRIDGE OVER NEHALEM RIVER ON FISHHAWK FALLS SECONDARY HIGHWAY IN CLATSOP COUNTY

Philpott & Buckingham, Portland	$ 16,680.00

H. R. Treloar, Portland	4% of Gross Sales
Peter & Gerald Cleary, Salem	1% of Gross Sales

A letter was presented from the County Court of Benton County proposing an exchange of roads in the state secondary highway system as follows: Elimination from such system of the Tampico-Lewisville Secondary Highway No. 202, in northern Benton County, and the substitution therefor of about eight miles of county road in the southwest corner of Benton County, being an extension of the Alsea-Deadwood Secondary State Highway No. 200. The County Court urged the exchange from the standpoint of reducing maintenance costs, alleging that the state could maintain the county roads in connection with its maintenance of the Alsea-Deadwood Secondary Highway, much cheaper than could the County because they are isolated from other county operations. The Engineer recommended against such exchange of roads. The Commission approved the recommendation unanimously.

The Engineer reported briefly the results of his contacts with the Tillamook County Court and residents of the City of Tillamook regarding the proposed permanent location of the Wilson River Highway between the City of Tillamook and the Wilson River Canyon. He advised that there is a difference of opinion among the people of this district, the farmers of the district desiring no change in the present route, which enters the city on East Third Street, because the proposed location passes through valuable farm property; whereas, the city people who reside along the present route want the location changed so it will enter the city about one block farther north, which is the route tentatively proposed as the result of investigations by highway department engineers in 1940 and 1941. The County Court, he said, favors the proposed new route. The Engineer pointed out that it will cost more to improve the present route than to construct the proposed new route; also, that stock passes will have to be provided under the highway for each property owner between Tillamook and the mouth of the Wilson River Canyon, a distance of three or four miles. He exhibited a map showing the present and proposed routes together with a proposed arrangement for traffic control within the

city and requested authority to complete the survey. It appeared to the Commission that the project as explained involves major construction which it is reluctant to approve at this time; however, it was felt that a decision should be made with respect to the entrance into Tillamook and the matter of controlling traffic within the city. Accordingly, the Engineer was authorized to work up the plans for the control of traffic within the city limits and to a point about one-quarter mile easterly thereof where a connection with the present highway could be made as a temporary expedient. The Commission made it clear that the authorizing of the survey at this time is simply to give the people of Tillamook an idea where this highway is to enter the city and how traffic is to be controlled, which would enable the people to develop their holdings in conformity therewith, and it is not to give these people any reason to believe that the project is definitely planned for immediate construction.

The Engineer also reported completion of the survey for the proposed revision of the Oregon Coast Highway between Tillamook and Pleasant Valley. He advised that, pursuant to instructions from the Commission, he made a personal inspection of the proposed route and is of the firm opinion that the alignment as revised constitutes the best line, everything considered, that can be found. He further advised that such routing meets with the approval of the Tillamook County Court and with the city officials and Chamber of Commerce of the City of Tillamook, with whom he discussed the matter. Following discussion, the Commission approved the location as reported and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, the Commission heretofore authorized and directed the Engineer to make a complete and final survey of the route and location of the Tillamook-Pleasant Valley Section of the Oregon Coast Highway, in Tillamook County, and in connection therewith to prepare a map or maps showing the route and location of said section of highway and file said report and record with the Commission for consideration; and

WHEREAS, th Engineer has reported the completion of the said survey and has submitted the same for the approval or disapproval of the Commission; and

WHEREAS, after due consideration of said survey, field notes, maps and other engineering data, it is the judgment of the Commission that the same should be approved and filed;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by this Commission, all members being present and affirmatively voting as follows:

1. That the survey of the Tillamook-Pleasant Valley Section of the Oregon Coast Highway, together with the map, which for identification purposes bears the Map File No. 6B-15-5, field notes and other engineering data submitted by the Engineer hereby are approved, and the Engineer is directed to file and preserve the same in the records and files of the Commission at Salem, Oregon.

DEC 05 1946

2. That when said section of said highway is permanently constructed the same shall be done in accordance with said survey and location unless otherwise directed or ordered by the Commission.

3. That this resolution be entered in the minutes and records of the Commission as of the twenty-fifth day of February, 1945.

The Engineer reported that, in conformity with authority heretofore given him by the Commission, he awarded to Kuckenberg Construction Company, low bidder, the contract for construction of the Gates-Niagara Section of the North Santiam Highway, in Marion County, bids for which were received by the Commission on January 17, 1946. The contract was awarded on February 6, 1946, the conditions of the award having been satisfied. The Commission, by unanimous vote, confirmed the award of this contract as reported.

The Commission had under consideration the following requests for extensions of time within which to complete highway contracts:

Rogers Construction Company, Contract No. 2721, for the Chemult-Beaver Marsh Rock Production Project on The Dalles-California and East Diamond Lake Highways, in Klamath County, requested an additional extension of time from January 1, 1946, to April 15, 1946, within which to complete this job. They alleged that extremely heavy snowfall made it impossible for them to complete this project within the previously-extended time limit. The Engineer advised that the reason given by the contractor for failure to complete the project within the extended time limit is correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

Rogers Construction Company, Contract No. 2722, for the Fort Klamath-Lobert Rock Production Project on state highways, in Klamath County, requested an additional extension of time of six days, from November 15 to November 21, 1945, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions and labor difficulties. The Engineer advised that the reasons given by the contractor for overrunning the previously-extended time limit are correct. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Coos Bay Dredging Company, Contract No. 2741, for construction of a drainage change project on the Hall Lake Section of the Oregon Coast Highway, in Coos County, requested an additional extension of time of five days, from January 3 to January 8, 1946, within which to complete this job. They attributed their failure to complete the project within the previously-extended time limit to adverse weather conditions. The Engineer advised that the reason given by the contractor for overrunning the previously-extended time limit is correct. He recommended

that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

M. C. Lininger & Sons, Contract No. 2742, for slide correction on the Bear Canyon-State Line Section of the Pacific Highway, in Jackson County, requested an extension of time of 90 days, from November 30, 1945, to March 1, 1946, within which to complete this job. They attributed their failure to complete the project within the specified time limit to adverse weather conditions and inability to obtain competent workmen. The Engineer advised that the reasons given by the contractor for failure to complete the project within the specified time limit are substantially correct. He pointed out, however, that the work was satisfactorily completed by the contractor on January 23, 1946, so there is no occasion for extending the time limit beyond that date. He further stated that the delay in completing the job did not materially affect the use of the highway nor increase engineering expense. He recommended that the extension of time requested be granted without penalty. The Commission approved the recommendation unanimously.

Slate Construction Company, Contract No. 2744, for slide correction on the Toll Creek-Snow Creek Section of the Santiam Highway, in Linn County, requested an extension of time of 212 days, from December 31, 1945, to July 31, 1946, within which to complete this job. They attributed their failure to complete the project within the specified time limit to the saturated condition of the excavated material which would not maintain equilibrium in embankment. They requested such a long extension of time in order to permit this material to dry out so it would stand up in the embankment. The Engineer advised that the reason given by the contractor for overrunning the time limit is substantially correct. He recommended, in view thereof, that the extension of time requested be granted without penalty. The Commission approved the recommendation by unanimous vote.

The Engineer reported that Contracts Nos. 2710, 2740, 2741, and 2742 for the construction of state highway projects have been completed according to the requirements of the contracts or modifications thereof and that said jobs are now ready for acceptance. The following resolution accepting the above projects was offered and adopted by the unanimous vote of the Commission:

WHEREAS, the Engineer has reported that the following State Highway Commission contracts for the construction of state highway projects have been completed according to the terms and provisions of the contracts, and that said jobs are now ready for acceptance:

Contract No. 2710, with T. F. Skelton and H. H. Wiecks, for furnishing crushed rock in stockpiles on the Newport Section of the Oregon Coast, Corvallis-Newport and Siletz Highways in Lincoln County; completed July 26, 1945. (The contractor did not remove his equipment and complete clean-up of site until December 5, 1945.)

Contract No. 2740, with E. C. Hall, for 11.10 miles of surfacing on the Roots Creek-Siletz Section of the Siletz Secondary Highway in Lincoln County; completed October 8, 1945.

Contract No. 2741, with Coos Bay Dredging Co., for drainage change on the Hall Lake Section of the Oregon Coast Highway in Coos County; completed January 8, 1946.

Contract No. 2742, with M. C. Lininger & Sons, for slide correction on the Bear Canyon-State Line Section of the Pacific Highway in Jackson County; completed January 23, 1946.

THEREFORE, BE IT RESOLVED that the work covered by said state highway contracts for the construction of said state highway projects be declared completed according to the terms of the respective contracts, and said jobs are hereby accepted and final payment in connection with each is hereby authorized.

The Commission discussed matters pertaining to the operation of a state-owned ferry across the mouth of the Columbia River between Astoria, Oregon, and Megler, Washington. In this connection the Commission's Chief Counsel reported that all of the cooperating parties have fulfilled their obligations with respect to such operation. The Commission then discussed the advisability of advertising for bids for the ferry operation in order to determine just how much expense is involved before actually closing the deal for the purchase of the ferry boat facilities. The matter was discussed at considerable length, but a decision in the matter was deferred until the following day as there was a question as to the legal authority of the Commission to advertise for bids for the operation of ferry boats that the state presently does not own. (The matter was reconsidered on the following day, and, as a result of further discussion, motion was offered by Commissioner Chessman that the ferry operation be advertised for bids to be received at the next regular meeting of the Commission based on the Commission's expressed intention of operating the ferry as a state-owned proposition. See ahead for minute entry.)

The Commission discussed a request from Mr. Richard B. Ulstrup, Deputy Sheriff, Umatilla County, Oregon, urging the establishment of a 35 mile per hour speed limit on the four-mile section of the Oregon-Washington Highway between the Town of Freewater and the Washington state line. Mr. Ulstrup declares that the reduced speed limit is a necessity because of the numerous accidents that have occurred at this point, some of which have ended in fatalities. The Engineer gave as his opinion that there is justification in this request but suggested that the speed limit be set at 40 miles per hour rather than 35. He recommended the establishment of such a speed limit for about a year, when the construction of the new highway between these points would be completed. Chairman Banfield gave as his thought that the Department of State Police should be consulted before a reduced

speed limit is adopted inasmuch as the State Police will have to enforce the regulation. Commissioner Schaupp expressed himself as opposed to reducing the speed limit. The Commission deferred a decision in the matter pending consultation with the Department of State Police and with the authorities of the Highway Department of the State of Washington inasmuch as this highway connects with a highway in that state. The Engineer was instructed to ascertain the attitude of such officials.

The Commission had under discussion the adoption of a resolution prohibiting the parking of cars on the right of way of the Pacific Highway opposite the "public mart" just north of the City of Eugene, in conformity with the decision reached at its meeting on December 14, 1945. The following resolution with regard thereto was adopted by the Commission by unanimous vote on motion of Commissioner Chessman, which was duly seconded by Commissioner Schaupp:

WHEREAS, the Pacific Highway is one of the major state highways and is likewise a federal highway, which highway throughout its entire length carries a large volume of traffic; and

WHEREAS, it appears that a short distance outside the corporate limits of the City of Eugene there is maintained a public mart on real property abutting on said highway, which mart on certain days of the week is patronized by a large number of people, many of whom park their cars within the right of way limits of said highway and leave said cars so parked for extended periods of time; and

WHEREAS, the parking of said cars on the shoulders of said highway tends to restrict and impair the use of the traveled portion of the highway to such an extent that in the opinion of the Commission a hazard not only to through traffic but to the owners and occupants of the parked cars is created; and

WHEREAS, in the opinion of the Commission public welfare and public safety require that the use of the shoulders of said highway within said area for the parking of cars should be prohibited;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission as follows:

1. The Commission does hereby find and declare, based upon investigation, reports and recommendations by members of its staff, that the parking of motor vehicles along the Pacific Highway between Engineer's Station 600+233 and Engineer's Station 606+83.3 in Lane County, Oregon, creates a hazard not only to through traffic but to persons owning and using said parked cars.

2. That in the opinion of the Commission the right of way of said highway at said location is not of sufficient width to permit parking facilities for large numbers of cars and at the same time provide the degree of safety and convenience which in the opinion of the Commission should be provided the motoring public.

3. That the Commission does further find and declare that the parking of cars for long periods of time on the right of way of said highway within said termini should be prohibited.

4. That the Engineer be and he hereby is instructed to erect at the said termini, and at such points between said termini as in the judgment of the Engineer are necessary to accomplish the purpose of this resolution and the action of the Commission as here declared, "no parking" signs.

5. That a copy of this resolution be sent to Col. R. D. Arnold, Route 5, Eugene, Oregon, the owner and operator of said public mart, and that a like copy be mailed to the Superintendent of State Police.

6. That this resolution be entered in the minutes and records of the Commission as of the 25th day of February, 1946.

The Commission also adopted by unanimous vote, the following resolution designating a "no parking" zone on the Mt. Hood Highway in front of Battle Axe Inn, at Government Camp, in conformity with the decision reached at its meeting on December 14, 1945.

WHEREAS, during the period when winter sports are carried on and conducted at and in the vicinity of Government Camp large numbers of people congregate from time to time, some of whom reach said place by private transportation and many by bus transport; and

WHEREAS, because of the limited area available for the parking of vehicles for the accommodation of pedestrian traffic and for the normal movement of through traffic at said place as well as for the loading and unloading of passengers, it is deemed necessary that a definite space be set aside for the parking or stopping of buses while taking on and letting off passengers;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED that an area 150 feet in length, immediately in front of Battle Axe Inn, be and said area hereby is set aside and made available for the exclusive use of buses while taking on and letting off passengers at said place.

That the Engineer be and he is hereby instructed to erect and thereafter maintain appropriate signs defining the limits of said area, on which sign shall be the words "For Bus Stop Only".

Neither the State nor its Highway Commission, officers or employes assume any obligation with respect to the safe condition of said area, but any carrier using said place for the taking on or letting off of passengers shall be solely responsible to the passengers for their safety and convenience.

This authorized use of the right of way of the highway for the accommodation of bus transports may be terminated by the Commission if and when in the judgment of the Commission public welfare demands such termination.

This resolution shall be entered in the minutes and records of the Commission nunc pro tunc as of the 25th day of February, 1946.

A complaint was reported from Mr. John Christman, Reedsport, that a hazardous condition exists for school children and other pedestrians on the Oregon Coast Highway at the south end of the Scholfield Bridge, at Reedsport. Mr. Christman advises that car owners park their cars along both sides of the highway at this point, creating an unsafe condition for pedestrians, who are forced to walk on the highway pavement. Mr. Christman is fearful that accidents will occur unless corrective measures are taken. A report on this subject was also presented from the State Police Department verifying Mr. Christman's statements. The Engineer advised that this matter has been investigated by the Traffic Engineer, who recommends the establishment of a "no parking at any time" restriction along both sides of the highway for a distance of one block from the west (south) end of the bridge. He advised that he concurs in the recommendation. The Commission approved the recommendation and thereupon by unanimous vote adopted the following resolution with regard thereto:

WHEREAS, the Oregon Coast Highway, which is U. S. Route No. 101, is a state highway under the jurisdiction and control of the State and said highway carries a large volume of through and local traffic; and

WHEREAS, a portion of Winchester Avenue in the City of Reedsport has heretofore been selected and designated by the Highway Commission as the route of said highway into and through said City; and

WHEREAS, said Winchester Avenue connects directly with the westerly approach to the highway bridge which spans Scholfield Creek at Reedsport; and

WHEREAS, the safety of pedestrian and vehicular traffic requires that said highway between the westerly end of the bridge and First Street be kept open and unimpaired for its entire width; and

WHEREAS, the parking of cars on each side of said street or highway between the westerly end of the bridge and First Street for indefinite periods of time is a hazard to pedestrians having occasion to cross said highway and is likewise a hazard to vehicular traffic moving over said highway; and

WHEREAS, in the judgment of the Commission public welfare requires that the parking of cars on said highway between the westerly end of the bridge and First Street be prohibited;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED by the Commission, all members being present and voting affirmatively, as follows:

1. That the parking of cars on U. S. Route No. 101 between the westerly end of the Scholfield Creek bridge and First Street in the City of Reedsport be and the same hereby is prohibited, except for such emergency parking as is permitted by law.

2. That the Engineer be and he hereby is instructed to erect and thereafter maintain at appropriate places on said highway between the westerly end of the bridge and First Street the approved "no parking" signs.

3. That this resolution be entered in the minutes and records of the Commission as of the twenty-fifth day of February, 1946, and a copy thereof mailed to the Recorder of the City of Reedsport.

In connection with the discussion of the establishment of "no parking" zones on state highways, Chairman Banfield gave as his thought that the Commission should, by appropriate resolution, authorize the Engineer to post such zones wherever, in his estimation, they may be required without first bringing each individual case to the Commission's attention for instructions. He particularly mentioned a situation in the City of McMinnville, which needs attention in order to eliminate a hazardous condition. Commissioners Schaupp and Chessman concurred, whereupon the Chief Counsel was instructed to prepare a form of resolution granting such general authority to the Engineer. The Engineer was instructed to investigate the condition in McMinnville as reported by the Chairman.

The Engineer brought up for discussion a letter from Mr. Gordon Hood, County Agent, Clatsop County, directed to Mr. Merle Chessman, State Highway Commissioner, requesting State cooperation in the eradication of noxious weeds growing on and adjacent to state highway rights of way. The Engineer advised that the past policy of the State Highway Commission has been to cooperate with the counties in this work, and to that end it has reimbursed the counties for the work that they have done on state highway rights of way. For the most part, he said, the costs were for chemicals only. He estimated that the Highway Commission has paid annually for this purpose approximately $2,000. He recommended a continuance of this policy. The Commission approved the recommendation unanimously subject to the condition that the local authorities control the noxious weed growth on adjacent private lands.

The Commission had under discussion the assignment by the Ostrander Railway and Timber Company to the Crown-Zellerbach Corporation of its interests in the permit heretofore given by the State Highway Commission to the Ostrander Railway and Timber Company and the Weyerhaeuser Timber Company, jointly, authorizing the operation of logging trucks at grade across two state secondary highways in the vicinity of Molalla. The Chief Counsel advised that the Ostrander Railway and Timber Company has conveyed to the Crown-Zellerbach Corporation its undivided one-half interest in its private logging road which

crosses the two said secondary highways and which is the subject matter of the permit. He advised that he has examined the form of assignment and recommended its acceptance by the State Highway Commission. In the discussion of this matter the question arose whether or not other changes in the permit might be desirable. In view thereof, action on the assignment was deferred until the next meeting. The Chief Counsel and the Engineer were instructed to examine the original permit in the meantime and ascertain whether or not any changes should be made.

A letter was presented from the Long-Bell Lumber Company, Longview, Washington, inquiring whether or not it would be possible to secure the services of the Highway Department's Weighmasters to weigh their logging trucks on the highway scales located a short distance west of Grand Ronde for a period of about two months pending installation of the Company's own platform scales. The Company agrees to reimburse the state for the expense of the weighing operations. The Engineer estimated that the expense would amount to about 50 cents per load and recommended approval of the Company's request subject to the condition that it will deposit with the Commission the estimated cost of the weighing operations for the two-month period. The Commission approved the recommendation unanimously.

The Engineer reported on a number of overweight violations involving logging trucks owned by Mr. Forrest Meacham, Eugene. It appears that Mr. Meacham's drivers have been arrested numerous times since July 28, 1945, for transporting overweight loads and that fines in substantial amounts have been imposed on them by the justice of the peace to whom they were cited. It also appears that the drivers refuse to pay the fines, alleging that they have an understanding with Mr. Meacham to the effect that he would pay the fines if the drivers were arrested. The Engineer advised that a letter received from Mr. John Bryson, Justice of the Peace who handled the cases, indicates that he is satisfied that such an understanding existed and that the payment of the fines is Mr. Meacham's obligation; however, if they are not paid by someone within a reasonable length of time it may be necessary to place the drivers in jail, which he hesitates to do under the circumstances. The Engineer recommended cancellation of Mr. Meacham's P. U. C. permit if the fines are not paid within a reasonable length of time. The Commission approved the recommendation unanimously and instructed the Secretary to so inform Mr. Meacham and to advise him further that the Commission considers that the fines imposed are against his operations rather than against the drivers of his trucks and accordingly expects him to pay them or be ruled off the road.

A letter was presented from Mr. Paul Youngman, McMinnville, complimenting the Commission on the manner that it has been, and is, conducting highway matters. The Commission ordered the communication acknowledged with thanks.

The Commission discussed a letter from Mrs. Dorothy McCullough Lee, Commissioner of Public Utilities, City of Portland, urging the Commission's approval of the use of a park area between Front Avenue and Harbor Drive and extending from S. W. Alder Street to S. W. Pine Street, Portland, for

temporary off-street automobile parking. The Commission indicated a reluctance to grant this privilege, however, deferred a decision until the following day when someone representing Mrs. Lee will be present to discuss the matter.

The Engineer presented a report from Division Engineer F. D. Eason concerning the mutilation of a number of sightly oak trees along the Silver Creek Falls Secondary Highway east of Shaw by workmen in the employ of the Mountain States Power Company. He advised that this Company had no permit to construct its pole line on this section of highway and was without authority whatsoever to cut or trim trees. It was his thought that the Company should be penalized for the damage done, which is estimated by Mr. Eason's assistant at $100 for each of the four trees that were destroyed. He requested instructions. The matter was referred by the Commission to the Engineer and the Chief Counsel with power to act.

The Engineer reported on a claim of the Gilpin Construction Company for damage that occurred to its derrick "Woodland" by reason of the failure of the operator of the Interstate Bridge to raise the draw span sufficiently high to allow the derrick to pass beneath the bridge. He advised that the derrick was being moved by the Atlas Tug Service, and when it approached the bridge, the signal was given to lift the draw span, which was done, but evidently the span was not lifted high enough to give full clearance. As a result, the derrick struck the span and suffered damage in the amount of $377.40. The Engineer advised that investigations reveal that the State is to blame for the accident and recommended payment of the claim. The question arose whether or not the State of Washington should be asked to assume 50 per cent of the payment because the bridge is being operated jointly by both states. It was decided to ask the Washington Highway Department to pay half the expense; however, the Commission authorized payment of the full amount with Oregon Highway Funds if the Washington Highway Department cannot cooperate. The matter was referred to the Engineer to handle.

The Commission had under discussion the rescinding of the order of the former Highway Commission requiring the maintenance of stop signs at highway-railroad grade crossings. The Engineer explained that this order was adopted by the former Commission as a wartime measure to facilitate train movements, including both troops, explosives and war equipment, and to eliminate, insofar as was possible, accidents occurred at railroad crossings. In this connection a letter was presented from Hon. Robert S. Farrell, Jr., Secretary of State, in which Mr. Farrell urges the Commission to continue the order and to reject any move that would have the effect of removing these stop signs from the railroad crossings. The Engineer gave as his thought that with the termination of hostilities the reason which prompted the order no longer exists in its entirety and recommended an investigation to determine which of the signs could be removed without creating a dangerous condition. The Commission approved the recommendation and instructed the Engineer to make such an investigation and report his findings at the next meeting.

The Commission had under consideration approval of the plans of the cities of Burns and La Grande for the expenditure of State Tax Street

Funds which they received in 1944 from 1943 state highway revenues. The Engineer advised that both of these cities have complied with the statutory requirements with respect to the State Tax Street Fund and that the plans for the expenditure of the monies have been examined and found satisfactory. He recommended approval of the same. The Commission approved the recommendation and thereupon, by unanimous vote, adopted the following resolution with regard thereto:

WHEREAS, pursuant to the provisions of Chapter 371, Oregon Laws 1943, there have been by this Commission apportioned to the cities and/or towns hereinafter named for disbursement during the calendar year 1944 for street purposes as provided in said law the several sums or amounts set opposite the names of the respective cities or towns:

Burns	$ 3,524.24
La Grande	10,640.00

AND, WHEREAS, each of said cities and towns has, by appropriate action evidenced by resolution or other official instrument, certified copies of which have been filed with the Commission, conformed to and complied with the requirements of said law so as to qualify each for the benefits thereof;

NOW, THEREFORE, BE IT AND IT HEREBY IS RESOLVED as follows:

1. That this Commission does hereby approve for construction, improvement, or maintenance with the funds above specified the following streets in the following named cities:

Burns - North Buena Vista Avenue, West "D" Street, Washington Street

La Grande - Cherry Street, Maple Street, "G" Avenue, Cove Avenue, Monroe Avenue

2. That the type, plan and character of improvement proposed in the resolutions filed with this Commission by the above named respective cities and towns hereby are approved.

3. That the action taken respectively by said cities and towns, as evidenced by appropriate resolutions by them respectively adopted and thereafter filed with this Commission, shall be and is deemed an appropriate and proper conformance with the requirements of said law by said cities and towns individually so as to qualify each to receive and use the funds to them apportioned.

4. That upon entry of this resolution in the minutes and records of the Commission the Secretary shall thereafter mail to the proper officer in each of said cities and towns a duly certified copy of the resolution or resolutions adopted by the city together with a copy of the resolution approving the plan submitted by the city.

MAY 1946

5. This resolution shall be entered in the minutes and records of this Commission as of the 25th day of February, 1946.

The Commission also had under discussion the approval of plans of the following cities and towns for the expenditure of State Tax Street Funds received by them in 1945 from 1944 state highway revenues:

Amity	Donald	Myrtle Creek
Banks	Fossil	Paisley
Carlton	Grants Pass	Scio
